Blue Ribbon Commission on School Funding

FROM: Russ Kava, Fiscal Analyst

SUBJECT: General Aid, Tax Levy and Levy Credit Data for School Districts -- Memorandum #9

This memorandum provides information on the general school aid, property tax levy, and school levy tax credit payments for school districts.

The attachments show the 2015-16 pupil membership, equalized value per member, and shared costs per member for each district, which were used to calculate 2016-17 general school aids. Also shown are the 2016-17 general school aid payment and gross property tax levy for each district, and the estimated 2016-17 school levy tax credit apportioned by district. These amounts are shown on both a total and per pupil basis. Attachment 1 presents the districts in alphabetical order, while Attachment 2 presents them in rank order from low to high by adjusted value per member.

The equalized values per member shown for K-8 and union high school districts are adjusted to account for the proportion of grade levels offered by these districts. Because of its unique characteristics, the Norris School District has been excluded from these attachments.

Under revenue limits, the amount of revenue a school district can raise from general school aids and property taxes is restricted. Almost all general school aid funding is distributed through the equalization aid formula. A major objective of the formula is tax base equalization. The formula operates under the principle of equal tax rate for equal per pupil expenditures. Districts with lower per pupil property values receive a larger share of their costs, and a larger amount of aid per pupil, through the formula than districts with higher per pupil property values, which receive smaller amounts of aid per pupil. As a result, under revenue limits, districts with lower per pupil property values would tend to have a lower gross levy per pupil, while districts with higher per pupil property values would tend to have a higher gross levy per pupil.

The school levy tax credit provides a generally proportionate levy reduction for all districts and produces a similar reduction in tax rates. Because districts with relatively higher per pupil property values tend to receive relatively less equalization aid, more of the cost of operating these

districts is funded from property tax levies. Because the school levy tax credit is allocated based on each district's school levy in proportion to statewide levies, these districts receive relatively more school levy tax credit funding per pupil than districts that have more of their costs supported from general aid.
