Rule Information

The objective of the proposed rule is to amend ch. NR 809, Wis. Adm. Code, to establish drinking water standards, referred to as Maximum Contaminant Levels (MCLs), for 12 Per- and Polyfluoroalkyl substances (PFAS) and combined standards for 4 PFAS. Establishment of these MCLs is based on recommendations for health-based standards from the Department of Health Services (DHS) based on its review of scientifically valid technical information. On November 6, 2020, DHS transmitted the 11th Cycle of Groundwater Standards Proposals to DNR containing recommendations to establish groundwater standards for 22 substances including individual standards for 6 pesticides, individual standards for 12 per- and polyfluoroalkyl substances (PFAS), and combined standards for 4 PFAS.

Accessibility

For the hearing or visually impaired, non-English speakers, or those with other personal circumstances which might make communication at the meeting/hearing difficult, DNR will, to the maximum extent possible and with reasonable advance notice, provide aids including an interpreter,

or a non-English, large-print, or recorded version of hearing documents. To access these resources, please contact the email address or phone number listed below as soon as possible.
