Costs of services include preparation of preliminary and final engineering reports, design of facilities, preparation of plans and specifications, inspection and supervision of construction and any other services necessary for the construction of the project. Where technical services are provided by regularly employed persons of a municipality, actual documented applicable costs are allowable, provided they do not exceed costs determined by the department to be reasonable if the work were performed by a consulting engineer on a fee basis. Technical service costs for study of sewer infiltration-inflow problems performed in accordance with requirements of the federal grant program (P.L. 92-500) are allowable.

(3) LEGAL AND FISCAL COSTS. The eligible cost shall be the most cost effective repair or replacement in terms of the initial capital cost. Higher incremental replacement costs to reduce future maintenance or operation costs are not eligible. The width of the eligible repaired area shall not be greater than that of the top width of the sewer trench unless it can be demonstrated that it is less expensive to remove and replace the entire width of road pavement. Eligible costs of replacement of badly deteriorated road pavements shall be limited to that of the least expensive all weather road pavement regardless of the type of original material. Where the replaced item is better than the original item, the eligible cost shall be limited to a pro rata share of the replacement cost.
