a. No more than 300,000 pounds of chubs may be harvested during the quota period of July 1 through January 15; and no more than 100,000 pounds of chubs may be harvested during the quota period of March 1 through June 30 except that this amount shall be adjusted based on the reported catch of the previous period within a license year.

b. The department shall notify all permittees to cease fishing upon receipt of information that 85% of the period quotas as established in subpar. a. have been harvested except that all nets in the water shall be lifted under s. NR 25.09 (2) (a) 9., and the legal fish harvested.

3. All permittees under subd. 1. who select the southern chub fishing zone under sub. (3) (d) shall be subject to the following limitations:

26-30	2.44
31-32	2.15

1) The fisher rank of each individual permittee shall be based on their individual authorized regular season chub harvest from April 1, 1981 through December 31, 1982. This harvest determination shall be based on the permittee's reported catch during that period adjusted to the legal amount under subd. 1. b. 4) and 5), Register, June, 1981, No. 306. The highest resulting number shall be assigned the fisher rank of 1, and the following numbers assigned sequential ranks until the 32 individual quota allotments are all assigned. If there are any ties for a given fisher rank, a public drawing will be conducted by the department and the permittee selected will receive that fisher rank. The permittee or permittees not selected will go to the next lower fisher rank. Additional drawings will be conducted as needed to resolve all ties. Any remaining permittees not receiving individual quota allotments shall fish under the provisions of subpar. b.

(a) Stretch measure shall be determined by exerting a one pound strain on a mesh knot and measuring the mesh opening immediately above that knot on which the strain is applied from the inside edge of that knot to the inside edge of the knot directly opposite. Measurement shall be made by inserting the measuring device at the uppermost knot in the mesh and reading at the lowermost knot.

(b) The weight and measuring devices to be used under par. (a) shall be tested, approved and certified by the Wisconsin department of agriculture, trade and consumer protection, or other governmental entity authorized to do so.

Whenever any gill nets, encircling nets or trawls catch illegal fish of any species in an amount equal to 10% or more by weight or numbers of the total legal catch, those nets shall be immediately removed from the water, and may not be reset, placed, replaced, recast or operated during that same day unless:

(a) All parts of the net are moved a distance of at least 3 miles from that site; or
