Analysis Prepared by Department of Natural Resources

The Wisconsin endangered species law (s. 29.415, Stats.) requires periodic updating of our endangered and threatened species lists. The most recent review resulted in the revised endangered and threatened bird, amphibian, reptile and fish lists that went into effect December 1, 1982. Since then the DNR Bureau of Endangered Resources and knowledgeable scientists have reviewed the status of "watch list" plants and recommend the addition of 8 plant species as endangered and 12 plant species as threatened.

The 20 species being added to the lists were determined by such factors as rate of population decline, threats to remaining populations, population status as a native Wisconsin species, and status throughout its range.

Pursuant to the authority vested in the State of Wisconsin Natural Resources Board by ss. 29.415 and 227.014(2)(a), Stats., the State of Wisconsin Natural Resources Board hereby creates rules interpreting s. 29.415, Stats., as follows:

SECTION 1. NR 27.03(2)(g)4m., 7m., 8m., 9m., 22m., 30m., 40h. and 40q. are created to read:

- NR 27.03(2)(g)4m. Asclepias purpurascens - Purple Milkweed
(Asclepiadaceae: Milkweed Family)
- 7m. Astragalus neglectus - Coppers Milk Vetch (Fabaceae: Bean Family)
- 8m. Botrychium mormo - Goblin Fern (Ophioglossaceae: Adder's-tongue Family)
