7. Fiscal Effect of Implementing the Rule		
☑ No Fiscal Effect ☐ Increase Existing Revenues	☐ Increase Costs ☐ Decrease Costs	
☐ Indeterminate ☐ Decrease Existing Revenues	☐ Could Absorb Within Agency's Budget	
8. The Rule Will Impact the Following (Check All That Apply)		
State's Economy Specific Businesses/Sectors		
☐ Local Government Units ☐ Public	c Utility Rate Payers	
☐ Small Businesses (if checked, complete Attachment A)		
9. Estimate of Implementation and Compliance to Businesses, Local Governmental Units and Individuals, per s. 227.137(3)(b)(1).		
\$0, (No implementation and compliance costs anticipated)		
10. Would Implementation and Compliance Costs Businesses, Local Governmental Units and Individuals Be \$10 Million or more Over Any 2-year Period, per s. 227.137(3)(b)(2)?		
☐ Yes ☐ No		
11. Policy Problem Addressed by the Rule		
Under the federal framework for duck hunting, the USFWS is allowing Wisconsin a 60-day restrictive scaup season in		
which no more than one scaup per day may be harvested for 15 days and no more than two scaup per day may be		

Under the federal framework for duck hunting, the USFWS is allowing Wisconsin a 60-day restrictive scaup season in which no more than one scaup per day may be harvested for 15 days and no more than two scaup per day may be harvested for 45 days. However, there is flexibility in how the restriction is applied to each harvest zone. In 2021 all three zones had the same scaup season structure of 1 scaup/day for 15 days and 2 scaup/day for the final 45 days. Public feedback gathered after the 2021 showed support to change the structure in the North and Open Water Zones, with support to retain structure in the South Zone.

This rule also adjusts and simplifies the open water restrictions on all approved inland open water hunting lakes. The Department in 2011 identified several inland lakes that would be open to open water hunting. The decision was to set the minimum distance from shore where hunters can be without having to adhere to concealment regulations to "greater than 1000 feet" as a precaution until the Department had some time to review how this opportunity was utilized. With more than a decade of these regulations the Department feels that the 1000-foot restriction can be reduced to 500 feet which aligns the definition of open water hunting for both the inland lakes and the Great Lakes. This change simplifies regulations while adding additional open water hunting opportunity on these identified inland lakes. Department biologist staff, law enforcement staff and public input all were in support of this rule simplification.

In 2020, the Department gathered public input regarding the reconfiguration of duck harvest zones. Public input favored the creation of a new Open Water Zone to allow hunters to take advantage of unique late season opportunities which exist in open waters (waters greater than 500 feet from the mainland shore) of Lake Michigan and Green Bay. The Board approved of the new zone configuration for the 2021 migratory bird season. With all new opportunities issues and confusion arose regarding the Open Water Zone boundary. [This sentence is a bit vague and subjective. Can we objectively state what the problem was that we are trying to solve?] This rule clarifies the duck zone boundary for the Open Water Zone by updating the definition of the Open Water Zone boundary as, "waters greater than 500 feet from the mainland shore of Green Bay and Lake Michigan; for the purposes of the Open Water Zone, mainland shore includes all

ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

adjacent rooted vegetation, adjacent floating cattail and Long Tail and Little Tail points.

12. Summary of the Businesses, Business Sectors, Associations Representing Business, Local Governmental Units, and Individuals that may be Affected by the Proposed Rule that were Contacted for Comments.

No fiscal effects on small businesses, their associations, or local governments are anticipated

13. Identify the Local Governmental Units that Participated in the Development of this EIA. None at this time. Local Government units are not anticipated to be impacted by this rule.

14. Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred)

No effects on small businesses, their associations, or local governments are anticipated. The department does not anticipate any fiscal impacts as a result of these rules. Following is the department's preliminary analysis.

Economic Impact

Because the hunting season framework proposed in this rule will be very similar to those in place during previous seasons, no economic impacts are anticipated. We do not anticipate that these rules will result in changes in the activities of migratory bird hunters, their expenditures, and the related economic activity. These rules are applicable to individual hunters and impose no compliance or reporting requirements for small business, nor are any design or operational standards contained in the rule.

Fiscal Impact

The department anticipates no fiscal impact resulting from these rules. The department currently annually conducts a number of activities related to migratory bird hunting such as managing department lands, selling licenses, providing law enforcement services, and surveys and related research. The department will continue to conduct the same activities under the season framework proposed in this rule and does not anticipate any new or reduced expenditures. No effects on small businesses, their associations, or local governments are anticipated. The department does not anticipate any fiscal impacts as a result of these rules. Following is the department's preliminary analysis.

15. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

By implementing this rule, Wisconsin's migratory bird hunters will continue to enjoy excellent hunting opportunities. The expenditures of migratory bird hunters and the economic impacts resulting from their expenditures will continue to benefit the state's economy.

16. Long Range Implications of Implementing the Rule

Implementing these rules will have little impact on the public except that they will continue to have good hunting opportunities into the future.

17. Compare With Approaches Being Used by Federal Government

Migratory game bird hunting is regulated by the United States Fish & Wildlife Service (USFWS), in 50 CFR part 20. Under international treaty and Federal law, migratory game bird seasons are closed unless opened annually through the USFWS regulations process. As part of the federal rule process, the service annually evaluates migratory game bird populations and breeding habitat in cooperation with state provincial agencies and the Canadian Wildlife Service. After considering recommendations from the flyway councils of states and the guidance of cooperatively developed harvest strategies, the USFWS establishes annual frameworks within flyway or bird populations regions. States can then establish hunting seasons within the sideboards for each species and region.

None of the provisions of this rule conflict with the federal framework.

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

The department establishes migratory game bird hunting seasons based on a federal framework that is presented to Wisconsin by the US Fish & Wildlife Service. Because of the federal guidelines, Wisconsin's regulations are similar to
