and to create 20.155 (3) (g) and 256.35 (3f) of the statutes; relating to: state

911 telecommunications services and making an appropriation.

Analysis by the Legislative Reference Bureau

This bill is explained in the Notes provided by the Joint Legislative Council in the bill.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

JOINT LEGISLATIVE COUNCIL PREFATORY NOTE: This bill was prepared for the Joint Legislative Council's Special Committee on 911 Communications.

This bill requires the public service commission (PSC) to contract with a network of 911 telecommunications service providers to perform selective routing services, manage updates to automatic location information databases, manage master street address guides statewide, and perform other functions related to state 911 telecommunications services. The bill also requires communications providers to provide price schedules for 911 telecommunications services to the PSC, requires the PSC to review the price schedules to determine whether they are commercially reasonable, and requires the PSC to reimburse the commercially reasonable costs the providers incur. These costs include those associated with both wireless and landline 911 telecommunications service.

BILL

The requirements described above are intended to replace requirements under current law for counties to contract with telecommunications utilities for 911 telecommunications services. Those requirements under current law are repealed by 2013 Assembly Bill (LRB-0921/1). This bill includes transitional provisions for telecommunications utilities to continue to perform the contracts until the requirements described above are implemented. In addition, the bill includes requirements for the PSC to reimburse telecommunications utilities for services provided during the transition.

This bill also creates a staff position at the PSC to perform these functions and allows the PSC to pay its administrative expenses from the state 911 fee, not to exceed 1% of the revenue from that fee that is disbursed under contracts with 911 telecommunications service providers and paid to communications providers for 911 telecommunications service.

Section 1. 20.155 (3) (g) of the statutes is created to read:

20.155 (3) (g) Statewide 911 telecommunications. From the moneys received under s. 256.35 (3) (dm), a sum sufficient for contracts required under s. 256.35 (3f) (b), reimbursements required under s. 256.35 (3f) (c) and 2013 Wisconsin (this act), section 5 (2) (c) and (d), and administration of the contracts and reimbursements, except that no more than 1 percent of the moneys appropriated under this paragraph for the contracts and reimbursements may be used for administration of the contracts and reimbursements.

SECTION 2. 256.35 (3) (a) 2. of the statutes is renumbered 256.35 (3f) (a) and amended to read:

256.35 (3f) (a) "Costs" In this subsection, "costs" means the costs incurred by a service—supplier communications provider or 911 service provider after August 1, 1987 the effective date of this paragraph [LRB inserts date], in installing and maintaining the trunking and central office equipment used only to operate a basic or sophisticated system and the database databases used only to operate a sophisticated system; the costs incurred for the provision of 911 telecommunications service between selective routers and public safety answering points; and all other costs associated with providing 911 telecommunications service.
