Analysis by the Legislative Reference Bureau

The bill specifies that every woman has the fundamental right to choose to obtain a safe and legal abortion. Under the bill, the state may not prohibit a woman from obtaining an abortion before viability or from obtaining an abortion at any time during her pregnancy if the termination is necessary, in the professional judgment of a physician, to protect her life or health. Also under the bill, a law or rule of this state that places a burden on a woman's access to abortion is unenforceable if the law or rule does not confer any legitimate health benefit. The bill describes circumstances that constitute a law or rule placing a burden on access to abortion or conferring a legitimate health benefit. Any person that is or may be aggrieved by the enforcement of a law or rule passed or promulgated after the effective date of the bill that would be unenforceable under the bill may bring an action in state or federal court for injunctive relief or damages against a state or local official who enforces or attempts to enforce such a law or rule.

SENATE BILL 569

In addition, the bill makes various changes to the laws relating to abortion, including:

1. The bill eliminates requirements for voluntary and informed consent before the performance of an abortion. Current law requires that a woman upon whom an abortion is to be performed or induced must give voluntary and informed written consent to an abortion. Except in a medical emergency, a woman's consent to an abortion is considered informed only if, before the abortion is performed or induced at a time specified in current law, the physician or an assistant has, in person, orally provided the woman with certain information and given to the woman certain written materials.

2. The bill eliminates the requirement that except in a medical emergency a physician must determine or rely on another determination of the probable postfertilization age of an unborn child before performing an abortion. The bill also eliminates the prohibition on performing or inducing an abortion if the probable postfertilization age of the unborn child is 20 or more weeks.

3. This bill eliminates the prohibition on giving a woman an abortion-inducing drug unless the physician who provided the drug for the woman performs a physical exam on the woman and is physically present in the room when the drug is given to the woman.

4. The bill eliminates the prohibition on coverage of abortions by qualified health plans offered through an exchange in this state.

5. The bill eliminates the prohibition on performing abortions by a physician that does not have admitting privileges in a hospital within 30 miles of the location where the abortion is to be performed. Under a federal appellate court ruling, the requirement to have admitting privileges currently may not be enforced.

6. Under current law, any person, other than the mother, who intentionally destroys the life of an unborn child may be fined not more than \$10,000, imprisoned for not more than six years, or both. Any person, other than the mother, who intentionally destroys the life of an unborn quick child or causes the mother's death by an act done with intent to destroy the life of an unborn child may be fined not more than \$50,000, imprisoned for not more than 15 years, or both. None of these penalties apply to a therapeutic abortion that is performed by a physician; that is necessary, or advised by two other physicians as necessary, to save the life of the mother; and that is performed, except on an emergency basis, in a licensed maternity hospital. These provisions were cited, along with other provisions not affected by this bill that prohibit performing an abortion generally, in *Roe v. Wade*, 410 U.S. 113 (1973), as substantially similar to a Texas statute that was held to violate the due process clause of the 14th Amendment to the U.S. Constitution. The bill repeals these provisions. The bill also repeals the criminal penalty on a person who is not a physician and who intentionally performs an abortion. The bill, however, does not affect any other criminal prohibition or limitation on abortion in current law, such as the prohibition on performing an abortion after the fetus or unborn child has reached viability, or any other homicide prohibition. The bill also does not affect a separate provision in current law that prohibits prosecution of and imposing or

enforcing a fine or imprisonment against a woman who obtains an abortion or otherwise violates any abortion law with respect to her unborn child or fetus.

15 defined in s. ~~253.10 (2) (a)~~ 69.01 (13m).

16 **SECTION 23. Nonstatutory provisions.**

17 (1) LEGISLATIVE FINDINGS. The legislature finds all of the following:

18 (a) Comprehensive reproductive health care, including safe abortions, is a vital
19 component of a woman’s overall health and must be protected.

20 (b) Access to abortion is a core component of women’s social and economic
21 equality.

22 (c) Abortion is one of the safest medical procedures in the United States. Data,
23 including data from the Centers for Disease Control and Prevention, show that
24 abortion has over a 99 percent safety record.

25 (d) Any regulation of medical care must have a legitimate purpose.

SENATE BILL 569**SECTION 23**

1 (e) The goal of medical regulation should be to improve the quality of care and
2 increase access to care.

3 (f) More than 40 years ago, the Supreme Court held in *Roe v. Wade*, 410 U.S.
4 113 (1973), that access to abortion is a constitutional right and that states may not
5 prohibit abortion prior to viability.

6 (g) The right to abortion prior to viability has been upheld time and again by
7 the court, including in the 1992 case *Planned Parenthood of Southeastern*
8 *Pennsylvania v. Casey*, 505 U.S. 833, and most recently in the landmark decision
9 *Whole Woman's Health v. Hellerstedt*, 136 S. Ct. 2292 (2016), where the court
10 reaffirmed once again a woman's constitutional right to access a safe, legal abortion.

11 (h) In *Whole Woman's Health*, the court struck down 2 Texas laws designed to
12 close abortion providers in the state which the court concluded provided few, if any,
13 health benefits for women.

14 (i) Justice Ruth Bader Ginsburg concluded in her concurrence in *Whole*
15 *Woman's Health* that, given the safety of abortion, "it is beyond rational belief that
16 [Texas] H. B. 2 could genuinely protect the health of women, and certain that the law
17 'would simply make it more difficult for them to obtain abortions.'"

18 (j) In *Whole Woman's Health*, the court held that the Constitution "requires
19 courts to consider the burdens a law imposes on abortion access together with the
20 benefits those laws confer."

21 (k) In *Whole Woman's Health*, the court further held that courts "when
22 determining the constitutionality of laws regulating abortion procedures," must
23 place "considerable weight upon evidence...presented."
