(a) *Purpose.* The department shall issue bear harvest permits in sufficient numbers to assure maintenance of bear populations for each zone indicated in par. (d).

(b) *Permit formula.* In each black bear management zone, the number of permits to be issued to harvest the desired numbers of bear shall be based on hunter success rates from previous seasons. In establishing permits for a zone without an adequate history of permits, the average success rates of similar zones shall be applied or the department shall estimate an anticipated success rate. The permit number formula is:

$$\text{Permit number} = \frac{\text{Bear to be harvested}}{\text{Hunter success rate}}$$

(c) *Success rate formula.* Permit success rates used to compute the number of permits to be issued for each zone shall be those calculated by the department from annual bear season harvest reports except where no previous history of success rates exist. The success rate formula is:

$$\text{Success rate} = \frac{\text{Number of bear harvested}}{\text{Number of permits issued}}$$

(d) *Population goals.* This fall, pre-hunt black bear population goal is as follows:

<u>Zone</u>	<u>Population Goal</u>
A	4,100
B	1,600
C	200

(3) **PERMIT ISSUANCE.** Upon receipt of proper application, the department shall issue permits in the following manner:

(a) *Initial permit.* Successful applicants for hunter's choice or antlerless permits shall be determined by random selection from all eligible applications received for each deer management unit. Permits remaining unissued for any deer management unit after all initial applications have been processed may be issued by the department on a first-come, first-served basis, in accordance with any statutorily established landowner preference permit issuance system, or as established by par.
