9. Deer quotas. a. Deer quotas are primarily based on the following considerations: the status of unit deer populations in relation to established population goals as determined by inventories, the past effect of varying antlerless harvest levels on unit deer populations gained from many years experience with the quota system, and the estimated impact of the previous winter's severity on deer survival and subsequent fawn production. The department shall issue party permits, antlerless permits or hunter's choice permits in sufficient numbers to assure maintenance of overwintering deer populations for each quota area indicated in subd. e.

b. Quota areas are composed of single management units or parts of units, the boundaries of which are established in s. NR 10.28.

c. In each quota area, the number of permits to be issued to harvest the desired numbers of deer shall be based on an average of the hunter success rates from the Register, July, 1985, No. 355

most recent 3 previous seasons or by an average of fewer seasons where a 3-year average is not available. In establishing a quota for an area without an adequate history of permits, the average success rates of similar quota areas shall be applied or the department shall estimate an anticipated success rate.

d. Permit success rates used to compute the number of permits to be issued for each quota shall be those calculated by the department from annual deer season harvest reports except where no previous history of success rates exist.

The success rate formula is:

$$\text{Success rate} = \frac{\text{Number of antlerless deer harvested}}{\text{Number permits issued}}$$

The permit number formula is:

$$\text{Permit number} = \frac{\text{Quota deer to be harvested}}{\text{Hunter success rate}}$$

e. Deer management units, overwinter population goals expressed in terms of deer per square mile of deer range and 1983 deer quota are as follows:

(c) *Permit application procedures.* Any person possessing a valid hunting license authorizing the hunting of game birds may apply for a turkey hunting permit as follows:

1. Application shall be made on forms provided by the department.
2. All application forms must be postmarked no later than the first Friday in November to be considered for the succeeding wild turkey hunting season.
3. If a maximum of 2 persons wish to hunt together, each must complete an application form for individual permits and submit them together in a single envelope clearly marked "group application". Such group application shall be treated as one application for purposes of random selection or consideration for a permit. Preference may be requested by group applicants provided both individuals are eligible under par. (b).

(d) *Random selection.* If the number of applications for permits exceed the available number of permits as determined under this section, successful applicants shall be determined by random selection.

(e) *Permit and tag restrictions.* 1. Permit and carcass tags issued under this section are only valid for the zone and time period indicated on the permit.

2. Permits or carcass tags issued under this section may not be transferred to or used by any person other than the permittee.

2. Completely attach and seal the carcass tag, utilizing its own adhesive, around the leg of the turkey.

(b) *Transportation and possession.* No person may possess or transport a wild turkey unless the person has lawfully killed and tagged it.

(3) **REGISTRATION.** A person who possesses a wild turkey shall exhibit and register the bird at a department registration station no later than 1:30 p.m. on the day killed. The department shall affix a registration tag to lawfully taken wild turkeys and the tag shall be kept until the turkey meat is consumed.

(4) **RESTRICTIONS.** No person may hunt wild turkeys:
