Assumptions Used in Arriving at Fiscal Estimate				
The United States Department of Agriculture – Animal and Plant Health Inspection Service (APHIS)				
positively identified Emerald Ash Borer (EAB) in Door County in the Village of Fish Creek on June 10,				
2014. APHIS subsequently identified EAB in Nelson Dewey State Park, Grant County, and in the Village				
of Oakdale Monroe County on July 11 2014. On July 17 2014 APHIS identified FAB in the Town of				

of Oakdale, Monroe County, on July 11, 2014. On July 17, 2014, APHIS identified EAB in the Town of Lodi, Columbia County. This emergency rule creates a Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP) quarantine for Columbia, Door, Grant, Green, Iowa, Lafayette, Monroe and Richland Counties. A federal quarantine will be enacted approximately six to eight weeks after a formal submission by the state plant regulatory official. EAB is carried and spread by untreated ash wood products. A six week delay until enactment of the federal quarantines leaves too much time for businesses or individuals to move potentially EAB-infested material out of these eight counties to areas of Wisconsin or other states that are not infested with EAB.

EAB is an injurious exotic pest that now endangers Wisconsin's 750 million ash trees and ash resources. This insect has the potential to destroy entire stands of ash, and any incursion of EAB can result in substantial losses both to forest ecosystems and to urban trees, as well as the state's vital tourism and timber industries. The emerald ash borer has killed over fifty million trees in the Midwest and has cost several hundred million dollars in losses to the woodlot, nursery, landscape industries and municipalities. APHIS predicts the national urban impact alone from this pest may exceed \$370 billion.

DATCP has plant inspection and pest control authority under s. 94.01, Wis. Stats., to adopt rules establishing quarantines or other restrictions on the importation into or movement of plants or other materials within this state, if these measures are necessary to prevent or control the spread of injurious plant pests. A quarantine order may prohibit the movement of any pest, or any plant, pest host or pest-harboring material which may transmit or harbor a pest.

The proposed rule will do the following:

- Create a quarantine for EAB for Columbia, Door, Grant, Green, Iowa, Lafayette, Monroe and Richland Counties that prohibits the movement of all hardwood species of firewood, nursery stock, green lumber, and other material living, dead, cut or fallen, including logs, stumps, roots, branches and composted and uncomposted chips of the genus *Fraxinus* (Ash wood), out of these counties or any contiguous EAB quarantined counties.
- Provide an exemption for items that have been inspected and certified by a pest control official and are accompanied by a written certificate issued by the pest control official.
- Provide an exemption for businesses that enter into a state or federal compliance agreement. The compliance agreement describes in detail what a company can and cannot do with regulated articles.

This rule will be administered by DATCP. DATCP will have additional workload related to enforcing the quarantine but it will be able to absorb the projected workload and costs within DATCP's current budget and with current staff. The presence of EAB may produce additional workload for local governments in Columbia, Door, Grant, Green, Iowa, Lafayette, Monroe and Richland Counties, but the quarantine itself will not produce any local fiscal impact.

Long - Range Fiscal Implications

If multiple infestations are found in this state, DATCP may experience substantial costs and personnel demands for providing regulatory oversight and working with affected industries. Costs may vary, depending on the nature and scope of the infestations, and cannot be accurately predicted at this time.
