NR 20.03 Season tables; open and closed seasons, size and bag limits and measurements. (1) The open seasons specified in the following table apply to fishing in open waters and fishing through the ice. The department may, following scientific investigation and study, establish bag limits and size limits on the individual inland waters when it finds that the taking of fish will aid in management of the fishery and insure the citizens of this state additional opportunities for good fishing. Such special regulations shall become effective only after public informational meetings are held. The department may also establish an urban fishing program by posting the open and closed seasons on specified waters. For open seasons in specified waters see s. NR 20.04. The possession limit for each species of fish, except trout as specified in sub. (4), shall be double the daily bag limit specified in this chapter except that no person may have in possession or under control more than the daily bag limit while on the ice or waters or while fishing in the state of Wisconsin unless the person holds a permit issued by the department under this section and s. NR 19.05 for restocking of fish caught in a fishing tournament or holds a permit or license which authorizes possession of a greater number under s. 29.135, 29.513, 29.52 or 29.535, Stats. The measurement of all fish taken shall be in a straight line from the tip of the snout to the utmost end of the tail fin fully extended.

NR 20.035 Alternate size and bag limits. (1) PURPOSE. Notwithstanding any provision of ch. NR 21, 22, 23 or this chapter, for all or part of any inland, boundary or outlying water, the department may apply the alternative size limits, bag limits or both under this section for fish species identified in this section in order to provide for better use and management of the fishery resource of the water to which the proposed alternate limit would apply.

(2) PROCEDURE. The department shall follow the procedures in this subsection in applying an alternate size limit or bag limit under this section.

(a) **Notice.** The department shall prepare and distribute a notice of its intent to apply an alternate limit under this section. The notice shall be published as a class 1 notice under ch. 985, Stats., in a general circulation newspaper in the vicinity of the water and, if the proposal has state-

wide significance, in the official state newspaper. A copy of the notice shall be sent to individuals and organizations which the department believes may be interested in the matter. The notice shall include a description of the water affected, the fish species affected, the alternate limit which will apply, and the date the alternate limit will take effect. The notice shall invite the public to submit written comments and indicate that a public information meeting will be held on the alternate limit if requested in writing within 10 days after the notice is published.

(b) **Public information meeting.** If a public information meeting is requested under par. (a), the department shall conduct the public information meeting in the vicinity of the affected water. At the meeting the department shall describe the factual basis for its intended decision and shall receive comments from the public on the matter.

(c) **Determination.** If, based on facts and information available to it, including comments received in response to the notice and at any public information meeting which may be held, the department concludes that a condition described in sub. (3) affects fish in a specific water, it shall apply the corresponding alternate limit. The alternate limit shall take effect upon the posting of the notice under par. (d).

(d) **Posting.** The department shall post notice at public access sites on the affected water that an alternate limit applies to a species of fish found in that water. The notice shall set out the name or description of the water or that part of the water to which the proposed alternate limit would apply, the species of fish affected, the corresponding alternate limit and the effective date of the alternate limit.

(e) **List.** The department shall maintain a current list of all waters to which an alternate limit under this section applies. The list shall be available for public inspection at the department's central office during regular office hours.

(3) ALTERNATE LIMIT. (a) Size limits. No size limit shall apply to walleye, largemouth bass or smallmouth bass if, for the particular species in a particular water, the department finds:

1. Angler exploitation of the species is less than 15% of the population of fish larger than the original size limit.

2. Total adult mortality for that species is less than 30% of the population.

3. More than 10% of the fish tested of that species in the size range from the originally applicable size limit to 3 inches larger than the originally applicable size limit, in fillets with the skin on, contain .75 parts per million or more mercury, 2 parts per million or more PCB (polychlorinated biphenyl), 5 parts per million or more DDT (dichloro diphenyl trichloroethane), 5 parts per million or more Toxaphene, 0.3 parts per million or more Chlordane, or 0.3 parts per million or more Dieldrin.

4. Walleye males do not grow to a length of at least 13 inches in 4 years or largemouth bass or smallmouth bass do not grow to a length of at least 12 inches in 5 years in all inland waters lying north of a line beginning at the state highway 70 bridge over the St. Croix river, then east on state highway 70 to its intersection with state highway 27, then south on highway 27 to its intersection with state

highway 64, then east along highway 64 to its end, then continuing east to the waters of Green Bay or in inland waters of Brown, Kewaunee or Door counties north of a line beginning with the state highway 29 bridge over the Fox river, then east along state highway 29 to its end, then continuing east to Lake Michigan.

5. Largemouth bass or smallmouth bass do not grow to a length of at least 14 inches in 6 years in inland waters other than those identified in subd. 4.

(b) *Bag limits.* If the department finds under sub. (2) that one or more of the following conditions exists in a particular water, the corresponding alternate bag limit shall apply to the named species of fish in that water.

(4) **TERMINATION OF ALTERNATE LIMITS.** Any time the department has reason to believe that the condition which led to the application of an alternate limit under this section no longer affects a species of fish in a particular water, it may remove the alternate limit by following the procedures under sub. (2) (a) to (c). Following its determination to remove an alternate limit the department shall remove or modify the posted notices of alternate limits and the original bag limit or size limit shall then apply.

Reduced daily bag limits for walleye angling

Daily bag limit	current pop. est.	% of safe harvest to be speared, trapped or netted	
		pop. est. made 1-2 yrs. ago	pop. est. made 3 yrs. ago or more or regression model.
4	1-7	1-14	1-20
3	8-18	15-39	21-54
2	19-36	40-76	55-84
1	37-68	77-94	85-94
0	69 or more	95 or more	95 or more

(b) *Muskellunge.* The minimum size limit will be increased when the department is notified by the Chippewa bands that their harvest goal on an individual water is 60% or more of the safe harvest. The minimum size limits to be used with different percentages of the safe harvest are as follows:

Increased minimum size limits for muskellunge angling

% of safe harvest to be speared, trapped or netted by tribes	Minimum size limit
60-94	45 inches
95 or more	55 inches

(2) **READJUSTMENT.** If the Chippewa bands inform the department that they have completed harvesting and their goal has not been reached, the secretary may raise the daily bag limit or reduce the minimum size limit to the limit specified as appropriate using the percent of the safe harvest level expected to be harvested as indicated in sub. (1). If a new population estimate is made, the safe harvest level shall be changed accordingly and the secretary may adjust the daily bag limit or minimum size limit according to the percentage of the new safe harvest level that is expected to be harvested as indicated in sub. (1), where deemed necessary to remain consistent with the safety factors established under *Lac Courte Oreilles v. State of Wis.*, 707 F. Supp. 1034 (W. D. Wis. 1989). The readjusted daily bag and size limits shall be in effect until March 1 of the year following the tribal harvest.

(3) **BAG AND POSSESSION LIMITS.** (a) Reduced daily bag limits calculated pursuant to this section are individual

NR 20.037 Modifications in daily bag limit and minimum size limit in response to tribal harvest. (1) **ADJUSTMENT.** In order to prevent a total harvest of more than 35% of the adult walleye population or 27% of the adult muskellunge population, the secretary may lower the daily bag limit on walleye and increase the minimum size limit for muskellunge in specific waters in response to the harvest goals of the Chippewa bands for their spear, net or trap fisheries. The adjusted daily bag and size limits shall be in effect until March 1 of the year following the tribal harvest. The safe harvest levels on individual waters shall be determined by the department.

(a) *Walleyes.* The daily bag limit will be reduced when the department is notified by the Chippewa bands of their harvest goals on individual waters. The extent of the reduction depends upon the percent of the safe harvest they intend to take and the age of the population estimate used to determine the safe harvest or if a regression model was used to determine the safe harvest. The daily bag limits to be used with the different percentages and for various basis of determining the safe harvest are as follows:

lake limits and may be combined, but no person may exceed a total daily bag limit of 5 walleyes.

(b) While fishing no person may possess fish on any water in excess of the bag limit or under the size limit for that water.

(4) **NOTICE.** Adjustments and readjustments of bag limits and minimum size limits under subs. (1) and (2) shall become effective upon publication of the adjustment or readjustment in the official newspaper in the area affected.

(b) "Person" means any individual, partnership, association, organization and body politic and corporate.

(c) "Sponsor" means a person who advances, conducts, directs, establishes, organizes, promotes or otherwise is responsible for the operation of a fishing tournament, but does not include a person who only assists in advertising or publicizing another person's fishing tournament. "Sponsor" also means to advance, conduct, direct, establish, organize, promote or otherwise be responsible for the operation of a fishing tournament.

(2) **PERMIT REQUIRED.** No person may sponsor a fishing tournament without first obtaining a permit from the department.

b. To protect public rights, interests or safety, including designated swimming areas, mooring areas, access areas, navigational channels, staging areas, beaches or other special use areas.

2. Specify the method for fish holding and release for tournaments where fish are reduced to possession, usually for purposes of recording, and live fish are then released to the water from which they came.

Note: NR 20.03 (1) provides for permits for restocking.

3. Contain provisions for other than live release of fish when the department determines that weather conditions and water temperature are not conducive to survival of fish intended for release and the release may constitute malicious waste of natural resources under the provisions of s. 23.095 (1), Stats.

4. Prohibit the use of tagged fish, except when approved by the department to enhance collection of data for management purposes as part of a scientific study, or when tagged fish are legally obtained from a licensed private fish hatchery and are planted under a stocking or introduction permit issued by the department under s. 29.535, Stats., and s. NR 19.05.
