

CHAPTER 144

WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

	SUBCHAPTER I DEFINITIONS		
144 01	Definitions.	144 435	Solid waste disposal standards
	SUBCHAPTER II WATER AND SEWAGE	144 436	Solid waste open burning standards.
144 02	Sanitary survey	144 437	Solid waste management.
144 025	Department of natural resources—water resources	144 438	Exemption for certain alcohol fuel production systems.
144 03	Visitorial powers of department	144 44	Site approval process; annual operating license.
144 04	Approval of plans	144 441	Long-term care.
144 045	Garbage and refuse disposal	144 442	Transference of responsibility.
144 05	Sewage drains; sewage discharge into certain lakes	144 445	Local permits not required; departmental license
144 06	House connections.	144 448	Duties of metallic mining council.
144 07	Joint sewerage systems	144 45	Research.
144 09	Enforcement.	144 46	Shoreland and flood plain zoning
144 14	Nondegradable detergents, sale prohibited	144 47	Violations: enforcement.
144 15	Mercury discharge into water	144 48	Waste oil collection and recycling.
144 21	Financial assistance program.	144 545	Mercury users.
144 23	Financial assistance program; sewerage systems	144 60	Hazardous waste management.
144 235	Financial assistance program; local water quality planning.	144 61	Definitions.
144 24	Financial assistance program; point source pollution abatement	144 62	Powers and duties of the department.
144 25	Financial assistance; nonpoint source water pollution abatement.	144 63	Generation
144 26	Navigable waters protection law.	144 64	Licenses
144 27	Limitation.	144 69	Inspections and right of entry
	SUBCHAPTER III AIR POLLUTION	144 70	Confidentiality
144 30	Air pollution; definitions.	144 72	Imminent hazard.
144 31	Air pollution control; powers and duties.	144 73	Enforcement.
144 32	Federal aid.	144 74	Penalties.
144 33	Confidentiality of records	144 76	Hazardous substance spills.
144 34	Inspections	144 781	Solid waste management grant program
144 35	Air pollution control council	144 782	Department powers and duties
144 355	Air resource allocation council.	144 783	Financial assistance.
144 371	Identification of nonattainment areas.	144 784	Grant applications.
144 372	Best available retrofit technology	144 79	Manufacture and purchase of polychlorinated biphenyls.
144 373	Air resource allocation		SUBCHAPTER V MINING
144 374	Mandatory operation permit dates	144 80	Metallic mining reclamation act
144 375	Air pollution control; standards and determinations	144 81	Definitions.
144 38	Classification and reporting	144 82	Mine effect responsibility.
144 391	Air pollution control permits	144 83	Department powers and duties.
144 392	Permit application and review.	144 831	Data collection; monitoring.
144 3925	Mandatory operation permit for existing sources; application and review	144 832	Exploration.
144 393	Criteria for permit approval	144 834	Reclamation plans.
144 3935	Criteria for mandatory operation permits for existing sources	144 836	Hearings on permit applications.
144 394	Permit conditions.	144 838	Local impact committee.
144 395	Alteration, suspension and revocation of permits.	144 84	Prospecting permits.
144 396	Permit duration.	144 85	Mining permits.
144 397	Operation permit review.	144 86	Bonds.
144 398	Failure to adopt rule or issue permit or exemption.	144 87	Modifications
144 399	Fees.	144 875	Cessation of mining or reclamation.
144 40	Machinery use.	144 88	Exploring, prospecting and mining without authorization.
144 401	County program	144 89	Reports
144 402	Petition for alteration.	144 90	Certificate of completion, partial completion and bond release.
144 403	Hearings on certain air pollution actions	144 91	Mining and reclamation; orders.
144 41	Local air pollution control programs.	144 92	Nonconforming sites.
144 42	Motor vehicle emissions limitations; inspections.	144 925	Prospecting data.
144 423	Violations: enforcement.	144 93	Enforcement.
144 424	Emergency procedure.	144 935	Citizen suits.
144 426	Penalties for violations relating to air pollution.	144 937	Effect of other statutes.
	SUBCHAPTER IV SOLID WASTE, HAZARDOUS WASTE AND REFUSE	144 94	Review.
144 43	Solid waste; definitions.		SUBCHAPTER VI GENERAL PROVISIONS, ENFORCEMENT AND PENALTIES
144 431	Solid waste; powers and duties.	144 95	Citizens environmental council
144 432	Federal aid.	144 952	Financial interest prohibited.
144 433	Confidentiality of records	144 96	Reports on substances used; environmental fee.
144 434	Inspections	144 97	Review of orders.
		144 975	Hearings; procedure, review.
		144 98	Enforcement; duty of department of justice; expenses.
		144 99	Penalties.

SUBCHAPTER I

DEFINITIONS

144.01 Definitions. Except as the context requires otherwise, the following terms as used in this chapter mean:

- (1) "Air pollution" means the presence in the atmosphere of one or more air contaminants in such quantities and of such duration as is or tends to be injurious to human health or welfare, animal or plant life, or property, or would unreasonably interfere with the enjoyment of life or property.
- (2) "Department", the department of natural resources.
- (3) "Environmental pollution" means the contaminating or rendering unclean or impure the air, land or waters of the state, or making the same injurious to public health, harmful for commercial or recreational use, or deleterious to fish, bird, animal or plant life.
- (4) "Garbage" means discarded materials resulting from the handling, processing, storage and consumption of food.
- (5) "Industrial wastes" include liquid or other wastes resulting from any process of industry, manufacture, trade or business or the development of any natural resource.
- (6) "Municipality", any city, town, village, county, county utility district, town sanitary district, public inland lake protection and rehabilitation district or metropolitan sewage district.
- (7) "Nonprofit-sharing corporation", a non-stock corporation organized under ch. 181 or corresponding prior general corporation laws.
- (8) "Owner," the state, county, town, town sanitary district, city, village, metropolitan sewerage district, corporation, firm, company, institution or individual owning or operating any water supply, sewerage or water system or sewage and refuse disposal plant.
- (9) "Other wastes" include all other substances, except industrial wastes and sewage, as the latter term is defined in s. 144.01, which pollute any of the surface waters of the state. The term also includes "unnecessary siltation" resulting from operations such as the washing of vegetables or raw food products, gravel washing, stripping of lands for development of subdivisions, highways, quarries and gravel pits, mine drainage, cleaning of vehicles or barges or gross neglect of land erosion.
- (9m) "Person" means an individual, owner, operator, corporation, partnership, association, municipality, interstate agency, state agency or federal agency.
- (10) "Pollution" includes contaminating or rendering unclean or impure the waters of the state, or making the same injurious to public health, harmful for commercial or recreational use, or deleterious to fish, bird, animal or plant life.
- (11) "Refuse," all matters produced from industrial or community life, subject to decomposition, not defined as sewage.
- (12) "Secretary", the secretary of natural resources.
- (13) "Sewage," the water carried wastes created in and to be conducted away from residences, industrial establishments, and public buildings as defined in s. 101.01 (2), with such surface or ground water as may be present.
- (14) "Sewerage system," all structures, conduits and pipe lines by which sewage is collected and disposed of, except plumbing inside and in connection with buildings served, and service pipes from building to street main.
- (15) "Solid waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant or air pollution control facility and other discarded or salvageable materials, including solid, liquid, semisolid, or contained gaseous materials resulting from industrial, commercial, mining and agricultural operations, and from community activities, but does not include solids or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under ch. 147, or source, special nuclear or by-product material as defined under s. 140.52.
- (16) "Solid waste disposal" means the collection, storage treatment, utilization, processing or final disposal of solid waste.
- (17) "System or plant" includes water and sewerage systems and sewage and refuse disposal plants.
- (18) "Wastewater", all sewage.
- (19) "Waters of the state" includes those portions of Lake Michigan and Lake Superior within the boundaries of Wisconsin, and all lakes, bays, rivers, streams, springs, ponds, wells, impounding reservoirs, marshes, watercourses, drainage systems and other surface or ground water, natural or artificial, public or private, within the state or its jurisdiction.
- (20) "Water supply," the sources and their surroundings from which water is supplied for drinking or domestic purposes.
- (21) "Waterworks," or "water system," all structures, conduits and appurtenances by means of which water is delivered to consumers except piping and fixtures inside buildings

served, and service pipes from building to street main.

History: 1971 c. 185 s. 7; 1975 c. 197; 1979 c. 34 ss. 972dg to 972e, 978k; 1979 c. 221

SUBCHAPTER II

WATER AND SEWAGE

144.02 Sanitary survey. (1) The department is authorized to act with the U.S. geological survey in determining the sanitary and other conditions and nature of the natural water supplies of the state of Wisconsin, such water survey to have for its objects:

(a) To determine the nature and condition of the unpolluted natural water supplies of the state.

(b) To determine to what extent the natural waters are being contaminated by sewage from cities.

(c) To determine to what extent the natural waters are being polluted by industrial wastes, and in what way these wastes might be utilized for beneficial purposes.

(e) To assist in determining the best source of water supplies.

(2) The department is hereby empowered and instructed to make the necessary rules and regulations, in conjunction with the U.S. geological department, to carry this section into effect.

History: 1971 c. 164.

144.025 Department of natural resources—water resources. (1) **STATEMENT OF POLICY AND PURPOSE.** The department of natural resources shall serve as the central unit of state government to protect, maintain and improve the quality and management of the waters of the state, ground and surface, public and private. Continued pollution of the waters of the state has aroused widespread public concern. It endangers public health and threatens the general welfare. A comprehensive action program directed at all present and potential sources of water pollution whether home, farm, recreational, municipal, industrial or commercial is needed to protect human life and health, fish and aquatic life, scenic and ecological values and domestic, municipal, recreational, industrial, agricultural and other uses of water. The purpose of this section is to grant necessary powers and to organize a comprehensive program under a single state agency for the enhancement of the quality management and protection of all waters of the state, ground and surface, public and private. To the end that these vital purposes may be accomplished, this section and all rules and orders promulgated under this section shall be liberally construed in

favor of the policy objectives set forth in this section. In order to achieve the policy objectives of this section, it is the express policy of the state to mobilize governmental effort and resources at all levels, state, federal and local, allocating such effort and resources to accomplish the greatest result for the people of the state as a whole. Because of the importance of Lakes Superior and Michigan and Green Bay as vast water resource reservoirs, water quality standards for those rivers emptying into Lakes Superior and Michigan and Green Bay shall be as high as is practicable.

(2) **POWERS AND DUTIES.** (a) The department shall have general supervision and control over the waters of the state. It shall carry out the planning, management and regulatory programs necessary for implementing the policy and purpose of this chapter. The department also shall formulate plans and programs for the prevention and abatement of water pollution and for the maintenance and improvement of water quality.

(b) The department shall adopt rules setting standards of water quality to be applicable to the waters of the state, recognizing that different standards may be required for different waters or portions thereof. Such standards of quality shall be such as to protect the public interest, which include the protection of the public health and welfare and the present and prospective future use of such waters for public and private water supplies, propagation of fish and aquatic life and wildlife, domestic and recreational purposes and agricultural, commercial, industrial and other legitimate uses. In all cases where the potential uses of water are in conflict, water quality standards shall be interpreted to protect the general public interest.

(c) The department may issue general orders, and adopt rules applicable throughout the state for the construction, installation, use and operation of practicable and available systems, methods and means for preventing and abating pollution of the waters of the state. Such general orders and rules shall be issued only after an opportunity to be heard thereon has been afforded to interested parties.

(d) 1. The department may issue special orders directing particular owners to secure such operating results toward the control of pollution of the waters of the state as the department prescribes, within a specified time. Pending efforts to comply with any order, the department may permit continuance of operations on such conditions as it prescribes. If any owner cannot comply with an order within the time specified, the owner may, before the date set in the order, petition the department to modify the order.

The department may modify the order, specifying in writing the reasons therefor. If any order is not complied with within the time period specified, the department shall immediately notify the attorney general of this fact. Within 30 days thereafter, the attorney general shall forthwith commence an action under s. 144.98.

2. The department may issue temporary emergency orders without prior hearing when the department determines that the protection of the public health necessitates such immediate action. Such emergency orders shall take effect at such time as the department determines. As soon as is practicable, the department shall hold a public hearing after which it may modify or rescind the temporary emergency order or issue a special order under subd. 1.

(e) No wells shall be constructed, installed or operated to withdraw water from underground sources for any purpose where the capacity and rate of withdrawal of all wells on one property is in excess of 100,000 gallons a day without first obtaining the approval of the department. If the department finds that the proposed withdrawal will adversely affect or reduce the availability of water to any public utility in furnishing water to or for the public it shall either withhold its approval or grant a limited approval under which it imposes such conditions as to location, depth, pumping capacity, rate of flow and ultimate use so that the water supply of any public utility engaged in furnishing water to or for the public will not be impaired. The department may issue such general or special orders as it deems necessary to insure prompt and effective administration of this paragraph.

(f) The department shall make investigations and inspections to insure compliance with any general or special order or rule which it issues. In the exercise of this power the department may require the submission and approval of plans for the installation of systems and devices for handling, treating or disposing of any wastes.

(g) The department may conduct scientific experiments, investigations, waste treatment demonstrations and research on any matter under its jurisdiction. It may establish pilot plants, prototypes and facilities in connection therewith and lease or purchase land or equipment.

(h) The department, upon request, and without charge for service or expense, shall consult with and advise owners having installed or about to install systems or plants, as to the most appropriate water supply and the best method of providing for its purity, or as to the best method of disposing of sewage or refuse, with reference to the existing and future needs of all communities or persons which may be affected thereby.

The department shall not be required to prepare plans.

(i) The department shall supervise chemical treatment of waters for the suppression of algae, aquatic weeds, swimmers' itch and other nuisance-producing plants and organisms. It may purchase equipment and may make a charge for the use of the same and for materials furnished, together with a per diem charge for any services performed in such work. The charge shall be sufficient to reimburse the department for the use of the equipment, the actual cost of materials furnished, and the actual cost of the services rendered.

(j) The department may enter into agreements with the responsible authorities of other states, subject to approval by the governor, relative to methods, means and measures to be employed to control pollution of any interstate streams and other waters and to carry out such agreement by appropriate general and special orders. This power shall not be deemed to extend to the modification of any agreement with any other state concluded by direct legislative act, but, unless otherwise expressly provided, the department shall be the agency for the enforcement of any such legislative agreement.

(k) The department may order or cause the abatement of any nuisance affecting the waters of the state under ss. 146.13 and 146.14.

(l) The department shall by rule establish an examining program for the certification of waterworks and wastewater treatment plant operators, setting such standards as the department finds necessary to accomplish the purposes of this chapter. The department may charge applicants for the certificates to pay the cost of examination. No person may operate a waterworks or wastewater treatment plant without a valid certificate issued under this paragraph. The department shall substitute the term "wastewater" for the term "sewage" in all rules adopted under this paragraph.

(m) Orders issued by the department shall be signed by the person designated by the board.

(n) The department may accept gifts and grants from any private or public source for any purpose under its jurisdiction and may expend or use such gifts and grants for the purposes for which received.

(p) Beginning January 1, 1967, any provision of the state plumbing code which sets specifications for septic tanks and their installation shall be void unless it has been approved by the department.

(q) The department may prohibit the installation or use of septic tanks in any area of the state where the department finds that the use of septic tanks would impair water quality. The department shall prescribe alternate methods

for waste treatment and disposal in such prohibited areas.

(r) If the department finds that a system or plant tends to create a nuisance or menace to health or comfort, it shall order the owner or the person in charge to secure such operating results as the department prescribes, within a specified time. If the order is not complied with, the department may order designated changes in operation, and if necessary, alterations or extension to the system or plant, or a new system or plant. If the department finds that the absence of a municipal system or plant tends to create a nuisance or menace to health or comfort, it may order the city, village, town or town sanitary district embracing the area where such conditions exist to prepare and file complete plans of a corrective system as provided by s. 144.04, and to construct such system within a specified time.

(s) In cases of noncompliance with any order issued under par. (d) or (r), the department may take the action directed by the order, and collect the costs thereof from the owner to whom the order was directed. The department shall have all the necessary powers needed to carry out this paragraph including powers granted municipalities under ss. 66.076 and 66.20 to 66.26. It shall also be eligible for financial assistance under ss. 144.21 and 144.24.

(t) The department may establish, administer and maintain a safe drinking water program no less stringent than the requirements of the safe drinking water act of 1974, P.L. 93-523, 88 Stat. 1660.

(6) Personnel of all state agencies shall report any evidence of water pollution found by them to the department.

History: 1971 c. 307; 1973 c. 243; 1975 c. 349; 1977 c. 29, 418; 1979 c. 34 ss. 972f to 972m, 2102 (39) (d), (g); 1979 c. 89, 176, 177

The supreme court overrules its decision in *Huber* (117 W (2d) 355) and adopts the so-called American rule for liability on use of underground waters. *State v. Michels Pipeline Construction, Inc.* 63 W (2d) 278, 217 NW (2d) 339, 219 NW (2d) 308.

Supplying of water to its inhabitants by a municipality is not a proprietary function immune from the provisions of ch. 144, because the protection of public health is a matter of state-wide concern over which the legislature may exercise its police powers to insure a healthful water supply. See note to 66.065. *Village of Sussex v. Dept. of Natural Resources*, 68 W (2d) 187, 228 NW (2d) 173.

Department is authorized, not required, to set standards for sewer extension approvals and may process sewer extension applications on a case by case basis under (2) (c). *Wis. Environmental Decade v. DNR*, 82 W (2d) 97, 260 NW (2d) 674.

Madison's power to forbid chemical treatment of Madison lakes was withdrawn by (2) (i). *Wis. Environmental Decade, Inc. v. DNR*, 85 W (2d) 518, 271 NW (2d) 69 (1978).

The department of natural resources has the authority to order a municipality to construct a public water supply under (2) (r), upon a finding that the absence of a public water supply constitutes a nuisance or menace to health or comfort, even though the electors of the municipality voted against construction in a referendum. 60 Atty. Gen. 523

A municipality has no jurisdiction over chemical treatment of waters to suppress aquatic nuisances. The department is granted statewide supervision over aquatic nuisance

control under (2) (i). Applications for permits to chemically treat aquatic nuisances under (2) (i) may be denied even though statutory and regulatory requirements have been met if such chemical treatment would be counter-productive in achieving the goals set out in (1). 63 Atty. Gen. 260

Department regulatory power over wetlands discussed. 68 Atty. Gen. 264

The public trust doctrine. 59 MLR 787

Theories of water pollution litigation. Davis, 1971 WLR 738

Carrying capacity controls for recreation water uses. Kusler, 1973 WLR 1.

144.03 Visitorial powers of department.

(1) Every owner of an industrial establishment shall furnish to the department all information required by it in the discharge of its duties under s. 144.025 (2). Any member of the natural resources board or any employe of the department may enter any industrial establishment for the purpose of collecting such information, and no owner of an industrial establishment shall refuse to admit such member or employe. The department shall make such inspections at frequent intervals. The secretary and all members of the board shall have power for all purposes falling within the department's jurisdiction to administer oaths, issue subpoenas, compel the attendance of witnesses and the production of necessary or essential data.

(2) Any duly authorized officer, employe or representative of the department may enter and inspect any property, premises or place on or at which any prospecting or metallic mining operation or facility is located or is being constructed or installed at any reasonable time for the purpose of ascertaining the state of compliance with this chapter and rules adopted pursuant thereto. No person may refuse entry or access to any such authorized representative of the department who requests entry for purposes of inspection, and who presents appropriate credentials, nor may any person obstruct, hamper or interfere with any such inspection. The department shall furnish to the prospector or operator, as indicated in the prospecting or mining permit, a written report setting forth all observations, relevant information and data which relate to compliance status.

History: 1973 c. 318; 1979 c. 221 s. 635.

144.04 Approval of plans. Every owner within the time prescribed by the department, shall file with the department a certified copy of complete plans of a proposed system or plant or extension thereof, in scope and detail satisfactory to the department, and, if required, of existing systems or plants, and such other information concerning maintenance, operation and other details as the department requires. Material changes with a statement of the reasons shall be likewise submitted. Before plans are drawn a statement concerning the improvement

144.04 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2890

may be made to the department and the department shall, if requested, outline generally what it will require. Upon receipt of such plans for approval, the department or its duly authorized representative shall by return mail notify the owner of their acceptance. The notice shall include the date of receipt. Within 90 days from the time of their acceptance the department or its authorized representative shall examine and take action to approve, approve conditionally or reject the plans and shall state in writing any conditions of approval or reasons for rejection. Approval or disapproval of such plans and specifications shall not be contingent upon eligibility of such project for federal aid. The 90-day time period may be extended by agreement with the owner if the plans and specifications cannot be reviewed within the 90-day time limitation due to circumstances beyond the control of the department or in the case of extensive installation involving expenditures of \$350,000 or more. The extension shall not exceed 6 months. Failure of the department or its authorized representative to act within 90 days or during an extension of such time period shall constitute an approval of the plans, and upon demand a written certificate of approval shall be issued. Approval may be subject to modification by the department upon due notice. Construction or material change shall be according to approved plans only. The department may disapprove plans which are not in conformance with any existing approved areawide waste treatment management plan prepared pursuant to the federal water pollution control act, P.L. 92-500, as amended.

History: 1977 c. 418

144.045 Garbage and refuse disposal. No person shall dispose of garbage or refuse in any area that is subject to inundation by periodic flooding and from which such garbage or refuse is likely to be washed by flood waters into any surface waters of the state. The department shall order immediate discontinuance of disposal of refuse in a manner or at a site not in compliance with this section.

144.05 Sewage drains; sewage discharge into certain lakes. (1) (a) When any city or village or owner has constructed or constructs a sewage system complying with s. 144.04, the outflow or effluent from such system may be discharged into any stream or drain constructed pursuant to law, but no such outflow of untreated sewage or effluent from a primary or secondary treatment plant from a city, village, town, town sanitary district or metropolitan sewage district in a county having a population of 240,000 or more, according to the latest U.S.

bureau of census figures available including any special census of municipalities within the county, any part of which is located within a drainage basin which drains into a lake of more than 2 square miles and less than 16 square miles in area, shall be discharged directly into, or through any stream, or through any drain, into such a lake located within 18 miles of the system or plant of such city, village, town, town sanitary district or metropolitan sewage district. All necessary construction of plant, system or drains for full compliance with this subsection in the discharge of untreated sewage or sewage effluent from all existing primary or secondary plants shall be completed by September 1, 1970, and the plans for any new system or plant shall include provisions for compliance with this subsection. The department may at any time order and require any owner of an existing plant to prepare and file with it, within a prescribed time, preliminary or final plans or both, for proposed construction to comply with this subsection.

(b) Any municipality, which, on April 30, 1972, has an operating sewerage collection and treatment system and has an application for attachment to a metropolitan sewerage district pending in the county court, in such a county, any part of which is located within such a drainage basin and which is located within 10 miles of a metropolitan sewerage district on September 1, 1967, shall be added to the metropolitan sewerage district upon application of the governing body of the municipality as provided in s. 66.205 (1), 1969 stats., if such petitioning municipality pays its fair share of the cost of attachment as determined by mutual agreement or a court of competent jurisdiction.

(c) In lieu of the construction in compliance with the foregoing provision for diversion from such lakes, any owner of an existing plant, on or before September 1, 1967, or any owner of a new system or plant prior to construction of such new system or plant, may file with the department such plans for advanced treatment of effluent from primary or secondary treatment as in the judgment of the department will accomplish substantially the same results in eliminating nuisance conditions on such lake as would be accomplished by diversion of secondary sewage effluent from said lake (without at the same time creating other objectionable or damaging results), and such owner shall be exempt from the foregoing provisions of this subsection for diversion from such lakes upon approval of such plans and installation of advanced treatment facilities and procedures in compliance therewith, but nothing shall impair the authority of

the department to require at any time preliminary or final plans, or both, for diversion construction.

(d) Any person violating this subsection or any order issued in furtherance of compliance therewith shall forfeit to the state not less than \$100 nor more than \$500 for each violation, failure or refusal. Each day of continued violation is deemed a separate offense. No such penalty shall be invoked during the time that any petition for review of an order is pending under s. 144.97 until final disposition thereof by the courts, if judicial review is sought under ch. 227.

(2) The city or village or the owner of land through which the drain is constructed may apply to the circuit court of the county in which the land is located to determine the damages, if any. No injunction against the use shall be granted until the damages are finally determined and payment refused. Unless within six months after the system is completed the owner of the land institutes such proceedings the owner is barred. The proceedings shall be according to ch. 32, so far as applicable.

History: 1971 c. 164, 276; 1979 c. 34 s. 2102 (39) (g); 1979 c. 176.

The original opinion of the supreme court in 63 W (2d) 175, finding (1), Stats. 1969, an unconstitutional delegation of legislative power to county courts is withdrawn. *Madison Metropolitan Sewerage Dist. v. DNR*, 66 W (2d) 634, 226 NW (2d) 184.

144.06 House connections. To assure preservation of public health, comfort and safety, any city, village or town or town sanitary district having a system of waterworks or sewerage, or both, may by ordinance require buildings used for human habitation and located adjacent to a sewer or water main, or in a block through which one or both of these systems extend, to be connected with either or both in the manner prescribed. If any person fails to comply for more than 10 days after notice in writing the municipality may impose a penalty or may cause connection to be made, and the expense thereof shall be assessed as a special tax against the property. Except in 1st class cities, the owner may, within 30 days after the completion of the work, file a written option with the municipal clerk stating that he or she cannot pay the amount in one sum and asking that it be levied in not to exceed 5 equal annual instalments, and the amount shall be so collected with interest at the rate of 6% per year from the completion of the work, the unpaid balance to be a special tax lien.

History: 1979 c. 110 s. 60 (13); 1979 c. 221.

Population limitation applies only to towns. *Vandervelde v. Green Lake*, 72 W (2d) 210, 240 NW (2d) 399.

144.07 Joint sewerage systems. (1) The department of natural resources may require the sewerage system, or sewage or refuse disposal plant of any governmental unit including any town, village or city, to be so planned and constructed that it may be connected with that of any other town, village or city, and may, after hearing, upon due notice to the governmental units order the proper connections to be made or a group of governmental units including cities, villages, town sanitary districts or town utility districts may construct and operate a joint sewerage system under this statute without being so required by order of the department of natural resources but following hearing and approval of the department.

(1m) An order by the department for the connection of unincorporated territory to a city or village system or plant under this section shall not become effective for 30 days following issuance. Within 30 days following issuance of the order, the governing body of a city or village subject to an order under this section may commence an annexation proceeding under s. 66.024 to annex the unincorporated territory subject to the order. If the result of the referendum under s. 66.024 (4) is in favor of annexation, the territory shall be annexed to the city or village for all purposes, and sewerage service shall be extended to the territory subject to the order. If an application for an annexation referendum is denied under s. 66.024 (2) or the referendum under s. 66.024 (4) is against the annexation, the order shall be void. If an annexation proceeding is not commenced within the 30-day period, the order shall become effective.

(2) When one governmental unit renders service to another under this section, reasonable compensation shall be paid. The officials in charge of the system, of the governmental unit furnishing the service shall determine the reasonable compensation and report to its clerk who shall, on or before August 1 of each year, certify a statement thereof to the clerk of the governmental unit receiving the service. This clerk shall extend the amount shown in such statement as a charge on the tax roll, in the manner following: a) where the service rendered is available to substantially all improved real estate in the member governmental unit receiving the same, the charges shall be placed upon the tax roll of such member governmental unit as a general tax; b) where the service rendered is for the benefit of public highways in, or real estate owned or operated by, the member governmental unit receiving the same, the charges therefor shall be placed upon the tax roll of such member governmental unit as a general tax; c) where the

service rendered does not come under the provisions of a) or b), the charges therefor shall be placed upon the tax roll of such member governmental unit as a special tax upon each parcel of real estate benefited; and when collected it shall be paid to the treasurer of the member governmental unit rendering the service. Where the charges are to be extended on such tax roll under the provisions of c), the clerk of the member governmental unit furnishing such service shall itemize the statement showing separately the amount charged to each parcel of real estate benefited; if, due to delay in determination, such charge cannot be extended on the tax roll of any particular year, it shall be extended as soon as possible.

(3) If the governing body of any governmental unit deems the charge unreasonable, it may by resolution within 20 days after the filing of the report with its clerk:

(a) Submit to arbitration by 3 reputable and experienced engineers, one chosen by each governmental unit, and the 3rd by the other 2. If the engineers are unable to agree, the vote of 2 shall be the decision. They may affirm or modify the report, and shall submit their decision in writing to each governmental unit within 30 days of their appointment unless the time be extended by agreement of the governmental units. The decision shall be binding. Election to so arbitrate shall be a waiver of right to proceed by action. Two-thirds of the expense of arbitration shall be paid by the governmental unit requesting it, and the balance by the other.

(b) Institute a proceeding for judicial review under ch. 227.

(4) (a) Any 2 or more governmental units, including cities, villages, town sanitary districts or town utility districts not wishing to proceed under sub. (2) may jointly construct, operate and maintain a joint sewerage system, inclusive of the necessary intercepting sewers and sewerage treatment works. Such joint action by 2 governmental units shall be carried out by a sewerage commission consisting of one member appointed by each of the governing bodies of such governmental units and a 3rd member to be selected by the 2 members so appointed, or in lieu thereof said sewerage commission may consist of 2 members appointed by the governing body of each governmental unit and a 5th member to be selected by the 4 members so appointed or where more than 2 governmental units act to form the commission, the representation on the commission shall be in accordance with a resolution approved by the member governmental units.

(b) 1. Where such sewerage commission shall consist of 3 members, the members chosen by the 2 members first appointed shall serve for

2 years, while the members appointed by the governing bodies of the 2 governmental units shall serve for terms of 4 and 6 years, respectively, the length of term of each to be determined by lot. All subsequent appointments, except for unexpired terms, shall be for 6 years. All such members shall serve until their successors shall have been appointed and shall have qualified.

2. Where such sewerage commission shall consist of 5 members, the member chosen by the 4 members first appointed shall serve for one year, while the members appointed by the governing bodies of the 2 governmental units shall serve for terms of 2, 3, 4 and 5 years respectively, the length of terms of each to be determined by lot. All subsequent appointments, except for unexpired terms, shall be for 6 years. All such members shall serve until their successors shall have been appointed and shall have qualified.

3. Where such sewerage commission representation shall be formed by approval of a resolution, the resolution shall state the method of appointing commissioners and the term of office of each commissioner.

(c) The sewerage commissioners shall project, plan, construct and maintain in the district comprising the member governmental units intercepting and other main sewers for the collection and transmission of house, industrial and other sewage to a site or sites for disposal selected by them, such sewers to be sufficient, in the judgment of the sewerage commissioners, to care for such sewage of the territory included in such district. The sewerage commissioners shall project, plan, construct and operate sewerage disposal works at a site or sites selected by them which may be located within or outside of the territory included in the district. The sewerage commissioners may also project, plan, construct and maintain intercepting and other main sewers for the collection and disposal of storm water which shall be separate from the sanitary sewerage system. The sewerage commissioners may also project, plan, construct and operate solid waste disposal works at a site or sites selected by them which may be located within or outside of the territory included in the district or by contract with counties or municipalities which have solid waste disposal facilities. The sewerage commissioners may employ and fix compensation for engineers, assistants, clerks, employes and laborers, or do such other things as may be necessary for the due and proper execution of their duties. Such sewerage disposal works may be used by the sewerage commissioners and by such governmental units for the disposal of garbage, refuse and rubbish.

(d) Such sewerage commission shall constitute a body corporate by the name of "(Insert

name of governmental units or area) Sewerage Commission," by which in all proceedings it shall thereafter be known. It may purchase, take and hold real and personal property for its use and convey and dispose of the same. This grant of power shall be retroactive to September 13, 1935 for commissions formed prior to January 1, 1972. Except as provided in this subsection the sewerage commissioners shall have the power and proceed as a common council and board of public works in cities in carrying out the provisions of par. (c). All bond issues and appropriations made by said sewerage commission shall be subject to the approval of the governing bodies of the respective governmental units.

(e) Each such governmental unit shall pay for its proportionate share of such sewerage system, including additions thereto, and also its proportionate share of all operation and maintenance costs as may be determined by the sewerage commission. Each governmental unit may borrow money and issue revenue or general obligation bonds therefor, for the acquisition, construction, erection, enlargement and extension of a joint sewage disposal plant or refuse or rubbish or solid waste disposal plant or system or any combination of plants provided under this section, and to purchase a site or sites for the same. Each governmental unit may, if it so desires, proceed under s. 66.076 in financing its portion of the cost of the construction, operation and maintenance of the joint sewage disposal plant or plants provided for in this section, or system.

(f) Any such governmental unit being aggrieved by the determination of the sewerage commission on matters within its jurisdiction may appeal to the circuit court as provided in sub. (3) (b).

History: 1971 c. 89, 276; 1977 c. 187; 1979 c. 176.

Sub. (1m) does not violate Art. IV, sec. 1. See note to Art. IV, sec. 1, citing *City of Beloit v. Kallas*, 76 W (2d) 61, 250 NW (2d) 342.

Joint sewerage commission may enact and enforce regulations required of it under Clean Water Act of 1977, but it cannot make appropriations or issue bonds without approval of governing bodies which established it. 68 Atty. Gen. 83.

144.09 Enforcement. Records required by the department shall be kept by the owners and the department supplied with certified copies and such other information as it may require. Agents of the department may enter buildings, structures and premises of owners supplying the public or industrial plants with water, ice, sewerage systems, sewage or refuse disposal service and private properties to collect samples, records and information, and to ascertain if the rules and orders of the department are complied with. The department of justice shall assist in the enforcement of this chapter.

144.14 Nondegradable detergents, sale prohibited. On and after December 31, 1965, the sale and use of nondegradable detergents containing alkyl benzene sulfonate is prohibited in this state.

History: 1971 c. 40.

144.15 Mercury discharge into water. Discharge of mercury compounds and metallic mercury into the waters of this state by any person shall be limited to fifteen-hundredths of a pound of mercury per day averaged over a 30-day period, and not more than one-half pound in any one day. The department may establish lower maximum discharge limits by rule.

History: 1971 c. 272; 1979 c. 34 s. 984p.

144.21 Financial assistance program. (1)

The legislature finds that state financial assistance for the construction and financing of pollution prevention and abatement facilities is a public purpose and a proper state government function in that the state is trustee of the waters of the state and that such financial assistance is necessary to protect the purity of state waters.

(2) In order that the construction of pollution prevention and abatement facilities necessary to the protection of state waters be encouraged, a state program of assistance to municipalities and school districts for the financing of such facilities is established and a program of state advances in anticipation of federal aid reimbursement is established to meet the state's water quality standards. These state programs shall be administered by the department of natural resources and the department shall make such rules as are necessary for the proper execution of the state program.

(2m) In this section "estimated reasonable costs" include the costs of preliminary planning to determine the economic and engineering feasibility of pollution prevention and abatement facilities, the engineering, architectural, legal, fiscal and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures and other action necessary to the construction of pollution prevention and abatement facilities and the erection, building, acquisition, alteration, remodeling, improvement or extension of pollution prevention and abatement facilities and the inspection and supervision of the construction of pollution prevention and abatement facilities.

(3) (a) The department shall establish criteria to determine those municipalities and school districts and projects which are eligible for the state program and to determine appropriate priorities among the projects.

(c) All municipalities and school districts are eligible for agreements under sub. (6) (a) and

(b) based on the criteria in this paragraph. The criteria shall consider the health hazards of existing conditions, the extent and nature of pollution, per capita costs of the project, property valuation of the municipalities or school districts as equalized by the state, income of the residents in the municipalities or school districts, the availability of federal funds for the project, soil conditions, the feasibility and practicality of the project, the borrowing capacity of the municipality or school district and any other factors which the department considers important. Municipalities or school districts commencing projects but not completed prior to January 18, 1970, shall be deemed eligible for agreements under sub. (6) (a) and (b). School district projects are not eligible if the project is located within the corporate limits of a city or of a village with an operating municipal sewage system.

(4) Municipalities or school districts which desire to participate in the state program shall submit application for participation to the department. The application shall be in such form and include such information as the department prescribes.

(5) The department shall review applications for participation in the state program. It shall determine those applications which meet the criteria it established under sub. (3), and shall arrange the applications in appropriate priority order.

(6) The department may enter into agreement with municipalities and school districts to provide state assistance for the financing of those pollution prevention and abatement facilities projects it approves under sub. (5).

(a) The department may enter into agreements with municipalities and school districts to make payments to them from the appropriation made by s. 20.370 (4) (cb) to pay not less than 25% and not more than 30% of the estimated reasonable costs of the approved project. These payments shall be in even annual amounts and shall extend for a period of not less than 5 years and not more than 30 years. The department shall not enter into such additional agreements after July 1, 1969, but shall continue to make payments on existing agreements until the terms of the agreement are fully satisfied.

(b) The department may enter into agreements with municipalities and school districts to make payments to them from the appropriations made by s. 20.866 (2) (tm).

1. These payments shall not exceed 50% of the approved project in conjunction with the state program of advancement in anticipation of federal reimbursement under sub. (2). To provide for the financing of pollution prevention

and abatement facilities, the natural resources board, with the approval of the governor, subject to the limits of s. 20.866 (2) (tm) may direct that state debt be contracted as set forth in subd. 2 and subject to the limits set therein. Said debts shall be contracted for in the manner and form as the legislature hereafter prescribes.

2. It is the intent of the legislature that state debt not to exceed \$150,850,000 in the 10-year period from 1969 to 1979 may be incurred for state water pollution and abatement assistance.

(c) The department may enter into agreements with municipalities and school districts to make payments to them from the appropriation under s. 20.370 (4) (cb) to provide direct financial assistance for smaller projects for sewage treatment facilities, including but not limited to chlorination treatment, phosphate removal and other improvements to sewage treatment capabilities.

(e) The department shall review and approve the plans and specifications of all facilities designed and constructed by agreement under this section.

(7) This section shall be construed liberally in aid of the purposes declared in sub. (1).

(8) After June 30, 1979, the department may not enter into any agreements or contracts under sub. (6) (a) or (b), but the department shall continue to make payments on existing agreements and contracts until the terms of the agreements and contracts are fully satisfied.

History: 1971 c. 95; 1975 c. 39 s. 734; 1977 c. 29; 1979 c. 34 ss. 974 to 976, 2102 (39) (a).

144.23 Financial assistance program; sewerage systems. (1) The financial assistance program established under this section is to be used only if the applicant is unable to receive assistance in a timely manner from the federal government and supplementary funding program established under s. 144.21. Receipt of aid under this section makes the applicant ineligible for aid under s. 144.21.

(2) There is established a state program of assistance to municipalities and unincorporated areas for the purpose of financing the construction of water pollution abatement and sewage collection systems. The program shall be administered by the department which shall make such rules as are necessary for the proper execution of the program.

(3) (a) The department shall establish criteria to determine those municipalities and projects which are eligible for the state program and to determine appropriate priorities by rule among the projects.

(b) All municipalities having a population of less than 10,000 are eligible for agreements under sub. (6) based on the criteria in this

paragraph. The criteria shall consider the health hazards of existing conditions, the adequacy of the existing water pollution abatement system, per capita costs of the project, property valuation of the municipalities as equalized by the state, income of the residents in the municipalities, the availability of federal funds for the project and the borrowing capacity of the municipality. Highest priority shall initially be given to projects which have completed all necessary planning and engineering and any other factors which the department considers important. Municipalities commencing projects not completed prior to June 29, 1974 are eligible for agreements under sub. (6).

(4) Municipalities which desire to participate in the state program shall submit application for participation to the department. The application shall be in such form and include such information as the department prescribes.

(5) The department shall review applications for participation in the state program. It shall determine those applications which meet the criteria it established under sub. (3) and shall arrange the applications in appropriate priority order.

(6) (a) Upon approval of an application, the department may enter into an agreement with the municipality to pay from the appropriation under s. 20.866 (2) (tm) an amount not to exceed 50% of the estimated reasonable costs of the approved project. The agreement shall be for such duration and subject to such terms as the department may prescribe. The department shall not grant any municipality more than 10% of the funds available under s. 20.866 (2) (tm) for a given year.

(b) In this subsection "estimated reasonable costs" include the costs of preliminary planning to determine the economic and engineering feasibility of a proposed sewerage system, the engineering, architectural, legal, fiscal and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures and other action necessary to the construction of the project and the erection, building, acquisition, alteration, remodeling, improvement or extension of system facilities and the inspection and supervision of the construction of such facilities.

(7) The department shall review and approve the plans and specifications of all facilities designed and constructed by agreement under this section.

(8) After June 30, 1978, the department may not enter into any agreements or contracts under this section, but the department shall

continue to make payments on existing agreements and contracts until the terms of the agreements and contracts are fully satisfied.

History: 1973 c. 333; 1977 c. 418.

144.235 Financial assistance program; local water quality planning. (1) DEFINITIONS. As used in this section:

(a) "Designated local agency" means the designated local agency under section 208 of the federal act.

(b) "Federal act" means the federal water pollution control act amendments of 1972, P.L. 92-500, 86 Stat. 816.

(2) STATE ASSISTANCE. (a) The department shall administer a program to provide state assistance to designated local agencies for water quality planning activities.

(b) Each designated local agency which provides equal matching funds is eligible to receive state assistance in an amount equal to no less than one-sixth of the current annual grant amount received from the federal environmental protection agency for water quality planning activities under section 208 of the federal act.

(c) A designated local agency which provides matching funds may be eligible to receive additional state assistance for water quality planning activities, as determined by the department, based upon a demonstration of need.

History: 1979 c. 221.

144.24 Financial assistance program; point source pollution abatement. (1) LEGISLATIVE INTENT. The legislature finds that state financial assistance for the planning, design, engineering and construction of point source pollution abatement facilities is a public purpose and a proper state government function in that the state is the trustee of the waters of the state and that such financial assistance is necessary to protect the purity of state waters. In order that the planning, design, engineering and construction of point source pollution abatement facilities necessary to the protection of state waters be encouraged, a state program of assistance to municipalities for the financing of such facilities is established.

(2) ADMINISTRATION; RULES. The state's point source pollution abatement program shall be administered by the department. The department shall make such rules as are necessary for the proper execution of the program.

(3) DEFINITIONS. In this section:

(a) "Federal act" means the federal water pollution control act P.L. 92-500, as amended.

(b) "Point source pollution abatement facilities" means those facilities eligible for financial assistance under title II of the federal act.

144.24 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2896

(c) "State program" means the program of financial assistance for point source pollution abatement established under this section.

(4) ELIGIBILITY. (a) The department shall, by rule, specify criteria for determining eligible municipalities and projects for funding by grants under this section. Where a municipality is serviced by more than one sewerage district for wastewater pollution abatement, each service area of the municipality shall be considered as a separate municipality for purposes of obtaining financial assistance under the state program. Except as provided in this subsection, the department shall promulgate rules which specify criteria for determining eligible participants and projects which comply with the federal act and rules promulgated under the federal act.

(b) Eligible projects relating to collection systems include only collection systems in unsewered municipalities which are constructing a new wastewater treatment plant and collection system rehabilitation which is necessary to maintain the total integrity of a sewerage system. Funding may not be provided for that portion of any project related to industrial capacity that is defined under the federal act as subject to industrial cost recovery. The amount of reserve capacity for treatment works eligible for grant assistance is limited to that future capacity required to serve the users of the treatment works expected to exist within the service area of the project 10 years from the time the treatment works are estimated to become operational or June 30, 1985, in the case of interceptor sewers and associated appurtenances. The department, in consultation with the demographic services center in the department of administration under s. 16.96 shall promulgate rules defining procedures for projecting population used in determining the amount of reserve capacity. Notwithstanding the federal act and the rules promulgated thereunder, the state program shall not require an industrial cost recovery system.

(c) Every applicant seeking grants for construction purposes under this section shall complete a staged planning, design and environmental analysis sequence developed by the department. The department shall model the required sequence after the staged planning, design and environmental analysis sequence under title II of the federal act. In cases where sources of funding for the planning and design prescribed under this paragraph are not available for such activities, grants provided under this section may pay 75% of the cost of such planning and design.

(5) APPLICATION. Municipalities which desire to participate in the financial assistance program under this section shall submit an

application for participation to the department. The application shall be in such form and include such information as the department prescribes. The department shall review applications for participation in the state program. It shall determine those applications which meet the criteria it established under sub. (4).

(6) PRIORITIES. (a) Each municipality shall notify the department of its intent to apply for a grant under this section by January 1 of each year. For those municipalities that notify the department by January 1, the department shall annually compile a funding list which ranks these municipalities in the same order as they appear on the federal priority list, prepared under the federal act, as of January 1 of each year. If there is not sufficient funding available under this section to fund all grant applications in one year, the department shall allocate available funding to projects in the order in which they appear on the funding list. The department shall not allocate funds to a municipality that is on the funding list in a particular year if the municipality is not ready to begin construction within 3 months of the time when the department is ready to allocate the funds, and the municipality can reasonably expect to receive funds under the federal program within 12 months of the time when the department is ready to allocate the funds.

(b) For those municipalities that notify the department after January 1 but before April 1 of each year of their intent to apply for a grant under this section, the department shall compile a funding list as of April 1 of each year. If funding remains from the allocation under par. (a), the department shall allocate available funding to projects in the order in which they appear on the funding list compiled under this paragraph. The department shall not allocate funds to a municipality under this paragraph that is on the funding list in a particular year if the municipality is not ready to begin construction within 3 months after the department is ready to allocate the funds and the municipality can reasonably expect to receive funds under the federal program within 12 months after the department is ready to allocate the funds.

(7) PAYMENT. Upon the completion by an applicant of all application requirements, the department may enter into an agreement with a municipality for a grant of up to 60% of the eligible costs of a project, except as provided in sub. (4) (c). No project funded under this section may receive state assistance that, combined with other nonlocal government assistance, exceeds 75% of the eligible cost of the project. Metropolitan sewerage districts that serve cities of the first class shall be limited

annually to receiving 33% of the state funding appropriated annually under this section.

(8) CONDITIONS OF PAYMENT. (a) Each municipality receiving state assistance under this section for the construction of a point source pollution abatement facility shall develop and adopt:

1. A program of water conservation no less stringent than the federal requirements.

2. A program of systemwide operation and maintenance of the wastewater treatment plant, including the training of personnel, no less stringent than the federal requirements.

3. A system of equitable user charges to ensure that each recipient of waste treatment services pays its proportionate share of the costs of the operation and maintenance of the point source pollution abatement facility. The user fee system shall be in compliance with title II of the federal act and the rules promulgated under the federal act.

(b) Payment in excess of two-thirds of the state assistance provided for the eligible costs of construction shall not be made until the department has approved the programs required under par. (a) 1 and 2 and the system specified under par. (a) 3.

(c) The department shall promulgate rules consistent with this subsection.

(9) REIMBURSEMENT. (a) The department shall, by rule, implement and administer reimbursement funding to municipalities as part of the financial assistance program under this section to encourage the participation of all municipalities.

(b) The department shall promulgate rules specifying reimbursement eligibility and procedures for commitments of financial assistance. The rules shall specify that reimbursement shall be made or committed:

1. To communities willing to apply for state assistance conditioned upon legislative appropriation of the amounts needed to reimburse municipalities.

2. To communities successfully completing all planning and design requirements.

3. For all eligible costs consistent with sub. (4).

4. Prior to the start of construction of any reimbursable project if all required procedures have been complied with.

5. Subject to a priority determination system consistent with sub. (6) for reimbursable projects.

6. Subject to the same provisions of payment under sub. (7).

7. Subject to the same conditions of payment under sub. (8).

(c) The maximum amount of state assistance the department may commit for future reimbursement is 110% of the current year's appropriation for point source pollution grants.

(10) INDIVIDUAL SEPTIC TANK REPLACEMENT OR REHABILITATION. (a) *Definitions.* In this subsection:

1. "Principal residence" means a residence which is occupied at least 51% of the year by an individual, a family or household.

2. "Private sewage system" means a sewage treatment and disposal system serving a single structure with a septic tank and soil absorption field located on the same parcel as the structure. This term also means an alternative sewage system approved by the department of industry, labor and human relations including a substitute for the septic tank or soil absorption field, a holding tank, a system serving more than one structure or a system located on a different parcel than the structure. A private sewage system may be owned by the property owner or by a special purpose district.

3. "Small commercial establishment" means a commercial establishment or business place which has average total sewage flows of less than 2,100 gallons per day.

(b) *Rules.* The department may not promulgate a rule under this subsection until the proposed rule is approved by the department of industry, labor and human relations. A rule promulgated under this subsection without the approval of the department of industry, labor and human relations is void.

(c) *Maintenance.* The department shall establish a maintenance program to be administered by the governmental units responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), under this subsection, applicable to all new or replacement private sewage systems constructed in governmental units which receive a grant under this subsection. The maintenance program shall include a requirement of inspection or pumping of the private sewage system at least once every 3 years. Inspections may be conducted by a master plumber, journeyman plumber or restricted plumber licensed under ch. 145, a person licensed under s. 146.20 or by an employe of the state or governmental unit designated by the department. The department may suspend or revoke a license issued under s. 146.20 if the department finds that the licensee falsified information on inspection forms. The department of industry, labor and human relations may suspend or revoke the license of a plumber licensed under ch. 145 if the department of industry, labor and human relations finds that the plumber falsified information on inspection forms.

144.24 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2898

(d) *Failing private sewage systems.* The department shall establish criteria for determining if a private sewage system is a failing private sewage system. A failing private sewage system is one which causes or results in any of the following conditions:

1. The failure to accept sewage discharges and back up of sewage into the structure served by the private sewage system.

2. The discharge of sewage to the surface of the ground or to a drain tile.

3. The discharge of sewage to any waters of the state.

4. The introduction of sewage into zones of saturation which adversely affects the operation of a private sewage system.

(e) *Eligibility; priority.* 1. A failing private sewage system serving one or more principal residences or small commercial establishments constructed prior to and inhabited on July 1, 1978, is eligible for grant funds under this subsection if an enforcement order has been issued under s. 144.025 (2) (d), 145.02 (3) (f) or 145.20 (2) (f) or an enforcement order has been issued by a governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), under s. 146.13. A private sewage system subject to an enforcement order is eligible for grant funds during the 3-year period after the order is issued, if the application is submitted and work is completed within 12 months after the order is issued. Grant funds may be awarded after work is completed if rehabilitation or replacement of the system meets all requirements of this subsection and rules promulgated under this subsection. After receiving a grant application, unless a grant is awarded, the department shall include the private sewage system on the priority list until the end of the 3-year period after the order is issued.

2. Each principal residence or small commercial establishment may receive only one grant under this subsection.

(f) *Use of funds.* Funds available under a grant under this subsection shall be applied to the rehabilitation or replacement of the private domestic sewage system. An existing private sewage system may be replaced by an alternative sewage system or by a system serving more than one principal residence.

(g) *Allowable costs.* 1. Costs allowable in determining grant funding under this subsection may not exceed the costs of rehabilitating or replacing a private sewage system which would be necessary to allow the rehabilitated system or new system to meet the minimum requirements of the state plumbing code promulgated under s. 145.13.

2. Costs allowable in determining grant funding under this subsection may not exceed the costs of rehabilitating or replacing a private sewage system by the least costly methods.

(h) *Application.* In order to be eligible for a grant under this subsection a governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), shall make an application for replacement or rehabilitation of private sewage systems of principal residences or small commercial establishments.

(i) *Conditions; governmental units.* As a condition for obtaining a grant under this subsection, a governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), making an application shall:

1. Certify that grants will be used for private sewage systems which meet the eligibility requirements under par. (e), that the funds will be used as provided under par. (f) and that allowable costs will not exceed the amount permitted under par. (g);

2. Certify that grants will be used for private sewage systems which will be properly installed and maintained;

3. Certify that grants provided to the governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), will be disbursed to the owners of eligible private sewage systems;

4. Establish a process for regulation and inspection of private sewage systems; and

5. Establish a system of user charges and cost recovery if the governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), considers this system to be appropriate. User charges and cost recovery may include the cost of the grant application fee and the cost of supervising installation and maintenance.

(j) *Assistance.* The department shall make its staff available to provide technical assistance to each governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15).

(k) *Priority.* The department shall establish a funding priority list separate from the funding priority list established under sub. (6) for the purposes of distributing grant funds under this subsection. The funding priority list shall give a higher rank to projects which alleviate greater potential or actual harm to public health and water quality.

(L) *Funding.* 1. A governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), which desires to participate in the financial assistance program under this subsection shall submit an application for participation to the department.

The application shall be in the form and include the information the department prescribes. The department shall review applications for participation in the state program. It shall determine those applications which meet the criteria it established under par. (i). Applications must be received by the department no later than January 1 of any year for consideration in that fiscal year.

2. Funds available for grants under this subsection are limited to 3% of the point source appropriation under s. 20.370 (4) (ca) in any year plus any available funds from a previous year and may be expended until fully depleted.

3. The state grant share under this subsection for any private sewage system and the cost of its installation shall be limited to \$3,000 for each principal resident or small commercial establishment served or 60% of the total project cost, whichever is less. The total share for each principal residence owner or small commercial establishment owner shall not be less than 25% of the total costs of the project attributable to that principal resident or small commercial establishment.

4. The department shall promulgate rules which shall define payment mechanisms to be used to disburse grants to a governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15).

(m) *Inspection.* Agents of the department or the governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), may enter premises where private sewage systems are located pursuant to a special inspection warrant as required under s. 66.122, to collect samples, records and information and to ascertain compliance with the rules and orders of the department or the governmental unit.

(n) *Enforcement.* 1. If the department has reason to believe that a violation of this subsection or any rule promulgated under this subsection has occurred, it may:

a. Cause written notice to be served upon the alleged violator. The notice shall specify the alleged violation, and contain the findings of fact on which the charge of violation is based, and may include an order that necessary corrective action be taken within a reasonable time. This order shall become effective unless, no later than 30 days after the date the notice and order are served, the person named in the notice and order requests in writing a hearing before the department. Upon this request and after due notice, the department shall hold a hearing. Instead of an order, the department may require that the alleged violator appear before the department for a hearing at a time and place

specified in the notice and answer the charges complained of; or

b. Initiate action under s. 144.99.

2. If after the hearing the department finds that a violation has occurred, it shall affirm or modify its order previously issued, or issue an appropriate order for the prevention, abatement or control of the violation or for other corrective action. If the department finds that no violation has occurred, it shall rescind its order. Any order issued as part of a notice or after hearing may prescribe one or more dates by which necessary action shall be taken in preventing, abating or controlling the violation.

3. Enforcement of this subsection shall follow the procedures under s. 144.98.

4. Additional grants under this subsection to a governmental unit responsible for the regulation of private sewage systems, as defined under s. 145.01 (15), previously awarded a grant under this subsection may be suspended or terminated if the department finds that a private sewage system previously funded in the governmental unit is not being or has not been properly installed or maintained.

(11) This section shall be liberally construed in aid of the purposes declared in sub. (1).

History: 1977 c. 418; 1979 c. 34 ss. 976g to 976wd, 2102 (39) (g); 1979 c. 221 ss. 626 to 626y, 2200 (20), 2202 (39).

144.25 Financial assistance; nonpoint source water pollution abatement. (1)

The purposes of the nonpoint source pollution abatement grant program under this section are to:

(a) Provide the necessary administrative framework and financial assistance for the implementation of measures to meet nonpoint source water pollution abatement needs identified in areawide water quality management plans.

(b) Provide coordination with all elements of the state's water quality program in order to ensure that all activities and limited resources are optimally allocated in the achievement of this state's water quality goals.

(c) Provide technical and financial assistance to individuals and municipalities in the application of necessary nonpoint source water pollution abatement measures.

(d) Focus limited technical and financial resources in critical geographic locations through the selection of priority watersheds where nonpoint source related water quality problems are the most severe and control is most feasible.

(e) Provide for program evaluation, subsequent modifications and recommendations.

(2) In this section:

(a) "Best management practices" means practices, techniques or measures, identified in

144.25 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2900

areawide water quality management plans, which are determined to be the most effective, practicable means of preventing or reducing pollutants generated from nonpoint sources to a level compatible with water quality goals.

(b) "Nonpoint source" means a land management activity which contributes to run-off, seepage or percolation; and are sources which are not defined as point sources of pollutants under s. 147.015 (8).

(3) (a) The department shall administer the nonpoint source water pollution program under this section and shall promulgate rules in consultation with the board of soil and water conservation districts as are necessary for the proper execution and administration of the state program.

(b) The following requirements apply to rules promulgated under this section:

1. Rules which relate to animal waste treatment and which are strictly administrative in character shall not require prior approval under s. 13.565.

2. Only those persons involved in the administration of the program established under this section, or persons who are grant recipients or applicants shall be subject to rules promulgated under this section.

3. All rules which relate or pertain to agricultural practices relating to animal waste handling and treatment shall be subject to s. 13.565.

(4) The department shall:

(a) Be responsible for the integration of the nonpoint source water pollution abatement program into the state's overall water quality management program.

(b) Identify through the areawide water quality management plans provided for under section 208 of the federal water pollution control act, P.L. 92-500, as amended, the designated local management agencies.

(c) Identify through the continuing planning process under s. 147.25 those priority watersheds where the need for nonpoint source water pollution abatement is most critical and identify for those watersheds the best management practices necessary to meet water quality objectives.

(d) Review and approve the detailed program for implementation prepared by the designated management agencies.

(e) Promulgate rules establishing standards and specifications concerning best management practices which are required for eligibility for cost-sharing grants under this section. The department may waive these standards and specifications in exceptional cases.

(f) Administer the distribution of aids under s. 20.370 (4) (ce) to designated management agencies for local implementation of the

nonpoint source pollution abatement grant program.

(5) The board of soil and water conservation districts shall:

(a) Be responsible for assisting each local designated management agency in the preparation of a detailed program for implementation.

(b) Assist the local designated management agencies in local coordination, technical assistance and public education for the nonpoint source water pollution abatement program.

(c) Assist in the local administration of cost-sharing grants under this section:

(d) Assist the local designated management agencies within the selected priority watersheds in conducting one or more informational meetings for the purpose of presenting the implementation program under this section to the general public, landowners and affected individuals and groups.

(6) The designated local management agency shall:

(a) Be responsible for coordination and implementation of activities necessary to achieve water quality objectives including the development of a detailed program for implementation.

(b) Utilize, whenever possible, existing staff or contract with existing governmental agencies to utilize that agency's existing staff to provide various field, administrative, planning and other services.

(c) Contact or attempt to contact all landowners or operators within critical management areas concerning their participation in the implementation program. The designated local management agency shall certify to the department that it has complied with this paragraph.

(8) Eligibility for cost-sharing grants under this section shall be determined based on the following:

(a) Municipalities and individual landowners or operators shall be eligible for cost-sharing grants.

(b) Grants may be provided to applicants in priority watershed areas for projects in conformance with approved areawide water quality management plans.

(c) Grants may be provided to applicants in nonpriority watersheds for projects which are in conformance with areawide water quality management plans and which conform to the purposes specified under sub. (1).

(d) Each cost-sharing grant shall be approved by the designated management agency.

(e) Grants may only be used for implementing best management practices.

(f) The state share of a cost-sharing grant under this section may not exceed 50% of the cost of implementing the best management

practice except as provided under pars. (g) and (h).

(g) The department may increase the state share of a cost-sharing grant under this section up to 70% of the cost of implementing the best management practice if the department, in consultation with the board of soil and water conservation districts, determines that:

1. The main benefits to be derived from the best management practices are related to improving offsite water quality; and

2. The matching share requirement under par. (f) would place an unreasonable cost burden on the applicant.

(h) The department may increase the state share of a cost-sharing grant under this section up to 80% of the cost of implementing the best management practice if:

1. The department, in consultation with the board of soil and water conservation districts, determines that par. (g) 1 and 2 applies; and

2. A county matching share is provided which equals the state share over 70%.

(i) The local matching share of a cost-sharing grant under this section shall be at least 30% of the cost of implementing the best management practice except as provided under par. (j).

(j) The local matching share of a cost-sharing grant under this section shall be the remainder of the cost of implementing the best management practice after subtracting the state share and county share if the department increases the state share under par. (h).

(k) A minimum of 70% of the total amount of cost-sharing grants available annually under this section shall be utilized for implementing best management practices in priority watersheds.

History: 1977 c. 418; 1979 c. 34, 221; 1979 c. 355 s. 241

144.26 Navigable waters protection law.

(1) To aid in the fulfillment of the state's role as trustee of its navigable waters and to promote public health, safety, convenience and general welfare, it is declared to be in the public interest to make studies, establish policies, make plans and authorize municipal shoreland zoning regulations for the efficient use, conservation, development and protection of this state's water resources. The regulations shall relate to lands under, abutting or lying close to navigable waters. The purposes of the regulations shall be to further the maintenance of safe and healthful conditions; prevent and control water pollution; protect spawning grounds, fish and aquatic life; control building sites, placement of structure and land uses and reserve shore cover and natural beauty.

(2) In this section, unless the context clearly requires otherwise:

(c) "Municipality" or "municipal" means a county, village or city.

(d) "Navigable water" or "navigable waters" means Lake Superior, Lake Michigan, all natural inland lakes within Wisconsin and all streams, ponds, sloughs, flowages and other waters within the territorial limits of this state, including the Wisconsin portion of boundary waters, which are navigable under the laws of this state. Notwithstanding any other provision of law or administrative rule promulgated thereunder, a shoreland zoning ordinance required under s. 59.971 and this section does not apply to lands adjacent to farm drainage ditches if:

1. Such lands are not adjacent to a natural navigable stream or river;

2. Those parts of such drainage ditches adjacent to such lands were nonnavigable streams before ditching or had no previous stream history; and

3. Such lands are maintained in nonstructural agricultural use.

(e) "Regulation" refers to ordinances enacted under ss. 59.971 and 62.23 (7) and means shoreland subdivision and zoning regulations which include control of uses of lands under, abutting or lying close to navigable waters for the purposes specified in sub. (1), pursuant to any of the zoning and subdivision control powers delegated by law to cities, villages and counties.

(f) "Water resources," where the term is used in reference to studies, plans, collection of publications on water and inquiries about water, means all water whether in the air, on the earth's surface or under the earth's surface. "Water resources" as used in connection with the regulatory functions under this section means navigable waters.

(g) "Shorelands" means the lands specified under par. (e) and s. 59.971 (1).

(3) (a) The department shall coordinate the activities of the several state agencies in managing and regulating water resources.

(b) The department shall make studies, establish policies and make plans for the efficient use, conservation, development and protection of the state's water resources and:

1. On the basis of these studies and plans make recommendations to existing state agencies relative to their water resource activities.

2. Locate and maintain information relating to the state's water resources. The department shall collect pertinent data available from state, regional and federal agencies, the university of Wisconsin, local units of government and other sources.

3. Serve as a clearinghouse for information relating to water resources including referring citizens and local units of government to the

appropriate sources for advice and assistance in connection with particular water use problems.

(5) (a) The department shall prepare a comprehensive plan as a guide for the application of municipal ordinances regulating navigable waters and their shorelands as defined in this section for the preventive control of pollution. The plan shall be based on a use classification of navigable waters and their shorelands throughout the state or within counties and shall be governed by the following general standards:

1. Domestic uses shall be generally preferred.
2. Uses not inherently a source of pollution within an area shall be preferred over uses that are or may be a pollution source.
3. Areas in which the existing or potential economic value of public, recreational or similar uses exceeds the existing or potential economic value of any other use shall be classified primarily on the basis of the higher economic use value.
4. Use locations within an area tending to minimize the possibility of pollution shall be preferred over use locations tending to increase that possibility.
5. Use dispersions within an area shall be preferred over concentrations of uses or their undue proximity to each other.

(b) The department shall apply to the plan the standards and criteria set forth in sub. (6).

(6) Within the purposes of sub. (1) the department shall prepare and provide to municipalities general recommended standards and criteria for navigable water protection studies and planning and for navigable water protection regulations and their administration. Such standards and criteria shall give particular attention to safe and healthful conditions for the enjoyment of aquatic recreation; the demands of water traffic, boating and water sports; the capability of the water resource; requirements necessary to assure proper operation of septic tank disposal fields near navigable waters; building setbacks from the water; preservation of shore growth and cover; conservancy uses for low lying lands; shoreland layout for residential and commercial development; suggested regulations and suggestions for the effective administration and enforcement of such regulations.

(7) The department, the municipalities and all state agencies shall mutually co-operate to accomplish the objective of this section. To that end, the department shall consult with the governing bodies of municipalities to secure voluntary uniformity of regulations, so far as practicable, and shall extend all possible assistance therefor.

(8) This section and s. 59.971 shall be construed together to accomplish the purposes and objective of this section.

(9) Sections 30.50 to 30.80 are not affected or superseded by this section.

(10) A person aggrieved by an order or decision of the department under this section may cause its review under ch. 227.

History: 1979 c. 221 s. 624.

SUBCHAPTER III

AIR POLLUTION

144.30 Air pollution; definitions. As used in ss. 144.30 to 144.426 unless the context requires otherwise:

(1) "Air contaminant" means dust, fumes, mist, liquid, smoke, other particulate matter, vapor, gas, odorous substances or any combination thereof but shall not include uncombined water vapor.

(2) "Air contaminant source" means any facility, building, structure, equipment, vehicle or action which may emit or result in the emission of an air contaminant directly, indirectly or in combination with another facility, building, structure, equipment, vehicle or action.

(3) "Air pollution control permit" means any permit required or allowed under s. 144.391.

(3m) "Allocation of the available air resource" means either:

(a) The apportionment among air contaminant sources of the difference between an ambient air quality standard and the concentration in the atmosphere of the corresponding air contaminant in existence at the time the rule promulgated under s. 144.373 becomes effective; or

(b) The apportionment among air contaminant sources of the difference between an ambient air increment and the baseline concentration if a baseline concentration is established.

(4) "Allowable emission" means the emission rate calculated using the maximum rated

capacity of the origin of, or the equipment emitting an air contaminant based on the most stringent applicable emission limitation and accounting for any enforceable permit conditions which limit operating rate, or hours of operation, or both.

(5) "Ambient air increment" means the maximum allowable concentration of an air contaminant above the base line concentration.

(6) "Ambient air quality standard" means a level of air quality which will protect public health with an adequate margin of safety or may be necessary to protect public welfare from anticipated adverse effects.

(7) "Attainment area" means an area which is not a nonattainment area.

(8) "Base line concentration" means concentration in the atmosphere of an air contaminant which exists in an area at the time of the first application to the U.S. environmental protection agency for a prevention of significant deterioration permit under section 165 of the federal clean air act or the first application for an attainment area major source permit under s. 144.391 (2), whichever occurs first, less any contribution from stationary sources identified in section 169 (4) of the federal clean air act.

(9) "Best available control technology" means an emission limitation for an air contaminant based on the maximum degree of reduction achievable as specified by the department on an individual case-by-case basis taking into account energy, economic and environmental impacts and other costs related to the source.

(9m) "Construction or modification permit" means any permit under s. 144.391 (1) (b) 1, (2) (b) 1 or (3) (b) 1.

(9p) "Construction or new operation permit" means a permit under s. 144.391 (1) (b), (2) (b) or (3) (b).

(9r) "Elective operation permit for an existing source" or "elective operation permit" means a permit under s. 144.391 (1) (c), (2) (c) or (3) (c).

(10) "Emission" means a release of air contaminants into the atmosphere.

(11) "Emission limitation" or "emission standard" means a requirement which limits the quantity, rate or concentration of emissions of air contaminants on a continuous basis. An emission limitation or emission standard includes a requirement relating to the operation or maintenance of a source to assure continuous emission reduction.

(12) "Emission reduction option" means:

(a) An offsetting of greater emissions from a stationary source against lower emissions from the same or another stationary source.

(b) A reduction in emissions from a stationary source which is reserved as a credit against future emissions from the same or another stationary source.

(c) Other arrangements for emission reduction, trade-off, credit or offset permitted by rule by the department.

(14) "Federal clean air act" means the federal clean air act, as amended, on July 29, 1979 (42 USC 7401 et seq.) and regulations issued by the federal environmental protection agency under that act.

(15) "Lowest achievable emission rate" means the rate of emission which reflects the more stringent of the following:

(a) The most stringent emission limitation which is contained in the air pollution regulatory program of any state for this class or category of source, unless an applicant for a permit demonstrates that these limitations are not achievable; or

(b) The most stringent emission limitation which is achieved in practice by the class or category of source.

(17m) "Mandatory operation permit for an existing source" or "mandatory operation permit" means a permit under s. 144.391 (1) (bm), (2) (bm) or (3) (bm).

(18m) "Major source construction or new operation permit" means a permit under s. 144.391 (1) (b) or (2) (b).

(19) "Major source permit" means any permit under s. 144.391 (1) or (2).

(19m) "Minor source construction or new operation permit" means a permit under s. 144.391 (3) (b).

(20) "Modification" means any changes in the physical size or method of operation of a stationary source which increases the potential amount of emissions of an air contaminant or which results in the emission of an air contaminant not previously emitted or which results in the violation of an ambient air increment. In determining if a change in the physical size or method of operation of an attainment area major source is a modification, an increase in the potential amount of emissions of an air contaminant occurs only if there is an increase in the net amount of emissions of the air contaminant.

(21) "Nonattainment area" means an area identified by the department in a document prepared under s. 144.371 (2) where the concentration in the atmosphere of an air contaminant exceeds an ambient air quality standard.

(22) "Nonattainment area major source construction or new operation permit" means a permit under s. 144.391 (1) (b).

(22m) "Operation permit", unless otherwise qualified, means any permit under s. 144.391

144.30 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2904

(1) (b) 2, (bm) or (c), (2) (b) 2, (bm) or (c) or (3) (b) 2, (bm) or (c).

(23) "Stationary source" means an air contaminant source which directly or indirectly is capable of emitting an air contaminant only from a fixed location. A stationary source includes an air contaminant source which is capable of being transported to a different location. A stationary source may consist of one or more pieces of process equipment, each of which is capable of emitting an air contaminant. A stationary source does not include a motor vehicle or equipment which is capable of emitting an air contaminant while moving.

History: 1971 c. 125, 130, 211; 1977 c. 377; 1979 c. 34, 221.

The social and economic roots of judge-made air pollution policy in Wisconsin. Laitos, 58 MLR 465

144.31 Air pollution control; powers and duties. (1) The department shall:

(a) Promulgate rules implementing and consistent with ss. 144.30 to 144.426 and 144.96.

(b) Encourage voluntary cooperation by persons and affected groups to achieve the purposes of ss. 144.30 to 144.426 and 144.96.

(c) Encourage local units of government to handle air pollution problems within their respective jurisdictions and on a regional basis, and provide technical and consultative assistance for that purpose.

(d) Collect and disseminate information and conduct educational and training programs relating to the purposes of ss. 144.30 to 144.426 and 144.96.

(e) Organize a comprehensive and integrated program to enhance the quality, management and protection of the state's air resources.

(f) Prepare and develop one or more comprehensive plans for the prevention, abatement and control of air pollution in this state. The department thereafter shall be responsible for the revision and implementation of such plans.

(g) Conduct or direct studies, investigations and research relating to air contamination and air pollution and their causes, effects, prevention, abatement and control and, by means of field studies and sampling, determine the degree of air contamination and air pollution throughout the state.

(h) Consult, upon request, with any person proposing to construct, install, or otherwise acquire an air contaminant source, device or system for the control thereof, concerning the efficacy of such device or system, or the air pollution problem which may be related to the source, device or system. Nothing in any such consultation shall relieve any person from compliance with ss. 144.30 to 144.426 or rules pursuant thereto, or any other provision of law.

(i) Prepare and adopt minimum standards for the emission of mercury compounds or metallic mercury into the air.

(k) Specify the best available control technology on an individual case-by-case basis considering energy, economic and environmental impacts and other costs related to the source.

(m) Coordinate the reporting requirements under ss. 144.394 and 144.96 in order to minimize duplicative reporting requirements.

(p) Promulgate by rule the actions or events which constitute the reconstruction of a major source. The department shall submit the notice required under s. 227.018 regarding rules under this paragraph by January 1, 1984.

(2) The department may:

(a) Hold hearings relating to any aspect of the administration of ss. 144.30 to 144.426 and 144.96 and, in connection therewith, compel the attendance of witnesses and the production of evidence.

(b) Issue orders to effectuate the purposes of ss. 144.30 to 144.426 and 144.96 and enforce the same by all appropriate administrative and judicial proceedings.

(c) Secure necessary scientific, technical, administrative and operational services, including laboratory facilities, by contract or otherwise.

(d) Make a continuing study of the effects of the emission of air contaminants from motor vehicles on the quality of the outdoor atmosphere and make recommendations to appropriate public and private bodies with respect thereto.

(e) Advise, consult, contract and cooperate with other agencies of the state, local governments, industries, other states, interstate or interlocal agencies, and the federal government, and with interested persons or groups.

(f) Examine any records relating to emissions which cause or contribute to air contamination.

History: 1971 c. 125 s. 522 (2); 1979 c. 34 ss. 979h, 979j, 980p, 980t, 984ng, 2102 (39) (g); 1979 c. 175; 1979 c. 221 ss. 627fd to 627fm, 2202 (39).

144.32 Federal aid. Subdivisions of this state and interlocal agencies may make application for, receive, administer and expend any federal aid for the control of air pollution or the development and administration of programs related to air pollution control if first submitted to and approved by the department. The department shall approve any such application if it is consistent with the purposes of ss. 144.30 to 144.426 and any other applicable requirements of law.

History: 1979 c. 34

144.33 Confidentiality of records. (1) RECORDS. Except as provided under sub. (2), any records or other information furnished to or obtained by the department in the administration of ss. 144.30 to 144.426 and 144.96 are public records subject to s. 19.21.

(2) CONFIDENTIAL RECORDS. Any records or information, except emission data, received by the department and certified by the owner or operator to relate to production or sales figures or to processes or production unique to the owner or operator or which would tend to affect adversely the competitive position of the owner or operator are only for the confidential use of the department in the administration of ss. 144.30 to 144.426 and 144.96, unless the owner or operator expressly agrees to their publication or availability to the general public. Nothing in this subsection prevents the use of the records or information by the department in compiling or publishing analyses or summaries relating to the general condition of the outdoor atmosphere, if the analyses or summaries do not identify a specific owner or operator.

History: 1971 c. 125 s. 522 (2); 1979 c. 34; 1979 c. 221 s. 2202 (39).

144.34 Inspections. Any duly authorized officer, employe or representative of the department may enter and inspect any property, premise or place on or at which an air contaminant source is located or is being constructed or installed at any reasonable time for the purpose of ascertaining the state of compliance with ss. 144.30 to 144.426 and 144.96 and rules promulgated under those sections. No person may refuse entry or access to any authorized representative of the department who requests entry for purposes of inspection, and who presents appropriate credentials. No person may obstruct, hamper or interfere with any such inspection. The department, if requested, shall furnish to the owner or operator of the premises a report setting forth all facts found which relate to compliance status.

History: 1971 c. 125 s. 522 (2); 1979 c. 34; 1979 c. 221 s. 2202 (39).

144.35 Air pollution control council. (1) GENERAL DUTIES. The air pollution control council shall advise the natural resources board on proposed and existing rules and any matters pertaining to air pollution.

(2) STUDY OF MANDATORY OPERATION PERMIT REQUIREMENTS FOR EXISTING SOURCES. The air pollution control council with the cooperation and assistance of the department shall conduct a study on the requirement of mandatory operation permits for existing sources. The study shall describe the implementation of the

mandatory operation permit requirements for existing sources, the costs, paperwork, delays and other burdens, if any, incurred by permit applicants in order to comply with the mandatory operation permit requirements for existing sources and the benefits to the citizens of the state in reduced air pollution and more effective management of the state's air resource. The air pollution control council shall report the results of this study to the legislature by July 1, 1988.

(3) STUDY OF ENFORCEMENT. The air pollution control council, with the cooperation and assistance of the department, shall conduct a study to identify any mechanism to minimize conflicting enforcement of the air pollution control permit program by the department and the federal environmental protection agency. The study shall include an examination of the enforcement of provisions in state law which are not required by the federal clean air act. The air pollution control council shall report the results of this study to the legislature and the natural resources board.

History: 1979 c. 221 ss. 627gb, 627gm; 1979 c. 355

144.355 Air resource allocation council.

(1) GENERAL DUTIES. The air resource allocation council shall advise the department on the allocation of the available air resource in attainment areas.

(2) STAFF. The department of natural resources shall provide adequate staff for the air resource allocation council to meet its responsibilities under subs. (3) to (5).

(3) RECOMMENDATIONS. The air resource allocation council shall prepare recommendations for the allocation of the available air resource in attainment areas among possible future sources considering ambient air quality standards, ambient air increments and emission limitations. These recommendations may include:

(a) Formulas for the reservation of certain amounts of the available air resource for future development.

(b) Factors to be considered in allocating the available air resource.

(c) Methods to determine the amount by which a source reduces or has the potential to reduce the amount of the available air resource.

(d) Methods to be used in establishing emission reduction options to apportion the available air resource.

(e) Methods for the continuing evaluation of policies related to the allocation of the air resource and public participation in this process.

(f) Identification of the air resources which the department should allocate.

144.355 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2906

(4) **CONSIDERATIONS.** In preparing its recommendations, the air resource allocation council shall consider:

(a) Present and future development needs.

(b) Priorities for certain types of development.

(c) Compatibility of certain types of development with existing uses.

(d) The possibility and the impact of stricter or more relaxed air quality standards, ambient air increment and emission limitations.

(5) **REPORT.** The air resource allocation council shall report its recommendations to the natural resources board by January 1, 1984.

(6) **SUNSET.** This section is effective until January 2, 1984.

History: 1979 c. 221.

NOTE: Chapter 221, laws of 1979, repeals this section effective January 2, 1984.

144.371 Identification of nonattainment areas.

(1) **PROCEDURES AND CRITERIA.** The department shall promulgate by rule procedures and criteria to identify a nonattainment area and to reclassify a nonattainment area as an attainment area. The department shall submit the notice required under s. 227.018 regarding rules under this subsection by July 1, 1982.

(2) **DOCUMENTS.** The department shall issue documents from time to time which define or list specific nonattainment areas based upon the procedures and criteria promulgated under sub.

(1). Notwithstanding s. 227.01 (9) or (10), documents issued under this subsection are not rules.

(3) **REVIEW.** The documents issued under sub. (2) may be reviewed under ss. 227.064 and 227.15.

(4) **PROCEDURES.** For any document issued under sub. (2) after April 30, 1980, the department shall hold a public hearing and follow the procedures in this subsection. The department shall give notice of the public hearing, and shall take any steps it deems necessary to convey effective notice to persons who are likely to have an interest in the proposed document. The notice shall be given at least 30 days prior to the date set for the hearing. The notice shall include a statement of the time and place at which the hearing is to be held and either a text of the proposed document or a description of how a copy of the document may be obtained from the department at no charge. The department shall hold a public hearing at the time and place designated in the notice of hearing, and shall afford all interested persons or their representatives an opportunity to present facts, views or arguments relative to the proposal under consideration. The presiding officer may limit oral presentations if it appears that the length of the

hearing otherwise would be unduly increased by reason of repetition. The department shall afford each interested person opportunity to present facts, views or arguments in writing whether or not he or she has had an opportunity to present them orally. At the beginning of each hearing the department shall present a summary of the factual information on which the document is based. The department or its duly authorized representative may administer oaths or affirmations and may continue or postpone the hearing to such time and place as it determines. The department shall keep minutes or a record of the hearing in such manner as it determines to be desirable and feasible. The department shall receive written comments on the document for at least 10 days after the close of the hearing. The department may not issue documents under this section earlier than 30 days after the close of the hearing.

History: 1979 c. 221.

144.372 Best available retrofit technology.

(1) **CASE-BY-CASE SPECIFICATION.** If visibility in an area is identified as an important value of the area under section 169A of the federal clean air act, the department shall specify on a case-by-case basis the best available retrofit technology for any existing major source located in the area and identified under section 169A of the federal clean air act.

(2) **CONSIDERATIONS.** In specifying the best available retrofit technology, the department shall consider:

(a) The cost of compliance.

(b) The existing pollution control technology in use at the source.

(c) The remaining useful life of the source.

(d) The degree of improvement in visibility which may be anticipated to result from the use of various retrofit technologies.

(e) The energy and nonair quality environmental impacts of compliance.

History: 1979 c. 221.

144.373 Air resource allocation.

(1) **DETERMINATION.** The department, after considering the recommendations submitted under s. 144.355, 1979 stats., shall promulgate by rule procedures and criteria to determine the allocation of the available air resource in an attainment area.

(2) **ALLOCATION.** The department, after considering the recommendations submitted under s. 144.355, 1979 stats., shall promulgate by rule air resource allocation standards to allocate the available air resource in attainment areas among sources receiving a construction or new operation permit or an elective operation permit for an existing source after the effective

date of this rule, other air contaminant sources and possible future air contaminant sources. The air resource allocation standards may allow for emission reduction options. The application of air resource allocation standards may not result in a violation of an ambient air quality standard or an ambient air increment.

(3) **DOCUMENTS.** The department shall maintain records indicating how much of the available air resource has been allocated in attainment areas. The department shall make these records available for public inspection.

History: 1979 c. 221

144.374 Mandatory operation permit dates. (1) **OPERATION PERMIT REQUIREMENT DATE.** The department shall promulgate by rule a schedule of the dates when a mandatory operation permit is required for various categories of existing sources. The department shall submit the notice required under s. 227.018 regarding rules under this subsection by October 1, 1982. The department may not require a mandatory operation permit for any existing source prior to January 1, 1983. The department shall require a mandatory operation permit for all existing sources after July 1, 1986.

(2) **OPERATION PERMIT APPLICATION DATE.** The department shall promulgate by rule a schedule of the dates when a mandatory operation permit application is required to be submitted for various categories of existing sources. The department shall submit the notice required under s. 227.018 regarding rules under this subsection by October 1, 1982.

History: 1979 c. 221

144.375 Air pollution control; standards and determinations. (1) **AMBIENT AIR QUALITY STANDARDS.** (a) *Similar to federal standard.* If an ambient air quality standard is promulgated under section 109 of the federal clean air act, the department shall promulgate by rule a similar standard but this standard may not be more restrictive than the federal standard except as provided under sub. (6).

(b) *Standard to protect health or welfare.* If an ambient air quality standard for any air contaminant is not promulgated under section 109 of the federal clean air act, the department may promulgate an ambient air quality standard if the department finds that the standard is needed to provide adequate protection for public health or welfare.

(2) **AMBIENT AIR INCREMENT.** The department shall promulgate by rule ambient air increments for various air contaminants in attainment areas. The ambient air increments shall be consistent with and not more restrictive, either

in terms of the concentration or the contaminants to which they apply, than ambient air increments under the federal clean air act except as provided under sub. (6).

(3) **CAUSE OR EXACERBATION OF AMBIENT AIR QUALITY STANDARD OR INCREMENT.** The department shall promulgate rules to define what constitutes the cause or exacerbation of a violation of an ambient air quality standard or ambient air increment.

(4) **STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES.** (a) *Similar to federal standard.* If a standard of performance for new stationary sources is promulgated under section 111 of the federal clean air act, the department shall promulgate by rule a similar emission standard but this standard may not be more restrictive in terms of emission limitations than the federal standard except as provided under sub. (6).

(b) *Standard to protect public health or welfare.* If a standard of performance for any air contaminant for new stationary sources is not promulgated under section 111 of the federal clean air act, the department may promulgate an emission standard of performance for new stationary sources if the department finds the standard is needed to provide adequate protection for public health or welfare.

(c) *Restrictive standard.* The department may impose a more restrictive emission standard of performance for a new stationary source than the standard promulgated under par. (a) or (b) on a case-by-case basis if a more restrictive emission standard is needed to meet the applicable lowest achievable emission rate under s. 144.393 (2) (b) or to install the best available control technology under s. 144.393 (3) (a).

(5) **EMISSION STANDARDS FOR HAZARDOUS AIR CONTAMINANTS.** (a) *Similar to federal standard.* If an emission standard for a hazardous air contaminant is promulgated under section 112 of the federal clean air act, the department shall promulgate by rule a similar standard but this standard may not be more restrictive in terms of emission limitations than the federal standard except as provided under sub. (6).

(b) *Standard to protect public health or welfare.* If an emission standard for a hazardous air contaminant is not promulgated under section 112 of the federal clean air act, the department may promulgate an emission standard for the hazardous air contaminant if the department finds the standard is needed to provide adequate protection for public health or welfare.

(c) *Restrictive standard.* The department may impose a more restrictive emission standard for a hazardous air contaminant than the

144.375 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2908

standard promulgated under par. (a) or (b) on a case-by-case basis if a more restrictive standard is needed to meet the applicable lowest achievable emission rate under s. 144.393 (2) (b) or to install the best available control technology under s. 144.393 (3) (a).

(6) IMPACT OF CHANGE IN FEDERAL STANDARDS. (a) If the ambient air increment, the ambient air quality standard, the standards of performance for new stationary sources or the emission standards for hazardous air contaminants under the federal clean air act are relaxed, the department shall alter the corresponding state standards unless it finds that the relaxed standards would not provide adequate protection for public health and welfare.

(b) Paragraph (a) applies to state standards of performance for new stationary sources and emission standards for hazardous air contaminants in effect on April 30, 1980 if the relaxation in the corresponding federal standards occurs after April 30, 1980.

(c) Paragraph (a) applies to ambient air quality standards in effect on April 30, 1980.

History: 1979 c. 34; 1979 c. 221 ss. 627fd, 627fg, 627gx.

144.38 Classification and reporting. (1)

(a) The department, by rule, shall classify air contaminant sources which may cause or contribute to air pollution, according to levels and types of emissions and other characteristics which relate to air pollution, and may require reporting for any such class. Classifications made pursuant to this section may be for application to the state as a whole or to any designated area of the state, and shall be made with special reference to effects on health, economic and social factors, and physical effects on property.

(b) Any person operating or responsible for the operation of air contaminant sources of any class for which the rules of the department require reporting shall make reports containing such information as the department requires concerning location, size and heights of contaminant outlets, processes employed, fuels used and the nature and time periods of duration of emissions, and such other information as is relevant to air pollution and available or reasonably capable of being assembled.

144.391 Air pollution control permits. (1)

NONATTAINMENT AREA MAJOR SOURCE PERMITS. (a) *Nonattainment area major source.* A stationary source is a nonattainment area major source if:

1. The source is located in a nonattainment area or may affect significantly the air quality in a nonattainment area; and

2. The source, considering air pollution control equipment, is capable of emitting an air contaminant for which the area is classified as a nonattainment area in the following amounts:

a. One hundred tons per year or more of sulfur oxides, particulate matter, carbon monoxide, nitrogen oxides or volatile organic compounds; or

b. An amount specified by rule by the department of any other air contaminant.

(ae) *Nonattainment area new major source.* A nonattainment area major source is a new source if, at the time application is made for an air pollution control permit, the department determines that when the source will commence operation following construction, reconstruction or replacement, it will be located in a nonattainment area or may affect significantly the air quality in a nonattainment area, and if:

1. Construction. Construction of the source commences after April 30, 1980;

2. Reconstruction. Reconstruction of the source commences after April 30, 1980; or

3. Replacement. Replacement of the source commences after April 30, 1980.

(am) *Nonattainment area modified major source.* A nonattainment area major source is a modified source if, at the time application is made for an air pollution control permit, the department determines that when the source will commence operation following modification, it will be located in a nonattainment area or may affect significantly the air quality in a nonattainment area, and if modification of the source commences after July 29, 1979.

(as) *Nonattainment area existing major source.* A nonattainment area major source is an existing source if it is not a new source and it is not a modified source.

(b) *Nonattainment area major source construction or new operation permit.* 1. Construction permit. No person may commence construction, reconstruction or replacement or commence modification of a nonattainment area major source unless the person has a permit from the department.

2. New operation permit. No person may operate a nonattainment area new major source or operate a nonattainment area modified major source unless the person has a permit from the department.

(bm) *Mandatory operation permit for existing nonattainment area major source.* No person may operate a nonattainment area existing major source after the operation permit requirement date specified under s. 144.374 (1) unless the person has an operation permit from the department.

(c) *Elective operation permit for nonattainment area existing major source.* A person may

apply for a permit for the operation of one or more points of emission from a nonattainment area existing major source even if no permit is required under par. (b) or (bm). No person may operate a source under an emission reduction option program unless the person has an operation permit from the department. If a person elects to apply for an elective operation permit, the source may not be operated without that permit beginning on the date the permit is first issued and the source may not be withdrawn from this permit program.

(2) ATTAINMENT AREA MAJOR SOURCE PERMITS. (a) *Attainment area major source.* A stationary source is an attainment area major source if:

1. The source is located in an attainment area or may affect significantly the air quality in an attainment area; and

2. The source, considering air pollution control equipment, is capable of emitting an air contaminant for which the area is classified as an attainment area as follows:

a. Two hundred and fifty tons per year or more of any air contaminant; or

b. One hundred tons per year or more of any air contaminant if the source is a type listed under section 169 (1) of the federal clean air act.

(ae) *Attainment area new major source.* An attainment area major source is a new source if, at the time application is made for an air pollution control permit, the department determines that when the source will commence operation following construction, reconstruction or replacement, it will be located in an attainment area or may affect significantly the air quality in an attainment area, and if:

1. Construction. Construction of the source commences after April 30, 1980;

2. Reconstruction. Reconstruction of the source commences after April 30, 1980; or

3. Replacement. Replacement of the source commences after April 30, 1980.

(am) *Attainment area modified major source.* An attainment area major source is a modified source if, at the time application is made for an air pollution control permit, the department determines that when the source will commence operation following modification, it will be located in an attainment area or may affect significantly the air quality in an attainment area, and if modification of the source commences after January 1, 1980.

(as) *Attainment area existing major source.* An attainment area major source is an existing source if it is not a new source and it is not a modified source.

(b) *Attainment area major source construction or new operation permit.* 1. Construction

permit. No person may commence construction, reconstruction or replacement or commence modification of an attainment area major source unless the person has a permit from the department.

2. New operation permit. No person may operate an attainment area new major source or operate an attainment area modified major source unless the person has a permit from the department.

(bm) *Mandatory operation permit for attainment area existing major source.* No person may operate an attainment area existing major source after the operation permit requirement date specified under s. 144.374 (1) unless the person has an operation permit from the department.

(c) *Elective operation permit for attainment area existing major source.* A person may apply for a permit for the operation of one or more points of emission from an attainment area existing major source even if no permit is required under par. (b) or (bm). No person may operate a source under an emission reduction option program unless the person has an operation permit from the department. If a person elects to apply for an elective operation permit, the source may not be operated without that permit beginning on the date the permit is first issued and the source may not be withdrawn from this permit program.

(3) MINOR SOURCE PERMITS. (a) *Minor source.* A stationary source is a minor source if no mandatory major source permit is required for the source.

(ae) *New minor source.* A minor source is a new source if:

1. Construction. Construction of the source commences after April 30, 1980; or

2. Replacement. Replacement of the source commences after April 30, 1980.

(am) *Modified minor source.* A minor source is a modified source if modification of the source commenced after April 30, 1980.

(as) *Existing minor source.* A minor source is an existing source if it is not a new source and it is not a modified source.

(b) *Minor source construction or new operation permit.* 1. Construction permit. No person may commence construction or replacement or commence modification of a minor source unless the person has a permit from the department or unless the source is in a class exempted by rule of the department.

2. New operation permit. No person may operate a new minor source or operate a modified minor source unless the person has a permit from the department. This subdivision does not apply if the person applies for a construction permit for the source prior to April 30, 1980.

(bm) *Mandatory operation permit for existing minor source.* No person may operate an existing minor source after the operation permit requirement date specified under s. 144.374 (1) unless the person has an operation permit from the department.

(c) *Elective operation permit for existing minor source.* A person may apply for a permit for the operation of one or more points of emission from an existing minor source. No person may operate a source under an emission reduction option program unless the person has an operation permit from the department. If a person elects to apply for an elective operation permit, the source may not be operated without that permit beginning on the date the permit is first issued and the source may not be withdrawn from this permit program.

(4) EXEMPTION FROM PERMIT REQUIREMENTS FOR CERTAIN MODIFICATIONS. (a) *Routine maintenance or repair exempt.* Routine maintenance or repair of a source is an exempt modification.

(b) *Specified changes in operations exempt under certain circumstances.* 1. A specified change in operation listed under par. (c) is an exempt modification if the specified change does not violate any condition of a permit, plan approval or special order applicable to the source.

2. If no permit is applicable to the source, a specified change in operation listed under par. (c) is an exempt modification if the specified change does not cause or exacerbate the violation of an ambient air quality standard and the specified change does not cause or exacerbate the violation of an ambient air quality increment.

(c) *Specified changes in operation.* A specified change in operation is:

1. An increase in production rate if that increase does not exceed the operating design capacity of the source.

2. An increase in the hours of operation of the source.

3. Use of an alternate fuel or raw material if the source is designed to burn or use the alternate fuel or raw material and if that information is included in the plans, specifications and other information submitted under s. 144.392 (2) or under s. 144.39 (1), 1977 stats.

4. Resumption of operation of a source after a period of closure if the existing equipment was continuously included in the source inventory as an existing source covered by plans under s. 144.31 (1) (f).

5. A change in ownership of the source.

(d) *Exempt from permit requirements.* Notwithstanding sub. (1) (b), (2) (b) or (3) (b), no permit is required to commence modification

and no additional permit is required to operate a modified source if the modification is an exempt modification.

(5) EXEMPTION FROM ADDITIONAL PERMIT REQUIREMENTS FOR APPROVED RELOCATED SOURCES. (a) *Approved relocated source.* A source is an approved relocated source if:

1. The source is to be relocated within an attainment area.

2. The source is a stationary source capable of being transported to a different location.

3. The source received an air pollution control permit for the relevant air contaminant prior to relocation.

4. The owner or operator of the source provides notice to and receives approval from the department prior to relocation.

5. The source in its new location meets all applicable emission limitations and does not violate an ambient air increment or ambient air quality standard.

(b) *Exempt from additional permits.* Notwithstanding subs. (2) and (3), no additional permit is required if a source is an approved relocated source.

(6) EXEMPTION BY RULE. Notwithstanding the other provisions of this section the department may, by rule, exempt types of stationary sources from any requirement of this section if the potential emissions from the sources do not present a significant hazard to public health, safety or welfare or to the environment.

History: 1979 c. 34, 221

144.392 Permit application and review.

(1) APPLICABILITY. This section does not apply to a mandatory operation permit for an existing source.

(1m) APPLICANT NOTICE REQUIRED. A person who is required to obtain or who seeks an air pollution control permit shall apply to the department for a permit to construct, reconstruct, replace, modify or operate the stationary source.

(2) PLANS, SPECIFICATIONS AND OTHER INFORMATION. Within 20 days after receipt of the application the department shall indicate the plans, specifications and any other information necessary to determine if the proposed construction, reconstruction, replacement, modification or operation will meet the requirements of ss. 144.30 to 144.426 and 144.96 and rules promulgated under these sections.

(3) ANALYSIS. The department shall prepare an analysis regarding the effect of the proposed construction, reconstruction, replacement, modification or operation on ambient air quality and a preliminary determination on the approvability of the permit application, within the

following time periods after the receipt of the plans, specifications and other information:

(a) *Major source construction or new operation permits.* For major source construction or new operation permits, within 120 days.

(b) *Minor source construction or new operation permits.* For minor source construction or new operation permits, within 30 days.

(c) *Elective operation permit.* For an elective operation permit for an existing source, within 240 days.

(4) DISTRIBUTION AND AVAILABILITY OF ANALYSIS, PRELIMINARY DETERMINATION AND MATERIALS. (a) *Distribution and publicity.* The department shall distribute and publicize the analysis and preliminary determination as soon as they are prepared.

(b) *Availability.* The department shall make available for public inspection in each area where the source would be constructed, reconstructed, replaced, modified or operated the following:

1. A copy of materials submitted by the permit applicant;

2. A copy of the department's analysis and preliminary determination; and

3. A copy or summary of other materials, if any, considered by the department in making its preliminary determination.

(5) NOTICE; ANNOUNCEMENT; NEWSPAPER NOTICE. (a) *Distribution of notice required.* The department shall distribute a notice of the proposed construction, reconstruction, replacement, modification or operation, a notice of the department's analysis and preliminary determination, a notice of the opportunity for public comment and a notice of the opportunity to request a public hearing to:

1. The applicant

2. Appropriate federal, local and state agencies including agencies in other states which may be affected

3. Regional and county planning agencies located in the area which may be affected.

4. Public libraries located in or near the area which may be affected.

5. Any person or group who requests this notice.

(b) *Announcement required.* The department shall circulate an announcement sheet containing a brief description of the proposed construction, reconstruction, replacement, modification or operation, a brief description of the administrative procedures to be followed, the date by which comments are to be submitted to the department and the location where the department's analysis and preliminary determination are available for review to:

1. Local and regional governments which have jurisdiction over the area that may be affected.

2. Local and regional news media in the area that may be affected.

3. Persons and groups who have demonstrated an interest and have requested this type of information.

(c) *Newspaper notice.* The department shall publish a class 1 notice under ch. 985 announcing the opportunity for written public comment and the opportunity to request a public hearing on the analysis and preliminary determination.

(6) PUBLIC COMMENT. The department shall receive public comments on the proposed construction, reconstruction, replacement, modification or operation and on the analysis and preliminary determination for a 30-day period beginning when the department gives notice under sub. (5) (c).

(7) PUBLIC HEARING. (a) *Hearing permitted.* The department may hold a public hearing on the permit application if requested by a person, any affected state or the U.S. environmental protection agency within 30 days after the department gives notice under sub. (5) (c). A request for a public hearing shall indicate the interest of the party filing the request and the reasons why a hearing is warranted. The department shall hold the public hearing within 60 days after the deadline for requesting a hearing if it deems that there is a significant public interest in holding a hearing.

(b) *Procedure.* The department shall promulgate by rule procedures for conducting public hearings under this subsection. Hearings under this subsection are not contested cases under s. 227.01 (2).

(8) DEPARTMENT DETERMINATION; ISSUANCE. (a) *Criteria; considerations.* The department may approve the permit application and issue a permit according to the criteria established under s. 144.393 after consideration of the comments received under subs. (6) and (7) and after consideration of the environmental impact as required under s. 1.11.

(b) *Time limits.* 1. The department shall act on a construction or new operation permit application within 60 days after the close of the public comment period or the public hearing, whichever is later, unless compliance with s. 1.11 requires a longer time. For an attainment area new major source, the department shall complete its responsibilities under s. 1.11 within one year.

2. The department shall act on an elective operation permit for an existing source within 120 days after the close of the public comment period or the public hearing, whichever is later,

unless compliance with s. 1.11 requires a longer time.

(9) MINING HEARING. If a hearing on the air pollution control permit is conducted as a part of a hearing under s. 144.836, the notice, comment and hearing provisions in that section supersede the provisions of subs. (4) to (8).

History: 1979 c. 34, 221

144.3925 Mandatory operation permit for existing sources; application and review.

(1) APPLICANT NOTICE REQUIRED. A person who is required to obtain a mandatory operation permit for an existing source shall apply to the department for the permit on or before the mandatory operation permit application date specified under s. 144.374 (2). The department shall specify by rule the content of applications under this subsection. The department shall consider the availability of existing information when requesting application information from the source.

(2) PLANS, SPECIFICATIONS AND OTHER INFORMATION. Within 20 days after receipt of the application the department shall indicate any additional information required under sub. (1) necessary to determine if the source, upon issuance of the permit, will meet the requirements of ss. 144.30 to 144.426 and 144.96 and rules promulgated under those sections.

(3) NOTICE; ANNOUNCEMENT; NEWSPAPER NOTICE. (a) **DISTRIBUTION OF NOTICE REQUIRED.** The department shall distribute a notice of a mandatory operation permit for an existing source, a notice of the opportunity for public comment and a notice of the opportunity to request a public hearing to the persons listed under s. 144.392 (5) (a) 1 to 5.

(b) **Announcement required.** The department shall circulate an announcement sheet containing a brief description of the mandatory operation permit application for an existing source, a brief description of the administrative procedures to be followed and the date by which comments are to be submitted to the department to the persons listed under s. 144.392 (5) (b) 1 to 3.

(c) **Newspaper notice.** The department shall publish a class 1 notice under ch. 985 announcing the opportunity for written public comment and the opportunity to request a public hearing on the application for a mandatory operation permit for an existing source.

(4) PUBLIC COMMENT. The department shall receive public comment on the application for a 30-day period beginning when the department gives notice under sub. (3) (c).

(5) PUBLIC HEARING. (a) **Hearing permitted.** The department may hold a public hearing

on an application for a mandatory operation permit for an existing source if requested by a person, any affected state or the U.S. environmental protection agency within 30 days after the department gives notice under sub. (3) (c). A request for a public hearing shall indicate the interest of the party filing the request and the reasons why a hearing is warranted. The department shall hold the public hearing within 60 days after the deadline for requesting a hearing if it deems that there is a significant public interest in holding the hearing.

(b) **Procedure.** The department shall promulgate by rule procedures for conducting public hearings under this subsection. Hearings under this subsection are not contested cases under s. 227.01 (2).

(6) DEPARTMENT DETERMINATION; ISSUANCE. The department shall approve the mandatory operation permit application for an existing source and issue the permit according to the criteria established under ss. 144.393 and 144.3935.

(7) OPERATION CONTINUED DURING APPLICATION. If a person applied to the department for a permit for a source under sub. (1), the source may not be required to discontinue operation for lack of a permit until the department acts under sub. (6).

History: 1979 c. 221

144.393 Criteria for permit approval. (1) REQUIREMENTS FOR ALL SOURCES. The department may approve the application for a permit required or allowed under s. 144.391 if it finds:

(a) **Source will meet emission limitations.** The source will meet all applicable emission limitations promulgated under ss. 144.30 to 144.426, standards of performance for new stationary sources under s. 144.375 (4) and emission standards for hazardous air contaminants under s. 144.375 (5);

(b) **Source will not violate or exacerbate violation of air quality standard or ambient air increment.** The source will not cause or exacerbate a violation of any ambient air quality standard or ambient air increment under s. 144.375 (1) or (2);

(c) **Other permits approvable if source is operating under an emission reduction option.** If the source is operating or seeks to operate under an emission reduction option, the required permit applications for other sources participating in that emission reduction option are approvable; and

(d) **Source will not preclude construction or operation of other source.** The source will not degrade the air quality in an area sufficiently to prevent the construction, reconstruction, replacement, modification or operation of another

source if the department received plans, specifications and other information under s. 144.392 (2) for the other source prior to commencing its analysis under s. 144.392 (3) for the former source. This paragraph does not apply to an existing source required to have a mandatory operation permit.

(2) **REQUIREMENTS FOR NONATTAINMENT AREA MAJOR SOURCE CONSTRUCTION OR NEW OPERATION PERMITS.** The department may approve the application for a nonattainment area major source construction or new operation permit if the department finds the source meets the requirements under sub. (1) and it finds:

(a) *Reasonable further progress.* By the time the source is to commence operation, the emissions from it and from other sources in or significantly affecting the air quality in the nonattainment area will be sufficiently less than the total emissions allowed prior to the application for the permit, so that reasonable further progress toward the attainment and maintenance of any ambient air quality standard will be achieved;

(b) *Lowest achievable emission rate.* The emission from the source will be at the lowest achievable emission rate; and

(c) *Applicant's other major sources meet or on schedule to meet requirements.* All other nonattainment area major sources and attainment area major sources which are located in this state and which are owned or operated by the permit applicant meet or are on schedule to meet the requirements of ss. 144.30 to 144.426 and 144.54 and rules promulgated under those sections.

(d) *Analysis of alternatives.* Based on an analysis of alternative sites, sizes, production processes and environmental control techniques for any source which is a major source based upon its emissions of carbon monoxide or volatile organic compounds and is located in an area designated under section 172 (a) (2) of the federal clean air act, that the benefits of the construction or modification of the source significantly outweigh the environmental and social costs imposed as a result of the source's location, construction or modification.

(3) **REQUIREMENTS FOR ATTAINMENT AREA MAJOR SOURCE CONSTRUCTION OR NEW OPERATION PERMITS.** The department may approve the application for an attainment area major source construction or new operation permit if the department finds the source meets the requirements under sub. (1) and it finds:

(a) *Best available control technology.* The source will be subject to the best available control technology for each applicable air contaminant;

(b) *Effects on air quality analyzed.* The effects on air quality as a result of the source and growth associated with the source were analyzed;

(c) *No adverse affect on air quality related values.* The source will not adversely affect the air quality related values of any federal mandatory class I prevention of significant deterioration area; and

(d) *Monitoring.* The permit applicant agrees to conduct monitoring specified by the department as necessary to determine the effects of the source on air quality.

(4) **EXEMPTION FROM REQUIREMENTS.** The department may waive a requirement under sub. (2) or (3) if:

(a) *Not applicable.* The requirement is not applicable to the source; or

(b) *Not necessary.* The requirement is not necessary to ensure that the source will have no adverse effect on air quality if the construction and operation or modification and operation of the source would result in an allowable emission of less than an amount specified by rule by the department. The department shall submit the notice required under s. 227.018 regarding rules under this paragraph by January 1, 1984.

(5) **CONDITIONAL PERMIT.** The department may issue a conditional air pollution control permit even if it finds that the source, as proposed, does not meet the requirements under subs. (1) to (3). If the department issues a conditional permit, it shall prescribe reasonable permit conditions to assure that the source will meet the requirements under subs. (1) to (3) if it is constructed, reconstructed, replaced, modified or operated in accordance with those conditions.

(6) **EXEMPTION FROM REQUIREMENTS FOR MODIFICATIONS.** The department may waive a requirement under subs. (1) to (3) if the application is for the modification of a source, the source already has an air pollution control permit and the source already meets the requirements as a condition of that permit.

History: 1979 c. 34, 221.

144.3935 Criteria for mandatory operation permits for existing sources. (1) **REQUIREMENTS.** Notwithstanding s. 144.393, the department shall approve the application for a mandatory operation permit for an existing source unless:

(a) *Source likely to violate standards.* The department determines that either:

1. The source is located in a nonattainment area, the source is exceeding an emission limitation for the air contaminant for which the area is nonattainment, this excess is likely to be significant or recurring and the excess is causing or

144.3935 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2914

exacerbating a violation of an ambient air quality standard for the air contaminant for which the area is nonattainment;

2. The source is located in an ozone nonattainment area, the source is exceeding an emission limitation for volatile organic compounds, this excess is likely to be significant or recurring and the excess is causing or exacerbating a violation of an ozone ambient air quality standard; or

3. The source is located in a nonattainment area, there is no emission limitation applicable to the source for an air contaminant for which the area is nonattainment, the source is causing or exacerbating a violation of an ambient air quality standard for the air contaminant for which the area is nonattainment and the violation is likely to be significant or recurring; or

(b) *Source likely to violate hazardous air contaminant standard.* The department determines that the source is likely to be in significant or recurring violation of a hazardous air contaminant emission limitation.

(2) ONE-YEAR MORATORIUM ON SUSPENSION OR REVOCATION. (a) The department may not suspend or revoke a mandatory operation permit for an existing source for one year after the issuance of that permit based upon failure of the source at the time of permit issuance to comply with ss. 144.30 to 144.426 and 144.96 and rules promulgated under these sections.

(b) Notwithstanding par. (a), the department may take any other action necessary to enforce ss. 144.30 to 144.426 and 144.96 and rules promulgated under these sections which apply to the source after issuance of a permit under this section.

History: 1979 c. 221, 355

144.394 Permit conditions. The department may prescribe conditions for an air pollution control permit to ensure compliance with ss. 144.30 to 144.426 and 144.96 and rules promulgated under these sections if the condition is one of the following and if the condition is applicable to the source:

(1) Final inspection and release of the project for permanent operation upon completion of construction, reconstruction, replacement or modification.

(2) Variances, orders or compliance schedules.

(3) Requirements necessary to assure compliance with s. 144.393.

(4) Reasonable construction and applicable operating conditions, emission control equipment maintenance requirements and emergency episode plans.

(5) Emission reduction options.

(6) Documentation of the allocation of the available air resource.

(7) The terms of any election by the permit applicant to meet more stringent emission limitations or to limit hourly, daily or annual emissions beyond what is otherwise required or to obtain an emission reduction option.

(8) Other requirements specified by rule by the department.

History: 1979 c. 34, 221.

144.395 Alteration, suspension and revocation of permits.

(1) ALTERATION. The department, after providing written notice to the permit holder and to the persons listed under s. 144.392 (5) (a) 2 to 5, may alter an air pollution control permit if there is or was:

(a) *Violation.* A significant or recurring violation of any condition of the permit;

(b) *Change in rules.* 1. A change in any applicable emission limitation, ambient air quality standard or ambient air quality increment that requires either a temporary or permanent reduction or elimination of the permitted emission or allows a temporary or permanent increase of the permitted emission; or

2. A change in any applicable rule promulgated under ss. 144.30 to 144.426 or 144.96;

(c) *Election.* An election by the permit holder to meet more stringent emission limitations, to limit hourly, daily or annual emissions beyond what is otherwise required or to obtain an emission reduction option;

(d) *Misrepresentation or failure to disclose.* Any misrepresentation or failure to disclose fully all relevant facts when obtaining the permit; or

(e) *Reconstruction, replacement or modification.* A reconstruction, replacement or modification of the stationary source.

(2) SUSPENSION OR REVOCATION. The department, after providing written notice to the permit holder and to the persons listed under s. 144.392 (5) (a) 2 to 5, may suspend or revoke an air pollution control permit, part of that permit or the conditions of that permit if there is or was:

(a) *Violation.* A significant or recurring violation of any condition of the permit which causes or exacerbates a violation of any ambient air quality standard or ambient air increment or which causes air pollution;

(b) *Misrepresentation or deliberate failure to disclose.* Any misrepresentation or a deliberate failure to disclose fully all relevant facts when obtaining the permit; or

(c) *Failure to pay fees.* Failure to pay the required fee.

(3) HEARINGS ON ALTERATION, SUSPENSION AND REVOCATION. Any decision of the department under this section is effective unless the permit holder seeks a hearing on the decision under s. 144.403 (1). If the permit holder files a petition with the department within the time limit specified under s. 144.403 (1) (a), the air pollution control permit remains unaltered and in effect until 10 days after service of the decision issued under s. 144.403 (1) on the matter or a later date established by court order.

History: 1979 c. 34, 221.

144.396 Permit duration. (1) CONSTRUCTION OR MODIFICATION. A construction or modification permit is valid for 18 months from the date of issuance of the permit unless the permit is revoked or suspended. The department may extend the term of the permit for the purposes of commencing construction, reconstruction, replacement or modification.

(2) OPERATION. An operation permit continues to be valid following the date of issuance unless revoked or suspended and does not need to be renewed.

History: 1979 c. 34, 221.

144.397 Operation permit review. (1) DEPARTMENT TO REVIEW OPERATION PERMITS. At least once every 5 years and not more than once every 2 years, the department shall review the operation permit under this section. The department may use information received in public comments or at the public hearing as the basis to initiate a proceeding under s. 144.395 to alter, suspend or revoke the permit.

(2) NOTICE; NEWSPAPER NOTICE. (a) Distribution of notice required. The department shall distribute a notice of the permit review, a notice of the opportunity for public comment and a notice of the opportunity to request a public hearing to the permit holder and to the persons listed under s. 144.392 (5) (a) 2 to 5. The notice shall indicate the date by which comments are to be submitted to the department.

(b) Newspaper notice. Before reviewing an air pollution control permit the department shall publish a class 1 notice under ch. 985 announcing the opportunity for written public comment and the opportunity to request a public hearing on the permit review.

(3) PUBLIC COMMENT. The department shall receive public comment on the permit review for a 30-day period beginning when the department gives notice under sub. (2) (b).

(4) PUBLIC HEARING. (a) Hearing permitted. The department may hold a public hearing on the permit if requested by a person, any affected state or the U.S. environmental protection agency within 30 days after the department

gives notice under sub. (2) (b). A request for a public hearing shall indicate the interest of the party filing the request and the reasons why a hearing is warranted. The department shall hold the public hearing within 60 days after the deadline for requesting a hearing if it deems that there is a significant public interest in holding the hearing.

(b) Procedure. The department shall promulgate by rule procedures for conducting public hearings under this subsection. Hearings under this subsection are not contested cases under s. 227.01 (2).

History: 1979 c. 34, 221.

144.398 Failure to adopt rule or issue permit or exemption. The failure to adopt a rule or issue an air pollution control permit or the exemption or granting of an exemption from an air pollution control permit requirement does not relieve any person from compliance with any emission limitation or with any other provision of law.

History: 1979 c. 34.

144.399 Fees. (1) DEPARTMENT MAY PRESCRIBE. The department may by rule prescribe and provide for the payment and collection of reasonable fees for:

(a) Application. Reviewing and acting upon any application for an air pollution control permit; and

(b) Implementation and enforcement. Implementing and enforcing the conditions of any air pollution control permit but these fees may not include any court costs or other costs associated with an enforcement action.

(2) ENVIRONMENTAL IMPACT FEE CREDIT. The portion of any fees relating to air quality analysis assessed by the department under s. 23.40 (2) for the preparation of an environmental impact statement may be credited towards the payment of any fees assessed under sub. (1).

(3) EXEMPTIONS. (a) Application fee. Notwithstanding sub. (1) (a), the department may not charge a fee for reviewing and acting upon any application for a mandatory operation permit for an existing source.

(b) Implementation and enforcement fee. Notwithstanding sub. (1) (b), the department may not charge an annual fee for implementing and enforcing an air pollution control permit greater than \$200 for a minor source or greater than \$500 for a major source.

(4) INFORMATION ON FEES. In promulgating rules under sub. (1), the department shall provide information on the costs upon which the proposed fees are based.

History: 1979 c. 34, 221.

144.40 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2916

144.40 Machinery use. The department may not require the use of machinery, devices or equipment from a particular supplier or produced by a particular manufacturer, if the required performance standards may be met by machinery, devices or equipment otherwise available.

History: 1979 c. 34.

144.401 County program. Instead of state review of plans and specifications, the department may authorize counties which are administering approved air pollution control programs to review and approve plans, specifications and permits of air contaminant sources being constructed, modified or operated within the jurisdiction of these counties.

History: 1979 c. 34.

144.402 Petition for alteration. A person holding an air pollution control permit may file a petition with the department for alteration of the permit. The department shall promulgate by rule procedures for the alteration of an air pollution control permit under this section.

History: 1979 c. 34.

144.403 Hearings on certain air pollution actions. (1) PERMIT HOLDER; PERMIT APPLICANT; ORDER RECIPIENT. Any permit, part of a permit, order, decision or determination by the department under ss. 144.391 to 144.402 shall become effective unless the permit holder or applicant or the order recipient seeks a hearing on the action in the following manner:

(a) *Petition.* The person seeking a hearing shall file a petition with the department within 30 days after the date of the action sought to be reviewed. The petition shall set forth specifically the issue sought to be reviewed, the interest of the petitioner, the reasons why a hearing is warranted and the relief desired. Upon receipt of the petition, the department shall hold a hearing after at least 10 days' notice.

(b) *Hearing.* The hearing shall be a contested case under ch. 227. At the beginning of the hearing the petitioner shall present evidence in support of the allegations made in the petition. Following the hearing the department's action may be affirmed, modified or withdrawn.

(2) **OTHER PERSONS.** Any person who is not entitled to seek a hearing under sub. (1) (intro.) and who meets the requirements of s. 227.064 (1) may seek review under sub. (1) of any permit, part of a permit, order, decision or determination by the department under ss. 144.391 to 144.402.

(3) **MINING HEARING.** Subsections (1) and (2) do not apply if a hearing on the matter is

conducted as a part of a hearing under s. 144.836.

History: 1979 c. 34, 221.

144.41 Local air pollution control programs. (1) After consultation with incorporated units of local government, any county may establish and thereafter administer within its jurisdiction, including incorporated areas, an air pollution control program which:

(a) Provides by ordinance for requirements compatible with, or stricter or more extensive than those imposed by ss. 144.30 to 144.426 and rules issued thereunder. Such ordinances shall supersede any existing local ordinances;

(b) Provides for the countywide enforcement of such requirements by appropriate administrative and judicial process;

(c) Provides for administrative organization, staff and financial and other resources necessary to effectively and efficiently carry out its program;

(d) May authorize municipalities to participate in the administration and enforcement of air pollution programs; and

(e) Is approved by the department as adequate to meet the requirements of ss. 144.30 to 144.426 and any applicable rules pursuant thereto.

(2) Any county may consult with regional planning commissions and may administer all or part of its air pollution control program in cooperation with one or more other counties or municipalities. Performance by or on behalf of a county pursuant to such co-operative undertaking shall be considered to be performance by the county for purposes of this section.

(3) If the department finds that the location, character or extent of particular concentrations of population, air contaminant sources, the geographic, topographic or meteorological considerations, or any combinations thereof, are such as to make impracticable the maintenance of appropriate levels of air quality without an area-wide air pollution control program, the department may determine the boundaries within which such program is necessary and require it.

(4) (a) If the department has reason to believe that a program in force pursuant to this section is inadequate to prevent and control air pollution in the jurisdiction to which such program relates, or that such program is being administered in a manner inconsistent with the requirements of ss. 144.30 to 144.426, the department shall, on due notice, conduct a hearing on the matter.

(b) If, after such hearing, the department determines that a program is inadequate to prevent and control air pollution in the county to

which such program relates, or that such program is not accomplishing the purposes of ss. 144.30 to 144.426, it shall require that necessary corrective measures be taken within a reasonable period of time, not to exceed 60 days.

(c) If the county fails to take such necessary corrective action within the time required, the department shall administer within such county all of the regulatory provisions of ss. 144.30 to 144.426. Such air pollution control program shall supersede all county air pollution regulations, ordinances and requirements in the affected jurisdiction.

(5) Any county in which the department administers its air pollution control program under sub. (4) may, with the approval of the department, resume a county air pollution control program which meets the requirements of sub. (1).

(6) Nothing in ss. 144.30 to 144.426 supercedes the jurisdiction of any county air pollution control program in operation on July 26, 1967, but any such program shall meet all requirements of ss. 144.30 to 144.426 for a county air pollution control program. Any approval required from the department shall be deemed granted unless the department takes specific action to the contrary.

History: 1973 c. 90; 1979 c. 34 s. 2102 (39) (g).

144.42 Motor vehicle emissions limitations; inspections. (1) **DEFINITIONS.** As used in this section, unless the context requires otherwise:

(a) "Federal act" means the federal clean air act, as amended, on May 11, 1980 (42 USC 7401 et seq.) and regulations issued by the federal environmental protection agency under that act.

(b) "Motor vehicle" has the meaning designated under s. 340.01 (35).

(2) **LIMITATIONS.** The department shall adopt rules specifying emissions limitations for all motor vehicles not exempted under sub. (5). The limitations may be different for each size, type and year of vehicle engine affected and may not be more stringent than those required by federal law at the time of the vehicle's manufacture. The limitations shall be adopted and periodically revised upon consideration of the following factors:

(a) The emissions reductions necessary to achieve federally mandated ambient air quality standards not later than December 31, 1987, and to maintain those standards after that date.

(b) The emissions levels attainable by reasonable preventive maintenance practices relating to installed emission control equipment and devices for each model year, size and type of motor vehicle affected.

(c) The requirements for eligibility for a manufacturer's warranty under section 7541(b) of the federal act.

(3) **COUNTIES WHERE INSPECTIONS REQUIRED.** If the department finds that air quality within a county will not meet one or more applicable primary or secondary ambient air quality standards by December 31, 1982, or that these standards will not be maintained in the county after that date and that inspection of emissions from motor vehicles in any part of the county is required by federal law to attain or maintain these standards, the department shall certify this finding to the department of transportation.

(4) **TERMINATION.** If the department finds that air quality within a county specified in a certification under sub. (3) has attained all applicable ambient air quality standards and that these standards will be maintained in the county or that control of motor vehicle emissions is no longer required by federal law for attainment and maintenance of these standards, the department shall notify the department of transportation that the county is withdrawn from the certification under sub. (3).

(5) **EXEMPTIONS.** Emissions limitations promulgated under sub. (2) do not apply to the following motor vehicles:

(a) A motor vehicle of a model year more than 15 years old.

(b) A motor vehicle registered at a gross weight exceeding 8,000 pounds.

(c) A motor vehicle exempt from registration under s. 341.05, except that a motor vehicle owned by the United States is not exempt unless it comes under one of the other paragraphs of this subsection.

(d) A motor vehicle powered by diesel fuel.

(e) A new motor vehicle not previously registered in any state.

(f) A motor vehicle for which inspection, in the judgment of the department, is not a cost effective method for attaining and maintaining air quality.

(g) A moped as defined in s. 340.01 (29m).

(h) A motor-driven cycle as defined in s. 340.01 (33).

(6) **TAMPERING WITH POLLUTION CONTROL SYSTEM OR MECHANISM.** (a) **Definitions.** As used in this subsection:

1. "Air pollution control equipment" means any equipment or feature which constitutes an operational element of the air pollution control system or mechanism of a motor vehicle.

3. "Tamper" means to dismantle, to remove without replacing with an identical or comparable tested replacement device or to cause to be inoperative any air pollution control equipment.

(b) *Prohibition* Except as permitted or authorized by rule of the department, no person may tamper with air pollution control equipment.

(c) *Ineligibility for motor vehicle registration*. Except as permitted or authorized by rule of the department, if any person tampers with the air pollution control equipment of a motor vehicle, that vehicle is ineligible for motor vehicle registration until the air pollution control equipment is replaced, repaired or restored to good working order.

(d) *Suspension or cancellation of motor vehicle registration*. Except as permitted or authorized by the rule of the department, if the owner of a motor vehicle tampers with or causes or knowingly permits any person to tamper with the air pollution control equipment, the motor vehicle registration for that vehicle may be suspended or canceled in addition to any other penalty provided by law.

History: 1971 c. 164 s. 81; 1977 c. 29 s. 1654 (7) (b); 1979 c. 34 s. 2102 (39) (g); 1979 c. 274.

144.423 Violations: enforcement. (1) (a) If the department has reason to believe that a violation of ss. 144.30 to 144.426 or 144.96 or any rule promulgated or special order, plan approval or permit issued under those sections has occurred, it may:

1. Cause written notice to be served upon the alleged violator. The notice shall specify the alleged violation, and contain the findings of fact on which the charge of violation is based. The notice may include an order that necessary corrective action be taken within a reasonable time. This order shall become effective unless, no later than 30 days after the date the notice and order are served, the person named in the notice and order requests in writing a hearing before the department. Upon such request, the department shall after due notice hold a hearing. Instead of an order, the department may require that the alleged violator appear before the department for a hearing at a time and place specified in the notice and answer the charges complained of; or

2. Initiate action under s. 144.426.

(b) If after such hearing the department finds that a violation has occurred, it shall affirm or modify its order previously issued, or issue an appropriate order for the prevention, abatement or control of the problems involved or for the taking of such other corrective action as may be appropriate. If the department finds that no violation has occurred, it shall rescind its order. Any order issued as part of a notice or after hearing may prescribe one or more dates

by which necessary action shall be taken in preventing, abating or controlling the violation.

History: 1971 c. 125 s. 522 (2); 1977 c. 377; 1979 c. 34 s. 980h; 1979 c. 221 s. 2202 (39).

144.424 Emergency procedure. (1) If the secretary finds that a generalized condition of air pollution exists and that it creates an emergency requiring immediate action to protect human health or safety, he or she shall order persons causing or contributing to the air pollution to reduce or discontinue immediately the emission of air contaminants, and such order shall fix a place and time, not later than 24 hours thereafter, for a hearing to be held before the department. Not more than 24 hours after the commencement of such hearing, and without adjournment thereof, the natural resources board shall affirm, modify or set aside the order of the secretary.

(2) In the absence of a generalized condition of air pollution of the type referred to in sub. (1), if the secretary finds that emissions from the operation of one or more air contaminant sources is causing imminent danger to human health or safety, he or she may order the persons responsible for the operations in question to reduce or discontinue emissions immediately, without regard to s. 144.423. In such event, the requirements for hearing and affirmance, modification or setting aside of orders set forth in sub. (1) shall apply.

History: 1979 c. 34 ss. 983m, 2102 (39) (g); 1979 c. 176.

144.426 Penalties for violations relating to air pollution. Any person who violates ss. 144.30 to 144.426 or any rule promulgated, any permit issued or any special order issued under those sections shall forfeit not less than \$10 or more than \$25,000 for each violation. Each day of continued violation is a separate offense.

History: 1979 c. 34.

SUBCHAPTER IV

SOLID WASTE, HAZARDOUS WASTE AND REFUSE

144.43 Solid waste; definitions. As used in ss. 144.43 to 144.47 unless the context requires otherwise:

(1) "Closing" means the time at which a solid waste or hazardous waste treatment, storage or disposal facility ceases to accept wastes, and includes those actions taken by the owner or operator of the facility to prepare the site for long-term care and to make it suitable for other uses.

(2) "Hazardous substance" means any substance or combination of substances, including

wastes, of a solid, liquid, gaseous or semisolid form which, because of its quantity, concentration or physical, chemical or infectious characteristics, may cause, or significantly contribute to, an increase in mortality or an increase in serious irreversible or incapacitating reversible illness, or pose a substantial present or potential hazard to human health or the environment. Such substances may include, but are not limited to, those which are, to the degree determined by the department, toxic, corrosive, flammable, irritants, strong sensitizers or explosive.

(3) "Long-term care" means the routine care, maintenance and monitoring of a solid waste or hazardous waste treatment, storage or disposal facility following closing of the facility.

(4) "Refuse" means combustible and noncombustible rubbish, including, but not limited to, paper, wood, metal, glass, cloth and products thereof; litter and street rubbish, ashes; and lumber, concrete and other debris resulting from the construction or demolition of structures.

(5) "Solid waste disposal sites and facilities" include commercial and municipal establishments or operations such as, without limitation because of enumeration, sanitary landfills, dumps, land disposal sites, incinerators, auto junk yards, scrap metal salvage yards, transfer stations, storage facilities, collection and transportation services and other establishments or operations for the storage, collection, transportation, transfer, processing, treatment, recovery or disposal of solid waste. "Solid waste disposal sites and facilities" does not include a site or facility for the processing of scrap iron, steel or nonferrous metal using large machines to produce a principal product of scrap metal for sale or use for remelting purposes; nor does the term include a site or facility which uses large machines to sort, grade, compact or bale clean wastepaper, fibers or plastics, not mixed with other solid waste, for sale or use for recycling purposes.

(6) "Solid waste management" means planning, organizing, financing, and implementing programs to effect the storage, collection, transporting, processing, recycling or final disposal of solid wastes in a sanitary, nuisance-free manner.

(7) "Solid waste management plan" means a plan prepared to provide for solid waste management.

(8) "Termination" means the final actions taken by an owner or operator of a solid waste or hazardous waste treatment, storage or disposal facility when formal responsibilities for long-term care cease.

History: 1979 c. 34 ss. 978k, 984rd.

144.431 Solid waste; powers and duties.

(1) The department shall:

(a) Promulgate rules implementing and consistent with ss. 144.43 to 144.47.

(b) Encourage voluntary cooperation by persons and affected groups to achieve the purposes of ss. 144.43 to 144.47.

(c) Encourage local units of government to handle solid waste disposal problems within their respective jurisdictions and on a regional basis, and provide technical and consultative assistance for that purpose.

(d) Collect and disseminate information and conduct educational and training programs relating to the purposes of ss. 144.43 to 144.47.

(e) Organize a comprehensive and integrated program to enhance the quality, management and protection of the state's land and water resources.

(2) The department may:

(a) Hold hearings relating to any aspect of the administration of ss. 144.43 to 144.47 and, in connection therewith, compel the attendance of witnesses and the production of evidence.

(b) Issue orders to effectuate the purposes of ss. 144.43 to 144.47 and enforce the same by all appropriate administrative and judicial proceedings.

(c) Secure necessary scientific, technical, administrative and operational services, including laboratory facilities, by contract or otherwise.

(d) Advise, consult, contract and cooperate with other agencies of the state, local governments, industries, other states, interstate or interlocal agencies, and the federal government, and with interested persons or groups.

History: 1979 c. 34.

144.432 Federal aid. Subdivisions of this state and interlocal agencies may make application for, receive, administer and expend any federal aid for the development and administration of programs related to solid waste disposal sites and facilities if first submitted to and approved by the department. The department shall approve any such application if it is consistent with the purposes of ss. 144.43 to 144.47 and any other applicable requirements of law.

History: 1979 c. 34.

144.433 Confidentiality of records. (1)

RECORDS. Except as provided under sub. (2), any records or other information furnished to or obtained by the department in the administration of ss. 144.43 to 144.47 and 144.96 are public records subject to s. 19.21.

(2) CONFIDENTIAL RECORDS. Any records or information except emission data received by the department and certified by the owner or

operator to relate to production or sales figures or to processes or production unique to the owner or operator or which would tend to affect adversely the competitive position of the owner or operator are only for the confidential use of the department in the administration of ss. 144.43 to 144.47 and 144.96, unless the owner or operator expressly agrees to their publication or availability to the general public. Nothing in this subsection prevents the use of the records or information by the department in compiling or publishing analyses or summaries relating to the general condition of the environment, if the analyses or summaries do not identify a specific owner or operator.

History: 1979 c. 34; 1979 c. 221 s. 2202 (39).

144.434 Inspections. Any duly authorized officer, employe or representative of the department may enter and inspect any property, premise or place on or at which a solid waste disposal site or facility is located or is being constructed or installed at any reasonable time for the purpose of ascertaining the state of compliance with ss. 144.43 to 144.47 and rules promulgated under those sections. No person may refuse entry or access to any authorized representative of the department who requests entry for purposes of inspection, and who presents appropriate credentials. No person may obstruct, hamper or interfere with any such inspection. The department, if requested, shall furnish to the owner or operator of the premises a report setting forth all facts found which relate to compliance status.

History: 1979 c. 34.

144.435 Solid waste disposal standards. (1) The department shall prepare and adopt minimum standards for the location, design, construction, sanitation, operation and maintenance of solid waste disposal sites and facilities and shall, following a public hearing, adopt such rules relating to the operation and maintenance of solid waste disposal sites and facilities as it deems necessary to ensure compliance and consistency with the purposes of and standards established under the resource conservation and recovery act of 1976, P.L. 94-580, except that such rules relating to open burning shall be consistent with s. 144.436. The standards and rules adopted under this subsection shall conform to the rules adopted under sub. (1m).

(1m) No later than 24 months after May 21, 1978, the department shall adopt, with the advice and comment of the metallic mining council, rules for the identification and regulation of metallic mining wastes. The rules adopted to identify metallic mining wastes and to regulate the location, design, construction and operation

and maintenance of the sites and facilities for the disposal of metallic mining wastes shall be adopted in accordance with any or all of the following: chs. 30, 144 and 147 and s. 107.05. The rules shall take into consideration the special requirements of metallic mining operations in the location, design, construction and operation and maintenance of sites and facilities for the disposal of metallic mining wastes as well as any special environmental concerns that will arise as a result of the disposal of metallic mining wastes. In adopting the rules, consideration shall also be given to research, studies, data and recommendations of the U.S. environmental protection agency on the subject of metallic mining wastes arising from the agency's efforts to implement the resource conservation and recovery act of 1976, P.L. 94-580.

(2) Nothing in ss. 144.43 to 144.47 shall limit the authority of any local governing body to issue licenses and permits for any state-licensed sites or facilities or to adopt, subject to department approval, standards for the location, design, construction, operation and maintenance of solid waste disposal sites and facilities more restrictive than those adopted by the state under this section.

History: 1975 c. 83; 1977 c. 377; 1979 c. 34 ss. 984rb, 2102 (39) (g).

144.436 Solid waste open burning standards. (1) As used in this section:

(a) "Air curtain destructor" means a solid waste disposal operation that combines a fixed wall open pit and a mechanical air supply which uses an excess of oxygen and turbulence to accomplish the smokeless combustion of clean wood wastes and similar combustible materials.

(b) "Open burning" means combustion in which the by-products thereof are emitted directly into the ambient air without passing through a stack or chimney. Open burning does not include the combustion occurring at a properly operated air curtain destructor.

(c) "Population equivalent" means the population equal to the sum of the population of the geographical area based on the most recent census data, or department of administration census data used for tax sharing purposes, plus the seasonal population not included in the census data, plus one person per 1,000 pounds per year of industrial, commercial and agricultural waste.

(2) The department shall grant licenses for the open burning of solid waste at the licensee's solid waste disposal sites if:

(a) The open burning operation serves a population equivalent of less than 2,500 or, if the operation is controlled by more than one municipality, a population equivalent of less than 2,500

for each such municipality. The department shall give consideration to seasonal variations in population in granting partial yearly burning exemptions.

(b) All portions of the licensed operation are greater than one-fourth mile from any residence or place of public gathering, or written consent is obtained from all residents and proprietors within one-fourth mile thereof.

(c) The open burning does not include the burning of wet combustible rubbish, garbage, oily substances, asphalt, plastic or rubber products.

(d) The open burning operation is supervised by an attendant.

(e) The open burning operation is accomplished in a nuisance-free manner and does not create hazards for adjacent properties.

(f) Adequate firebreaks are provided and provision is made to obtain the services of the local fire protection agency if needed.

(g) The open burning operation is not in violation of any federal air pollution control rules, or any state air pollution control rules required to be adopted under applicable federal laws or regulations.

History: 1975 c. 83; 1979 c. 34 s. 984rf.

144.437 Solid waste management. (1)

Each county board individually or jointly with another county board may prepare and adopt a county solid waste management plan consistent with state criteria. No such plan containing the proposed construction, alteration or reconstruction of a recycling or processing plant in a recycling region established by the Wisconsin solid waste recycling authority shall be submitted under sub. (2) without prior consultation with the authority.

(2) All county plans shall be submitted to the department for review. Within 90 days after submittal, the department shall approve or disapprove the plans. During its review, the department shall consult with the appropriate regional planning commission or other planning agency to determine whether any site use and operation is in conflict with any plans adopted by such agency.

(3) The department shall by rule adopt county solid waste management criteria for the development of the plans permitted under this section.

History: 1971 c. 130; 1973 c. 305; 1975 c. 20; 1977 c. 377; 1979 c. 34 s. 984rt.

144.438 Exemption for certain alcohol fuel production systems. (1) DEFINITIONS.

As used in this section:

(a) "Distillate waste product" means solid, semisolid or liquid by-products or wastes from

the distillation or functionally equivalent process of an alcohol fuel production system.

(b) "Environmentally sound storage facility" means a facility, including a holding lagoon, which is used to store distillate waste products so that no waste products from the facility enter or leech into the waters of the state.

(c) "Private alcohol fuel production system" means an alcohol fuel production system from which no alcohol is sold and from which all the alcohol is used as a fuel by the owner.

(2) EXEMPTION. No permit, license or plan approval is required under this chapter for the owner of a private alcohol fuel production system to establish, construct or operate a system for the treatment, storage or disposal of distillate waste products if the distillate waste product is stored in an environmentally sound storage facility and disposed of using an environmentally safe land spreading technique and the storage, treatment or disposal is confined to the property of the owner.

History: 1979 c. 221

144.44 Site approval process; annual operating license. (1)

No person may establish or construct a site for the land disposal of solid waste unless the person has complied with subs.

(2) and (3). No person may operate any solid waste disposal site or facility without having obtained an operating license as provided in sub. (4).

(2) (a) Prior to constructing or establishing a site for the land disposal of solid waste or a site for the treatment, storage or disposal of hazardous waste, the applicant shall submit to the department a feasibility report describing the physical conditions of the proposed site. The purpose of the report and review of the report under this subsection is to determine whether the site has potential for use in solid waste disposal or hazardous waste treatment, storage or disposal and to establish any conditions which the applicant must include in the plan of operation submitted under sub. (3). Favorable feasibility determination under this subsection does not guarantee plan approval under sub. (3) or licensure under sub. (4).

(b) The feasibility report shall be submitted by a registered professional engineer, if deemed necessary by the department. The report shall include a general summary of the site characteristics as well as any specific data the department by rule requires regarding the site's topography, soils, geology, ground and surface waters and other features of the site and surrounding area. The report shall include preliminary engineering design concepts including the proposed design capacity of the site and an indication of the quantities and characteristics of the wastes to be

disposed of. The department, by rule, shall specify the minimum contents of feasibility reports and no report may be deemed complete unless the specified information is provided by the applicant. The rules may specify special requirements for feasibility reports relating to sites for the treatment, storage or disposal of hazardous waste. The applicant shall send a copy of the report to the clerk of any county, city, village or town with zoning jurisdiction over the proposed site, to the clerk of any county, city, village or town within whose boundaries any portion of the proposed site will be located, and to the main public library of each county or municipality with zoning jurisdiction over the proposed site, within whose boundaries any portion of the proposed site will be located. Within 60 days after a feasibility report is submitted, the department shall either publish notice under par. (d) or notify the applicant in writing that the report is not complete, specifying the information which must be submitted before the report is deemed complete.

(c) In the event that a local ordinance or resolution precludes or inhibits the ability of the applicant to obtain data required to be submitted in a feasibility report, the applicant may petition the department to waive application of the ordinance or resolution to the applicant. The department shall promptly schedule a hearing on the matter of waiver and notify the local government of the scheduled hearing. If, after hearing, the department finds the ordinance or resolution to be unreasonable, the department shall waive application of the ordinance or resolution to the applicant.

(d) Within 60 days after a complete feasibility report is filed, the department shall publish a class 1 notice under ch. 985, in the official newspaper designated under s. 985.04 or 985.05, or, if none exists, in a newspaper likely to give notice in the area of the proposed site or facility. The notice shall include the department's preliminary determination on the need for an environmental impact statement under s. 1.11. The notice shall invite the submission of written comments by any person within 30 days from the time the notice is published, and shall describe the method by which a hearing may be demanded under par. (e). The department shall send a copy of the notice and of the general summary of the report to the clerk of any county, city, village or town with zoning jurisdiction over the proposed site, to the clerk of any county, city, village or town within whose boundaries any portion of the proposed site will be located, or which could be substantially affected by the operation of the proposed site, and to the main public library of each county or municipality with zoning jurisdiction over the

proposed site, within whose boundaries any portion of the proposed site will be located, or which could be substantially affected by the operation of the proposed site.

(e) Within 30 days after the notice required under par. (d) is published, a written demand for a hearing on the matter may be filed by any county, city, village or town, or by any 6 persons. The demand shall indicate the interests of the municipality or persons who file it and state the reasons why the hearing is demanded. A hearing demanded under this paragraph shall be conducted as provided under s. 227.022 and shall be held within 60 days after the deadline for demanding a hearing unless an environmental impact statement is required under s. 1.11. If an environmental impact statement is required, this hearing shall be held concurrently with the hearing on the environmental impact statement. The hearing shall be held in an appropriate place designated by the department in one of the counties, cities, villages or towns which could be substantially affected by the operation of the proposed site. If the feasibility report indicates the probability that approval of the site feasibility cannot be given until an environmental impact statement is prepared or if the department intends to require an environmental impact report under s. 23.11 (5), the department shall notify the applicant of that fact and commence the process required under s. 1.11.

(f) 1. Except as provided under subd. 2, within 120 days after the submission of a complete feasibility report under par. (a), within 60 days after any hearing demanded under par. (e) is adjourned or within 90 days after the completion of any environmental impact statement process required under s. 1.11, whichever is later, the department shall issue a written determination of site feasibility, stating the findings of fact and conclusions of law upon which the determination is based.

2. If approval of the site feasibility is required under s. 196.491 (2m), the time limits under s. 196.491 (3) (f) and (ff) apply.

3. Any determination made under this subsection may be conditioned upon the design, operational or other requirements deemed necessary to be included in the plan submitted under sub. (3). A favorable determination issued under this subsection shall specify the design capacity of the proposed site, constitutes approval of the site for the purpose intended and entitles the applicant to submit a plan of operation under sub. (3).

(g) If a hearing on the feasibility report is conducted as a part of a hearing under s. 144.836, notice and hearing provisions in that section supersede the notice and hearing provisions of pars. (d) to (f).

(3) (a) Any person who has obtained a favorable determination of site feasibility may submit to the department a proposed plan of operation for the site. The owner or operator of a licensed facility for the land disposal of solid waste in existence on May 21, 1978 may, but shall not be required to, seek approval of the site's plan of operation under this subsection. Any operator engaged in mining as defined under s. 144.81 (5) on May 21, 1978 may, but shall not be required to, seek approval of any feasibility report or plan of operation for any site for the disposal of solid waste resulting from such mining operations in existence on May 21, 1978.

(b) The proposed plan of operation shall be submitted by a registered professional engineer and shall include at a minimum a description of the manner of solid waste disposal or hazardous waste treatment, storage or disposal and a statement setting forth the proposed development, daily operation, closing and long-term care of the site. The proposed plan of operation shall specify whether the owner's responsibility for long-term care of the site will terminate 30 years after closing as provided in s. 144.441 (2) (b) or 20 years after closing as provided in s. 144.441 (2) (c). The department shall, by rule, specify the minimum contents of a plan of operation submitted for approval under this subsection and no plan may be deemed complete unless the information is supplied. The rules may specify special standards for plans of operation relating to sites or facilities for the treatment, storage or disposal of hazardous waste. Within 30 days after a plan is submitted, the department shall notify the applicant in writing if the plan is not complete, specifying the information which must be submitted before the report is deemed complete. If no notice is given, the report shall be deemed complete on the date of its submission.

(c) Within 90 days after a complete plan of operation is submitted, the department shall either approve or disapprove the plan in writing. The determination of the department shall be based upon compliance with the standards established under s. 144.435 or, in the case of hazardous waste treatment, storage or disposal sites, with the rules and standards established under s. 144.62. No plan for a site or facility for the disposal of solid or hazardous waste may be approved unless the applicant submits a bond, deposit, proof of an established escrow account or other proof of financial responsibility satisfactory to the department ensuring that the applicant and any successor in interest will comply with the closure and long-term care requirements of the plan. An approval may be conditioned upon any requirements necessary to

comply with the standards. Any approval may be modified by the department upon application of the licensee if newly discovered information indicates that the modification would not inhibit compliance with the standards adopted under s. 144.435 or, if applicable, s. 144.62. A determination under this subsection does not constitute a major state action under s. 1.11 (2).

(d) Approval under par. (c) shall entitle the applicant to construct and operate the site in accordance with the approved plan for not less than the design capacity specified in the determination of site feasibility, unless the department establishes by a clear preponderance of the credible evidence that:

1. The site is not constructed in accordance with the approved plan;

2. The site poses a substantial hazard to public health or welfare; or

3. In-field conditions, not disclosed in the feasibility report or plan of operation, necessitate modifications of the plan to comply with standards in effect at the time of plan approval under s. 144.435 or, if applicable, s. 144.62.

(e) Failure to operate in accordance with the approved plan subjects the operator to enforcement under s. 144.47, or, if the department establishes that any failure to operate in accordance with the approved plan is grievous and continuous, to suspension, revocation or denial of the operating license under sub. (4).

(4) (a) No person may maintain or operate a site or facility for the disposal of solid waste or the treatment, storage or disposal of hazardous waste, unless the person obtains an operating license from the department. The department shall issue an operating license with a duration of one year or more except that the department may issue an initial license with a duration of less than one year. The department may deny, suspend or revoke an operating license for failure to pay the fees required under s. 144.441 (3) or for grievous and continuous failure to comply with the approved plan of operation under sub. (3) or, if no plan of operation exists with regard to the site or facility, for grievous and continuous failure to comply with the standards adopted under s. 144.435. If the license application is for a site for the disposal of solid waste resulting from mining operations in existence on May 21, 1978, the department shall make any determination with respect to whether disposal is being undertaken in an environmentally sound manner and shall administer compliance with the licensing requirement of this subsection in a manner which, with respect to nonhazardous solid waste, does not require substantial structural modification of the existing site, expenditure which is not appropriate for the nonhazardous nature of the waste or interruption of the

mining operation. A determination under this subsection does not constitute a major state action under s. 1.11 (2).

(b) The initial operating license for a site for the land disposal of solid waste or the treatment, storage or disposal of hazardous waste shall not be issued unless the site has been constructed in substantial compliance with the operating plan approved under sub. (3). The department may require that compliance be certified in writing by a registered professional engineer. The department may by rule require, as a condition precedent to the issuance of the operating license for a solid waste land disposal site, that the applicant submit evidence that a notation of the existence of the site has been recorded in the office of the register of deeds in each county in which a portion of the site is located.

(5) The department shall, by rule, adopt a graduated schedule of reasonable fees to be charged for administering this section.

(6) At least 120 days prior to the closing of a site for the land disposal of solid waste, or the treatment, storage or disposal of hazardous waste, the owner or operator shall notify the department in writing of the intent to close the site.

(7) The department may waive compliance with any requirement of this section or shorten the time periods under this section provided to the extent necessary to prevent an emergency condition threatening public health, safety or welfare. The department may, by rule, exempt specified solid wastes or specified facilities and sites from licensing as solid waste disposal sites or facilities if it finds that regulation under this section would discourage the development of improved methods of solid waste disposal, including the landspreading of sludges, or would not be warranted, in light of the potential hazard to public health or the environment. The department shall not regulate under this chapter any solid waste from a single family or household disposed on the property where it is generated. No license pursuant to s. 144.44 shall be required for agricultural land on which nonhazardous sludges from a treatment work, as defined under s. 147.015 (12), are land spread for purpose of a soil conditioner or nutrient.

(8) Notwithstanding s. 144.47, for solid waste disposal sites or facilities licensed on or before January 1, 1977, which the department believes do not meet minimum standards promulgated under s. 144.435, the following enforcement procedure shall apply:

(a) The department may issue an order relating to the site or facility or may refuse to relicense the site or facility.

(b) The department shall notify the licensee of its intended action under par. (a), and the licensee, within 30 days of receipt of such notice, shall notify the department whether it desires a hearing under par. (c).

(c) If the licensee desires a hearing, the department may not issue the order or decision under par. (a) until a hearing, conducted as a class 2 proceeding under ch. 227, is held. The hearing shall be held in the county where the site or facility is located. At the hearing the department must establish by a preponderance of all the available evidence that the site or facility does not adhere to the minimum standards promulgated under s. 144.435. If the hearing examiner's decision is in favor of the department, the order or decision may be issued. The order or decision shall be subject to judicial review under ch. 227.

(d) If the licensee does not request a hearing under par. (b), the department shall issue the order or decision under par. (a). The licensee may challenge the order or decision by commencing an action in the circuit court for the county in which the site or facility is located within 60 days after issuance of the order or decision. The complaint shall allege that the site or facility adheres to the minimum standards promulgated under s. 144.435. The licensee shall receive a new trial on all issues relating to the site or facility and relicensing of the site or facility. The trial shall be conducted by the court without a jury.

History: 1977 c. 377; 1979 c. 34 s. 2102 (39) (g); 1979 c. 110; 1979 c. 221 ss. 629m to 630g, 2202 (39); 1979 c. 355

144.441 Long-term care. (1) STANDARDS. The department shall prescribe by rule minimal standards for closing, long-term care and termination of sites for the disposal of hazardous waste or the land disposal of solid waste. The standards, and any additional site-specific requirements designated by the department, shall be incorporated into the plan of operation prepared under s. 144.44 (3). The long-term care provisions in an approved plan of operation may be modified under s. 144.44 (3) (d) 3.

(2) OWNER RESPONSIBILITY; TERMINATION. (a) In this subsection, "site" refers only to a site for the disposal of hazardous waste or the land disposal of solid waste with an approved plan of operation under s. 144.44 (3), or a site for the land disposal of solid waste initially licensed within 3 years prior to May 21, 1978 whose owner successfully applies, within 2 years after May 21, 1978, for a determination by the department that the site's design and plan of operation comply substantially with the requirements necessary for plan approval under s. 144.44 (3).

(b) The owner of a site shall be responsible for the long-term care of the site for 30 years after closing of the site unless the responsibility is terminated earlier under par. (c) or (d).

(c) If the approved plan of operation for a site indicates, or if the owner of a site requests and the department approves, the owner's responsibility for long-term care of the site shall terminate 20 years after closing of the site unless the owner's responsibility is terminated sooner under par. (d).

(d) The owner of a site may apply to the department for termination of the owner's responsibility for long-term care at any time after the site has been closed for at least 10 years. Upon receipt of such application the department shall, using the procedure applicable to feasibility reports under s. 144.44 (2) (d), provide notice to the public and to the owner or operator and an opportunity for a hearing on the termination of the site. In this proceeding the burden shall be on the applicant to prove by a preponderance of the evidence that additional long-term care is not necessary for adequate protection of public health or the environment. Within 120 days after posting notice of the pending termination or within 60 days after any hearing is adjourned, whichever is later, the department shall determine either that long-term care of the site is no longer required, in which case the applicant shall be relieved of such responsibility; or that additional long-term care of the site as specified in the plan of operation is still required, in which case further application under this subsection shall not be permitted until at least 5 years have elapsed since the previous application.

(3) WASTE MANAGEMENT FUND. (a) Each owner or operator of a licensed site for the land disposal of solid waste or the disposal of hazardous waste shall periodically pay to the department a fee for each ton, or equivalent volume as determined by rule of the department, of solid waste received and disposed of at the site during the preceding reporting period. Solid waste materials approved by the department for lining or capping or for constructing berms, dikes or roads within a site for the land disposal of solid waste are not subject to the fee imposed under this paragraph. The fees shall be paid into the waste management fund to be used for the purposes specified in par. (g). Whenever the investment board certifies to the department that the balance in the waste management fund exceeds \$15,000,000, this paragraph shall not apply to any site which is operating under its 6th or subsequent annual license until the investment board certifies to the department that the balance in the waste management fund is less than \$12,000,000.

(b) Except as provided in pars. (d) to (f), the fee imposed by par. (a) shall be 1.5 cents per ton for solid waste and for any hazardous wastes which are excepted from the fee specified in par. (c).

(c) Except as provided in pars. (d) to (f), the fee imposed by par. (a) shall be 15 cents per ton for hazardous wastes other than ashes and sludges from electric and process steam generating facilities, sludges produced by waste treatment or manufacturing processes at pulp or paper mills, manufacturing process solid wastes from foundries, or sludges produced by municipal wastewater treatment facilities.

(d) With respect to a site under sub. (2) (c), the fee imposed under par. (a) is 3.5 cents per ton for solid waste and for any hazardous wastes which are excluded from the fee specified under par. (e).

(e) With respect to a site under sub. (2) (c), the fee imposed under par. (a) is 35 cents per ton for hazardous wastes other than ashes and sludges from electric and process steam generating facilities, sludges produced by waste treatment or manufacturing processes at pulp or paper mills, manufacturing process solid wastes from foundries, or sludges produced by municipal wastewater treatment facilities.

(f) Notwithstanding pars. (b) to (e), with respect to prospecting or mining waste, the fee imposed under par. (a) is:

1. For hazardous tailing solids, 1.5 cent per ton.
2. For nonhazardous tailing solids or for nonacid producing taconite tailing solids, 0.2 cent per ton.
3. For hazardous sludge, one cent per ton.
4. For nonhazardous sludge, 0.5 cent per ton.
5. For hazardous waste rock, 0.3 cent per ton.
6. For nonhazardous waste rock or for nonacid producing taconite waste rock, 0.1 cent per ton.
7. For any prospecting or mining waste not specified under subds. 1 to 6, 0.5 cent per ton.

(g) In this paragraph, "site" has the meaning given in sub. (2) (a). The moneys in the waste management fund shall be expended by the department exclusively for the following purposes:

1. Payment for all costs of long-term care of a site accruing after the responsibility of the owner has been terminated under sub. (2). The department shall by rule provide for the method of payment.
2. Payment of the costs of repairing a site, and the costs of repairing environmental damage caused by a site, as a result of occurrence not anticipated in the plan of operation which poses a substantial hazard to public health or welfare. Prior to making any expenditure under this

subdivision, the department shall publish a class 1 notice, under ch. 985, of its intent to do so, specifying the amount and purpose of the proposed expenditure and shall afford a hearing to any person who so demands within 30 days for the purpose of determining whether the proposed expenditure meets the requirements of this subdivision. If an expenditure made under this subdivision would not have been necessary had the person responsible for the operation or long-term care of the site substantially complied with the requirements of the plan of operation, a right of action in favor of the fund shall accrue to the state against such person, and the attorney general shall take such action as is appropriate to enforce this right of action by recovering any amounts so expended. The net proceeds of any such recovery shall be paid into the waste management fund.

History: 1977 c. 377; 1979 c. 142; 1979 c. 221 ss. 630q to 630t, 2202 (39)

144.442 Transference of responsibility.

Any person acquiring rights of ownership, possession or operation in a licensed site or facility for the disposal of solid waste or the treatment, storage or disposal of hazardous waste at any time after the site or facility has begun to accept waste shall be subject to all requirements of the license approved for the site or the facility, including the requirements relating to long-term care of the site or facility. Upon acquisition of the rights, the department shall issue a new operating license if the previous licensee is no longer connected with the operation of the site or facility, if the new licensee meets all requirements specified in the previous license, the approved plan of operation, if any, and the rules promulgated under s. 144.62, if applicable.

History: 1977 c. 377

144.445 Local permits not required; departmental license. (1)

Any solid waste site or facility which meets all state standards and is to be operated in accordance with an approved county plan under s. 144.437 (2) shall not be required to obtain any local permits or authorization.

(2) (a) Notwithstanding s. 144.435 (2), if a solid waste disposal site or facility is otherwise eligible for construction and licensing except for failure to obtain a local permit, the department may, if it finds after notice and hearing that the requirements of public health, safety and welfare so require, waive such local approvals.

(b) Any license issued under this section shall supersede all local requirements. However, operations licensed under this section may be required to render payments in lieu of local license or permit fees to the municipality in

whose jurisdiction they lie not to exceed \$100 per site per year.

History: 1971 c. 130; 1977 c. 377; 1979 c. 34 s. 2102 (39) (g).

DNR was not authorized by 144.445, 1975 stats., to contravene county ordinance prohibiting use of county lands for solid waste disposal sites. *Nelson v. DNR*, 88 W (2d) 1, 276 NW (2d) 302 (Ct. App. 1979)

144.448 Duties of metallic mining council. (1)

The metallic mining council shall advise the department on the implementation of ss. 144.435, 144.44, 144.441, 144.442, 144.445, 144.60 to 144.74 and 144.80 to 144.94 as those sections relate to metallic mining in this state.

(2) The council shall serve as an advisory, problem-solving body to work with and advise the department on matters relating to the reclamation of mined land in this state and on methods of and criteria for the location, design, construction and operation and maintenance of sites and facilities for the disposal of metallic mine-related wastes.

(3) All rules proposed by the department relating to the subjects specified in this section shall be submitted to the council for review and comment prior to the time the rules are proposed in final draft form by the department. The department shall transmit the written comments of all members of the council submitting written comments with the summary of the proposed rules to the appropriate standing committees of the legislature under s. 227.018.

(4) Written minutes of all meetings of the council shall be prepared by the department and made available to all interested parties upon request.

History: 1979 c. 355.

144.45 Research. The department may conduct or direct scientific experiments, investigations, demonstration grants and research on any matter relating to solid waste disposal, including, but not limited to, land fill, disposal and utilization of junked vehicles, and production of compost.

144.46 Shoreland and flood plain zoning.

Solid waste disposal sites and facilities are prohibited within areas under the jurisdiction of shoreland and flood plain zoning regulations adopted pursuant to ss. 59.971 and 87.30, except that the department may issue permits authorizing sites and facilities in such areas.

144.47 Violations: enforcement. (1) (a)

If the department has reason to believe that a violation of ss. 144.43 to 144.47 or any rule promulgated or special order, plan approval or permit issued under those sections has occurred, it may:

1. Cause written notice to be served upon the alleged violator. The notice shall specify the law or rule alleged to be violated, and contain the findings of fact on which the charge of violation is based, and, except as provided in s. 144.44 (8), may include an order that necessary corrective action be taken within a reasonable time. This order shall become effective unless, no later than 30 days after the date the notice and order are served, the person named in the notice and order requests in writing a hearing before the department. Upon such request, the department shall after due notice hold a hearing. Instead of an order, and except as provided in s. 144.44 (8), the department may require that the alleged violator appear before the department for a hearing at a time and place specified in the notice and answer the charges complained of; or

2. Initiate action under s. 144.99.

(b) If after such hearing the department finds that a violation has occurred, it shall affirm or modify its order previously issued, or issue an appropriate order for the prevention, abatement or control of the problems involved or for the taking of other corrective action as may be appropriate. If the department finds that no violation has occurred, it shall rescind its order. Any order issued as part of a notice or after hearing may prescribe one or more dates by which necessary action shall be taken in preventing, abating or controlling the violation.

History: 1979 c. 34

144.48 Waste oil collection and recycling.

(1) DEFINITIONS. As used in this section, unless the content requires otherwise:

(a) "Automotive engine oil" means any oil to be used in the engine or crankcase of a motor vehicle.

(b) "Consumer" means a person who, for personal or family purposes, purchases or uses automotive engine oil or generates, collects, stores or transports engine waste oil in quantities of less than 200 gallons per year.

(c) "Engine waste oil" means automotive engine oil after it is used and removed from the engine or crankcase of a motor vehicle but before that oil is recycled.

(d) "Fuel oil" means any oil to be burned to produce heat.

(e) "Motor vehicle" means any vehicle propelled by an internal combustion engine and includes any automobile, truck, bus, motorcycle, snowmobile or vehicle which travels on or off roads or highways.

(f) "Reclaimed oil" means engine waste oil which is processed by settling, dehydration, filtration or mixing, or combinations of those procedures, which removes some of the harmful

physical and chemical characteristics which are acquired through use.

(g) "Recycled oil" means re-refined oil or reclaimed oil.

(h) "Re-refined oil" means engine waste oil which is processed by high temperature distillation and chemical treatment or any other process which removes all harmful physical and chemical characteristics acquired through use.

(i) "Retail sales establishment" means a person who is engaged in the business of selling automotive engine oil to consumers.

(j) "Service establishment" means a person who is engaged in the business of servicing and removing automotive engine oil from motor vehicles for consumers.

(k) "Waste oil" means any oil after use or which is contaminated through storage or handling before that oil is recycled.

(2) WASTE OIL COLLECTION. (a) *Retail sales establishment.* A retail sales establishment:

1. Shall maintain an engine waste oil collection facility for the temporary storage of engine waste oil returned by consumers and post at least one sign at the location of sale which contains wording similar to: "Engine waste oil collection facility. Please return your waste oil here."; or

2. Shall post at least one sign at the location of sale which contains wording similar to: "Engine waste oil can be recycled. Please return your waste oil to a waste oil storage facility. The nearest waste oil storage facility is located _____ and is open _____". The sign shall describe the location and the days and hours of operation.

(b) *Approved waste oil collection facilities.* The department shall establish by rule standards for the approval of certain types of facilities to be used for engine waste oil collection.

(c) *Exemption.* A retail sales establishment which maintains an engine waste oil collection facility of a type approved by the department is exempt from the requirements of ss. 144.44, 144.46, 144.63 and 144.64 and rules promulgated under those sections with respect to that facility.

(d) *Compliance with solid and hazardous waste regulations.* Except as provided under par. (c), no person may maintain or operate an engine waste oil collection facility unless the person complies with the requirements of ss. 144.43 to 144.47 and 144.60 to 144.74 and rules promulgated under those sections with respect to that facility.

(3) WASTE OIL STORAGE FACILITIES. (a) *Required storage facilities.* 1. As used in this paragraph, "adequate engine waste oil storage facilities" means at least the minimum number of separate engine waste oil storage facilities each with a capacity of at least 250 gallons, approved

by the department and accessible to the public. The department shall establish standards for the approval of certain types of facilities to be used for engine waste oil storage. These standards may allow the same facility to serve as an engine waste oil collection facility and an engine waste oil storage facility.

2. The minimum number of engine waste oil facilities for a city, village or town located in a county with a population of 50,000 or more is:

a. Zero if the population is less than 3,500.

b. One if the population is at least 3,500 but less than 25,000.

c. Two if the population is at least 25,000 but less than 100,000.

d. Three if the population is at least 100,000, plus one for each additional 100,000 of population.

3. The minimum number of engine waste oil storage facilities for a county with a population under 50,000 is one.

4. A city, village or town located in a county with a population of 50,000 or more shall provide for adequate engine waste oil storage facilities if these facilities do not exist.

5. A county with a population of less than 50,000 shall provide for an adequate engine waste oil storage facility if a facility does not exist.

(b) *Exemption.* A municipality which submits and obtains approval from the department for an informal plan of operation for an engine waste oil storage facility and which constructs, maintains or provides for an engine waste oil storage facility of a type approved by the department is exempt from the requirements of ss. 144.44, 144.46, 144.63 and 144.64 and rules promulgated under those sections with respect to that facility. The informal plan of operation shall contain the information and be in a form approved by the department but is not required to be prepared by a registered professional engineer.

(c) *Compliance with solid and hazardous waste regulations.* Except as provided under par. (b), no person may maintain or operate a site or facility for the storage of engine waste oil unless the person obtains a license and complies with the requirements of ss. 144.43 to 144.47 and 144.60 to 144.74 and rules promulgated under those sections with respect to that site or facility.

(4) **WASTE OIL TRANSPORTATION.** (a) *Exemptions.* 1. The department shall exempt a consumer from the licensing and other requirements of s. 144.64 and rules promulgated under that section for the transportation of engine waste oil.

2. The department may exempt a retail sales establishment or a service establishment from

the licensing and other requirements of s. 144.64 and rules promulgated under that section for the transportation of engine waste oil.

(b) *Compliance with solid and hazardous waste regulations.* Except as provided under par. (a), no person may transport waste engine oil unless the person obtains a license and complies with the requirements of ss. 144.43 to 144.47 and 144.60 to 144.74 and rules promulgated under those sections with respect to the transportation of the waste engine oil.

(c) *Collection and transportation service.* A person who collects and transports waste oil for sale or transfer to waste oil recyclers or for other approved methods of disposal shall obtain a license and comply with the requirements of ss. 144.43 to 144.47 and 144.60 to 144.74 and rules promulgated under these sections. When issuing the license under s. 144.64, the department shall require any person who collects and transports waste oil to provide services to any collection or storage facility within his or her geographic area which has accumulated 200 gallons or more of engine waste oil. The department may revoke a license issued under s. 144.64 if a person who collects and transports waste oil fails to provide services to collection or storage facilities within his or her geographic area which have accumulated 200 gallons or more of engine waste oil.

(5) **WASTE OIL RECYCLING.** No person may maintain or operate a site or facility for the recycling of engine waste oil unless the person obtains a license and complies with the requirements of ss. 144.43 to 144.47 and 144.60 to 144.74 and rules promulgated under those sections with respect to that site or facility.

(6) **SALE OF RECYCLED OIL.** (a) *Re-refined oil.* No person may sell or possess with the intent to sell any re-refined oil unless the container clearly and prominently states on the front panel "RE-REFINED OIL" and unless the container complies with the labeling standards established by the federal trade commission and the environmental protection agency.

(b) *Reclaimed oil.* No person may sell or possess with intent to sell any reclaimed oil unless the container clearly and prominently states on the front panel "RECLAIMED OIL" and unless the container complies with the labeling standards established by the federal trade commission and environmental protection agency.

(7) **STATE CONTRACTS; USE OF RE-REFINED OIL.** All contracting agencies of the state shall be encouraged to purchase re-refined oil to be used as automotive engine oil if re-refined oil is available in sufficient supply of comparable

quality, satisfies applicable American petroleum institute standards and is available at prices competitive with new oil.

(8) PROMOTION OF RECYCLED OIL. The department, in conjunction with other interested state agencies, shall develop and conduct public information and educational programs regarding the availability of collection facilities, the merits of recycled oil, the need for using recycled oil to maintain oil reserves and the need to minimize the disposal of waste oil in ways harmful to the environment.

History: 1979 c. 221.

NOTE: Chapter 221, laws of 1979, which created this section, states in section 2204 (39) (f) that the section goes into effect on April 1, 1981.

144.545 Mercury users. Every owner of an establishment using 50 pounds or more of mercury compounds or metallic mercury in any one year shall furnish the department with a materials balance statement for the mercury compound or metallic mercury. Such statement shall itemize the type and amount of mercury compound or metallic mercury used, the processes used in and the means by and the place where it is disposed. The statement shall be on a form prescribed by the department and shall be filed on or before January 31 with respect to the use of mercury during the preceding calendar year.

History: 1971 c. 272; 1975 c. 349; 1979 c. 34 s. 984nb.

144.60 Hazardous waste management.

(1) TITLE. Sections 144.60 to 144.74 shall be known and may be cited as the "Hazardous Waste Management Act".

(2) DECLARATION OF POLICY. The legislature finds that hazardous wastes, when mismanaged, pose a substantial danger to the environment and public health and safety. To ensure that hazardous wastes are properly managed within this state, the legislature declares that a state-administered regulatory program is needed which:

(a) Relies upon private industry or local units of government to provide hazardous waste management services.

(b) Requires the transportation, storage, treatment and disposal of hazardous wastes to be performed only by licensed operators.

(c) Requires generators of hazardous waste to utilize operators licensed to transport, treat, store or dispose of hazardous wastes.

(d) Does not interfere with, control or regulate the manufacturing processes which generate hazardous wastes.

(e) Ensures the maintenance of adequate records on, and the reporting of, the disposition

of all hazardous wastes either generated in or entering this state.

(f) Encourages to the extent feasible, the reuse, recycling or reduction of hazardous wastes.

(g) Provides adequate care and protection of disposal sites after the sites cease to accept hazardous wastes.

(h) Provides members of the public and units of local government an opportunity to review and comment upon the construction, operation and long-term care of hazardous waste management facilities.

(i) Meets the minimum requirements of the resource conservation and recovery act of 1976, P.L. 94-580.

(3) RULES ON METALLIC MINING WASTES. The requirements of ss. 144.60 to 144.74 shall be subject to s. 144.435 (1m).

History: 1977 c. 377; 1979 c. 89; 1979 c. 175 s. 53.

144.61 Definitions. In ss. 144.60 to 144.74:

(1) "Closing" has the meaning designated under s. 144.43 (1).

(2) "Department" means the department of natural resources.

(3) "Disposal" means the discharge, deposit, injection, dumping or placing of any hazardous waste into or on any land or water so that the hazardous waste or any constituent of the hazardous waste may enter the environment or be emitted into the air or discharged into any waters, including ground waters, or the storage of any hazardous waste for a period longer than 18 months.

(4) "Generation" means the act or process of producing hazardous waste but does not include any manufacturing process.

(5) "Hazardous waste" or "waste" means any solid waste identified by the department as hazardous under s. 144.62 (2) (a).

(6) "Hazardous waste management" means the systematic source reduction, collection, source separation, storage, transportation, exchange, processing, treatment, recovery and disposal of hazardous wastes.

(7) "Long-term care" has the meaning designated under s. 144.43 (3).

(8) "Manifest" means a form used for identifying the quantity, composition and the origin, routing and destination of hazardous waste during its transport.

(9) "Person" means an individual, owner or operator, corporation, partnership, association, municipality, interstate agency or state agency.

(10) "Storage" means the containment of hazardous waste, for that period of time established by rule by the department not exceeding 18 months, in such a manner as not to constitute

disposal of the hazardous waste. Containment of less than 10,000 gallons for less than one month shall not constitute storage.

(11) "Termination" has the meaning designated under s. 144.43 (8).

(12) "Transport" means the movement of wastes between sites which are subject to or require a license under this subchapter or under the resource conservation and recovery act of 1976, P.L. 94-580.

(13) "Treatment" means any method, technique or process, including neutralization, which follows generation and is designed to change the physical, chemical or biological character or composition of any hazardous waste so as to neutralize the hazardous waste or so as to render the waste nonhazardous, safer for transport, amenable for recovery, amenable for storage or reduced in volume.

(14) "Treatment facility" means a location at which waste is subjected to treatment and may include a facility where waste has been generated. Such facilities shall not include waste water treatment facilities regulated under ch. 147.

History: 1977 c. 377; 1979 c. 34

144.62 Powers and duties of the department.

(1) Within one year after May 21, 1978, the department shall conduct and publish a study, using existing data to the extent possible, of hazardous waste management in this state. The study shall include, but is not limited to:

(a) A description of the sources of hazardous waste generation within the state, including the types and quantities of hazardous wastes.

(b) A description of current hazardous wastes management practices, including treatment and disposal, within the state.

(c) Establishment of physical criteria for acceptable hazardous waste treatment, storage and disposal sites.

(2) Within 12 months after publication of final regulations required under s. 3001 (b) of the resource conservation and recovery act of 1976, P.L. 94-580, or by July 1, 1979, whichever is earlier, the department shall:

(a) Promulgate, by rule, criteria identical to those promulgated by the U.S. environmental protection agency under s. 3001 (b) of the resource conservation and recovery act of 1976, P.L. 94-580, for identifying the characteristics of hazardous waste and based on use of these criteria, maintain and update a list of wastes identified as hazardous wastes which shall be subject to ss. 144.60 to 144.74. The rules shall require that any person generating or transporting, or owning or operating a facility for treatment, storage or disposal, of any substance

which either meets the criteria or is identified as a hazardous waste shall, within 90 days of promulgation of the rule, so notify the department.

(b) Publish a report identifying general areas of the state, based on criteria reported under sub. (1) (c), which may, or may not, be suitable for the establishment of hazardous waste treatment, storage or disposal facilities. This designation shall not operate to preclude specific sites from receiving a license.

(3) The department may, by rule, prohibit particular methods of treatment or disposal of particular hazardous wastes, upon a finding that restrictions on treatment or disposal methods are necessary to protect public health and safety or the environment.

(4) The department may enter into a compact with agencies in other states for the purposes of mutual assistance in the management and regulation of hazardous wastes.

(5) The department may, by rule, exempt from any of the provisions of ss. 144.60 to 144.74 any person who generates wastes which do not present a significant hazard to public health and safety or the environment.

(6) Commencing 5 years after May 21, 1978, the department shall study whether existing hazardous waste management facilities and operations are adequately handling all hazardous wastes within the state, and shall report its findings to the legislature within one year.

(7) In developing requirements for licenses to transport hazardous waste under s. 144.64 (2), the department shall maintain consistency with rules promulgated by the department of transportation.

(8) The department shall adopt rules which prescribe requirements for:

(a) The establishment and maintenance of records.

(b) The making of reports, including the manifest to be used during the transport of hazardous waste.

(c) Sampling and analysis.

(d) Installation, calibration, use and maintenance of monitoring equipment.

(e) The design, construction, operation and closing of sites and facilities for the treatment, storage and disposal of hazardous wastes.

(9) The department, in cooperation with the university of Wisconsin extension and other interested parties, shall develop educational programs and offer technical assistance to persons interested in hazardous waste management.

(10) (a) Rules under sub. (2) (a) shall also establish not less than 2 nor more than 4 classes of hazardous waste and shall assign wastes to a particular class. The classes shall be based upon

the relative degrees of hazard posed by the waste. Storage periods defined under s. 144.61 (10) and standards established under ss. 144.60 to 144.74 for facilities which treat, store or dispose of hazardous waste, or equipment which transports hazardous waste, shall recognize and differentiate between the classes of waste the facility or equipment is intended to transport, treat, store or dispose.

(b) In determining the relative degrees of hazard of classes of wastes under par. (a), the department shall consider the following:

1. The amounts of wastes and the concentrations of the harmful or potentially harmful constituents of the wastes;

2. The likelihood of exposure to humans or the environment of the harmful or potentially harmful constituents of the wastes based upon the mobility and stability of harmful constituents, and the biological or chemical conversion of the constituents to other harmful chemicals; and

3. The harm to humans or the environment resulting from the exposure identified under subd. 2 from the harmful constituents.

(11) The department, in cooperation with the solid waste recycling authority, shall report by January 1, 1980, to the legislature on the feasibility of establishing a waste exchange in this state, for the purpose of encouraging the utilization of hazardous wastes for useful purposes. The report shall include at least the following:

(a) A determination of whether there is a need for a waste exchange in this state, including the types of wastes that could be so exchanged;

(b) A discussion of which organizations, if any, should be involved in establishing or operating such an exchange; and

(c) An estimate of the costs of establishing and operating such an exchange.

(12) If facilities or equipment subject to ss. 144.60 to 144.74 are also subject to regulation by the department under other statutes or rules, the department shall integrate its regulatory processes to avoid duplicative or contradictory actions or requirements.

History: 1977 c. 377; 1979 c. 34 s. 2102 (39) (g).

144.63 Generation. Any person generating hazardous waste shall:

(1) Be responsible for testing programs needed to determine whether any material generated by them is a hazardous waste for purposes of ss. 144.60 to 144.74.

(2) Keep records that accurately identify:

(a) The quantities of hazardous waste generated;

(b) The constituents of hazardous wastes which are significant because of quantity or

potential harmfulness to human health or the environment; and

(c) The disposition of hazardous wastes.

(3) Label any container used for the storage, transport or disposal of hazardous waste to accurately identify its contents and associated hazards.

(4) Use appropriate containers for hazardous waste.

(5) Furnish information on the general chemical composition of hazardous waste to persons transporting, treating, storing or disposing of hazardous wastes, and on any precautions recommended to ensure safe handling of hazardous waste.

(6) Comply with rules relating to use of a manifest system.

(7) Submit all required reports.

(8) Comply with rules relating to notification under s. 144.62 (2) (a).

(9) Arrange that all wastes generated by them are transported, treated, stored or disposed of at facilities, or by operations, holding a license issued under ss. 144.60 to 144.74 or issued under the resource conservation and recovery act of 1976, P.L. 94-580.

History: 1977 c. 377.

144.64 Licenses. (1) LICENSE REQUIRED.

(a) After 9 months after April 30, 1980, and except as provided under par. (b) and sub. (3)

(c) 2, no person may store, transport, treat or dispose of any hazardous waste without a license issued by the department under this section.

(b) Where the application for or compliance with any license required under this section would, in the judgment of the department, cause undue or unreasonable hardship to any person, the department may issue a variance from the requirements of this section, if the variance does not result in undue harm to public health or the environment. In no case may the duration of any variance exceed one year. Renewals or extensions of variances may be given only after opportunity for a public hearing on each variance renewal or extension.

(c) The department may waive compliance with any requirement of this section or shorten the time periods provided under this section to the extent necessary to prevent an emergency condition threatening public health, safety or welfare.

(2) TRANSPORTATION. (a) Licenses issued under this section to transport hazardous waste shall require compliance with rules of the department. The rules shall establish standards for the following:

144.64 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2932

1. Recordkeeping concerning hazardous waste transported, and their source and delivery points.

2. Labeling procedures.

3. Use of a manifest system.

4. Containers used to transport waste.

5. Equipment operator qualifications.

(b) Licenses issued under this section may be denied, suspended or revoked for grievous and continuous failure to comply with the standards adopted under par. (a).

(3) FACILITIES. (a) *Existing solid waste site treated as a new hazardous waste site.* A solid waste treatment, storage or disposal site or facility which is authorized to receive hazardous waste under a license issued under s. 144.44 (4) but which was never licensed under this section shall be treated as an unlicensed proposed site which has not been established or constructed for the purpose of site approval under par. (b) and s. 144.44 (1) to (3), for the purpose of licensing under this subsection and for the purpose of administrative procedure and review under ch. 227.

(b) *Site approval process.* No person may establish or construct a site or facility to treat, store or dispose of hazardous waste unless the person complies with s. 144.44 (1) to (3).

(c) *Operation.* 1. Except as provided under subd. 2, no person may operate any hazardous waste treatment, storage or disposal site or facility without a license issued under this section.

2. A person may operate a solid waste treatment, storage or disposal site or facility which is authorized to receive hazardous waste under a license issued under s. 144.44 (4) even though no license is issued under this section if the person applies for this license and complies with conditions and restrictions prescribed by rule or special order by the department pending the decision on the issuance of the license.

(d) *Fees.* A person who operates a hazardous waste disposal site shall pay the fees specified under s. 144.441 (3).

(4) LOCAL PERMITS NOT REQUIRED. No hazardous waste treatment, storage or disposal facility which has been issued a license under this section may be required to obtain local permits or authorizations to operate the facility.

(5) FEES. The department shall, by rule, adopt a graduated schedule of reasonable fees to be charged for the direct administration of this section.

History: 1977 c. 377; 1979 c. 221.

144.69 Inspections and right of entry. Any person who generates, stores, treats, transports or disposes of hazardous wastes shall, upon

request of any officer or employe of the department, permit the person, at reasonable times and with notice no later than upon arrival, access to premises and records relating to hazardous wastes. Departmental personnel may take samples of hazardous wastes as they deem necessary. Inspections shall be commenced and completed with reasonable promptness. If samples are taken, a receipt for each sample shall be given to the person in charge of the facility, and upon request, half of the sample taken. A copy of the results of any departmental analysis of the sample, if taken, and a copy of the inspection report, shall be promptly furnished to the person in charge of the facility.

History: 1977 c. 377.

144.70 Confidentiality. The department shall prescribe by rule which records, reports or information, if any, obtained from any person under ss. 144.60 to 144.64 and 144.69 to 144.74 shall be confidential. The department shall not divulge any information entitled to protection as a trade secret. This section shall not prevent the department from using records, reports or information in the compilation of summaries and reports, provided that the summaries and reports do not identify any person or reveal any information otherwise confidential under this section.

History: 1977 c. 377.

144.72 Imminent hazard. Upon notice that the handling, treatment, storage, transportation or disposal of any hazardous waste is presenting an imminent and substantial danger to health or the environment, the department may request the department of justice to commence legal proceedings to restrain or enjoin any person from handling, treatment, storage, transportation or disposal presenting an imminent and substantial danger to health or the environment or to take any other action as may be necessary.

History: 1977 c. 377.

144.73 Enforcement. (1) COMPLIANCE ORDERS. If the department determines that any person is in violation of any requirement of ss. 144.60 to 144.74, the department shall give written notice to the violator of his or her failure to comply with the requirement and if compliance is not obtained within 30 days after notice or within such reasonable time in which compliance may be accomplished, may issue an order requiring compliance within a specified time period or may refer the matter to the department of justice for enforcement.

(2) ACTION; DISPOSITION. The department of justice may initiate the legal action requested by the department under sub. (1) within 30 days

of receipt of the written request. In any action commenced by it under this subsection, the department of justice shall, prior to stipulation, consent order, judgment or other final disposition of the case, consult with the department for the purpose of determining the department's views on final disposition. The department of justice shall not enter into a final disposition different than that previously discussed without first informing the department.

(3) ASSISTANCE OF DISTRICT ATTORNEY. In any criminal action commenced under s. 144.74, the department of justice may request the assistance of the district attorney of any county in which the violation occurred, and the district attorney shall provide the requested assistance.

(4) VENUE. Any action on a violation shall be commenced in the circuit court for the county in which the violation occurred.

History: 1977 c. 377.

144.74 Penalties. (1) The department of justice, upon a referral under s. 144.73, may initiate a civil action for a temporary or permanent injunction for any violation of ss. 144.60 to 144.74, or any rule promulgated under ss. 144.60 to 144.74, or of a term or condition of any license issued under ss. 144.60 to 144.74.

(2) Any person who violates ss. 144.60 to 144.74, or any rule promulgated under ss. 144.60 to 144.74, or any term or condition of a license issued under ss. 144.60 to 144.74, shall be subject to a forfeiture of not more than \$25,000 for each day of violation. The time elapsed prior to the expiration of a compliance order shall not constitute a violation.

(3) Any person who transports any hazardous waste subject to ss. 144.60 to 144.74 to a facility which the transporter knows does not have a license, intentionally disposes of any hazardous waste subject to ss. 144.60 to 144.74 without having obtained a license for disposal of hazardous wastes or intentionally makes any false statement or representation in any application, label, manifest, record, report, license or other document shall, upon conviction, be fined not more than \$25,000 for each day of violation or imprisoned not more than one year in the county jail or both. If the conviction is for a violation committed after a first conviction of the person, the person shall be fined not more than \$50,000 per day of violation or imprisoned not more than 2 years or both.

History: 1977 c. 377.

144.76 Hazardous substance spills. (1) DEFINITIONS. AS used in this section:

(a) "Discharge" means, but is not limited to, spilling, leaking, pumping, pouring, emitting, emptying or dumping

(b) "Hazardous substance" has the meaning given under s. 144.43 (2).

(c) "Preventive measures" mean the installation or testing of equipment or devices, a designated way of performing a specified operation or the preparation of an emergency response plan.

(2) NOTICE OF DISCHARGE. (a) Persons possessing or controlling a hazardous substance shall immediately notify the department of any discharge not exempted under sub. (9).

(b) Notification received under this section or information obtained in a notification received under this section may not be used against the person making such a notification in any criminal proceedings.

(c) The department shall designate a 24-hour statewide toll-free or collect telephone number whereby notice of any hazardous discharge may be made.

(3) RESPONSIBILITY. Persons having possession of or control over a hazardous substance being discharged, or who cause a hazardous discharge, shall take the actions necessary to restore the environment to the extent practicable and minimize the harmful effects from any discharge to the air, lands or waters of this state.

(4) PREVENTION OF DISCHARGE. (a) The department may require that preventive measures be taken by any person possessing or having control over hazardous substances when it finds:

1. Preventive action would result in a significant reduction in discharge potential; and
2. Past discharges by this person indicate that the existing control measures are inadequate in preventing discharges.

(b) The department shall specify necessary preventive measures by order. The order shall be effective 10 days after issuance, unless the person named requests a hearing, in which case no order may become effective until the conclusion of the hearing.

(5) CONTINGENCY PLAN. (a) The department shall, after consultation with other affected federal, state and local agencies and private organizations, establish by rule a contingency plan for the undertaking of emergency actions in response to the discharge of hazardous substances.

(b) The contingency plan shall:

1. Provide for efficient, coordinated and effective action to minimize damage to the air, land and waters of the state caused by the discharge of hazardous substances;
2. Include containment, clean-up and disposal procedures;
3. Provide for restoration of the lands or waters affected to the satisfaction of the department;

4. Assign duties and responsibilities among state departments and agencies, in coordination with federal and local agencies;

5. Provide for the identification, procurement, maintenance and storage of necessary equipment and supplies;

6. Provide for designation of persons trained, prepared and available to provide the necessary services to carry out the plan; and

7. Establish procedures and techniques for identifying, containing, removing and disposing of discharged hazardous substances.

(6) HAZARDOUS SUBSTANCES SPILL FUND.

(a) The appropriation under s. 20.370 (2) (ac) shall be used in implementing and carrying out the contingency plan developed under sub. (5). This fund shall provide for the procurement, maintenance and storage of necessary equipment and supplies, personnel training and expenses incurred during containment, clean-up and disposal of discharged substances.

(b) No more than 25% of the fund may be used annually for the procurement and maintenance of necessary equipment.

(c) Reimbursements to the department under sub. (7) shall be credited to the hazardous substances spill fund.

(d) Reimbursements to the department under s. 311, federal water pollution control act amendments of 1972, P.L. 92-500, shall be credited to the hazardous substances spill fund.

(7) REMOVAL OR OTHER EMERGENCY ACTION.

(a) In every case where action required under sub. (3) is not being adequately taken or the identity of the person responsible for the discharge is unknown, the department or its agent may contain, remove or dispose of the hazardous substance or take any other emergency action which it deems appropriate under the circumstances.

(b) The person causing the discharge shall reimburse the department for actual and necessary expenses incurred in carrying out its duties under this subsection.

(c) The department may, for the protection of public health, safety or welfare, issue an emergency order to the person possessing, controlling or responsible for the discharge of hazardous substances to fulfill the duty imposed by sub. (3).

(8) ACCESS TO PROPERTY. Any duly authorized officer, employe or agent of the department may, upon notice to the owner or occupant, enter any property, premises or place at any time for the purposes of sub. (7) if such entry is necessary to prevent increased damage to the air, land or waters of the state. Notice to the owner or occupant shall not be required if the

delay attendant upon providing it will result in imminent risk to public health or safety.

(9) EXEMPTIONS. (a) Any person holding a valid permit under ch. 147 is exempted from the reporting and penalty requirements of this section with respect to substances discharged within the limits authorized by the permit.

(b) Law enforcement officers or members of a fire department using hazardous substances in carrying out their responsibility to protect public health, safety and welfare are exempted from the penalty requirements of this section, but shall be encouraged to report to the department any discharges of a hazardous substance occurring within the performance of their duties.

(c) Any person discharging in conformity with a permit or program approved under this chapter is exempted from the reporting and penalty requirements of this section.

(d) Any person applying a registered pesticide according to the label instructions is exempted with respect to the application from the reporting and penalty requirements of this section.

(10) ENFORCEMENT EXCLUSIONS. (a) Any person proceeded against for a violation of this section shall not be subject to penalties under s. 144.74 for the same act or omission.

(b) Any person who discharges a hazardous substance, where the responsibilities for such a discharge are prescribed by statute other than ss. 144.60 to 144.74, shall be subject to the penalty under either this section or the other section but not both.

History: 1977 c. 377; 1979 c. 34 ss. 988, 2102 (39) (a), (g)

144.781 Solid waste management grant program. (1) Sections 144.781 to 144.784 shall be known and may be cited as the "Solid Waste Management Grant Program".

(2) The purpose of ss. 144.781 to 144.784 is to provide state financial assistance to regional planning commissions or to county areawide planning agencies for the development of areawide solid waste management plans and to counties and other local units of government to conduct specific solid waste disposal site feasibility studies consistent with previously adopted and approved areawide solid waste management plans.

(3) In ss. 144.781 to 144.784:

(a) "Applicant for a specific solid waste disposal site feasibility grant" means a town, village, city or county, or more than one town, village, city or county acting jointly, which presents an application for funding a proposal to conduct a specific solid waste disposal site feasibility study which is consistent with a previously

developed, department-approved areawide solid waste management plan.

(b) "Applicant for an areawide solid waste management planning grant" means a regional planning commission or a county, or more than one regional planning commission or county acting jointly, which presents an application for funding a proposal to develop an areawide solid waste management plan.

(c) "Areawide solid waste management plan" means a solid waste management plan developed by a regional planning commission or a county or more than one regional planning commission or county acting jointly.

(d) "Sludge" means any solid, semi-solid or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant or air pollution control facility, or any other such waste having similar characteristics and effects.

(e) "Solid waste management" has the meaning designated under s. 144.43 (6).

(f) "Solid waste management plan" has the meaning designated under s. 144.43 (7).

(g) "Specific solid waste disposal site feasibility study" means the study which describes the physical conditions of the proposed site including a description of the site's topography, soils, geology, ground and surface waters and other features of the site and surrounding area. The study shall also include preliminary engineering design concepts including the proposed design capacity of the site and an indication of the quantities and characteristics of the wastes to be disposed of.

History: 1977 c. 418; 1977 c. 447 ss. 130, 210; 1979 c. 34.

144.782 Department powers and duties.

(1) The department shall:

(a) Adopt rules within 9 months after May 19, 1978, implementing and consistent with ss. 144.781 to 144.784.

(b) Develop evaluation criteria for reporting on and evaluating the solid waste management grant program including the number of grants awarded for areawide solid waste management plans and specific site feasibility studies, the extent to which the grant money is used as required by the solid waste management grant program, and the costs necessary to meet remaining needs of implementing the purposes of ss. 144.781 to 144.784.

(c) Develop criteria, by rule, for approving areawide solid waste management plans. The criteria shall include, but are not limited to:

1. Consideration of the existing and anticipated disposal needs of all units of government within the planning area.

2. Promotion, wherever possible, of resource conservation and recovery practices.

3. Indicating probable disposal site locations to satisfy existing and anticipated solid waste disposal needs.

(d) Develop criteria, by rule, for approving specified solid waste disposal site feasibility studies. The criteria shall include, but are not limited to, identification of one or more disposal sites that are feasible for development as a sanitary landfill, and the provision that no grant moneys may be expended for any acquisition of land or interest in land, or any site preparation, operation or abandonment, or for any subsidies for the price of recovered resources.

History: 1977 c. 418; 1977 c. 447 ss. 130, 210.

144.783 Financial assistance. Under ss. 144.781 to 144.784:

(1) The department may enter into agreements with applicants, as defined under s. 144.781 (3) (a) and (b), to make grant payments to the applicants from the appropriation made by s. 20.370 (4) (cf). An applicant for an areawide solid waste management planning grant may receive a grant which provides up to 50% of the estimated total cost of the applicant's areawide solid waste management plan, but the grant may not exceed \$50,000. An applicant for a specific solid waste disposal site feasibility study may receive a grant which provides up to 25% of the total estimated cost of the applicant's specific site feasibility study if the study is consistent with the applicable department-approved areawide solid waste management plan, but the grant for each feasibility study may not exceed \$50,000.

(2) Any grant application recipient of an areawide solid waste management planning grant is not eligible to receive additional areawide solid waste management planning grants under this section.

(3) All available federal funding from the federal resource conservation and recovery act of 1976, P.L. 94-580, for areawide solid waste management planning and specific solid waste disposal site feasibility studies shall be utilized to supplement and increase the levels of funding under this program. The local or municipal share of either an areawide solid waste management plan or specific solid waste disposal site feasibility study shall not be less than 25% of the total eligible costs of the project.

(4) To the greatest extent possible, each year applications for areawide solid waste management planning grants shall receive first consideration for approval and funding by the department. Each year applications for specific solid waste disposal site feasibility studies shall be considered for funding by the department after

the department has completed the grant application process for the areawide solid waste management plans.

(5) (a) The department, by rule, shall develop a separate funding priority list for both areawide solid waste management plans and specific solid waste disposal site feasibility studies. Factors to be considered by the department in developing funding priorities for individual plans and studies include, but are not limited to:

1. Waste generation volumes and types of waste in the area.
2. Existing areawide planning activities.
3. Current disposal practices and their suitability for environmentally sound disposal.
4. Extent and availability of alternative funding sources.
5. Extent of existing or previously developed plans.
6. Size of the area to be served.

(b) The funding priority lists shall be made available to all potential applicants. The priority lists may be modified by the department, as needed, to reflect changes in solid waste management practices and technology.

History: 1977 c. 418; 1977 c. 447 ss. 130, 210; 1979 c. 34 s. 2102 (39) (a).

144.784 Grant applications. (1) Grant applications for either an areawide solid waste management plan or a specific solid waste disposal site feasibility study shall be submitted to the department by January 1 of each year.

(2) The department shall review and approve or disapprove for funding each grant application.

(3) For an applicant for an areawide solid waste management planning grant, the application shall show, at a minimum:

(a) Designation by the governor that the applicant may act as an areawide solid waste planning agency.

(b) A statement of the overall areawide solid waste management plan objective.

(c) The methods proposed to develop the areawide solid waste management plan and the estimated costs of developing the plan.

(4) For an applicant for a specific solid waste disposal site feasibility study grant, the application shall show, at a minimum:

(a) That an areawide solid waste management plan for the area has been approved by the department and adopted by a county or regional planning commission or a group of counties or regional planning commissions.

(b) The applicant's intent to implement portions of the department-approved areawide solid waste management plan.

(c) The overall specific solid waste disposal site feasibility objectives.

(d) The methods proposed to conduct the specific solid waste disposal site feasibility study and the estimated costs of conducting the study.

(5) The department shall decide the eligibility and the priority of each individual areawide solid waste management plan or specific solid waste disposal site feasibility study grant application by April 1 of each year. Funding for all grants submitted by January 1 of each year shall be committed by May 1 of the same year based on the acceptance of each grant by each successful applicant.

(6) The application and award time schedule specified in this section may be modified by the department if the department determines that such modification would be beneficial for the applicant. Prior to such modification the department shall consider such factors as the acquisition of funding for the project from sources other than the state and the coordination with local budgetary planning processes.

(7) Each grant shall be valid for one year after the date of acceptance. The department may extend to 2 years the amount of time within which the grant recipient may spend the grant if the department determines, on a case-by-case basis, that a time extension is warranted.

(8) After an applicant has accepted the grant offered by the department based on the application, the department shall make available to the applicant 75% of the total amount of the grant. The remaining 25% of the total amount of the grant shall be paid to the applicant only if final project plans are approved, in writing, by the department. The content of final project plans and the criteria for approval of the final project plans shall be specified by the department by rule.

(9) An applicant for a grant for a specific solid waste disposal site feasibility study shall submit one copy of its application to the areawide solid waste planning agency with jurisdiction over the applicant's area for comment on the proposed study's applicability to the department-approved areawide solid waste management plan. The areawide planning agency shall comment to the department within 30 days on the application. If the applicant for a specific solid waste disposal site feasibility study grant is the same agency that is responsible for the areawide solid waste plan, the department shall determine whether the study is consistent with the areawide solid waste plan.

(10) No grants may be distributed for areawide solid waste management plans or specific solid waste disposal site feasibility studies which have, as their primary goals, disposition of toxic and hazardous substances as defined under s. 144.43 (2), hazardous wastes, sludge, or source

material as defined under s. 140.52 (10), or by-product material or special nuclear material as defined under s. 140.52 (3) and (11).

History: 1977 c. 418, 447; 1979 c. 32; 1979 c. 34 s. 2102 (39) (g).

144.79 Manufacture and purchase of polychlorinated biphenyls. (1) In this section:

(a) "PCBs" mean the class of organic compounds generally known as polychlorinated biphenyls and includes any of several compounds or mixtures of compounds produced by replacing 2 or more hydrogen atoms on the biphenyl molecule with chlorine atoms.

(b) "Ppm" means parts per million by weight.

(c) "Product containing PCBs" means any item, device or material to which PCBs are intentionally added during or after manufacture as plasticizers, heat transfer media, hydraulic fluids, dielectric fluids, solvents, surfactants, insulators or coating, adhesive, printing or encapsulating materials or for other uses related to the function of such item, device or material.

(2) No person may manufacture, or purchase for use within this state, PCBs or a product containing PCBs after July 1, 1977.

(3) Subsection (2) shall not apply to any product containing PCBs if:

(a) The product contains PCBs in a closed system as a dielectric fluid for an electric transformer, electromagnet or capacitor, unless the department by rule prohibits such manufacture or purchase of specific products for which the department has determined that adequate alternatives are available at the time of manufacture or purchase.

(b) The product is an electrical component containing less than 2 pounds of PCBs, unless the department by rule prohibits the manufacture or purchase of any such product manufactured after the effective date of such rule for which the department has determined that an adequate alternative is available.

(c) The product is wastepaper, pulp or other paper products or materials, in which case such product may be purchased for use within this state in the manufacture of recycled paper products.

(4) Subsection (2) shall not be construed to prohibit the manufacture or purchase of PCBs or products containing PCBs for use within this state in scientific research, analytical testing or experimentation.

(5) The department by rule may exempt other uses of PCBs from the provisions of sub. (2) for specific products when adequate alternatives are not available.

(6) (a) In determining whether adequate alternatives are available under sub. (3) (a) and (b) or (5), the department shall take into account and make specific findings as to the following criteria:

1. The commercial availability and cost of alternative products;

2. The safety of alternative products to both human life and property;

3. The acceptance of alternative products by insurance underwriters;

4. The extent to which use of such alternative products is otherwise restricted by law;

5. The degree to which such alternative products satisfy the performance standards required for the particular use; and

6. Any adverse environmental effects associated with such alternative products.

(7) On or before July 1, 1977, the department shall adopt rules prescribing the methods and providing or designating sites and facilities for the disposal of PCBs and products containing PCBs. Such rules may require reporting by persons disposing of PCBs and products containing PCBs. Persons disposing of PCBs or products containing PCBs shall comply with such rules unless such products are exempted under sub. (3) (b) or (c). In this section, disposal does not include the disposal of PCBs in sludge produced by wastewater treatment systems under s. 144.435 (1) and ch. NR 151, Wis. Adm. Code, the discharge of effluents containing PCBs or the manufacture or sale of recycled paper products to which PCBs have not been intentionally added during or after manufacture for any of the uses set forth in sub. (1) (c). Nothing in this section shall exempt any person from applicable disposal or discharge limitations required or authorized under other sections of the statutes.

(8) On or before July 1, 1977, the department shall adopt rules setting forth the method and manner of sampling, preparing samples and analyzing PCBs which shall be used by the department in implementing this section.

(9) The department shall enforce this section as provided in ss. 147.21 and 147.29.

History: 1975 c. 412; 1977 c. 325; 1977 c. 377 s. 30; 1979 c. 32 s. 92 (1); 1979 c. 34 ss. 984t, 2102 (39) (g); 1979 c. 154; 1979 c. 221 s. 632.

SUBCHAPTER V

MINING

144.80 Metallic mining reclamation act.

(1) Sections 144.80 to 144.94 shall be known and may be cited as the "Metallic Mining Reclamation Act".

History: 1973 c. 318; 1977 c. 421.

144.81 Definitions. In ss. 144.80 to 144.94:

- (1) "Abandonment of mining" means the cessation of mining, not set forth in an operator's mining or reclamation plans or by any other sufficient written or constructive notice, extending for more than 6 consecutive months. Abandonment of mining does not include the cessation of mining due either to labor strikes or the cessation of mining due to such unforeseen developments as adverse market conditions for a period not to exceed 5 years as determined by the department after consulting with the metallic mining council.
- (1m) "Applicant" means a person who has applied for a prospecting permit or a mining permit.
- (2) "Exploration" means the onsite geologic examination from the surface of an area by core, rotary, percussion or other drilling, where the diameter of the hole does not exceed 18 inches, for the purpose of searching for metallic minerals or establishing the nature of a known metallic mineral deposit, and includes associated activities such as clearing and preparing sites or constructing roads for drilling.
- (2m) "Exploration license" means the license required under s. 144.832 (2) as a condition of engaging in exploration.
- (3) "Merchantable by-product" means all waste soil, rock, mineral, liquid, vegetation and other material directly resulting from or displaced by the mining, cleaning or preparation of minerals during mining operations which are determined by the department to be marketable upon a showing of marketability made by the operator, accompanied by a verified statement by the operator of his or her intent to sell such material within 3 years from the time it results from or is displaced by mining. If after 3 years from the time merchantable by-product results from or is displaced by mining such material has not been transported off the mining site, it shall be considered and regulated as refuse unless removal is continuing at a rate of more than 12,000 cubic yards per year.
- (4) "Minerals" mean unbeneficiated metallic ore but does not include mineral aggregates such as stone, sand and gravel.
- (5) "Mining" or "mining operation" means all or part of the process involved in the mining of metallic minerals, other than for exploration or prospecting, including commercial extraction, agglomeration, beneficiation, construction of roads, removal of overburden and the production of refuse.
- (6) "Mining plan" means the proposal for the mining of the mining site which shall be approved by the department under s. 144.85 prior to the issuance of the mining permit.
- (7) "Mining permit" means the permit which is required of all operators as a condition precedent to commencing mining at a mining site.
- (8) "Mining site" means the surface area disturbed by a mining operation, including the surface area from which the minerals or refuse or both have been removed, the surface area covered by refuse, all lands disturbed by the construction or improvement of haulageways, and any surface areas in which structures, equipment, materials and any other things used in the mining operation are situated.
- (9) "Operator" means any person who is engaged in, or who has applied for or holds a permit to engage in, prospecting or mining, whether individually, jointly or through subsidiaries, agents, employes or contractors.
- (10) "Principal shareholder" means any person who owns at least 10% of the beneficial ownership of an operator.
- (12) "Prospecting" means engaging in the examination of an area for the purpose of determining the quality and quantity of minerals, other than for exploration but including the obtaining of an ore sample, by such physical means as excavating, trenching, construction of shafts, ramps and tunnels and other means, other than for exploration, which the department, by rule, identifies, and the production of prospecting refuse and other associated activities. "Prospecting" shall not include such activities when the activities are, by themselves, intended for and capable of commercial exploitation of the underlying ore body. However, the fact that prospecting activities and construction may have use ultimately in mining, if approved, shall not mean that prospecting activities and construction constitute mining within the meaning of sub. (5), provided such activities and construction are reasonably related to prospecting requirements.
- (13) "Prospecting permit" means the permit which is required of all persons as a condition precedent to commencing prospecting at a location.
- (13m) "Prospecting plan" means the proposal for prospecting of the prospecting site, which shall be approved by the department under s. 144.84 prior to the issuance of the prospecting permit.
- (13n) "Prospecting site" means the lands on which prospecting is actually conducted as well as those lands on which physical disturbance will occur as a result of such activity.
- (14) "Prospector" means any person engaged in prospecting.
- (15) "Reclamation" means the process by which an area physically or environmentally

affected by prospecting or mining is rehabilitated to either its original state or, if this is shown to be physically or economically impracticable or environmentally or socially undesirable, to a state that provides long-term environmental stability. Reclamation shall provide the greatest feasible protection to the environment and shall include, but is not limited to, the criteria for reclamation set forth in s. 144.83 (2) (c).

(16) "Reclamation plan" means the proposal for the reclamation of the prospecting or mining site which must be approved by the department under s. 144.84 or 144.85 prior to the issuance of the prospecting or mining permit.

(17) "Refuse" means all waste soil, rock, mineral, liquid, vegetation and other material, except merchantable by-products, directly resulting from or displaced by the prospecting or mining and from the cleaning or preparation of minerals during prospecting or mining operations, and shall include all waste materials deposited on or in the prospecting or mining site from other sources.

(18) "Unsuitability" means that the land proposed for prospecting or surface mining is not suitable for such activity because the prospecting or surface mining activity itself may reasonably be expected to destroy or irreparably damage either of the following:

(a) Habitat required for survival of species of vegetation or wildlife designated as endangered through prior inclusion in rules adopted by the department, if such endangered species cannot be firmly reestablished elsewhere.

(b) Unique features of the land, as determined by state or federal designation and incorporated in rules adopted by the department, as any of the following, which cannot have their unique characteristic preserved by relocation or replacement elsewhere:

1. Wilderness areas.
2. Wild and scenic rivers.
3. National or state parks.
4. Wildlife refuges and areas.
5. Historical landmarks, sites or archaeological areas.
6. Other lands of a type designated as unique or unsuitable for prospecting or surface mining.

History: 1973 c. 318; 1977 c. 377 s. 29m; 1977 c. 421, 447.

144.82 Mine effect responsibility. The department shall serve as the central unit of state government to ensure that the air, lands, waters, plants, fish and wildlife affected by prospecting or mining in this state will receive the greatest practicable degree of protection and reclamation. The administration of occupational health and safety laws and rules that apply to mining

shall remain exclusively the responsibility of the department of industry, labor and human relations. The powers and duties of the geological and natural history survey under s. 36.25 (6) shall remain exclusively the responsibility of the geological and natural history survey. Nothing in this section prevents the department of industry, labor and human relations and the geological and natural history survey from cooperating with the department in the exercise of their respective powers and duties.

History: 1973 c. 318; 1975 c. 41 s. 52.

144.83 Department powers and duties.

(1) The department shall:

(a) Adopt rules, including rules for prehearing discovery, implementing and consistent with ss. 144.80 to 144.94.

(b) Establish by rule after consulting with the metallic mining council minimum qualifications for applicants for prospecting and mining permits. Such minimum qualifications shall ensure that each operator in the state is competent to conduct mining and reclamation and each prospector in the state is competent to conduct prospecting in a fashion consistent with the purposes of ss. 144.80 to 144.94. The department shall also consider such other relevant factors bearing upon minimum qualifications, including but not limited to, any past forfeitures of bonds posted pursuant to mining activities in any state.

(2) (a) The department by rule after consulting with the metallic mining council shall adopt minimum standards for exploration, prospecting, mining and reclamation to ensure that such activities in this state will be conducted in a manner consistent with the purposes and intent of ss. 144.80 to 144.94. The minimum standards may classify exploration, prospecting and mining activities according to type of minerals involved and stage of progression in the operation.

(b) Minimum standards for exploration, prospecting and mining shall include the following:

1. Grading and stabilization of excavation, sides and benches.
2. Grading and stabilization of deposits of refuse.
3. Stabilization of merchantable by-products.
4. Adequate diversion and drainage of water from the exploration, prospecting or mining site.
5. Backfilling.
6. Adequate covering of all pollutant-bearing minerals or materials.
7. Removal and stockpiling, or other measures to protect topsoils prior to exploration, prospecting, or mining.
8. Adequate vegetative cover.
9. Water impoundment.

10. Adequate screening of the prospecting or mining site.

11. Identification and prevention of pollution as defined in s. 144.01 (10) resulting from leaching of waste materials.

12. Identification and prevention of significant environmental pollution as defined in s. 144.01 (3).

(c) Minimum standards for reclamation of exploration sites, where appropriate, and for prospecting and mining sites shall conform to s. 144.81 (15) and include provision for the following:

1. Disposal of all toxic and hazardous wastes, refuse, tailings and other solid waste in solid or hazardous waste land disposal facilities licensed under this chapter or otherwise in an environmentally sound manner.

2. Sealing off tunnels, shafts or other underground openings, and prevention of seepage in amounts which may be expected to create a safety, health or environmental hazard, unless the applicant can demonstrate alternative uses of tunnels, shafts or other openings which do not endanger public health and safety and which conform to applicable environmental protection laws and rules.

3. Management, impoundment or treatment of all underground or surface runoff waters from open pits or underground prospecting or mining sites so as to prevent soil erosion, flooding, damage to agricultural lands or livestock, wild animals, pollution of surface or subsurface waters or damage to public health or safety.

4. Removal of all surface structures, unless they are converted to an alternate use.

5. Prevention or reclamation of substantial surface subsidence.

6. Preservation of topsoil for purposes of future use in reclamation.

7. Revegetation to stabilize disturbed soils and prevent air and water pollution, with the objective of reestablishing a variety of populations of plants and animals indigenous to the area immediately prior to exploration, prospecting or mining.

8. Minimization of disturbance to wetlands.

(d) The minimum standards adopted under this subsection shall also provide that if any of the following situations may reasonably be expected to occur during or subsequent to prospecting or mining, the prospecting or mining permit shall be denied:

1. Landslides or substantial deposition from the proposed operation in stream or lake beds which cannot be feasibly prevented.

2. Significant surface subsidence which cannot be reclaimed because of the geologic characteristics present at the proposed site.

3. Hazards resulting in irreparable damage to any of the following, which cannot be prevented under the requirements of ss. 144.80 to 144.94, avoided to the extent applicable by removal from the area of hazard or mitigated by purchase or by obtaining the consent of the owner:

a. Dwelling houses.

b. Public buildings.

c. Schools.

d. Churches.

e. Cemeteries.

f. Commercial or institutional buildings.

g. Public roads.

h. Other public property designated by the department by rule.

4. Irreparable environmental damage to lake or stream bodies despite adherence to the requirements of ss. 144.80 to 144.94. This subdivision does not apply to an activity which the department has authorized pursuant to statute, except that the destruction or filling in of a lake bed shall not be authorized notwithstanding any other provision of law.

(4) The department may:

(a) Hold hearings relating to any aspect of the administration of ss. 144.80 to 144.94 and, in connection therewith, compel the attendance of witnesses and production of evidence.

(b) Cooperate or contract with the geological and natural history survey to secure necessary scientific, technical, administrative and operations services, including research, projects and laboratory facilities.

(c) Issue orders directing particular prospectors or operators to comply with the provisions and purposes of ss. 144.80 to 144.94.

(d) Supervise and provide for such educational programs as appear necessary to carry out the purposes of ss. 144.80 to 144.94.

(e) Accept, receive and expend gifts and donations on behalf of the state.

(f) At its own expense, with the staff, equipment and material under its control, or by contract with others, take such actions as are necessary for the reclamation of abandoned project sites.

(g) Issue prospecting and mining permits.

(h) Issue exploration licenses.

(5) The department may require all persons under its jurisdiction to submit such informational reports as the department deems necessary for performing its duties under ss. 144.80 to 144.94.

(6) The department may, after hearing, cancel:

(a) The prospecting permit for a prospecting site that is the site of a violation of ss. 144.80 to 144.94.

(b) The mining permit for a mining site that is the site of a violation of ss. 144.80 to 144.94.

(c) A mining or prospecting permit, if the permitholder intentionally made a false statement in the permit application or intentionally omitted information from the permit application which was material to permit issuance.

History: 1973 c. 318; 1977 c. 377 s. 29m; 1977 c. 421, 447; 1979 c. 34 s. 2102 (39) (g).

144.831 Data collection; monitoring. (1)

Any person intending to submit an application for a prospecting or mining permit shall notify the department prior to the collection of data or information intended to be used to support the permit application. Specific environmental data which would be pertinent to a specific prospecting or mining application, but which was obtained or collected or generated prior to the notice of intent to apply for a prospecting or mining permit, shall be submitted in writing to the department together with any substantiating background information which would assist the department in establishing the validity of the data. The department shall review the data and, if it concludes that the benefits of permitting the admission of the data outweigh the policy reasons for excluding it, and if the data is otherwise admissible, inform the person giving the notice of intent to prospect or mine that the data will be accepted by the department. Such exclusion shall not relate to general environmental information such as soil characteristics, hydrologic conditions and air and water data contained in publications, maps, documents, studies, reports and similar sources, whether public or private, not prepared by or for the applicant. Such exclusion shall likewise not relate to data which is otherwise admissible that is collected prior to notification under this subsection for purposes of evaluating another site or sites and which is not collected with intent to evade the provisions of this section.

(2) Upon receipt of notification under sub. (1), the department shall give public notice of the notification in the same manner as provided under s. 144.836 (3) (b).

(3) The department shall also receive and consider any comments from interested persons received within 45 days after public notice is given under sub. (2) as to the information which they believe should be requested from the person giving notice of intent to apply for a prospecting or mining permit and the information which they believe the department should seek through independent studies.

(4) After the receipt and consideration of comments from interested persons, the department shall inform the person giving notice of intent to apply for a prospecting or mining

permit of the type and quantity of information that it then believes to be needed to support an application, and where applicable, the methodology to be used in gathering information. The department shall specifically inform the person giving notice of intent to apply for a prospecting or mining permit of the type and quantity of information on the characteristics of ground water resources in the area in which prospecting or mining is anticipated to occur which the department believes is needed to support an application. The department shall also begin informing the person giving notice of intent to apply for a prospecting or mining permit as to the timely application date for approvals, licenses and permits, so as to facilitate the consideration of all other matters at the hearing on the prospecting or mining permit.

(5) The department may conduct studies necessary to verify information which may be submitted at the time of a permit application.

(6) All information gathered by a person giving notice under sub. (1) shall be submitted to the department as soon as it is in final form. The department may at any time after consultation with the person giving notice of intent to apply for a prospecting or mining permit revise or modify its requirements regarding information which must be gathered and submitted.

(7) The department, in granting any application for a permit under s. 144.84 or 144.85, shall require the permitholder to perform adequate monitoring of environmental changes during the course of the permitted activity and for such additional period of time as is necessary to satisfactorily complete reclamation and completely release the permitholder from any bonds required.

(8) The department may monitor environmental changes concurrently with the permitholder under sub. (7), and for such additional period of time after the full bond is released under s. 144.90 (3) as is necessary for the site to return to a state of environmental stability. The department may conduct independent studies to monitor environmental changes.

History: 1977 c. 421.

144.832 Exploration. (1) DEFINITIONS. In this section:

(a) "Driller" means a person who performs core, rotary, percussion or other drilling involved in exploration for metallic minerals.

(b) "Parcel" means an identified section, fractional section or government lot.

(c) "Termination" means filling of drillholes and reclamation and revegetation of drilling sites.

(2) **LICENSE.** All persons intending to engage in exploration, or who contract for the services of drillers for purposes of exploration, shall be licensed by the department. Exploration licenses shall be issued annually by the department, and shall be applied for on forms provided by the department. The department shall provide copies of the application form for an exploration license to the state geologist upon issuance of the license. The department shall, by rule, establish an annual license fee plus a schedule of additional fees based on the number of holes drilled. The level of fees shall reflect the department's actual cost in administering this section. The fees set under this subsection may be adjusted for persons to reflect the payment of fees for the same services to meet other requirements.

(3) **BOND.** (a) Applications for licenses shall be accompanied by a bond in the amount of \$5,000 conditioned on faithful performance of the requirements of the department relating to termination.

(b) The department may require that the amount of the bond be increased at any time, if the department determines that a licensee's current level of activity makes it likely that the bond would be inadequate to fund the termination of all holes drilled for which the licensee is responsible.

(c) The department shall, by rule, establish a procedure for release of exploration sites from bond coverage.

(4) **NOTICE PROCEDURE.** (a) Commencement of drilling on a parcel shall be preceded by notice from the licensee to the department of intent to drill, given at least 10 days in advance of the commencement of drilling, and identifying the particular parcel. The department shall transmit a copy of the notice of intent to drill to the state geologist.

(b) The department shall, by rule, establish notification and inspection procedures applicable to the various stages of drilling and termination and procedures for the proper termination of drillholes.

(5) **LICENSE REVOCATION.** The department may revoke or suspend an exploration license issued under this section if it determines, after hearing, that:

(a) Statutes or rules of the department have not been complied with; or

(b) There has been a failure to increase bond amounts to adequate levels as specified by the department.

(6) **EXEMPTION.** This section does not apply to operators engaged in exploration activities on lands included in a mining and reclamation

plan, if the plan contains provisions relating to termination of the exploration activities.

History: 1977 c. 421

144.834 Reclamation plans. (1) A reclamation plan shall accompany all applications for prospecting or mining permits. If it is physically or economically impracticable or environmentally or socially undesirable for the reclamation process to return the affected area to its original state, the plan shall set forth the reasons therefor and shall discuss alternative conditions and uses to which the affected area can be put.

(2) The plan shall specify how the applicant intends to accomplish, to the fullest extent possible, compliance with the minimum standards under s. 144.83 (2) (c).

History: 1977 c. 421

144.836 Hearings on permit applications. This section, and ch. 227 where it is not inconsistent, shall govern all hearings on applications for prospecting or mining permits.

(1) **SCOPE.** (a) The hearing on the prospecting or mining permit shall cover the application and any statements prepared under s. 1.11 and, to the fullest extent possible, all other applications for approvals, licenses and permits issued by the department. The department shall inform the applicant as to the timely application date for all approvals, licenses and permits issued by the department, so as to facilitate the consideration of all other matters at the hearing on the prospecting or mining permits.

(b) Except as provided in this paragraph, for all department issued approvals, licenses and permits relating to prospecting or mining including solid waste feasibility report approvals and permits related to air and water, to be issued after April 30, 1980, the notice, hearing and comment provisions, if any, and the time for issuance of decisions, shall be controlled by this section and ss. 144.84 and 144.85. If an applicant fails to make application for an approval, license or permit for an activity incidental to prospecting or mining in time for notice under this section to be provided, the notice and comment requirements, if any, shall be controlled by the specific statutory provisions with respect to that application. If notice under those specific statutory notice requirements can be given for consideration of the approval, license or permit at the hearing under this section, the application shall be considered at that hearing; otherwise, the specific statutory hearing provisions, if any, with respect to that application shall control. The substantive requirements for the issuance of any approval, permit or license incidental to prospecting or mining are not affected by the fact that a hearing on the approval, permit or

license is conducted as part of a hearing under this section.

(2) **LOCATION.** The hearing shall be held in the county where the prospecting or mining site, or the largest portion of the prospecting or mining site, is located, but may subsequently be adjourned to other locations.

(3) **TIMING OF NOTICE AND OF HEARING; GIVING OF NOTICE.** (a) If it is determined that a statement under s. 1.11 is not required, the hearing shall be scheduled for a date not less than 60 days nor more than 90 days after the announcement of that determination, and the scheduling and providing of notice shall be completed not later than 10 days following the announcement. Notice of the hearing shall be given by mailing a copy of the notice to any known state agency required to issue a permit for the proposed operation, to the regional planning commission for the affected area, to the county, city, village and town within which any part of the affected area lies, to all persons who have requested this notification and, if applicable, to all persons specified under par. (b) 3. Written comments may be submitted to the department within 30 days of the date of notice.

(b) If it is determined that a statement under s. 1.11 is required, the department shall hold at least one informational meeting regarding the preliminary environmental report within 60 days of its issuance. The meeting shall be held not sooner than 30 days nor later than 60 days after the issuance of the report. The scheduling and providing of notice of the meeting shall be completed not later than 10 days following the issuance of the preliminary environmental report. A hearing referred to under sub. (1) shall be scheduled for a date not less than 120 days nor more than 180 days after the issuance of the environmental impact statement. The scheduling and providing of notice of the hearing shall be completed within 30 days from the date of issuance of the environmental impact statement. The providing of notice shall be accomplished by:

1. Mailing a copy of the notice to all known departments and agencies required to grant any permit necessary for the proposed operation, to any regional planning commission within which the affected area lies, to the governing bodies of all towns, villages, cities and counties within which any part of the proposed prospecting or mining site lies, to the governing bodies of any towns, villages or cities contiguous to any town, village or city within which any part of the proposed prospecting or mining site lies and to any interested persons who have requested such notification.

2. Publication of a class 2 notice, under ch. 985, utilizing a display advertising format, in

the weekly newspaper published in the closest geographic proximity to the proposed prospecting or mining site, in the newspaper having the largest circulation in the county within which the proposed site lies and in those newspapers published in counties contiguous to the county within which the proposed site lies which have a substantial circulation in the area of, or adjacent to, the proposed prospecting or mining site.

3. Mailing a copy of the notice to the U.S. environmental protection agency, U.S. army corps of engineers and other states potentially affected by the proposed discharge if a water discharge permit under ch. 147 is to be considered at the hearing under this section and to the U.S. environmental protection agency and appropriate agencies in other states which may be affected if an air pollution control permit under ss. 144.30 to 144.426 is to be considered at the hearing under this section.

(c) Written comments may be submitted by any governmental agency within 80 days of the date of issuance of the statement under par. (b). Individual persons may submit written comments within 120 days of the date of issuance of the statement. The last day for receipt of comments shall be specified by the department in all notices.

(4) **HEARING PROCEDURE.** (a) At the opening of the hearing, the hearing examiner shall advise all persons present of their right to express their views either orally or in writing, under oath or otherwise, and of the legal effect of each form of testimony. All interested persons, at the hearing or at a time set prior to the hearing, shall be given an opportunity, subject to reasonable limitations on the presentation of repetitious or irrelevant material, to express their views on any aspect of the matters under consideration. The presentation of these views need not be under oath nor subject to cross-examination. A written record of unsworn testimony shall be made.

(b) Persons who wish to participate as parties shall file a written notice with the hearing examiner setting forth their interest at least 30 days prior to the scheduled time of the hearing or prior to the scheduled time of any prehearing conference, whichever is earlier, unless good cause is shown.

(c) The record shall consist of the contested case portion of the proceeding. Views given under par. (a) and all written comments submitted from any source shall be placed in the file of the proceeding and shall be given appropriate probative value by the hearing examiner or decisionmaker.

(d) Hearings conducted under this section may be continued for just cause.

(e) If evidence of conformance with applicable zoning ordinances as required by s. 144.85 (5) (a) is not presented by the time testimony is completed, the department shall close the record and continue the hearing. The duration of the continuance of the hearing shall be specified by the department at the time the continuance begins, after first requesting the applicant to state the anticipated time at which the evidence will be provided. The continuance may be extended by the department prior to its expiration upon notice to all parties if good cause is shown.

(f) Each approval or denial of a license or permit considered at the hearing under this section shall be made in findings of fact, conclusions of law and an order setting forth reasons with clarity and in detail.

History: 1977 c. 421; 1979 c. 221, 355.

144.838 Local impact committee. (1) A county, town, village, city or tribal government likely to be substantially affected by potential or proposed mining may designate an existing committee, or establish a committee, for purposes of:

(a) Facilitating communications between operators and itself.

(b) Analyzing implications of mining.

(c) Reviewing and commenting on reclamation plans.

(d) Developing solutions to mining-induced growth problems.

(e) Recommending priorities for local action.

(f) Formulating recommendations to the investment and local impact fund board regarding distribution of funds under s. 70.395 (2) (g).

(2) A county, town, village, city or tribal government affected in common with another county, town, village, city or tribal government by a proposed or existing mine may cooperatively designate or establish a joint committee, but may also maintain a separate committee under sub. (1). Committees under this section may include representatives of affected units of government, business and industry, manpower, health, protective or service agencies, school districts, or environmental and other interest groups or other interested parties.

(3) Persons giving notice under s. 144.831 (1) shall thereafter appoint a liaison person to any committee established under sub. (1) or (2), and shall provide such reasonable information as is requested by the committee. Operators and persons giving notice under s. 144.831 shall thereafter make reasonable efforts to design and operate mining operations in harmony with community development objectives.

(4) Committees established under sub. (1) or (2) may be funded by their appointing authority, and may, through their appointing authority, submit a request for operating funds to the investment and local impact fund board under s. 70.395. Committees established under sub. (1) shall be eligible for funds only if the county, town, village or city is also a participant in a joint committee, if any, established under sub. (2). The investment and local impact fund board may not grant funds for the use of more than one committee established under sub. (1) in relation to a particular mining proposal unless a joint committee has been established under sub. (2). Committees may hire staff, enter into contracts with private firms or consultants or contract with a regional planning commission or other agency for staff services.

(5) Any county, town, village or city receiving notice of the filing of an application in the manner provided under s. 144.836 (3) (a) or (b) shall refer the application and reclamation plan to a committee established under sub. (1) or (2), if any, for review and comment. Such counties, towns, villages or cities may participate as a party in the hearing on the application and may make recommendations on the reclamation plan and future use of the project site.

History: 1977 c. 421

144.84 Prospecting permits. (1) No person may engage in prospecting without securing a prospecting permit issued under this section. Application for prospecting permits shall be made in writing to the department upon forms prepared and furnished by the department. An application must be made, and a prospecting permit obtained for each separate prospecting site. Applications shall be submitted in reproducible form in such multiples as required by rules of the department. As a part of each application for a prospecting permit, the applicant shall furnish a description of the proposed prospecting site, the number of acres in the proposed prospecting site, a prospecting plan, a reclamation plan meeting the requirements of s. 144.834 and a timetable for reclamation, information relating to whether the area may be unsuitable for prospecting or surface mining, unless the applicant conclusively certifies that he or she will not subsequently make application for a permit to conduct surface mining at the site and such other relevant information as the department may require, including information as to whether the applicant, its parent corporation, any of its principal shareholders, or any of the applicant's subsidiaries or affiliates in which the applicant owns more than a 40% interest, has forfeited any mining bonds in other states within the last 20 years, and the dates and locations, if

any. An application shall be accompanied by such fee as is required by the department by rule which shall cover the estimated cost of evaluating the prospecting permit application. After completing its evaluation, the department shall revise the fee to reflect the actual cost of evaluation. The fee may be revised for persons to reflect the payment of fees for the same services to meet other requirements.

(2) The department shall issue a prospecting permit under this section to an applicant within 60 days following the date of the completion of the hearing record if, on the basis of the application, the department's investigation and hearing and any written comments, it finds that the site is not unsuitable for prospecting or, absent a certification under sub. (1), surface mining, and the reclamation plan complies with ss. 144.83 (2) and 144.834 and rules promulgated under ss. 144.83 (2) and 144.834. The department may modify any part of the application or reclamation plan and approve it as modified. Except as otherwise provided in ss. 144.80 to 144.94, prospecting permits shall be valid for the life of the project, unless canceled under s. 144.83 (6) or 144.91 (1) or (3) or revoked under s. 144.93 (2) or (3).

(3) The department shall deny a prospecting permit within 60 days following the date of the completion of the hearing record if it finds that the site is unsuitable for prospecting or, absent certification under sub. (1), surface mining, or the reclamation plan, including the bond, does not comply with ss. 144.83 (2) and 144.834 and rules promulgated under ss. 144.83 (2) and 144.834 or that the applicant is in violation of ss. 144.80 to 144.94 or any rules adopted under ss. 144.80 to 144.94. If the applicant has previously failed and continues to fail to comply with ss. 144.80 to 144.94, or if the applicant has within the previous 20 years forfeited any bond posted in accordance with prospecting or mining activities in this state, unless by mutual agreement with the state, the department may not issue a prospecting permit. The department may not issue a prospecting permit if it finds that any officer or director of the applicant has, while employed by the applicant, the applicant's parent corporation, any of the applicant's principal shareholders, or any of the applicant's subsidiaries or affiliates, in which the applicant owns more than a 40% interest, within the previous 20 years forfeited any bond posted in accordance with prospecting or mining activities in this state unless by mutual agreement with the state. In this paragraph, "forfeited any bond" means the forfeiture of any performance security occasioned by noncompliance with any prospecting or mining laws or implementing rules. If an application for a prospecting permit is denied,

the department, within 30 days from the date of application denial, shall furnish to the applicant in writing the reasons for the denial.

(4) (a) Eighteen months after the issuance of a prospecting permit, and annually thereafter until prospecting ceases, the department shall review the permit, reclamation plan and bond to ascertain adequacy, compliance with state or federal laws enacted after the issuance of the permit and technological currency. If the department after review determines that the plan should be modified or the bond amount changed, it shall notify the permit holder of the necessary modifications or changes. If the permit holder does not request a hearing within 30 days, the modifications or changes shall be deemed accepted.

(b) If the permit holder desires to modify the permit, an amended application shall be submitted to the department, which shall process the amendment as if it were an original application if the proposed modification substantially broadens or changes the scope of the original prospecting proposal.

(c) To the extent that testimony and evidence submitted at the original prospecting permit proceedings or from previous modification hearings is relevant to the issues of modification or granting or denial of the amendment, it may be adopted in the subsequent proceedings, subject to the opportunity for cross-examination and rebuttal, if not unduly repetitious.

(5) If the department determines that a statement under s. 1.11 is required for consideration of an application for a prospecting permit, the statement need not consider impacts unrelated to the proposed prospecting activity, other than the issue of unsuitability for surface mining, absent a certification under sub. (1).

History: 1973 c. 318; 1977 c. 421

144.85 Mining permits. (1) (a) No operator may engage in mining or reclamation at any mining site that is not covered by a mining permit and by written authorization to mine under s. 144.86 (3). Applications for mining permits shall be made in writing and in reproducible form to the department upon forms prepared and furnished by it and in such multiples as required by rule of the department. An application shall be made, and a mining permit obtained for each separate mining site. No application for surface mining at a site may be entertained by the department if within the previous 5 years the applicant, or a different person who had received a prospecting permit for the site had certified under s. 144.84 (1) that he or she would not subsequently make application for a permit to conduct surface mining at the site.

144.85 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2946

(b) If a person commences mining at a mining site which includes an abandoned site, plans for reclamation of the abandoned site, or the portion of the abandoned site which is included in the mining site, shall be included in its mining plan and reclamation plan.

(2) (a) The application shall be accompanied by a fee established by the department, by rule, which shall cover the estimated cost of evaluating the mining permit application. After completing its evaluation, the department shall revise the fee to reflect the actual cost of evaluation. The fee may be revised for persons to reflect the payment of fees for the same services to meet other requirements.

(b) Except as otherwise provided in ss. 144.87 to 144.91, mining permits shall be valid for the life of the project unless canceled under s. 144.83 (6) or 144.91 (1) or (3) or revoked under s. 144.93 (2) or (3).

(3) As a part of each application for a mining permit, the applicant shall furnish:

(a) A mining plan, including a description and a detailed map of the proposed mining site drawn to a scale approved by the department. Aerial photographs may be accepted if the photographs show the details to the satisfaction of the department. The map, plan or photograph shall be prepared and certified by a competent engineer, surveyor or other person approved by the department, and shall show the boundaries of the area of land which will be affected, the drainage area above and below the area, the location and names of all streams, roads, railroads, pipelines and utility lines on or within 1,000 feet of the site, the name of the owner or owners of the site and the nearest city or village if within 3 miles of the site. The map or photograph shall be accompanied by descriptive data as required by the department, including but not limited to the soil conservation service soil capabilities classifications of the affected area, the anticipated geometry of the excavation, the estimated total production of tailings produced, the nature and depth of the overburden, the elevation of the water table and such other information about the geology of the deposit as the department, after consultation with the geological and natural history survey, finds is necessary to evaluate the applicant's mining plan and reclamation plan.

(b) In addition to the information and maps otherwise required by this subsection, a detailed reclamation plan showing the manner, location and time for reclamation, including ongoing reclamation during mining, of the proposed mining site. The reclamation plan shall be accompanied by a map subject to the requirements in par. (a) which shall show the specific reclamation proposal for each area of the site.

The reclamation plan shall conform to any applicable comprehensive plan created under sub.

(4) (b), and to any applicable minimum standard created under ss. 144.83 (2) and 144.834.

(c) The name and address of each owner of land within the mining site and each person known by the applicant to hold any option or lease on land within the mining site and all prospecting and mining permits in this state held by the applicant.

(d) Evidence satisfactory to the department that the applicant has applied for necessary approvals and permits under all applicable zoning ordinances and that the operator has applied for the necessary approval, licenses or permits required by the department including, but not limited to, those under chs. 30, 31, 107, 147 and 162 and this chapter.

(e) Information as to whether the applicant, its parent, any of its principal shareholders, or any of its subsidiaries or affiliates in which it owns more than a 40% interest, has forfeited any mining bonds in other states within the past 20 years, and the dates and locations, if any.

(f) Information relating to whether unsuitability may exist for surface mining to the extent not fully considered under s. 144.84.

(g) Such other pertinent information as the department requires.

(4) (a) The department shall require an applicant for a mining permit, amended mining permit or change in either the mining or reclamation plan to furnish, as part of the mining permit application, an itemized statement showing the applicant's estimation of the cost to the state of reclamation. The department may, at the applicant's expense, contract with an independent person to estimate the cost to the state of reclamation if it has reason to believe that the applicant's estimated cost of reclamation may not be accurate.

(b) If the department finds that the anticipated life and total area of a mineral deposit are of sufficient magnitude that reclamation of the mining site consistent with ss. 144.80 to 144.94 requires a comprehensive plan for the entire affected area, it shall require an operator to submit with the application for a mining permit, amended mining site or change in mining or reclamation plan, a comprehensive long-term plan showing, in detail satisfactory to the department, the manner, location and time for reclamation of the entire area of contiguous land which will be affected by mining and which is owned, leased or under option for purchase or lease by the operator at the time of application. Where a mineral deposit lies on or under the lands of more than one operator, the department shall require the operators to submit mutually consistent comprehensive plans.

(c) The department shall require an applicant to describe any land contiguous to the proposed mining site which he or she owns, leases or has an option to purchase or lease.

(5) (a) 1. Within 90 days of the completion of the public hearing record, the department shall issue the mining permit if it finds:

a. The mining plan and reclamation plan are reasonably certain to result in reclamation of the mining site consistent with ss. 144.80 to 144.94 and any rules adopted under ss. 144.80 to 144.94.

b. The proposed operation will comply with all applicable air, ground and surface water and solid and toxic waste disposal laws and rules of the department.

c. In the case of a surface mine, the site is not unsuitable for mining. The preliminary determination that a site was not unsuitable for mining under s. 144.84 may not be conclusive in the determination of the site's suitability for mining under this section. However, at the hearing held under this section and s. 144.836, testimony and evidence submitted at the prospecting permit proceeding relevant to the issue of suitability of the proposed mining site for surface mining may be adopted, subject to the opportunity for cross-examination and rebuttal, if not unduly repetitious.

d. The proposed mine will not endanger public health, safety or welfare.

e. The proposed mine will not result in a net substantial adverse economic impact in the area reasonably expected to be most impacted by the activity.

f. The proposed mining operation conforms with all applicable zoning ordinances.

2. Each approval or denial shall be made in findings of fact, conclusions of law and an order setting forth reasons with clarity and in detail. The department may modify the operator's proposed mining or reclamation plans in order to meet the requirements of ss. 144.80 to 144.94, and, as modified, grant its approval.

(b) The department shall deny a mining permit within 90 days following the date of the completion of the hearing record if it finds that the site is unsuitable for surface mining, where the application pertains to a proposed surface mine, or that the applicant is in violation of ss. 144.80 to 144.94 or any rules adopted under ss. 144.80 to 144.94. If the applicant has previously failed and continues to fail to comply with ss. 144.80 to 144.94, or if the applicant has within the previous 20 years forfeited any bond posted in accordance with mining activities in this state, unless by mutual agreement with the state, the department may not issue a mining permit. The department may not issue a mining permit if it

finds that any officer or director of the applicant, while employed by the applicant, the applicant's parent corporation, any of the applicant's principal shareholders or any of the applicant's subsidiaries or affiliates in which the applicant owns more than a 40% interest, has within the previous 20 years forfeited any bond posted in accordance with mining activities in this state, unless by mutual agreement with the state. In this paragraph, "forfeited any bond" means the forfeiture of any performance security, occasioned by noncompliance with any prospecting or mining laws or implementing rules.

(c) To the extent that an environmental impact statement on a prospecting permit application under s. 144.84, if prepared, fully considered unsuitability of the prospecting site for surface mining by virtue of unique features of the land as enumerated in s. 144.81 (18), that portion of the previous impact statement may be adopted in the impact statement on the mining permit application.

(d) The prior issuance of a prospecting permit under s. 144.84 for all or part of a site shall, in and of itself, be given no weight in the decision to grant or deny a mining permit under this section, and the department must find, in any order granting, or granting with conditions, a mining permit that no weight was given in the decision to the prior issuance of a prospecting permit. However, to the extent that testimony and evidence submitted at the prospecting permit proceedings is relevant to the issue of whether to grant or deny a mining permit, the testimony and evidence may be adopted in the mining permit proceedings, subject to the opportunity for cross-examination and rebuttal to the extent that the testimony and evidence are not unduly repetitious.

(e) The department shall send its statement, together with a copy of its rules and finding as to whether the applicant has otherwise satisfied the requirements of ss. 144.80 to 144.94, to the applicant and to the other parties.

History: 1973 c. 318; 1977 c. 377 s. 29m; 1977 c. 421.

144.86 Bonds. (1) Upon notification that an application for a prospecting or mining permit has been approved by the department but prior to commencing prospecting or mining, the operator shall file with the department a bond conditioned on faithful performance of all of the requirements of ss. 144.80 to 144.94 and all rules adopted by the department under ss. 144.80 to 144.94. The bond shall be furnished by a surety company licensed to do business in this state. In lieu of a bond, the operator may deposit cash, certificates of deposit or government securities with the department. Interest

144.86 WATER, SEWAGE, REFUSE, MINING AND AIR POLLUTION

2948

received on certificates of deposit and government securities shall be paid to the operator. The amount of the bond or other security required shall be equal to the estimated cost to the state of fulfilling the reclamation plan, in relation to that portion of the site that will be disturbed by the end of the following year. The estimated cost of reclamation of each prospecting or mining site shall be determined by the department on the basis of relevant factors including, but not limited to, expected changes in the price index, topography of the site, methods being employed, depth and composition of overburden and depth of mineral deposit being mined.

(2) The applicant shall submit a certificate of insurance certifying that the applicant has in force a liability insurance policy issued by an insurer authorized to do business in this state, or in lieu of a certificate of insurance evidence that the applicant has satisfied state or federal self-insurance requirements, covering all mining operations of the applicant in this state and affording personal injury and property damage protection in a total amount deemed adequate by the department but not less than \$50,000.

(3) Upon approval of the operator's bond, mining application and certificate of insurance, the department shall issue written authorization to commence mining at the permitted mining site in accordance with the approved mining and reclamation plans.

(4) Any operator who obtains mining permits from the department for 2 or more mining sites may elect, at the time the 2nd or any subsequent site is approved, to post a single bond in lieu of separate bonds on each site. Any single bond so posted shall be in an amount equal to the estimated cost to the state determined under sub. (1) of reclaiming all sites the operator has under mining permits. When an operator elects to post a single bond in lieu of separate bonds previously posted on individual sites, the separate bonds may not be released until the new bond has been accepted by the department.

(6) Any person who is engaged in mining on July 3, 1974 need not file a bond or deposit cash, certificates of deposits or government securities with the department under this section to obtain the written authorization to commence mining under sub. (3).

History: 1973 c. 318; 1977 c. 421; 1979 c. 102 s. 236 (3); 1979 c. 176.

144.87 Modifications. (1) An operator at any time may apply for amendment or cancellation of a mining permit or for a change in the mining or reclamation plans for any mining operation which the operator owns or leases.

The application for the amendment, cancellation or change shall be submitted by the operator on a form provided by the department and shall identify the tract of land to be added to or removed from the permitted mining site or to be affected by a change in the mining or reclamation plans. The application for an increase or decrease in the area of a mining site, or for a change in the mining or reclamation plans shall be processed in the same manner as an original application for a mining permit. If 5 or more interested persons do not request a hearing in writing within 30 days of notice under s. 144.836 (3), which notice shall include a statement to this effect, no hearing need be held on the modification. If a hearing is held, testimony and exhibits from the hearing on either the original applications for a mining permit or from previous modification hearings which are relevant to the instant modification may be adopted, subject to cross-examination and rebuttal if not unduly repetitious. If the application is to cancel any or all of the unmined part of a mining site, the department shall ascertain, by inspection, that no mining has occurred on the land. After so finding, the department shall order release of the bond or the security posted on the land being removed from the permitted mining site and cancel or amend the operator's written authorization to conduct mining on the mining site. No land where mining has occurred may be removed from a permitted mining site or released from bond or security under this subsection, unless reclamation has been completed to the satisfaction of the department.

(2) When one operator succeeds to the interest of another in an uncompleted mining operation by sale, assignment, lease or otherwise, the department shall release the first operator from the duties imposed upon the first operator by ss. 144.80 to 144.94 as to such operation if:

(a) Both operators have complied with the requirements of ss. 144.80 to 144.94; and

(b) The successor operator discloses whether it has forfeited any bond, as defined under s. 144.85 (3) and (5) (b), within the previous 20 years, posts any bond required under s. 144.86 and assumes all responsibilities of all applicable permits, licenses and approvals granted to the predecessor operator.

(3) If the department finds that because of changing conditions, including but not limited to changes in reclamation costs, reclamation technology, minimum standards under s. 144.83 or governmental land use plans, the reclamation plan for a mining site is no longer sufficient to reasonably provide for reclamation of the project site consistent with ss. 144.80 to 144.94 and any rules adopted under ss. 144.80 to 144.94, it shall require the applicant to submit

amended mining and reclamation plans which shall be processed in the same manner as an application for an original mining permit. The applicant shall be deemed to hold a temporary mining permit which shall be effective until the amended mining permit is issued or denied. The department shall review the mining and reclamation plans annually after the date of the mining permit issuance or previous review under this section.

History: 1973 c. 314; 1977 c. 421.

144.875 Cessation of mining or reclamation. If there is a cessation of mining or reclamation which is not set forth in either the mining plan or the reclamation plan, the operator shall so notify the department within 48 hours and shall commence stabilization of the mining site according to rules established by the department. If the department determines after hearing that stabilization of the mining site is inadequate to protect the environment, the department shall order the operator to commence additional measures to protect the environment, including, if the cessation is reasonably anticipated to extend for a protracted period of time, reclamation according to the reclamation plan or part of the reclamation plan. Usual and regular shutdown of operations on weekends, for maintenance or repair of equipment or facilities or for other customary reasons shall not constitute a cessation of mining.

History: 1977 c. 421.

144.88 Exploring, prospecting and mining without authorization. Any person who engages in exploration without a license shall forfeit not less than \$100 nor more than \$1,000 for each parcel as defined under s. 144.832 (1) (c) on which unlicensed exploration took place. Any person who authorizes or engages in prospecting without a prospecting permit or any operator who authorizes or engages in mining without a mining permit and written authorization to mine under s. 144.86 (3) shall forfeit all profits obtained from such illegal activities and not more than \$10,000 for each day during which the mine was in operation. The operator shall be liable to the department for the full cost of reclaiming the affected area of land and any damages caused by the mining operation. Each day's violation of this section shall be deemed a separate offense. If the violator is a corporation, partnership or association, any officer, director or partner who knowingly authorizes, supervises or contracts for exploration, prospecting or mining shall also be subject to the penalties of this section.

History: 1973 c. 318; 1977 c. 421.

144.89 Reports. (1) The operator shall furnish the department with a report for each mining site every 12 months after issuance of the permit, within 30 days after completion of all mining at the mining site and within 30 days after completion of the mining plan and of the reclamation plan. The reports shall include, in addition to such other information as the department requires, such information and maps as the department deems necessary to evaluate the extent of mining and the reclamation accomplished during the previous calendar year.

(1m) Annually, the department shall review the mining and reclamation plans and bonds, using the procedure specified under s. 144.84 (4).

(2) The department shall cancel the mining permit held by any operator who fails and refuses to submit reports required under this section.

History: 1973 c. 318; 1977 c. 421.

144.90 Certificate of completion, partial completion and bond release. (1) Upon the petition of the operator, but not less than 4 years after notification to the department by the operator of the completion of the reclamation plan, if the department finds after conducting a hearing that the operator has completed reclamation for any portion of the mining site in accordance with the reclamation plan and ss. 144.80 to 144.94, the department shall issue a certificate of completion setting forth a description of the area reclaimed and a statement that the operator has fulfilled its duties under the reclamation plan as to that area.

(2) Upon the issuance of any certificate of completion under sub. (1) for any portion of the mining site, but not for the entire mining site, the department shall allow the operator to reduce the amount of the bond to an amount which shall equal the estimated cost of reclamation of the portion of the mining site which is disturbed or for which reclamation has been completed but no certificate of completion has been issued.

(3) Upon issuance of a certificate or certificates of completion of reclamation for the entire mining site, the department shall require that the operator maintain a bond equal to at least 10% of the cost to the state of reclamation of the entire mining site if mining of the site was wholly underground, and at least 20% of the cost to the state of reclamation of the entire mining site if any surface mining was conducted. Where the mining site in the mining plan is less than 10 acres, the department may release the bond after issuance of the certificate under sub. (1).

(4) After 20 years after the issuance of a certificate or certificates of completion for the entire mining site, the department shall release the bond if the department finds that the reclamation plan has been complied with.

(5) The department shall, by rule, establish a procedure for release of reclamation bonds for prospecting sites similar to subs. (1) to (4), but with shorter time periods.

History: 1973 c. 318; 1977 c. 421.

144.91 Mining and reclamation; orders.

(1) Whenever the department finds a violation of law at a mining site under a mining permit including unapproved deviation from the mining or reclamation plan, or any of the department's rules, it shall order the operator to comply within a specified time. Any such order shall become effective unless the person named in the order requests in writing within 10 days after the date the order is served a hearing before the department. Upon such request and after due notice, the department shall hold a hearing. In lieu of an order, the department may require that the alleged violator appear before the department for a hearing and answer the charges complained of, or the department may request that the department of justice initiate action under s. 144.93. The department shall cancel the mining permit for a mining site held by an operator who fails to comply with the order. The department shall within 14 days inform the department of justice of the cancellation. Within 30 days thereafter the department of justice shall commence an action under s. 144.93.

(2) If reclamation of a mining site is not proceeding in accordance with the reclamation plan and the operator has not commenced to rectify deficiencies within the time specified in the order, or if the reclamation is not properly completed in conformance with the reclamation plan within one year after completion or abandonment of mining on any segment of the mining site, or if the exploration license or prospecting or mining permit is revoked under s. 144.93 (2) and (3), excepting acts of God, such as adverse weather affecting grading, planting and growing conditions, the department, with the staff, equipment and material under its control, or by contract with others, shall take such actions as are necessary for the reclamation of mined areas. The operator shall be liable for the cost to the state of reclamation conducted under this section. Any operator who is exempted from filing a bond or depositing cash, certificates of deposits or government securities by s. 144.86 (6) shall not be liable for an amount greater than an amount specified by the department. The specified amount shall be equal to

and determined in the same manner as the amount of the bond or other security otherwise required under s. 144.86 (1), assuming the operator had not been exempt from such filing or depositing.

(3) All other prospecting and mining permits held by an operator who refuses to reclaim a mining site in compliance with the reclamation plan after the completion of mining or after the cancellation of a mining permit shall be canceled. The department may not issue any prospecting or mining permits for that site or any other site in this state to an operator who refused to reclaim a mining site in compliance with the reclamation plan.

(4) (a) The department may issue a stop order to an operator, requiring an immediate cessation of mining, in whole or in part, at any time that the department determines that the continuance of mining constitutes an immediate and substantial threat to public health and safety or the environment.

(b) The department shall schedule a hearing on the stop order, to be held within 5 days of issuance of the order, and shall incorporate notice of the hearing in the copy of the order served upon the operator. Notice shall also be given to any other persons who have previously requested notice of such proceedings.

(c) Within 72 hours after commencement of the hearing, unless waived by agreement of the parties, the department shall issue a decision affirming, modifying or setting aside the stop order. The department may apply to the circuit court for an order extending the time, for not more than 10 days, within which the stop order must be affirmed, modified or set aside.

(d) The department shall set aside the stop order at any time, with adequate notice to the parties, upon a showing by the operator that the conditions upon which the order was based no longer exist.

History: 1973 c. 318; 1977 c. 421.

144.92 Nonconforming sites. (1) All prospectors and operators conducting mining operations in this state on July 3, 1974 shall submit to the department, within 90 days after that date, applications for prospecting permits or mining permits as provided in ss. 144.84 and 144.85. Sections 144.83 (1) (b) and 144.85 (5) (b) shall not apply to such operators.

(2) Modification of existing prospecting and mining sites and of operating procedures to conform with ss. 144.80 to 144.94 and rules adopted under ss. 144.80 to 144.94 shall be accomplished as promptly as possible, but the department shall give special consideration to a site where it finds that the degree of necessary

improvement is of such extent and expense that compliance cannot be accomplished.

History: 1973 c. 318; 1977 c. 421.

144.925 Prospecting data. (1) DEFINITIONS. In this section:

(a) "Economic information" means financial and economic projections for any potential mining of an ore body including estimates of capital costs, predicted expenses, price forecasts and metallurgical recovery estimates.

(b) "Geologic information" means information concerning descriptions of an ore body, descriptions of reserves, tonnages and grades of ore, descriptions of a drill core or bulk sample including analysis, descriptions of drill hole depths, distances and similar information related to the ore body.

(c) "Prospecting data" means data, records and other information furnished to or obtained by the department or held by the applicant or operator in connection with the application for a prospecting permit.

(2) **PROSPECTING DATA IN GENERAL.** Except as provided under sub. (3), prospecting data are public records subject to s. 19.21.

(3) **CONFIDENTIAL PROSPECTING DATA.** (a) *Request for confidential status.* An applicant for a prospecting permit may request confidential status for any prospecting data.

(b) *Confidential status.* The department shall grant confidential status to prospecting data if the applicant makes a request and if the prospecting data relates to economic information or geologic information or is entitled to confidential status under rules promulgated by the department.

History: 1973 c. 318; 1979 c. 221.

144.93 Enforcement. (1) All orders issued, fines incurred, bond liabilities incurred or other violations committed under ss. 144.80 to 144.94 shall be enforced by the department of justice. The circuit court of Dane county or any other county where the violation occurred shall have jurisdiction to enforce ss. 144.80 to 144.93 or any orders issued or rules adopted thereunder, by injunctive or other appropriate relief.

(2) Any person who makes or causes to be made in an application or report required by ss. 144.80 to 144.94 a statement known to the person to be false or misleading in any material respect or who refuses to file an annual report under s. 144.89 (1) or who refuses to submit information required by the prospecting or mining permit may be fined not less than \$1,000 nor more than \$5,000. If the false or misleading statement is material to the issuance of the permit, the permit may be revoked. If any

violation under this subsection is repeated the permit may be revoked.

(3) Any person holding a prospecting or mining permit who violates ss. 144.80 to 144.93 or any order issued or rule adopted under ss. 144.80 to 144.93 shall forfeit not less than \$10 nor more than \$10,000 for each violation. Each day of violation is a separate offense. If the violations continue after an order to cease has been issued, the permit shall be revoked.

History: 1973 c. 318; 1977 c. 421.

144.935 Citizen suits. (1) Except as provided in sub. (2), any citizen may commence a civil action on his or her own behalf:

(a) Against any person who is alleged to be in violation of ss. 144.80 to 144.94.

(b) Against the department where there is alleged to be a failure of the department to perform any act or duty under ss. 144.80 to 144.94 which is not discretionary with the department.

(2) No action may be commenced:

(a) Under sub. (1) (a):

1. Prior to 30 days after the plaintiff has given notice of the alleged violation to the department and to the alleged violator; or

2. If the department has commenced and is diligently prosecuting a civil or criminal action, but in any such action any citizen may intervene as a matter of right.

(b) Under sub. (1) (b) prior to 30 days after the plaintiff has given notice of such action to the department.

(3) The court, in issuing any final order in any action brought under this section, shall award costs of litigation including reasonable attorney and expert witness fees to the plaintiff if he or she prevails, and the court may do so if it determines that the outcome of the controversy is consistent with the relief sought by the plaintiff irrespective of the formal disposition of the civil action. In addition, the court shall award treble damages to any plaintiff proving damages caused by a person mining without a permit or wilfully violating ss. 144.80 to 144.94 or any permits or orders issued under ss. 144.80 to 144.94.

(4) Nothing in this section restricts any right which any person or class of persons may have under any other statute or common law.

History: 1977 c. 421.

144.937 Effect of other statutes. If there is a standard under other state or federal statutes or rules which specifically regulates in whole an activity also regulated under ss. 144.80 to 144.94 the other state or federal statutes or rules shall be the controlling standard. If the other state or federal statute or rule only specifically

regulates the activity in part, it shall only be controlling as to that part.

History: 1977 c. 421.

144.94 Review. Any person aggrieved by any decision of the department under ss. 144.80 to 144.937 may obtain its review under ch. 227.

History: 1973 c. 318; 1977 c. 421.

SUBCHAPTER VI

GENERAL PROVISIONS, ENFORCEMENT AND PENALTIES

144.95 Citizens environmental council.

(1) The citizens environmental council, as created under s. 15.107 (5), shall employ under the classified service an executive director and such clerical staff as is necessary to perform its duties.

(2) The overall objectives of the council shall be to facilitate effective public awareness of environmental activities. To this end the council shall educate and advise the general public and citizens groups on environmental activities.

History: 1975 c. 224; 1977 c. 29; 1977 c. 377 s. 22; 1979 c. 221 s. 636.

144.952 Financial interest prohibited. The secretary and any other person in a position of administrative responsibility in the department may not have a financial interest in any enterprise which might profit by weak or preferential administration or enforcement of the powers and duties of the department.

History: 1979 c. 221 s. 621.

144.96 Reports on substances used; environmental fee.

(1) The department shall require by rule that all persons, except municipalities, discharging industrial wastes, hazardous substances or air contaminants in this state report the manner used, amount used and amount discharged for each such waste, substance or contaminant. The required report shall include industrial wastes and hazardous substances discharged into any sewerage system operated by a municipality. The department may verify reports received by field monitoring of industrial waste and other waste outfalls and air contaminant sources.

(2) (a) The department by rule shall prescribe method of analysis and form of the reports required by this section and shall establish parameters for the pollutants on which reports are required by this section. The pollutants for which parameters are to be established shall include, but are not limited to:

1. Hazardous substances;
2. Air contaminants; and

3. Elemental discharges such as mercury or cadmium which may be toxic or hazardous when released to the environment.

(b) The department may, by rule, establish minimum reporting levels for pollutants and minimum effluent volumes for which reports are required under this section.

(3) (a) In order to provide for adequate departmental planning, standards development, permit administration, surveillance, investigation, monitoring, enforcement and related activities, there is established an annual operating plant discharge environmental fee to be paid by each person required to report under sub. (1). Such fee shall be based on an administrative fee of \$100 plus an additional operating plant discharge fee, to be set by the department by rule and to be based on the concentration or quantity or both of pollutants discharged at that plant in relation to the parameters established under sub. (2) (a).

(b) In establishing an annual discharge fee schedule, the department shall distinguish between substances discharged directly to surface waters and those discharged into land disposal systems or publicly owned treatment works based on their relative impacts on the quality of ground and surface waters.

(c) The annual fee shall be designed to generate revenues equal to 30% of the state cost of departmental activities for the administration of air pollution control under this section and ss. 144.30 to 144.42 and water resources under this section and ss. 144.025, 144.03 and 144.04 and ch. 147, except that the costs of departmental inland lake renewal activities under ch. 33, water supply activities under ss. 144.025 (2) (L) and (r) and 144.04, high capacity well activities under s. 144.025 (2) (e) and solid waste activities under ss. 144.44 and 144.445 shall not be included in determining such costs.

(d) The annual operating plant discharge environmental fee under this section shall be paid for each plant at which pollutants are discharged. In any one year the amount of annual operating plant discharge environmental fee shall be reduced for a plant which is a stationary source and which has paid fees under s. 144.399 by the amount of those fees.

(e) In this subsection, "state cost" means the actual expenditure under s. 20.370 (2) (ma) for the fiscal year immediately preceding the fiscal year of assessment.

(4) Violators of the reporting requirements established under sub. (1) shall forfeit not less than \$200 nor more than \$10,000 or an amount double the applicable environmental fee under sub. (3), whichever is greater, for each offense.

(5) The department may hold hearings relating to any aspect of the administration of the system established under this section, including, but not limited to, the assessment of environmental fees against specific plants and, in connection therewith, may compel the attendance of witnesses and the production of evidence.

History: 1971 c. 125; 1973 c. 90; 1977 c. 29, 203, 377; 1979 c. 34 ss. 985n, 2102 (39) (a); 1979 c. 221 ss. 634, 2202 (39).

144.97 Review of orders. Any owner or other person in interest may secure a review of the necessity for and reasonableness of any order of the department of natural resources in the following manner:

(1) They shall first file with the department a verified petition setting forth specifically the modification or change desired in such order. Such petition must be filed within 60 days of the issuance of the orders sought to be reviewed. Upon receipt of such a petition the department shall order a public hearing thereon and make such further investigations as it shall deem advisable. Pending such review and hearing, the department may suspend such orders under terms and conditions to be fixed by the department on application of any such petitioner. The department shall affirm, repeal or change the order in question within 60 days after the close of the hearing on the petition.

(2) The determination of the department shall be subject to review as provided in ch. 227.

History: 1979 c. 34 s. 987g.

144.975 Hearings; procedure, review. The department shall hold a public hearing relating to alleged or potential environmental pollution upon the verified complaint of 6 or more citizens filed with the department. The complaint shall state the name and address of a person within the state authorized to receive service of answer and other papers in behalf of complainants. The department may order the complainants to file security for costs in a sum deemed to be adequate but not to exceed \$100 within 20 days after the service upon them of a copy of such order and all proceedings on the part of such complainants shall be stayed until security is filed. The department shall serve a copy of the complaint and notice of the hearing upon the alleged or potential polluter either personally or by registered mail directed to the last-known post-office address at least 20 days prior to the time set for the hearing which shall be held not later than 90 days from the filing of the complaint. The respondent shall file a verified answer to the complaint with the department

and serve a copy on the person so designated by the complainants not later than 5 days prior to the date set for the hearing, unless the time for answering is extended by the department for cause shown. For purposes of any hearing under this chapter, the secretary may issue subpoenas and administer oaths. Within 90 days after the closing of the hearing, the department shall make and file its findings of fact, conclusions of law and order, which shall be subject to review under ch. 227. If the department determines that any complaint has been filed maliciously or in bad faith it shall so find, and the person complained against shall be entitled to recover expenses on the hearing in a civil action. Any situation, project or activity which upon continuance or implementation would cause, beyond reasonable doubt, a degree of pollution that normally would require clean-up action if it already existed, shall be considered potential environmental pollution.

History: 1979 c. 176; 1979 c. 221 s. 633.

144.98 Enforcement; duty of department of justice; expenses. The attorney general shall enforce this chapter and all rules, orders, licenses, plan approvals and permits of the department. The circuit court of Dane county or any other county where a violation has occurred in whole or in part has jurisdiction to enforce this chapter or the rule, order, license, plan approval or permit by injunctive and other relief appropriate for enforcement. For purposes of this proceeding where this chapter or the rule, order, license, plan approval or permit prohibits in whole or in part any pollution, a violation is deemed a public nuisance. The expenses incurred by the department of justice in assisting with the administration of this chapter shall be charged to the appropriation made by s. 20.370 (2) (ma).

History: 1975 c. 39 s. 734; 1979 c. 34 s. 985g; 1979 c. 221.

The provision that the violation of an order prohibiting pollution constitutes a public nuisance does not mean that there is no nuisance until an order is issued. *State v. Dairyland Power Coop.* 52 W (2d) 45, 187 NW (2d) 878.

144.99 Penalties. Any person who violates this chapter, except ss. 144.30 to 144.426 and 144.96 (1), or any rule promulgated or any plan approval, license or special order issued under this chapter, except under those sections, shall forfeit not less than \$10 nor more than \$5,000, for each violation. Each day of continued violation is a separate offense. While the order is suspended, stayed or enjoined, this penalty shall not accrue.

History: 1979 c. 34 s. 987m; 1979 c. 221.
