1 **AN ACT to create** 29.016 of the statutes; **relating to:** prohibiting the Department
2 of Natural Resources from establishing certain restrictions on hunting antlered
3 deer and regulating the establishment of fall open seasons for hunting deer
4 with firearms.

Analysis by the Legislative Reference Bureau

Under current law, the Department of Natural Resources (DNR) is required to establish open and closed seasons for fish and game and to establish conditions that conserve the fish and game supply and that ensure opportunities for good fishing, hunting, and trapping. Current law authorizes DNR to exercise this authority for the entire state, for any specified county, or for any lake or stream.

This bill prohibits DNR from requiring a person who holds a deer hunting license to kill an antlerless deer before killing the person's first antlered deer under that license. It also places restrictions on DNR's authority to establish open seasons for hunting deer with firearms (deer firearm season). The bill generally prohibits DNR from establishing a fall deer firearm season that begins before the Saturday immediately preceding the fourth Thursday in November (early season). Under the bill, the prohibition does not apply if DNR promulgates a rule that limits hunting during the early season to certain groups of people, including persons who are under 16 years of age or persons who are learning to hunt. The prohibition also does not apply if DNR establishes the early season because the early season is necessary to control the spread of chronic wasting disease or other disease in deer, the early season is limited to hunting only antlerless deer, the closing date for the early season

is on or before October 15, and the rule authorizing the early season expires 270 days after the effective date of the rule.
