

Wisconsin Food Code

PREFACE

Information to Assist the User

The following information explains the organizational format and the meaning of explanatory conventions used in the Wisconsin Food Code, which are intended to make the code easier to use.

Structural Nomenclature

Each chapter of the food code is divided into the following subunits. The system of numbering for a chapter and any of its subunits uses the following format:

Chapter	9
Part	9-1
Subpart	9-101
Section (§)	9-101.11
Paragraph (¶)	9-101.11(A)
Subparagraph	9-101.11(A)(1)

Internal cross-referencing is widely used throughout the code to eliminate the need for restating provisions. For example, fixtures and devices necessary for handwashing are relevant to both the plumbing (Chapter 5) and the facilities (Chapter 6) portions. To alert the reader to relevant information and provide a system by which each violation is recorded under the one most appropriate provision, the Code uses the phrase "...as specified under (followed by a Code cite such as a section or paragraph)." It must be determined within the context of the provision whether the cross reference simply provides information to explain the requirement or whether the observed violation is properly recorded against the provision that is cited after the word "under."

The Wisconsin Food Code presents requirements by principle rather than by subject. For example, equipment requirements are presented under headings such as Materials, Design and Construction, Numbers and Capacities, Location and Installation, and Maintenance and Operation rather than by refrigerators, sinks, and thermometers. In this way provisions need be stated only once rather than repeated for each piece or category of equipment. Where there are special requirements for certain equipment, the requirement is delineated under the appropriate principle (e.g., Design and Construction) and listed separately in the index.

Section Designations Based on Categories of Importance

Requirements contained in the Food Code are identified as being in one of 3 categories of importance: critical; "swing" (i.e., those that may or may not be critical depending on the circumstances); and noncritical. A bold superscripted letter C after a section title indicates that all of the provisions within that section are critical unless otherwise indicated. Any provisions that are "swing" items are followed by a bold, superscripted letter S. Any provisions that are noncritical are followed by a bold, superscripted letter N.

Categories of Importance		
Superscripted letter ^C	Critical	Indicates that all of the provisions within that section are critical unless otherwise indicated
Superscripted letter ^S	Swing	The requirement may or may not be critical depending on the circumstances.
Superscripted letter ^N	Noncritical	Noncritical item

Any unmarked provisions within a section that has a superscripted letter C after the section title are critical. All provisions following a section title that is not marked with a superscripted letter C are noncritical.

Font Style

Portions of some sections are written in Italics. These provisions are not requirements, but are included in the code to convey relevant information about specific exceptions and alternative means for compliance.

Defined words and terms are capitalized (small caps) in the text of the Wisconsin Food Code to alert the reader to the fact that there is a specific meaning assigned to the capitalized words and terms, and that the meaning of a provision is to be interpreted in the defined context. A concerted effort was also made to capitalize all forms and combinations of those defined words and terms that are related to the definition.

Font Style	
<i>Italics Text</i>	Provisions are not requirements, but are provided to convey relevant information about specific exceptions and alternative means for compliance.
CAPITALIZED WORDS and TERMS	Indicates the CAPITALIZED word(s) or term(s) is defined under section 1-201.10(B)
