Analysis by the Legislative Reference Bureau

Current law requires a professional geologist, hydrologist, or soil scientist, other than one employed by the federal government, to be licensed by the examining board (board) of professional geologist, hydrologists and soil scientists. This bill allows a professional geologist, hydrologist, or soil scientist to practice his or her profession without being licensed by the board if that person is employed by a state agency, county, city, village, or regional planning commission. The bill also exempts from the licensure requirement persons engaged in related professions (such as limnology) if the practice of their professions involves only the incidental practice of professional geology, hydrology, or soil science, and they do not designate themselves as professional geologists, hydrologists, or soil scientists.
