(ed) <i>Deer herd control measures.</i>		
1. a.	The department may, upon making the findings in subd. 2. modify the deer permit issuance procedures as described in this paragraph for any deer management unit to reduce the deer population nearer to the overwinter population goals established in s. NR 10.104. Under this paragraph special permits for antlerless deer under s. 29.177, Stats., may be issued free of charge at the rate of one permit per license authorizing deer hunting or 2 permits per conservation patron license. The permits may be used to hunt and tag deer during any of that year's deer seasons for the units specified under subd. 2. Additional special permits for antlerless deer shall be issued at no charge, except for a handling fee authorized under s. 29.556, Stats., and s. NR 19.02.	
b.	If after 2 consecutive years, as described in subd. 1. a., the department determines a third season, as described under subd. 1. a., is unlikely to reduce the deer population to within 20% of the overwinter population goal established in s. NR 10.104 for the same deer management unit or units in the subsequent year, hunters shall harvest or tag an antlerless deer in that unit or units with either a bow or a gun during any deer season or with an agricultural shooting permit, before they may tag a buck with either weapon in that unit or units. One antlerless deer is required to authorize harvest of one buck in that unit or units, or in state parks with gun deer seasons that are within or adjoining these units, for each archery and gun deer license. A person holding a Class A or Class C disabled permit under s. 29.193, Stats., is not required to harvest or tag an antlerless deer in that unit or units before the person may tag a buck. Deer harvested as described in this paragraph shall be transported in accordance with s. NR 10.105 (2).	
c.	If after a season as described in subd. 1. b., the department determines a season as described in subd. 1. a., is unlikely to reduce the deer population to within 20% of the overwinter population goal, established in s. NR 10.104, for the same deer management unit or units in the subsequent year, hunters may only hunt deer in accordance with subd. 1. b.	
2.	Findings. The department shall, prior to making any modification for a deer management unit under subd. 1., find that it is unlikely the deer population for the deer management unit will be reduced to within 20% of the overwinter population goal established in s. NR 10.104 under the established deer hunting seasons, including the December hunt. In making this determination, the department shall compare the deer harvest required to reduce the deer population to goal to the deer harvest likely to occur under the existing season structure.	
3.	Notice. Modification by the department under subd. 1. shall become effective upon issuance of an order and publication in the official state newspaper. In addition, a notice of the order shall be provided to newspapers, legislators and hunting license outlets in the area affected.	
4.	CWD zones. This paragraph does not apply to areas described in par. (et) 1. a. and 2. a. and b.

(ed) 2. shall equal or exceed the antlerless:antlered ratio identified in subd. 1. b. for the region in which the unit is located as established in s. NR 10.28 (4). The deer management units conducting herd control measures identified in par. (ed) 1. b. are not included in the determination of this performance measure.

	Eastern Farmland	2
	Central Forest	2

2.	Annual performance measures. The total antlerless:antlered harvest ratio in deer management units that meet the criteria established in par. (ed) 2., and are implementing the permit issuance procedures identified in par. (ed) 1. a., shall equal or exceed 1.4 antlerless deer per antlered buck. The deer management units conducting herd control measures identified in par. (ed) 1. b. are not included in the determination of this performance measure.

1. A CWD management zone has been established in the county or a portion of the county, or

2. A CWD or bovine tuberculosis positive captive or free-roaming, domestic or wild animal has been confirmed after December 31, 1997 from the county, or

3. The county or portion of the county is within a 10 mile radius of a captive or free-roaming, domestic or wild animal that

has been tested and confirmed to be positive for CWD or bovine tuberculosis after December 31, 1997.

(c) *Inclusion of additional counties.* 1. The department may add additional counties under par. (b) if they meet the criteria established in par. (b) 1., 2. or 3.

2. The prohibitions and exemptions in this subsection shall become effective upon issuance of an order by the secretary of the department and publication in the official state newspaper. In addition, a notice of the order shall be provided to newspapers, legislators and hunting license outlets in the area affected.

(d) *Bear hunting and bear dog training.* Bait or feed may be placed and used for the purpose of hunting bear or training bear dogs, except no person may place, use or hunt over bait or feed:

Liquid scent used for hunting of bear or training bear dogs does not need to be enclosed.

4. Unless, when the bait or feeding site is checked or re-baited, all bait that has been uncovered is again enclosed and made inaccessible to deer in accordance with subd. 3.

(e) *Deer hunting.* Bait or feed may be placed and used for hunting deer outside of the counties described in par. (b), except no person may place, use or hunt over bait or feed:

1. During the closed season for hunting deer. For the purpose of this paragraph, the open season for hunting of deer includes the 24-hour period prior to the deer seasons established in s. NR 10.01 (3).

- (a) *Denmed bear.* Hunt or shoot a bear in a den.
- (b) *Restricted areas.* Hunt bear in any dump or sanitary landfill.
- (c) *Non-adult bears.* Shoot, shoot at or kill a bear that is accompanied by a bear that is not an adult bear.

**(2) DOG USE RESTRICTIONS.** (a) *Identification.* No person shall hunt or pursue bear with any dog unless such dog is tattooed or wears a collar with the owner's name and address attached.

(b) *Training.* The training of dogs by pursuing wild bear is prohibited except July 1 through August 31.

**Note:** Bear dog trials and training are regulated by ch. NR 17.

(c) *Pack size.* No more than 6 dogs in a single pack may be used to pursue bear regardless of the number of bear hunters assisting the bear harvest permittee and regardless of the dog ownership.

**Note:** Only a bear hunting licensee with a bear harvest permittee may pursue bear during the open season on bear.

(e) *Bait use.* Persons hunting bear with dogs may use bait in accordance with s. NR 10.07 (2m) during the season established in s. NR 10.01 (3) (g) 2.

**Note:** This rule does not permit a person to hunt bear over bait without using dogs as a hunting aid.

**(3) BEAR CARCASS TAGS.** (a) *Validation.* Any person killing a bear shall immediately validate the carcass tag by slitting the mark designating the month, day, time of kill and bear sex.

(b) *Attachment.* Immediately following validation, the carcass tag shall be attached to the bear at any location on the bear.

(c) *Removal and retention.* A bear carcass tag attached under par. (b) and department registration tag may be removed from a gutted carcass at the time of butchering or when prepared by a licensed taxidermist, but the person who killed or obtained the bear shall retain all tags until the meat is consumed.

(d) *Exceptions.* Except as provided under par. (c), no person may possess, control, store or transport a bear carcass unless it is tagged as required under s. 29.184 (5), Stats., and pars. (a) and (b).

**NR 10.102 Bear hunting quota and license issuance. (1) BEAR QUOTAS.** Bear quotas are based on the status of zone black bear populations in relation to established population goals as determined by inventories.

(a) *Purpose.* The department shall issue Class A bear licenses in sufficient numbers to assure maintenance of bear populations for each zone indicated in par. (d).

(b) *Quota formula.* In each black bear management zone, the number of Class A bear licenses to be issued to harvest the desired numbers of bear shall be based on hunter success rates from previous seasons. In establishing licenses for a zone without an adequate history of licenses, the average success rates of similar zones shall be applied or the department shall estimate an anticipated success rate. The license number formula is:

$$\text{License number} = \frac{\text{Bear to be harvested}}{\text{Hunter success rate}}$$

(c) *Success rate formula.* Hunter success rates used to compute the number of Class A bear licenses to be issued for each zone shall be those calculated by the department from annual bear sea-

son harvest reports except where no previous history of success rates exist. The license rate formula is:

$$\text{Hunter success rate} = \frac{\text{Number of bear harvested}}{\text{Number of licenses issued}}$$

(d) *Population goals.* The fall pre-hunt black bear population goal is as follows:

<u>Zone</u>	<u>Population Goal</u>
A	4,600
B	2,200
C	1,200
D	3,300

(e) *Temporary bear harvest subzones.* 1. The department may establish temporary bear harvest subzones within each black bear management zone to increase or decrease harvest within specific subzones to assure maintenance of bear populations at a density level equivalent to that of the bear management zone.

2. The department may require that a portion of the Class A bear licenses available within a bear management zone be specific to a temporary bear harvest subzone to assure maintenance of bear populations at a density level equivalent to that of the bear management zone.

3. Class A bear licenses for the temporary subzones shall be used only within the subzone.

4. Temporary subzone boundaries shall follow deer management unit boundaries as identified in s. NR 10.28.

5. Temporary subzones may be established to increase bear harvest when either of the following 2 conditions exist within the area considered for a subzone:

a. The bear population density within the subzone for the previous 3 year period exceeds by 20% the zone population density goal as indicated by indexes or models, or both.

b. Bear nuisance or agricultural damage complaints per square mile within the subzone exceed the zone average by 20% or more for the previous 3 year period.

6. Temporary subzones may be established to decrease harvest when either one of the following conditions exist:

a. The mortality rate of adult bears within the subzone exceeds 22% for the previous 3 year period.

b. The bear population density within the subzone for the previous 3 year period is below the zone population density goal by 20% or more as indicated by indexes or models, or both.

7. Each temporary bear harvest subzone may be established for a period not to exceed 2 years.

(f) *Permanent bear harvest subzones.* Class A bear licenses for subzones shall be used only in the subzone.

**(2) APPLICATION PROCEDURE.** (a) *Application submittal.* Application for Class A bear licenses shall be on forms provided by the department. Applications shall be postmarked no later than the deadline date indicated on the form or received by a department service center location on the deadline date to be considered for selection. The annual deadline may not be sooner than December 1 each year.

**Note:** The department conducts extensive publicity on the application deadlines beginning several months prior to the deadline. Application deadline dates are published in news releases, license outlet handouts, and pertinent regulation pamphlets. Department service center hours may vary by location.

(b) *Group applications.* Group applications for a maximum of 4 hunters may be submitted for Class A bear hunting licenses provided each applicant completes the application form. The group's preference standing shall be that of the member with the lowest number of preference points. If the group is selected, the group shall accept or reject Class A bear licenses for all members of their group.

**(3) LICENSE ISSUANCE.** The department shall select successful applicants and issue Class A bear license approval notices no later than February 15 of each year. The department may reissue a Class A bear license if the license is returned or if the applicant fails to

or cannot comply with s. 29.184, Stats. Selection shall be by random drawing.

(4) FEES. A successful applicant shall submit the appropriate license fee established by s. 29.563 (2) (a) 6. or 7. or (b) 4. or 5., Stats., to the department before receiving a Class A bear license.

(4m) EFFECTIVE DATE. (a) Licenses issued prior to the season. Any Class A bear license issued prior to the opening date of the bear season established in s. NR 10.01 (3) (g) 2., shall be effective beginning on the opening date of the season specified in s. NR 10.01 (3) (g) 2.

(b) Licenses issued during the season. Except as provided in par. (c), a Class A bear license issued during the open season for hunting bear established in s. NR 10.01 (3) (g) 2., does not authorize hunting until the third day after the day the license is purchased.

(c) Exception. A Class A bear hunting license issued during the open season for hunting bear as established in s. NR 10.01 (3) (g) 2., authorizes bear hunting beginning the date of issuance if issued to a person to whom any of the following applies:

1. The person is a member of the U.S. armed forces who exhibits proof that he or she is in active service with the armed forces and that he or she is stationed in this state or is a resident on furlough or leave.

2. The person turns 10 years of age during the open season for hunting bear.

(5) BEAR PURSUIT. No person may handle a dog or dogs used for tracking or trailing bear unless he or she possesses a Class A or Class B bear license.

(6) EDUCATIONAL PERMIT ISSUANCE. Upon receipt of proper application, the department shall issue an educational permit for bear observation. The applicant shall include the location to the quarter section, times and dates of the activity, name of person and bear eco-tourism business or educational institution they are representing. The educational permit authorizes the permittee to observe or shine bear for educational purposes only pursuant to s. 29.314 (3) (b) 3. and (5) (b) 1., Stats.

(a) No person may be engaged in shining bear for educational purposes without being in possession of an educational permit.

(b) Only the named person on the permit may possess a firearm when participating in the actions authorized by the permit.

(c) The permit is restricted to use in a ground blind or elevated stand.

(d) The permit is not valid during the seasons established in s. NR 10.01 (3) (e) and (g) and the 7 consecutive days prior to those seasons.

NR 10.103 Deer hunting. (1) TAGS. A back and carcass tag shall be issued with each hunting license. While hunting, no person may possess a validated carcass tag including bonus and special carcass tags unless it is attached to a legally killed deer.

(2) VALIDATION. Any person who kills a deer or if s. 29.324, Stats., applies, the person providing the carcass tag, shall immediately validate the carcass tag by slitting the marks on the carcass tag as designated by the department. Failure to completely validate the carcass tag renders possession of the deer illegal and the carcass tag invalid.

Note: The carcass tag attachment procedures are also provided in s. 29.347 (2), Stats.

NR 10.104 Deer population management. (1) DEER MANAGEMENT SYSTEM. The department shall manage the state deer population by:

(a) Establishing deer management unit boundaries within the state;

(b) Establishing deer population goals for each deer management unit;

(c) Monitoring the performance of the deer population within each deer management unit; and

(d) Establishing deer hunting seasons and annual harvest quotas with the objective of maintaining deer populations at the established deer population goals for each deer management unit.

(2) DEER MANAGEMENT UNITS. (a) The deer management unit boundaries are as described in s. NR 10.28.

(b) Management unit size and configuration. Deer management unit boundaries shall be established to encompass areas of similar land use, soils and vegetative cover, and be of sufficient size to permit accurate monitoring of herds.

(c) Unit boundaries. Unit boundaries shall be readily identifiable features of the landscape such as roads and rivers. When road boundaries are used, the department shall give priority to use of numbered and lettered highways.

(3) THREE YEAR REVIEWS. The department shall review, and seek public comment, regarding the need to modify the boundaries or population goals for all deer management units every 3 years. For deer management units in the ceded territory as defined by s. NR 13.02 (1), the department shall also consult with the Wisconsin Chippewa bands in a government to government manner.

(4) DEER POPULATION GOALS. (a) Deer range. The department will calculate the area of deer range in each unit based on estimates of the amount of wetland, woodland at least 10 acres in size, and cropland within 330 feet of woodlands.

(b) Unit goals. The deer population goals for each deer management unit described in s. NR 10.28 shall be expressed as the number of deer per square mile of deer range in January and are as follows:

**(5) ANNUAL ANTLERLESS DEER KILL QUOTAS.** (a) *Annual population estimate.* The department shall annually calculate an estimate of the overwinter deer population for each deer management unit using the sex-age-kill method for calculating deer densities. The sex-age-kill method uses the following quantitative data for each deer management unit: proportion of yearling bucks in the harvest, proportion of yearling does in the harvest, proportion of males and females at birth, the number of fawns seen per doe during the summer, the proportion of total buck mortality due to hunting harvest, and the harvest by sex as registered during the hunting seasons.

(b) *Quota objective.* Using the overwinter deer population estimate established under par. (a), expected fawn production and overwinter mortality, the expected archery harvest of antlerless deer excluding those harvested under authority of hunter's choice and antlerless deer hunting permits, and the deer population goal in sub. (4), the department shall annually calculate an antlerless deer kill quota for each unit with the objective of maintaining the deer herd at the established deer population goal or temporary overwinter target population density.

(c) *Quota adjustment in ceded territory units.* For deer management units in the ceded territory as defined in s. NR 13.02 (1), expected tribal harvest shall be deducted from the antlerless deer kill quota established in par. (b).

**(6) ANTLERLESS DEER PERMITS.** (a) *Purpose.* The department shall issue deer hunting permits in sufficient numbers to achieve the state quota determined under sub. (5).

(b) *Permit formula.* In each deer management unit, the number of permits issued by the department shall be determined by the following formula:

$$\text{Permit number} = \frac{\text{State Quota}}{\text{Predicted hunter success rate}}$$

(c) *Success rate prediction.* The predicted hunter success rate used by the department to compute the number of permits for each deer management unit shall be based upon the percentage of permitted hunters harvesting an antlerless deer in that unit during previous seasons. In new deer management units or units with significant boundary changes, the predicted hunter success rate shall be based upon the harvest history of similar units.

**(7) DEER CARCASS TAGS.** (a) *Archery carcass tags.* Each license which authorizes the hunting of deer with a bow shall include one carcass tag that is valid for taking one buck deer in any unit statewide, except in units that are included in an earn-a-buck season under s. NR 10.01 (3) (ed) 1. b. or (et) when an antlerless

deer must be tagged prior to the harvest of a buck. Each license which authorizes the hunting of deer with a bow shall also include one carcass tag that is valid for the taking of one antlerless deer in any unit statewide.

(b) *Gun deer carcass tag.* Each license which authorizes the hunting of deer with a firearm, shall include one carcass tag that is valid for taking one buck deer in any unit statewide, except in units that are included in an earn-a-buck season under s. NR 10.01 (3) (ed) 1. b. or (et) when an antlerless deer must be tagged prior to the harvest of a buck.

**(8) PERMIT ISSUANCE.** The department shall issue permits in the following manner:

(a) *Antlerless permits.* The department may issue antlerless deer permits on a first-come, first-served basis to individuals who possess a valid deer hunting license.

**Note:** The department conducts extensive publicity on the day when the antlerless permits are first available for sale beginning several months prior to the purchase date. Permit sale dates are published in news releases, license outlet handouts, and pertinent regulation pamphlets. Permits are available from department license agents, on-line at [dnr.state.wi.us](http://dnr.state.wi.us) or by telephone at 1-877-945-4236.

(b) *Bonus permits for farm owners.* Eligible resident farm owners under s. 29.181, Stats., will receive one free bonus permit for each one they purchase in deer management units with additional permits as described in s. NR 10.104 (8) (a). Where there are joint owners or vendee names under a land contract, only one of the owners or vendees is eligible. To be an eligible farm under this section, a majority of the land must be used on a commercial basis, to produce income.

**(9) PERMIT AUTHORITY.** No person may hunt antlerless deer in deer management units described as such in s. NR 10.01 (3) unless he or she possesses a current valid antlerless deer hunting permit or the deer management unit in which the person is hunting, or is hunting as authorized in s. 29.324, Stats.

**Note:** Section 29.324, Stats., Group deer hunting. (1) In this section:

(a) "Contact" means visual or voice contact without the aid of any mechanical or electronic amplifying device other than a hearing aid.

(b) "Group deer hunting party" means 2 or more hunters hunting in a group all using firearms, each of whom holds an individual license to hunt deer.

(2) Any member of a group deer hunting party may kill a deer for another member of the group deer hunting party if both of the following conditions exist:

(a) At the time and place of the kill, the person who kills the deer is in contact with the person for whom the deer is killed.

(b) The person for whom the deer is killed possesses a current unused deer carcass tag which is authorized for use on the deer killed.

(3) A person who kills a deer under sub. (2) shall ensure that a member of his or her group deer hunting party without delay attaches a current validated deer carcass tag to the deer in the manner specified under s. 29.347 (2). The person who kills the deer may not leave the deer unattended until after it is tagged.

**(10) BAG LIMIT.** Each issued antlerless deer hunting permit shall authorize the use of the holder's current valid Wisconsin deer hunting license, back tag and antlerless carcass tag for the taking of one antlerless deer only in the deer management unit or units designated on the permit.

**(11) CHRONIC WASTING DISEASE SPECIAL PERMITS.** The following carcass tags are valid for the taking and tagging of deer in the CWD management zone as described in s. NR 10.28 (3):

(a) *Regular deer hunting carcass tags.* A valid gun or archery deer license carcass tag or a special antlerless permit issued under s. NR 10.01 (3) (ed), 10.104 (8), 12.06, 12.15 or 19.11 are all valid for tagging an antlerless deer or a buck deer pursuant to par. (b) 3.

(b) *Special CWD deer permits.* This special permit issued under s. 29.177, Stats., is valid for the taking of an antlerless deer in the units or portions of deer management units included in the CWD management zone as described in s. NR 10.28 (3). These special permits:

1. Will be issued free of charge at a rate of up to 4 permits per day per hunter.

2. Can be used during the hunts described in s. NR 10.01 (3) (et).

3. Can be used to tag a buck deer during the:

a. Archery or firearm hunts in units that do not meet the criteria established in s. NR 10.01 (3) (et) 3., or

b. Archery or firearm hunts in units where earn-a-buck regulations established in s. NR 10.01 (3) (et) 3. are in effect if the hunter possesses an antlerless deer registration verification earned in a unit designated under s. NR 10.01 (3) (ez) 1. d. or in a CWD management zone identified in s. NR 10.28 (3), or

**Note:** Section NR 10.01 (3) (ez) was repealed eff. 12-1-08.

c. Archery or firearm hunts in units where earn-a-buck regulations established in s. NR 10.01 (3) (et) 3. are in effect if an antlerless deer has been legally harvested and tagged prior to the harvest of the buck deer, and the antlerless deer accompanies the buck deer until each is registered.

4. Are not valid if all the required information is not completed on the permit, or the customer identification number has been changed or altered in any manner.

**(12) SPECIAL DISEASED DEER REPLACEMENT PERMITS.** The department may provide free replacement permits issued under s. 29.177, Stats., to hunters who harvest deer that are suspected of being diseased, provided that the entire deer is surrendered to the department or is disposed of as directed by the department. Each special permit shall be:

(a) Issued by a department employee or a designated agent.

(b) Issued to the hunter harvesting and tagging the suspect deer.

(c) Issued for the type of deer authorized on the permit or license used to harvest and tag the suspect deer.

**NR 10.111 Elk population management. (1) ELK MANAGEMENT SYSTEMS.** (a) The department shall manage the state elk population by:

1. Establishing elk management zone boundaries within the state.

2. Establishing elk population goals for each elk management zone.

3. Monitoring the performance of the elk population within each elk management zone.

4. Establishing elk hunting seasons and annual harvest quotas with the objective of maintaining elk populations at the established elk population goals for each elk management zone.

(b) In addition to the management objectives listed under par. (a), the department may trap and relocate elk within the state to establish new elk herds and management zones.

(2) ELK MANAGEMENT UNITS. The elk management zone boundaries are described in s. NR 10.37. Unit boundaries shall be readily identifiable features of the landscape such as roads and rivers. When road boundaries are used, the department shall give priority to use of numbered and lettered highways.

(3) ELK POPULATION GOALS. (a) The overwinter elk population goal for elk management zones A and B as described in s. NR 10.37 shall be expressed as the total number of elk per zone as follows:

Zone	Population Goal
A	600
B	800

(b) The department shall manage the elk population in Zone X, as described in s. NR 10.37, at a population level of zero elk. If the department determines that elk are causing agricultural damage, are a nuisance or are frequenting an area in Zone X, the department shall remove the elk in a manner determined by the department, in accordance with the procedures outlined ss. NR 12.10 and 12.15 and may include trapping and relocating, hazing, hunting or shooting.

(c) If the department determines that hunting is an appropriate removal method for elk subject to par. (b), the department may designate Zone A or B elk tags as being valid on specified properties in Zone X, during the elk season.

(4) ANNUAL ANTLERLESS ELK KILL QUOTAS. (a) *Annual population estimate.* The overwinter elk population goal shall be determined based on biological, ecological and sociological factors, including: reproductive success, winter severity, herd age and sex structure, non-hunting mortality, and agricultural damage.

(c) *Quota adjustment in ceded territory.* For the elk management units in the ceded territory as defined in s. NR 13.02 (1), expected tribal harvest shall be deducted from the elk kill quota established in par. (b).

(5) ELK LICENSES. (a) *Purpose.* The department may issue elk licenses in numbers to assure maintenance of elk populations for each zone indicated in sub. (3).

(b) *Bull elk tag formula.* The department shall determine the number of bull elk tags which shall be issued by the formula:

$$\text{Number of bull elk tags available} = \text{total elk population in Zones A and B} \times 5\%$$

(c) *Antlerless elk tag formula.* The department shall determine the number of antlerless elk tags which shall be issued at a level that will maintain the elk population goal established for each elk management zone listed in sub. (3).

(6) LICENSE ISSUANCE. (a) *License requirements.* Elk hunting licenses may only be issued to those who have earned a certificate of accomplishment under s. 29.595, Stats., and have obtained authorization for either a bull tag or antlerless elk tag. Successful applicants will be limited to one elk license per lifetime as established in s. 29.182 (4m), Stats. The department may reissue an elk license if the license is returned or if the applicant fails to or cannot comply with s. 29.182, Stats. Selection shall be by random drawing.

(b) *Success rate formula.* Hunter success rates used to compute the number of elk licenses to be issued for each zone shall be those calculated by the department from annual elk season harvest reports except where no previous history of success rates exist. In

establishing licenses for a zone without an adequate history of licenses, the department shall estimate an anticipated success rate. The license rate formula is:

$$\text{Hunter success rate} = \frac{\text{Number of elk harvested}}{\text{Number of licenses issued}}$$

(c) The number of elk licenses to be issued to harvest the desired number of elk shall be based on the hunter success rates from previous seasons. The license number formula is:

$$\text{License number} = \frac{\text{Elk to be harvested}}{\text{Hunter success rate}}$$

(7) APPLICATION PROCEDURE. Applications for elk licenses shall be on forms provided by the department. Applications shall be postmarked no later than April 10 or received by a department service center location no later than April 10.

**Note:** The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates are published in news releases, the department Web site at [www.dnr.wi.gov](http://www.dnr.wi.gov), license outlet handouts, and pertinent regulation pamphlets. Department service center office hours may vary by location.

**NR 10.12 Migratory game bird hunting.** (1) PROHIBITED METHODS. No person shall hunt any migratory game bird by any of the following methods:

(a) *Sinkbox.* From or by means, aid or use of a sinkbox or any other type of low floating device, having a depression affording the hunter a means of concealment beneath the surface of the water.

(b) *Boats.* From any boat or craft other than those propelled by paddle, oar or pole. When motors or sails are attached to the boat, the motor shall be completely shut off and the sail furled, and the boat's progress stopped before a firearm may be loaded.

(c) *Structures.* From any pier, dam, dock or similar structure, except disabled persons under the authority of a class A permit issued by the department.

(d) *Rallying.* By the use or aid of any water, air or motor-driven land conveyance used for the purpose of or resulting in stirring up, driving or rallying.

(e) *Bird calls.* By the use or aid of recorded or electrically amplified bird calls or sounds or imitations thereof, or while in possession of any type of device that produces recorded or electronic amplifications of bird calls or sounds.

(f) *Live decoys.* By using directly or indirectly any live tame or captive ducks or geese for decoy purposes regardless of the distance intervening between any such live decoys and the position of the hunter. All live tame or captive ducks and geese shall be removed for a period of 10 consecutive days prior to hunting, and confined within an enclosure which substantially reduces the audibility of their calls and totally conceals these live birds from the sight of migratory waterfowl.

(g) *Decoy use.* By the use or aid of decoys which are or have been:

1. Placed beyond 200 feet from the blind or cover in which the hunter is located.
2. Placed in the water more than one hour before the open hunting time.
3. Left in the water more than 20 minutes after the close of hunting time.
4. Left in the water unattended.

(h) *Baiting.* By the aid of baiting as described by the U.S. fish and wildlife service in 50 CFR 20.11 and 20.21(i).

(2) POSSESSION. No person shall possess any live or crippled migratory game bird reduced to possession by means of hunting. Such bird shall be immediately killed and become a part of the daily bag limit.

(3) OPEN WATER RESTRICTIONS. No person may hunt waterfowl in open water from or with the aid of any blind which may include any boat, canoe, raft, contrivance or similar device except:

(a) *Mississippi river*. Blinds in any of the waters of the Mississippi river and adjoining counties provided the blinds are securely anchored and located not more than 100 feet from any shoreline including islands. Blinds in open water in Grant county and the Lake Pepin portions of the Mississippi river are permitted regardless of the distance from shore provided the blinds are securely anchored.

(b) *Great Lakes and Big Green lake*. Blinds in open waters of Big Green lake, Lake Superior, Lake Michigan and Green Bay beyond 500 feet of any lake or bay shoreline. Blinds do not have to be anchored in these areas.

(c) *Lake Winnebago and Petenwell flowage*. Blinds in open waters of Lake Winnebago and Petenwell flowage (north of state highway 21 and south of state highway 73) if more than 1,000 feet from any shoreline including islands provided blinds are securely anchored.

(d) *Blind removal*. All open water blinds shall be removed at the close of hunting hours each day.

**(4) SPECIAL BLIND RESTRICTIONS.** The department may restrict hunters to certain blind locations within the Collins, Eldorado, Grand River, Pine Island and Theresa state wildlife areas by posted notice. If posted, maps shall be provided by the department indicating where blind sites are located. The following blind restrictions apply to goose hunting in the Horicon zone beginning in 2011:

(a) *Zone restrictions*. On any land within the Horicon intensive management subzone established in s. NR 10.31 (3) (b), no person may hunt geese except from a blind unless the person is a disabled person located no more than 20 feet from the blind and in possession of a class A permit issued by the department, except that no person is required to hunt geese from a blind during the early goose hunt established in s. NR 10.01 (1) (g) 1. L.

**Note:** Section NR 10.31 (3) (b) was repealed effective 7-1-10.

(b) *Hunter limits*. No more than 2 hunters may occupy any blind at one time nor may any person hunt waterfowl from a blind placed within 200 yards of any other blind occupied by one or more waterfowl hunters or within 100 yards of the property boundary on which the blind is located.

(c) *Game retrieval*. Downed game birds may be retrieved outside blinds with the aid of guns and dogs or by hand.

**(5) TAKING METHODS.** No person shall hunt any migratory bird:

(a) *Guns and devices*. With a trap, snare, cable restraint, net, rifle, pistol, crossbow other than as authorized in ss. 29.171 and 29.193 (2) (cr) 2. and 3., Stats., swivel gun, punt gun, battery gun, machine gun, fishhook, poison, drug, explosive, stupefying substance or shotgun of a larger bore than a no. 10 gauge.

**Note:** The ss. 29.171 and 29.193 (2) (cr) 2. and 3., Stats., references authorize disabled persons under department permit and resident senior citizens to hunt any migratory bird on which an open season is established in s. NR 10.01 (1) with crossbows meeting s. 29.171, Stats., standards.

(b) *Shotgun capabilities*. With any automatic-loading or hand-operated repeating shotgun capable of holding more than 3 shells the magazine of which has not been cut off or plugged with a one-piece filler incapable of removal without disassembling the gun so as to reduce the capacity of said gun to not more than 3 shells at one time in the magazine and chamber combined.

(c) *Legal means*. By any means other than a shotgun fired from the shoulder or a bow and arrow, or by falconry.

(d) *Non-toxic shot requirements*. While hunting waterfowl, snipe, rails, moorhens and coot within any areas of the state, or mourning doves on lands which are under the management, supervision and control of the department, no person may:

1. Take, catch, kill or pursue waterfowl, mourning doves, snipe, rails, moorhens and coot with any shot, either in shotshells or as loose shot for muzzle-loading, other than non-toxic shot.

2. Possess any shotshell or muzzle-loading firearm loaded with any material other than non-toxic shot.

**(6) TAGGING.** No person may give, put or leave migratory game birds at any place, other than at that person's permanent abode, or in the custody of another person unless the birds are

tagged individually or collectively with tags bearing the following information:

- (a) The hunter's signature,
- (b) The hunter's address,
- (c) The total number of birds tagged, by species, and
- (d) The dates the birds were killed.

**Note:** Tagging is required if the birds are being transported by another person for the hunter, or if the birds have been left for cleaning, storage (including temporary storage), shipment, or taxidermy services.

**(7) DRESSING.** No person may completely dress any migratory game bird while in the field or during transportation from the field. The head or one fully feathered wing shall remain attached to all migratory game birds while in the field or during transportation from the field to the person's permanent abode or a preservation facility.

**(8) SHIPMENT.** No person may ship migratory game birds unless the package is marked on the outside with:

- (a) The name and address of the person sending the birds,
- (b) The name and address of the person to whom the birds are being sent, and
- (c) The number of birds, by species, contained in the package.

**(9) IMPORTATION.** (a) One fully-feathered wing shall remain attached to all migratory game birds being transported between the port of entry and the possessor's permanent abode or to a preservation facility.

(b) No person may import migratory game birds belonging to another person.

**(10) WATERFOWL STAMP.** No person 16 years of age and older may hunt for waterfowl without a valid state waterfowl stamp approval unless the person is carrying a valid conservation patron license, senior citizen recreation card, free military small game license or first-year hunter education certificate.

**Note:** Violation of state migratory game bird regulations is also a violation of federal regulations. Importation restrictions do not prohibit the importation of legally taken, fully feathered migratory game birds for mounting purposes by a taxidermist holding a valid federal permit and licensed by the U.S. department of agriculture to decontaminate birds.

**(11) HARVEST INFORMATION PROGRAM.** Before hunting any migratory game birds each year, hunters shall register with the department by supplying their names, addresses, date of birth and other necessary information requested by the department in a manner prescribed by the department. No individual may hunt any species of migratory game bird until registered with the department and all hunters must have in their possession proof of registration while hunting migratory game birds.

**(12) WATERFOWL BLIND IDENTIFICATION.** No person may maintain, occupy or use a blind situated on state-owned property for hunting waterfowl unless the owner's name, address and customer identification number, in the English language and in lettering one-inch square or larger, is affixed permanently to the blind. The name and address shall be readily visible on the blind and shall be kept legible at all times.

**NR 10.125 Canada goose hunting.** (1) PERMIT REQUIREMENTS. (a) *Permit possession required.* No person may hunt Canada geese in any area of the state without having on his or her person a valid Canada goose hunting permit.

(b) *Maximum allowable harvest.* The total number of Canada goose permits and carcass tags issued by the department annually under this section and under s. NR 19.84 shall be based upon the maximum allowable harvest assigned by the U.S. fish and wildlife service. The assigned harvest shall be distributed within established zones and by time periods based upon historical data on the distribution of geese within the state and hunter success rates.

(c) *Validity.* All permits are valid only in the zones and for the time periods specified on the permit during the open season established for Canada geese. The department shall use the following procedure when specifying the permit zones:

1. If the maximum allowable harvest is 160,000 birds or less, all permits shall be restricted to one zone.

2. If the maximum allowable harvest is between 160,000 and 210,000 birds, the department may:

a. Issue Horicon and Collins zone permits that are also valid for the exterior zone during a time period specified by the department.

b. Issue exterior zone permits that are also valid for the Horicon zone during a time period specified by the department.

c. Establish a permit processing deadline for exterior zone permits receiving the 2 zone authorization described under subd. 2. b.

3. If the maximum allowable harvest exceeds 210,000 birds, all permits shall be valid in any zone.

(d) *Permit validation procedures.* When a Canada goose is killed and before it is carried by hand or transported in any manner, the hunter shall validate the permit by slitting, tearing or punching holes in the permit in the manner indicated by the department. Failure to follow the validation procedure invalidates the permit and renders any goose in the person's possession illegal.

(2) APPLICATION AND ISSUANCE REQUIREMENTS. (a) *Forms.* Applications shall be on forms supplied by the department.

(b) *Deadlines.* 1. All applications for the Horicon, Collins and Exterior zones shall be postmarked no later than the deadline dates indicated on the forms or received by a department service center location on that date to be considered for selection. The annual application deadlines may not be sooner than July 1.

**Note:** The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates are published in news releases, the department Web site at [www.dnr.wi.gov](http://www.dnr.wi.gov), license outlet handouts, and pertinent regulation pamphlets. Department service center hours may vary by location.

2. Exterior zone and early goose hunt subzone permits may be obtained at a license vendor or department service center location throughout the open season.

**Note:** Department service center office hours may vary by location.

(c) *Application limitations.* 1. No person may submit more than one application per year except that:

a. Persons who submitted an invalid permit application for the Collins or Horicon zones may reapply, provided the goose season is open, for an Exterior zone permit.

b. Persons applying for an early goose hunt subzone permit may also apply for a Collins, Horicon, or Exterior zone permit.

2. If 2 or more persons wish to hunt together in the Collins or Horicon zones, each applicant shall complete and submit an application form. A group application shall be considered one application.

(d) *Selection preference.* When applications exceed the number of permits available, successful applicants shall be randomly selected with first preference given to persons who unsuccessfully applied for a permit during the previous year.

(e) *Undersubscribed zones.* If the number of permit applications is less than the number of permits available for any time period, the department may issue the remaining permits to successful applicants by random selection.

(f) *Permit limits.* The department may not issue more than 425 permits for any time period for the Collins zone.

(3) SPECIAL REQUIREMENTS. Unless otherwise directed by the department, the following requirements apply to the Horicon and Collins zones:

(a) *Tagging.* When a Canada goose is killed within Horicon and Collins zones, the hunter shall:

1. Completely attach and seal the permit, utilizing its own adhesive, to the neck or leg of the goose before it is carried by hand or transported in any manner.

2. Keep the permit attached to the goose until the meat has been processed for cold storage or human consumption.

(b) *Possession.* No person may possess or transport a dead wild Canada goose unless it is tagged with a validated permit.

(c) *Transportation restrictions.* The hunter shall transport any tagged goose in a motor vehicle so that the permit attached to the goose cannot be handled or manipulated by any occupant of the vehicle.

(4) REPORTS. (a) *Harvest reports.* The department may require each successful exterior zone and early goose hunt subzone applicant to submit a harvest report in a manner prescribed by the department within 48 hours of harvesting a goose.

**Note:** The Canada goose harvest reports are used to calculate total harvest estimates in those zones where hunter participation is unlimited.

(b) *Season reports.* The department may require any permit holder to provide the department a goose hunting report. The selected hunter shall be required to complete the report and mail it within 48 hours of receipt.

**Note:** The hunting report forms will be mailed to certain hunters only.

(5) BAG AND POSSESSION LIMITS. (a) *Bag limit.* The aggregate daily bag limit for persons hunting in both the exterior zone and a subzone within the exterior zone in the same day is equal to the larger of the respective daily bag limits established in s. NR 10.01 (1) (g).

(b) *Daily possession limit.* No person may possess or transport more than the daily bag limit or aggregate daily limit, whichever applies, of migratory game birds, tagged or not tagged, at or between the place where taken and either the person's permanent abode or temporary or transient place of lodging; or a commercial preservation facility.

(6) SEASON CLOSURE. The secretary of the department may close a portion or all of any Canada goose season established in s. NR 10.01 (1) (g) upon a finding by the department that the harvest for that season will exceed the level authorized by U.S. fish and wildlife service. Closure shall become effective upon issuance of an order and publication in the official state newspaper.

**NR 10.13 Furbearing animals. (1) PROHIBITED METHODS.** No person may:

(a) *Hunting.* Hunt any beaver, fisher, mink, muskrat, or otter with the aid of any spear, gun or dog except that:

1. The owner or occupant of any land and members of their families may shoot or trap beaver on their respective lands without license as established in s. 29.337, Stats.

2. Agents or employees possessing written authorization from the landowner, land lessee or responsible governmental body may use firearms to shoot beaver under s. NR 12.10.

(b) *Trapping.* 1. 'Traps.' Set out or place traps, snares or cable restraints, whether set or sprung, during the closed season.

2. 'Bait or scent.' Set out or place any bait or scent for attracting furbearing animals during the closed season. During the open season, no person may use sight exposed bait consisting of feathers, animal flesh, fur, hide or entrails within 25 feet of any trap, snare or cable restraint.

4. 'Watersets.' Take, capture or kill, or attempt to take, capture, or kill any furbearing animals at any time by means of watersets except during that period when and in those areas where there is an open season for trapping muskrat, beaver, or otter or when using a commercially manufactured, enclosed trigger trap. In addition, persons removing beaver under s. NR 12.10 may use watersets.

5. 'Trap, snare, and cable restraint placement.' Set any traps, snares and cable restraints at any time within 15 feet of any beaver dam, except when trapping under the landowner authority established by s. 29.337, Stats., or with a commercially manufactured, enclosed trigger trap.

**Note:** The rule exception allows trapping on beaver dams by landowners.

6. 'Trap, snare, and cable restraint use.' Set, place, operate or possess while trapping, any trap other than a steel jawed trap, enclosed trigger trap, cage or box trap, body gripping trap, snare or cable restraint for the purpose of taking, capturing, or killing furbearing animals. Cage or box traps shall be constructed so that after an animal has been captured, no additional animals may enter the trap until the captured animal is removed and the trap is reset.

7. 'Artificial structures.' No person shall construct or place on the ice of any of the waters of this state any artificial house or den for the purpose of taking, catching, or killing any fur-bearing animals, or place or set therein any trap or traps of any kind which might take, catch, or kill fur-bearing animals.

8. 'Body-gripping type traps.' a. Set, place, or operate any body-gripping type trap greater than 75 square inches measured from the maximum outside points on the width and height of the jaws of a trap that has not been set, unless one-half of the set trap is located underwater at all times.

b. Set, place or operate any body-gripping type traps greater than 60 square inches or less than 75 square inches measured from the maximum outside points on the width and height of the jaws of a trap that has not been set: as a water set unless one-half of the trap is located underwater at all times; as an elevated set unless the trap is placed at least 5 feet above the surface; as a baited and/or scented set in or on the ground unless the trap trigger is within an enclosure that provides openings no greater than 50 square inches for a 7 inch minimum recess or an 8 inch height x 10 inch width opening with a 10 inch minimum recess from the enclosure openings; as an unbaited and/or unscented trail set in or on the ground

unless the trap is within an enclosure that provides openings no greater than 10 inches in height and 10 inches in width and is recessed a minimum of 15 inches from the enclosure openings; or as a bottom entry enclosure set unless the entire opening of the enclosure is no more than 7 inches above the surface. The measurement to the surface is the distance to the first surface beneath the trap or opening, where the surface is ground, ice, crusted or packed snow or any other hard material. For the purposes of this paragraph, an enclosure means any device that creates a barrier to the trap allowing entry only through designated openings.

c. Set, place, or operate any body-gripping type trap less than or equal to 60 square inches with a vertical measurement of greater than 7 1/2 inches when set. The vertical measurement is taken between the widest vertical points on the trap in the set position.

9. 'Steel jawed traps' No person may set, place or operate any steel jaw trap with a spread width of more than 8 inches.

10. 'Toothed traps.' No person may set, place or operate any steel jawed trap with teeth unless it is located completely underwater at all times.

11. 'Minimum waterset.' Except when the muskrat or mink season is open, set, place or operate any waterset smaller than 5 1/2" jaw spread for steel jaw traps or less than or equal to 60 square inches measured from the maximum outside points on the width and height of the jaws of a trap that has not been set, for body-gripping type traps.

12. 'Trap placement.' Set, place or operate any body-gripping type trap greater than 60 square inches measured from the maximum outside points on the width and height of the jaws of a trap that has not been set, or any snare or cable restraint regardless of the size of the noose, in the following locations:

a. Within 3 feet of any federal, state or county road rights-of-way culvert unless completely submerged in water.

b. Within 3 feet of any woven or welded wire mesh type fence.

c. Within 100 yards of any building devoted to human occupancy without the owner's consent.

13. 'Snare and cable restraint specifications.' Set, place or operate any snare or cable restraint unless they conform to the following specifications:

a. All snares and cable restraints shall be non-spring activated, constructed of galvanized aircraft cable and include a swivel.

b. All snares and cable restraints shall be tagged with a metal tag stamped with the name and address of the operator.

14. 'Snare specifications.' Set, place or operate any snare unless the noose cable and noose attachments conform to the following specifications and as authorized under subd. 13.:

a. Cable length shall be 5 feet or less with a diameter not exceeding 1/8".

b. At least one-half of the set snare is located underwater at all times.

15. 'Cable restraints specifications.' Set, place or operate any cable restraint except for bobcat from December 1 to January 31 and fox and coyotes from December 1 to February 15, dates inclusive, provided the cable restraint conforms to the following specifications in addition to those under subd. 13.

a. Cable length of 7 feet or less, with a diameter of 3/32 inch or larger, consisting of multiple strands of wire.

b. Cable stops shall be affixed to the cable to ensure that the portion of the cable which makes up the noose loop may not be longer than 38 inches when fully open, or less than 8 inches when fully closed.

c. The bottom of the set restraint cable loop may not be less than 6 inches nor greater than 12 inches above the surface. The measurement to the surface is the distance to the first surface beneath the bottom of the set cable restraint where the surface is ground, ice, crusted or packed snow or any other hard material.

d. A cable restraint shall include a breakaway device or stop rated at 285 pounds or less; a reverse-bend washer lock with a minimum outside diameter of 1 1/4 inches; and staked in a manner that does not allow the restraint device to reach any part of a fence, rooted woody vegetation greater than 1/2" in diameter or any other immovable object or stake that could cause entanglement.

16. 'Incidental take of raccoons with a cable restraint.' No person may retain any raccoon taken incidentally with a cable restraint during the period when the use of cable restraints is authorized under subd. 15. a., unless it is during the open season for raccoons listed in s. NR 10.01 (3) (b).

(2) MOLESTING. While hunting or trapping, no person shall:

(a) *Raccoon*. Molest any raccoon den or den trees.

(b) *Mink*. Molest any mink den.

(c) *Muskrat and beaver*. Molest any muskrat house, muskrat feeding house, or beaver dam. However, beaver dams may be altered by persons removing beaver causing damage under s. NR 12.10.

(3) TRAPPING HOURS. (a) *Legal time period*. The trapping hours shall be from 4:00 a.m. to 8:00 p.m.

(b) *Illegal time period*. No person may set or reset any trap or traps or attend any trapline from 8:00 p.m. to 4:00 a.m.

(c) *Set tending interval*. 1. Non-drowning sets shall be tended at least once each day and any animal captured shall be removed from the set.

2. Drowning sets shall be tended within a 4-day period following the last tending of the set. Any animal captured shall be removed from the set. Water levels shall be monitored to ensure effective drowning sets.

3. Under ice sets are exempt from the checking periods.

(4) TRAP PLACEMENT. "Lawfully placed" for the purposes of s. 29.331 (5) (a), Stats., refers to when the trap was initially placed by the owner or operator of the trap.

**NR 10.145 Bobcat, fisher and otter.** No person may hunt or trap, or attempt to hunt or trap, any bobcat, fisher or otter unless he or she possesses a current and valid permit from the department and any associated pelt tags for the area or unit in which he or she is hunting or trapping.

(1) HARVEST QUOTAS. The number of bobcat, fisher and otter permits issued annually shall be determined by the department. The department shall base its determination upon:

(a) Population estimates and trends.

(b) The population goals established in sub. (2).

(c) Trends in hunter or trapper success rates.

(2) POPULATION GOALS. (a) *Fisher*. The preharvest population goal for fisher management zones A, B, C, and D described under s. NR 10.01 (4) (dm) is one fisher per 2 square miles of fisher range.

(b) *Bobcat*. The preharvest population goal north of the state highway 64 is 2,500 bobcat plus-or-minus 20%.

(c) *Otter*. The statewide preharvest population goal is 13,000 otter.

(3) APPLICATION AND ISSUANCE PROCEDURES. (a) *Forms*. Applications for permits shall be made on forms provided by the department.

(b) *Deadlines*. All permit applications shall be postmarked no later than the deadline dates indicated on the form or received by a department service center location on those dates to be considered for selection. The annual application deadlines may not be sooner than July 1.

**Note:** The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates are published in news releases, the department Web site at [www.dnr.wi.gov](http://www.dnr.wi.gov), license outlet handouts, and pertinent regulation pamphlets. Department service center hours may vary by location.

(c) *Application limit*. No person may apply for more than 1 permit for each species.

(d) *Random selection*. If the number of applications for permits exceeds the number of permits available, successful applicants shall be randomly selected.

(e) *Pelt tag issuance*. The department shall issue pelt tags to successful permit applicants as follows:

1. 'Oversubscribed zones.' If the number of applications for permits is equal to or more than the number of permits available, each successful applicant shall be issued a pelt tag.

2. 'Undersubscribed zones.' If the number of applications for permits is less than the number of permits available, the department may:

a. Randomly issue successful applicants additional pelt tags; or

b. Make available to any person the remaining permits on a first-come, first-served basis; or

c. Use both procedures described in subd. 2. a. and b.

(f) *Validity*. All permits are valid only in the area and for the time period specified on the permit during the open season established for bobcat.

(4) TAGGING REQUIREMENTS. (a) *Field tagging*. When a bobcat, fisher or otter is killed and before it is carried by hand or transported in any manner, the person who trapped or killed the bobcat, fisher or otter shall immediately validate their pelt tag by slitting, tearing or punching the pelt tag in the manner indicated by the department and attach and seal the pelt tag to the animal in the manner indicated by the department. Failure to validate and attach and seal the pelt tag invalidates the permit. No person may tag a bobcat, fisher or otter that was trapped or killed by another.

(b) *Transportation and possession*. No person may transport or possess an unskinned bobcat, fisher, otter carcass, or a raw pelt of these species unless it has been tagged in accordance with par. (a).

(c) *Tag retention*. The pelt and registration tag shall remain attached to the pelt until removed by a fur dresser or taxidermist at time of preparation.

(5) RECORDING OF HARVEST. (a) 1. 'Bobcat, fisher and otter.' Unless authorized by the department, each person who has killed a bobcat, fisher or otter during the respective open season shall exhibit the pelt, separated from the rest of the carcass, to an authorized department representative no later than 5 days after the month of harvest.

(b) The department may require each person exhibiting a bobcat, fisher or otter pelt to exhibit and provide the skinned carcass to the department.

(c) *Department tagging.* The department shall inspect the pelt, and attach and lock a registration tag to the head portion of the pelt of all lawfully taken and possessed bobcat, fisher and otter.

(d) *Mounting.* Persons who intend to have a bobcat, fisher or otter mounted by a taxidermist may exhibit the bobcat, fisher or otter to the department for registration in whole carcass condition without separating the pelt and shall surrender the skinned carcass to the department within 30 days of registration.

(6) POSSESSION AND TRANSFER RESTRICTIONS. No person may:

(a) Possess raw bobcat, fisher or otter pelts after the 5th day following closure of the open season for each species and the respective opening date of the next trapping or hunting season without a registration tag attached and locked to the head of the animal.

(b) Transfer, give, trade, sell or purchase a raw pelt or unskinned carcass of any bobcat, fisher or otter pelt without a registration tag being attached and locked to the head portion of the pelt by the department in accordance with sub. (5) (c).

(7) SEASON CLOSURE. The secretary of the department may close a portion or all of any bobcat, otter or fisher season established in s. NR 10.01, upon a finding by the department that the harvest for that season will exceed the level authorized by the department under sub. (1). Closure shall become effective upon issuance of an order and publication in the official state newspaper.

(8) REPORTS. (a) *Harvest reports.* The department may require each successful bobcat permit applicant to submit a harvest report in a manner prescribed by the department within 24 hours of harvesting a bobcat

## NR 10.26 Sharp-tailed grouse hunting. (1) PERMITS

AND CARCASS TAGS. (a) *Authorization to hunt.* No person may hunt sharp-tailed grouse unless he or she possesses a valid sharp-tailed grouse hunting permit and carcass tag issued by the department, in addition to an approval authorizing small game hunting.

(b) *Permit application procedures.* Persons applying to hunt sharp-tailed grouse shall apply for a sharp-tailed grouse hunting permit as follows:

1. Application for a sharp-tailed grouse hunting permit shall be made on an application form provided by the department.

2. All applications shall be postmarked no later than the deadline dates indicated on the application form or received by a department service center location on those dates to be considered for selection.

**Note:** The department conducts extensive publicity on the application deadlines beginning several months prior to any deadline. Application deadline dates are published in news releases, the department Web site at [www.dnr.wi.gov](http://www.dnr.wi.gov), hunting license outlet handouts, and pertinent hunting regulation pamphlets. Department service center hours may vary by location.

3. If a maximum of 4 persons wish to hunt together, each shall complete an application form for individual permits and submit them together in a single envelope clearly marked "group application" on the outside. The group application shall be treated as one application for purpose of random selection or consideration for

a permit. If a group contains persons who unsuccessfully applied for sharp-tailed grouse hunting permits in the previous year, and persons who successfully applied or did not apply for sharp-tailed grouse permits the previous year, the group will be placed in the preference category of those who successfully applied in the previous year.

(c) *Permittee selection procedures for oversubscribed units.* If the number of applications for permits for a management unit exceeds the number of available permits in that unit, successful applicants shall be randomly selected according to the preference system established in s. 29.192 (2), Stats.

(d) *Carcass tag issuance.* 1. 'Oversubscribed units.' Each successful applicant for a sharp-tailed grouse hunting permit shall be issued a carcass tag by the department.

2. 'Undersubscribed units.' If the number of applications is less than the available permits for a management unit, the department may:

a. Randomly issue successful applicants additional carcass tags; or

b. Make available to any person the remaining permits for the unit on a first-come, first-serve basis; or

c. Use both procedures described in subd. 2. a. and b.

(e) *Permit and carcass tag restrictions.* 1. Permits and carcass tags issued under this section are only valid for the unit indicated on the permit during the open season established for sharp-tailed grouse.

2. Permits or carcass tags issued under this section may not be transferred to or used by any person other than the permittee.

(2) TAGGING PROCEDURE. (a) *Carcass tag use.* When a sharp-tailed grouse is killed and before it is carried by hand or transported in any manner, the hunter shall:

1. Immediately validate the carcass tag in the manner indicated by the department on the carcass tag. Failure to follow the validation procedure in this manner invalidates the tag.

2. Completely attach and seal the carcass tag around the leg of the sharp-tailed grouse in the manner indicated by the department on the carcass tag.

(b) *Transportation and possession.* No person may possess or transport a sharp-tailed grouse unless the person has lawfully killed and tagged it.

(3) HARVEST QUOTA. The number of sharp-tailed grouse hunting permits or carcass tags issued annually for units described in s. NR 10.28 shall be based on the annual sharp-tailed grouse harvest quotas established for these units. The department shall base its determination of the annual harvest quota for each unit upon:

(a) The estimated size and distribution of sharp-tailed grouse populations.

(b) Trends in sharp-tailed grouse hunter numbers and hunter success rates.

(c) A maximum allowable harvest of no more than 25% of the projected fall population.
