### ANALYSIS OF PROPOSED RULES

Statutory Authority: ss. 101.02 and 101.13, Stats.

Statutes Interpreted: s. 101.13, Stats.

The proposed rule will exempt in government-owned or operated buildings or facilities elevator access to certain floor levels above or below the accessible ground floor providing these floor levels are less than 500 square feet, are not open to the general public and house no more than 5 people. Examples of these type of floor levels are drawbridge towers and boat traffic towers, lock and dam control stations, train dispatching towers and press box facilities. The reason for the proposed rule change is to make the emergency rule issued on May 15, 1998 a permanent rule. This rule benefits not only school districts, but other small state and local government buildings or facilities as well.

### SECTION 1. Comm 69.18 (2) (a) 2. c. is created to read:

Comm 69.18 (2) (a) 2. c. Government-owned or operated buildings or facilities that are less than three stories and that are not open to the general public, if the story above or below the accessible ground floor has a capacity of no more than five persons and is less than 500 square feet. The story above or below the accessible ground floor that is less than 500 square feet shall have a sign stating the maximum capacity and the sign shall be placed in a conspicuous location at the main entrance to the floor level.

Note: Examples may include, but are not limited to, drawbridge towers and boat traffic towers, lock and dam control stations, press boxes, and train dispatching towers.
