

[December 13, 2006]

I just want to voice my concern regarding the ATV trails in the National Forests. I respect that ATV use is a pleasure for some. But as a mountain biker and hiker, I fear that the future will hold less and less trails that are not obtrusive, destroyed results of human impact. This affects more than just my ability to have a quiet hike in the woods, but could result in losing some of the sacred places left in our forested areas.

I am urging the committee to not allow any more trails to be included on the ATV routes. Thank you for your consideration.

Sincerely,  
Tanya Sue Kramer
