Initial Regulatory Flexibility Analysis

The proposed rule changes are not expected to result in a significant economic impact on small businesses. Small business applicants account for an estimated 10% of all waterways permit applicants. Language related to exemption standards and permit requirements and review factors in the proposed rule is not predicted to significantly change exemption or permit eligibility or application requirements. The proposed changes bring the rule language up to date with current statutory requirements and program practices. This rule does not affect administrative fees associated with permit applications.
