Cost-sharing cap on insulin

This bill prohibits every health insurance policy and governmental self-insured health plan that cover insulin and impose cost sharing on prescription drugs from imposing cost sharing on insulin in an amount that exceeds \$35 for a one-month supply. Current law requires every health insurance policy that provides coverage of expenses incurred for treatment of diabetes to provide coverage for specified expenses and items, including insulin. The required coverage under current law for certain diabetes treatments other than insulin infusion pumps is subject to the same exclusions, limitations, deductibles, and coinsurance provisions of the policy as other covered expenses. The bill's cost-sharing limitation on insulin supersedes the specification that the exclusions, limitations, deductibles, and coinsurance are the same as for other coverage.

This proposal may contain a health insurance mandate requiring a social and financial impact report under s. 601.423, stats.
