Prohibiting discrimination in broadband and broadband subscriber rights

The bill prohibits a broadband service provider from denying access to a group of potential residential customers because of their race or income. Under the bill, DATCP has authority to enforce the prohibition and to promulgate related rules. The bill also authorizes any person affected by a broadband service provider who violates the prohibition to bring a private action.

The bill also establishes various requirements for broadband service providers, including the following: 1) broadband service providers must provide service satisfying minimum standards established by PSC, and subscribers may terminate contracts if the broadband service provider fails to satisfy those standards; 2) broadband service providers must provide service as described in advertisements or representations made to subscribers; 3) broadband service providers must repair broadband service within 72 hours after a subscriber reports a broadband service interruption that is not the result of a major system-wide or large area emergency; 4) broadband service providers must give subscribers credit for interruptions of broadband service that last more than four hours in a day; and 5) broadband service providers must give subscribers at least 30 days' advance written notice before instituting a rate increase.

The bill also requires each internet service provider in this state to register with PSC.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
