2025 ASSEMBLY JOINT RESOLUTION 64

June 6, 2025 - Introduced by Representatives Sinicki, Stroud, Stubbs, Ortiz-Velez, Desmidt, Brown, Miresse, Kirsch, Clancy, Roe and Subeck, cosponsored by Senators Carpenter, Larson, Roys, Ratcliff, Wirch, Spreitzer, Hesselbein and Drake. Referred to Committee on Rules.

Relating to: designating June 2025 as Myasthenia Gravis Awareness Month.

Whereas, myasthenia gravis (MG) is an autoimmune neuromuscular disease that causes chronic weakness, in which antibodies attack receptors in the body and prevent muscle contraction; and

Whereas, MG frequently weakens muscles that control eye movement, facial expressions, and swallowing, and its symptoms may include blurred vision, speech impairment, difficulty chewing, shortness of breath, an unstable gait, and a weakened grip; and

Whereas, a diagnosis of MG may be missed or delayed because it shares symptoms in common with many other disorders; and

Whereas, in some cases, MG symptoms can worsen to the point of disability, grave illness, or death if there are gaps in or an absence of the several crucial health care treatments that can enable those who endure MG to lead productive, active lives of normal longevity; and

1	Whereas, MG is found most commonly in adult women under 40 and men over
2	60 but is not specific to either gender or any particular ethnic background; and
3	Whereas, MG is nonhereditary and noncontagious; and
4	Whereas, 10 to 20 out of every 100,000 Americans are diagnosed with MG,
5	and support groups exist in Wisconsin for those people; and
6	Whereas, MG Awareness Month is observed every year in June across the
7	United States, which allows people from the MG community to come together and
8	raise awareness about MG; now, therefore, be it
9	Resolved by the assembly, the senate concurring, That June 2025 is
10	hereby designated Myasthenia Gravis Awareness Month in Wisconsin.
