INSURANCE

Application of manufacturer discounts

Health insurance policies and plans often apply deductibles and out-of-pocket maximum amounts to the benefits covered by the policy. A deductible is an amount that enrollees in the policy must pay out of pocket before attaining the full benefits of the plan. An out-of-pocket maximum amount is a limit specified by the policy or plan on the amount that enrollees have paid themselves, and once this limit is reached, the policy or plan covers the benefit entirely. This bill requires health insurance policies that offer prescription drug benefits and self-insured health plans to apply the amount of discounts that a manufacturer of a brand name drug provides to reduce the amount of cost sharing that is charged to any enrollee for those brand name drugs to this out-of-pocket maximum amount and deductible for the enrollee. This requirement applies for brand name drugs that have no generic equivalent and for brand name drugs that have a generic equivalent but that the enrollee has prior authorization or physician approval to obtain. Health insurance policies are referred to in the bill as disability insurance policies.

This proposal may contain a health insurance mandate requiring a social and financial impact report under s. 601.423, stats.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

***NOTE: This draft reconciles LRB-0581/P1 and LRB-0884/P1.
