

1995 SENATE BILL 453

December 13, 1995 - Introduced by Senators BURKE, CLAUSING, DARLING and DECKER, cosponsored by Representatives BLACK, BALDWIN, BAUMGART, BOCK, BOYLE, GRONEMUS, SPRINGER, WIRCH, R. YOUNG and L. YOUNG. Referred to Committee on Environment and Energy.

1 **AN ACT to create** 16.957 and 20.505 (1) (er) of the statutes; **relating to:** creating
2 a clean energy rebate program, granting rule-making authority and making an
3 appropriation.

Analysis by the Legislative Reference Bureau

This bill creates a clean energy rebate program under the department of administration. Under the program, an individual may receive a rebate of up to \$2,000 from the state for installing a system that converts solar or wind energy into usable forms of thermal or electrical energy. The actual value of the rebate is based on the estimated annual amount of energy generated by the installed solar or wind energy resource system.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

4 **SECTION 1.** 16.957 of the statutes is created to read:
5 **16.957 Clean energy rebate program. (1) DEFINITIONS.** In this section:
6 (a) "Clean energy resource system" means a solar energy system or a wind
7 energy system, but does not include any equipment which would be present as part
8 of a conventional energy system or as part of a system primarily used to heat a
9 swimming pool.

1 (b) "Solar energy system" means equipment which directly converts and then
2 transfers or stores solar energy into usable forms of thermal or electrical energy.

3 (c) "Wind energy system" has the meaning given in s. 16.959 (1).

4 **(2) REBATE.** An individual owning a clean energy resource system installed
5 after the effective date of this subsection [revisor inserts date], may apply for a
6 rebate, not to exceed \$2,000 per clean energy resource system, that is calculated at
7 a rate of \$100 per million British thermal units of estimated annual energy produced
8 by the clean energy resource system if all of the following apply:

9 (a) The installation of the clean energy resource system is completed during the
10 year for which the rebate is claimed.

11 (b) The clean energy resource system is installed on the individual's property
12 in this state.

13 (c) The clean energy resource system is certified under sub. (4).

14 **(3) APPLICATION.** (a) An individual may make an application for a rebate to the
15 department. An individual may make only one application per year.

16 (b) The department shall calculate the amount of a rebate and may require an
17 applicant to submit additional information. If approved, a rebate may be certified
18 by the department for payment by check, share draft or other draft drawn from the
19 appropriation under s. 20.505 (1) (er).

20 (c) The department may not approve an application if any of the following
21 applies:

22 1. The application is received more than 12 months after the month during
23 which installation of the clean energy resource system was completed.

24 2. The department previously approved a rebate for the same clean energy
25 resource system at the same location.
