Key:

¹ Infectious disease or other condition designated as notifiable at the national level.

² Required Wisconsin or CDC follow-up form completed by public health agency.

³ High-risk assessment by local health department is needed to determine if patient or member of patient's household is employed in food handling, day care or health care.

⁴ Source investigation by local or state health department is needed.

⁵ Immediate treatment is recommended, i.e., antibiotic or biologic for the patient or contact or both.

⁶ Coordination between local and state health departments is recommended for follow-up.
