Analysis Prepared by Department of Natural Resources

- 1. Statutes interpreted.** Sections 29.014, 29.024, 29.041, 29.523, 29.526, 29.529, 29.531 and 29.533, Stats.
- 2. Statutory authority.** Sections 23.11 (1), 29.014 (1), 29.041, 29.523, 29.526, 29.529, 29.531, 29.533 and 227.11 (2) (a), Stats.
- 3. Explanation of agency authority to promulgate the proposed rules under the statutory authority.**

Section 23.11 (1), Stats., grants the department such powers as may be necessary or convenient to enable it to exercise the functions and perform the duties required of it by ch. 23, Stats., and by other provisions of law.

Section 29.014 (1), Stats., directs the department to establish and maintain conditions governing the taking of fish that will conserve the fish supply and ensure the citizens of this state continued opportunities for good fishing, and s. 29.041, Stats., provides that the department may regulate fishing on and in all interstate boundary waters, and outlying waters.

Section 29.041, Stats., authorizes the department to regulate hunting and fishing on and in all interstate boundary waters, and outlying waters.

Section 29.523, Stats., authorizes residents to use certain nets to take commercial fish on the Mississippi River.

Section 29.526, Stats., authorizes residents holding the appropriate license to take commercial fish with the use of slat nets in that part of the Mississippi River over which this state has jurisdiction.

Section 29.529, Stats., authorizes residents holding the appropriate license to take commercial fish with the use of trammel nets in that part of the Mississippi River over which this state has jurisdiction.

Section 29.531, Stats., authorizing residents holding the appropriate license to take rough fish, catfish and turtles with a set or bank pole on waters of the state where this type of gear is authorized.

Section 29.533, Stats., authorizing residents holding the appropriate license to take rough fish, catfish and turtles on certain inland waters, and to additionally take commercial fish on the Wisconsin/Iowa and Wisconsin/Minnesota boundary waters located in Wisconsin.

Finally, s. 227.11 (2) (a), Stats., expressly confers rulemaking authority on the department to promulgate rules interpreting any statute enforced or administered by it, if the agency considers it necessary to effectuate the purpose of the statute.

5. Plain language analysis of the proposed rule.

SECTIONS 1, 2, 3 and 34 of the order amend cross references found in chs. NR 20 and 24 to definitions that have been renumbered by this rule or which were incorrect.

SECTION 4 repeals and recreates the definition section in ch. NR 21. There are 8 new definitions added to this section, including bait net, buffalo net, frame net or fyke net, hoop net, lead, detrimental species, slat net or basket trap and trammel nets. Five existing definitions are revised and all others are retained but have been renumbered. Unnecessary statutory references placed in parenthesis after some definitions were removed.

SECTIONS 5 and 6 of the order correct cross references in ch. NR 21 to definitions that have been renumbered by this rule or which were incorrect.

SECTIONS 7 and 23 clarify in both ch. NR 21 and ch. NR 22 that live carp taken for use as bait may not be transported away from any waters of the state unless specifically authorized. Such movement of live fish has been prohibited under s. NR 19.05 effective November 2, 2007 as a result of new rules meant to reduce the risk of the spread of Viral Hemorrhagic Septicemia (VHS) in fish.

SECTION 8 and 24 clarify in both ch. NR 21 and ch. NR 22 that a licensed commercial fisher and their agents are restricted to commercial fishing only within the state boundaries of the state they are licensed under.

SECTIONS 9, 10, 11, 25, 26 and 30 clarify in both ch. NR 21 and ch. NR 22 that each person who is required to hold a commercial fishing license must be present at all times when any of his or her nets or setlines are set, placed, tended or operated, while still allowing the licensee to move commercial fish by boat or on the ice and to load commercial fish into trucks at a boat landing while the crew continues to load fish at the net. These sections also provide that a commercial fishing licensee's fish helpers or crew members do not need to also hold a commercial fishing license when only assisting a licensed commercial fisher, but that the commercial fisher must notify the department of the names of all such unlicensed helpers or crew members.

SECTIONS 12 and 30 amend the rules on tagging and marking commercial fishing nets to allow up to 2 commercial fishers to tag the same net when they share the use of the same net. This change however also clarifies that such nets are still not allowed to be marked with more than one flag and number at any one time.

SECTIONS 13 and 27 amend the monthly reporting requirement wording to clarify that the report shall contain all information requested on the departments report form, including the buyers name, address and phone number.

SECTIONS 14 and 28 repeal unnecessary references to the cost for tags issued for commercial fishing nets. These fees are established under ss. 29.523 and 29.563 (7) (c), Stats. SECTION 14 also clarifies that it is not legal to remove roe from a commercial fish while on the water, ice or shore, and that commercial fish shall remain intact until the fish reaches the final processing facility or place of business of the commercial fisher. This new language created in ch. NR 21 is consistent with the current rule language found in s. NR 22.11 (2m).

SECTIONS 15 and 16 amend the rules on placing or operating gill nets and seine nets within 1,000 feet of gill nets or frame nets that belong to another commercial fisher.

SECTIONS 17 and 32 clarify that either any small game or a fishing license is a valid approval for taking turtles. This change is consistent with a recent change made to s. NR 19.275 (3) (a) under clearinghouse rule CR 09-018 and which took effect March 1, 2010

SECTIONS 18 and 33 clarify that a person taking turtles on the Wisconsin-Minnesota and Wisconsin-Iowa boundary waters shall comply with the regulations of the state in whose territorial waters they are taking the turtles.

SECTION 19 of the order repeals and recreates the definition section in ch. NR 22. There are 16 new definitions added to this section, including bait net, bank pole, buffalo net, detrimental fish, drive set, drift set, frame net or fyke net, gill net, hoop net, lead, seine, seine haul, setline, slat net or basket trap and trammel nets. Two existing definitions are revised and all others are retained but have been renumbered.

SECTION 20 makes the s. NR 22.05 (1) language consistent with the language found under ch. NR 21, regarding the ability to sell or barter rough fish under one's control or possession if lawfully taken during the open season by hook and line, spear or bow and arrow.

SECTION 21 clarifies in ch. NR 22 that fishing within 200 feet of any fishway, lock or dam by any means other than hook and line is not legal. This is consistent with the restrictions found in ss. NR 20.05 (3) and 21.065.

SECTION 22 clarifies that set or bank poles are not commercial gear on the Wisconsin-Iowa boundary waters and that the same rules apply to their use on the Wisconsin portion of this water as apply to their use on non-boundary inland waters.

SECTION 27 makes a number of revisions to s. NR 22.11 so that the wording in this section is more consistent with the current s. NR 21.11.

SECTION 29 removes reference to tortoises and simply refers to these animals as turtles.

For consistency, SECTION 30 creates several new restrictions in s. NR 22.11 that currently apply to commercial fishing on the Mississippi River in the Wisconsin-Minnesota boundary waters in s. NR 21.11, but not to commercial fishing on the Mississippi River in the Wisconsin-Iowa boundary waters under ch. NR 22.

SECTION 31 amends s. NR 22.12 commercial fishing gear restrictions to make them more consistent with the commercial gear restrictions found in ch. NR 21. These new restrictions will provide for more consistency in the commercial fishing rules up and down the Mississippi River, as well as provide additional opportunity to use commercial fishing nets on this water.

6. Summary of and preliminary comparison with any existing or proposed federal regulation that is intended to address the activities to be regulated by the proposed rule.

The department is not aware of any existing or proposed federal regulation that would govern fishing in Wisconsin's boundary waters with Minnesota or Iowa.

7. Comparison of similar rules in adjacent states (Minnesota, Iowa, Illinois and Michigan).

Michigan does not border the Mississippi River and Illinois does not share a border with Wisconsin on the Mississippi or St. Croix Rivers, therefore the chs. NR 21 and 22 commercial fishing regulations are not applicable to any boundary waters shared with these states. The central issues in this rule proposal relate to establishing definitions of existing net types authorized by statute and code, and create more consistency between the commercial fishing rules on the Mississippi River, north of the Illinois state line.

Iowa – Iowa laws do not allow commercial gear to block more than one-half of a channel if less than 3 feet of water is over the net, requires commercial turtle harvesters and fish helpers to be licensed and that the commercial fisher be present any time a net is raised. Iowa prohibits commercial gear within 900 feet of a lock and dam or 300 feet of the mouth of a tributary stream. Iowa recently limited the number of setline hooks to 200.

Minnesota – Minnesota does not currently allow any hoop nets or trammel nets, prohibits shovelnose sturgeon harvest with any gear, prohibits sturgeon roe harvest, has net and setline marking similar to Wisconsin, limits the number of commercial licenses, limits the number of hooks on setlines to 400, and prohibits use of commercial gear within 900 feet of a lock and dam. Seine harvest of catfish is limited to 100 pounds per day consistent with Wisconsin-Minnesota boundary rules in Wisconsin. Minnesota requires a license for helpers.

8. Summary of the factual data and analytical methodologies that the agency used in support of the proposed rule and how any related findings support the regulatory approach chosen for the proposed rule.

This rule was not based on a technical analysis of data. It was developed in consultation with commercial fishers to address concerns regarding the lack of legal descriptions of what the varieties of nets are and inconsistency between the rules that apply to the same Wisconsin commercial fisher depending on if he or she is fishing in the waters between Wisconsin and Iowa or the waters between Wisconsin and Minnesota.

9. Analysis and supporting documentation that the agency used in support of the agency's determination of the rule's effect on small businesses under s. 227.114, Stats., or that was used when the agency prepared an economic impact report.

Small businesses engaged in commercial fishing may be affected by the rule. However, we currently have no basis for quantifying the economic impacts of the rule.

10. Effects on small business, including how the rule will be enforced.

This rule will benefit commercial fishers on the Mississippi River by providing clear descriptions of the nets that their licenses authorize them to use on this water and not leaving the types of nets open for a variety of interpretations. This rule will also benefit commercial fishers by creating more consistency in the rules regardless of which part of the river in Wisconsin they are fishing. The rule will be enforced by

department Conservation Wardens under the authority of chapters 23 and 29, Stats., through routine patrols, record audits of commercial fishers and follow up investigations of citizen complaints. Liberalization of some of the commercial fishing rules will also benefit commercial fishers such as the higher number of hooks on setlines allowed with these changes.
