

(a) *Hunter's choice deer hunting permit.* Valid for the taking of one deer of either sex or age, except on Chambers Island in Door County where the bag limit shall be one antlerless deer or one buck deer with a forked antler as indicated on the permit.

(b) *Antlerless deer hunting permit.* Valid for the taking of one antlerless deer only.

(7) **DEER HARVEST QUOTAS.** Deer harvest quotas are based on deer management unit populations in relation to established population goals as determined by inventories, the past effect of varying antlerless harvest levels on deer management unit populations, and the estimated impact of the previous winter's severity on deer survival and subsequent fawn production.

(a) *Purpose.* The department shall issue party permits, antlerless permits or hunter's choice permits in sufficient numbers to assure maintenance of overwintering deer populations for each deer management unit indicated in par. (d).

(b) *Permit formula.* In each deer management unit, the number of permits to be issued to harvest the desired number of deer shall be based on the hunter success rate average from the most recent 3 previous seasons or by an average of fewer seasons where a 3-year average is not available. In establishing a harvest quota for a deer management unit without an adequate history of permits, the average success rates of similar deer management unit shall be applied or the department shall estimate an anticipated success rate. The permit number formula is:

$$\text{Permit number} = \frac{\text{Antlerless deer to be harvested}}{\text{Hunter success rate}}$$

(c) *Success rate formula.* Permit success rates used to compute the number of permits to be issued for each deer management unit shall be those calculated by the department from annual deer season harvest statistics except where no previous history of success rates exist. The success rate formula is:

$$\text{Success rate} = \frac{\text{Number of antlerless deer harvested}}{\text{Number permits issued}}$$

(d) *Overwinter goals.* Overwinter population goals expressed in terms of deer per square mile of deer range by deer management unit are as follows:
