ANALYSIS OF RULES

Statutory authority ss. 101.02 (1) and 145.02 (2), Stats.
Statutes interpreted s. 145.02 (1); Stats.

Under s. 145.02, Stats., the Department of Industry, Labor and Human Relations has the responsibility of safeguarding public health and the waters of the state relative to the construction, installation and maintenance of plumbing. One mechanism of the Department to fulfill this responsibility has been the promulgation of the state uniform plumbing code.

The proposed rules bring the plumbing code into alignment with the 1986 Amendments of the U.S. Safe Drinking Water Act, Pub. L. 99-339, June 19, 1986. One provision of these Amendments mandates a maximum lead content of 8.0 percent for pipes and fittings of water supply systems. The Amendments of the Safe Drinking Water Act require states to adopt such a standard by June 19, 1988, otherwise, the United States Environmental Protection Agency may withhold up to 5 percent of a state's Public Water System Supervision program grant.

SECTION 1. ILHR 84.30 (4) (intro.) is amended to read:

ILHR 84.30 (4) WATER SUPPLY SYSTEMS. Water supply systems shall be of such material and workmanship as set forth in this subsection. All materials in contact with water, in a water supply system, shall be suitable for use with potable water. All pipes and pipe fittings for water supply systems shall be made of a material that contains not more than 8.0 percent lead.

SECTION 2. ILHR 84.30-11, Note b, is created to read:

Table 84.30-11, Note b: See s. ILHR 84.30 (4) (intro.) concerning the maximum lead content for fittings.

(END)

EFFECTIVE DATE

Pursuant to s. 227.22 (2) (intro.), Stats., these rules shall take effect on the first day of the month following publication in the Wisconsin Administrative Register.
