

**FINAL REGULATORY FLEXIBILITY ANALYSIS AND
SUMMARY OF LEGISLATIVE STANDING COMMITTEE COMMENTS**

04/21/2021

CR 19-110

Department of Health Services

DHS 163, relating to certification for the identification, removal and reduction of lead-based paint hazards.

Final Regulatory Flexibility Analysis or Summary:

The proposed rule includes modest fee increases that apply to certified lead companies. These increases will be no more than \$25 per certification over 2 years (or \$12.50 per year) for individuals, and \$50 per company certification over 2 years (or \$25 per year). The economic impact will be negligible for lead abatement, renovation and environmental consulting businesses and will have no impact on local governments or the state economy as a whole.

Comments of Legislative Standing Committees:
