Analysis by the Legislative Reference Bureau

This bill requires a hospital, clinic, or other facility in which an induced abortion is performed to report additional information in its required annual report to the Department of Health Services. Under current law, the report must include, among other pieces of information, for each patient, the state, and county if Wisconsin, of residence; certain demographic information; the month and year in which the abortion was performed; the number of weeks since the patient's last menstrual period; whether the abortion was chemically or surgically induced or surgically induced following a failed chemical abortion; any resulting complications; and certain information for abortions of an unborn child capable of experiencing pain. To the information required in the report this bill adds the sex of the aborted unborn child if the sex can be determined by visual inspection, whether the aborted unborn child had a fetal anomaly, and the nature of the fetal anomaly if the aborted unborn child had one. Under the bill, DHS must incorporate information reported regarding an aborted unborn child's fetal anomaly in the birth defect registry that currently exists.
