Required Guidelines for Infant Meal Pattern

Definition of Infant. Any child less than 12 months of age.

Definition of Infant Formula. Infant formula defined by USDA is “any iron–fortified infant formula intended for dietary use as a sole source for food for normal healthy infants served in liquid state at manufacturer’s recommended dilution”.

Infant Formula/Breast milk. The decision regarding feeding infants breast milk or the type of infant formula is one for the infant’s doctor and parents/guardian to make together.

Definition of Optional. Optional foods must be served as each infant becomes developmentally ready for the specified foods.
