# State of Misconsin 2011 - 2012 LEGISLATURE

## 2011 ASSEMBLY BILL 743

March 15, 2012 - Introduced by Representatives C. Taylor and Berceau, cosponsored by Senator C. Larson. Referred to Committee on Public Health and Public Safety.

AN ACT to create 254.345 of the statutes; relating to: radon measurement and

mitigation and granting rule-making authority.

### Analysis by the Legislative Reference Bureau

Under current law, the Department of Health Services (DHS) is required to develop standards of performance for the regional radon centers and distribute funds based on compliance with the standards to provide radon protection information dissemination from the regional radon centers. Radon is a radioactive noble gas. This bill requires that to place a device to measure the amount of radon in a building (radon measurement) for a fee a person must complete instruction in a radon measurement course that is approved by DHS and a radon measurement proficiency examination that is also approved by DHS. DHS may suspend or revoke the approval of a radon measurement course or a radon measurement proficiency examination if the course or examination fails to satisfy DHS standards or operates under conditions other than those in effect at the time of approval. The radon measurement proficiency examination must notify DHS for inclusion on a registry those individuals who successfully complete the examination.

The bill also requires that to evaluate reports of radon amounts to determine mitigation strategies, design mitigation systems, or install or supervise the installation of mitigation systems (radon mitigation) for a fee a person must successfully complete all of the following that are approved by DHS: a radon measurement course, a radon mitigation course, a radon measurement proficiency examination, and a radon mitigation proficiency examination. DHS, under the bill, may suspend or revoke approval of a radon mitigation course or radon mitigation

proficiency examination under the same conditions as it may suspend or revoke a radon measurement course or radon measurement proficiency examination. The radon mitigation proficiency examination must notify DHS for inclusion on a registry those individuals who successfully complete the examination.

Under the bill, anyone who holds a valid credential to perform radon measurement in another state and who submits proof of that credential to DHS may perform radon measurement in this state, to the extent that credential allows, without completing the course and examination approved by DHS. Similarly, anyone who holds a valid credential to perform radon mitigation in another state and who submits proof of that credential to DHS may perform radon mitigation in this state, to the extent the credential allows, without completing the courses and examinations approved by DHS.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

## The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

**Section 1.** 254.345 of the statutes is created to read:

**254.345** Radon measurement and mitigation. (1) Definitions. In this section:

- (a) "Radon" means the radioactive noble gas radon, including short-lived radionuclides formed as a result of the decay of radon.
- (b) "Radon measurement" means placement of a device to measure the amount of radon in a building.
- (c) "Radon mitigation" means evaluation of reports of radon amounts to determine mitigation strategies, design of mitigation systems, or installation or supervision of installation of mitigation systems.
- (2) Requirement for radon measurement for a fee without first successfully completing instruction in a radon measurement course that is approved under sub. (4) (a) and successfully completing a radon measurement proficiency examination that is approved under sub. (4) (b).

 $\mathbf{2}$ 

- (3) REQUIREMENT FOR RADON MITIGATION. No person may perform a radon mitigation for a fee without first successfully completing instruction in a radon measurement course that is approved under sub. (4) (a) and a radon mitigation course that is approved under sub. (5) (a) and successfully completing a radon measurement proficiency examination under that is approved under sub. (4) (b) and a radon mitigation proficiency examination that is approved under sub. (5) (b).
- (4) Radon Measurement course; proficiency examination. (a) The department shall review and approve radon measurement courses that satisfy the standards determined by the department. The department may promulgate rules establishing the application process for and standards for approval of radon measurement courses. The department shall review the curriculum of each approved radon measurement course at least once every 24 months following the date of approval to determine whether the program continues to satisfy the standards for approval. Under this paragraph, the department may, after providing notice, suspend or revoke the approval of a radon measurement course if the course fails to satisfy the standards for approval determined by the department or operates under conditions that are other than those in effect at the time of approval of the course.
- (b) The department shall review and approve radon measurement proficiency examinations that satisfy the standards determined by the department. The department may promulgate rules establishing the application process for and standards for approval of radon measurement proficiency examinations. Under this paragraph, the department may, after providing notice, suspend or revoke the approval of a radon measurement proficiency examination if the examination fails to satisfy the standards for approval determined by the department or operates

under conditions that are other than those in effect at the time of approval of the examination.

- (c) A radon measurement proficiency examination approved under par. (b) shall notify the department to include an individual on the registry under sub. (6) after the individual has successfully completed the radon measurement proficiency examination.
- (5) Radon mitigation course; proficiency examination. (a) The department shall review and approve radon mitigation courses that satisfy the standards determined by the department. The department may promulgate rules establishing the application process for and standards for approval of radon mitigation courses. The department shall review the curriculum of each approved radon mitigation course at least once every 24 months following the date of approval to determine whether the program continues to satisfy the standards for approval. Under this paragraph, the department may, after providing notice, suspend or revoke the approval of a radon mitigation course if the course fails to satisfy the standards for approval determined by the department or operates under conditions that are other than those in effect at the time of approval of the course.
- (b) The department shall review and approve radon mitigation proficiency examinations that satisfy the standards determined by the department. The department may promulgate rules establishing the application process for and standards for approval of radon mitigation proficiency examinations. Under this paragraph, the department may, after providing notice, suspend or revoke the approval of a radon mitigation proficiency examination if the examination fails to satisfy the standards for approval determined by the department or operates under

23

except as follows:

1	conditions that are other than those in effect at the time of approval of the
2	examination.
3	(c) A radon mitigation proficiency examination approved under par. (b) shall
4	notify the department to include an individual on the registry under sub. (6) after the
5	individual has successfully completed the radon mitigation proficiency examination
6	(6) REGISTRY. The department shall establish and maintain a registry that
7	contains all of the following:
8	(a) A listing of all individuals about whom the department is notified under sub
9	(4) (c).
10	(b) A listing of all individuals about whom the department is notified under sub
11	(5) (c).
12	(c) A listing of all individuals who submit proof of valid credentials from
13	another state under sub. (7).
14	(7) Credential from another Jurisdiction. (a) An individual who holds a valid
15	credential to perform radon measurement in another state and who submits proof
16	of that credential to the department may perform radon measurement to the extent
17	that credential allows in this state without complying with sub. (2).
18	(b) An individual who holds a valid credential to perform radon mitigation in
19	another state and who submits proof of that credential to the department may
20	perform radon mitigation to the extent that credential allows in this state without
21	complying with sub. (3).
22	SECTION 2. Effective dates. This act takes effect on the day after publication

SECTION 2

1 (1) The treatment of section 254.345 (2) and (3) of the statutes takes effect on 2 the first day of the 13th month beginning after publication.

3 (END)
