Analysis by the Legislative Reference Bureau

Under current law, certain health care providers are required to carry health care liability insurance with liability limits of at least \$1,000,000 for each occurrence and at least \$3,000,000 for all occurrences in a policy year. If a medical malpractice claim against a health care provider who is subject to the health care liability insurance requirements exceeds the limits of the provider's health care liability insurance, the injured patients and families compensation fund pays the portion of the claim that exceeds the limits. The injured patients and families compensation fund is funded by assessments paid by the health care providers who are subject to the health care liability requirements.

Health care providers who are currently subject to the health care liability requirements include physicians, nurse anesthetists, partnerships composed of physicians or nurse anesthetists, corporations that operate for the primary purpose of providing the medical services of physicians or nurse anesthetists, cooperative sickness care associations, and such entities as hospitals, ambulatory surgery centers, and nursing homes whose operations are combined as a single entity with a hospital. This substitute amendment adds, as another type of health care provider

that is subject to the health care liability requirements, any organization or enterprise organized and operated in this state for the primary purpose of providing the medical services of physicians or nurse anesthetists.
