

Chapter NR 666

APPENDIX XI

LEAD-BEARING MATERIALS THAT MAY BE PROCESSED
IN EXEMPT LEAD SMELTERS

<i>A. Exempt Lead-Bearing Materials When Generated or Originally Produced By Lead-Associated Industries¹</i>	solids from lead-associated industries (e.g., K069 and D008 wastes)
Acid dump/fill solids	Spent grids, posts, and separators
Sump mud	Spent batteries
Materials from laboratory analyses	Lead oxide and lead oxide residues
Acid filters	Lead plates and groups
Baghouse bags	Spent battery cases, covers, and vents
Clothing (e.g., coveralls, aprons, shoes, hats, gloves)	Pasting belts
Sweepings	Water filter media
Air filter bags and cartridges	Cheesecloth from pasting rollers
Respiratory cartridge filters	Pasting additive bags
Shop abrasives	Asphalt paving materials
Stacking boards	¹ Lead-associated industries are lead smelters, lead-acid battery manufacturing, and lead chemical manufacturing (e.g., manufacturing of lead oxide or other lead compounds).
Waste shipping containers (e.g., cartons, bags, drums, cardboard)	<i>B. Exempt Lead-Bearing Materials When Generated or Originally Produced By Any Industry</i>
Paper hand towels	Charging jumpers and clips
Wiping rags and sponges	Platen abrasive
Contaminated pallets	Fluff from lead wire and cable casings
Water treatment sludges, filter cakes, residues, and solids	Lead-based pigments and compounding pigment dust
Emission control dusts, sludges, filter cakes, residues, and
