

Chapter TR 12

ANNUITY RATES

TR 12.01 Basis for computation of annuities ~~TR-12.03—15-year-guaranteed-life annuity rates~~
~~TR-12.02—Life annuity rates~~

TR 12.01 Basis for computation of annuities. (1) From and after July 1, 1954, the basis for computation of annuities granted and of required reserves under the state teachers retirement system shall be for mortality: For male lives, the ALPHA-1949 table (male) published by the Society of Actuaries with ages adjusted three months older, and for females, the ALPHA-1949 table (female) published by the Society of Actuaries with ages adjusted two years older; and for interest 3% per annum.

(2) For survivorship annuities the rates and reserves will be based upon the ALPHA-1949 table published by the Society of Actuaries for joint life annuity values at equal ages at 3% and the auxiliary tables for obtaining equal ages with ages adjusted three months older for males and two years older for females.

TR 12.02 Life annuity rates.
