The Legislative Audit Bureau supports the Legislature in its oversight of Wisconsin government and its promotion of efficient and effective state operations by providing nonpartisan, independent, accurate, and timely audits and evaluations of public finances and the management of public programs. Bureau reports typically contain reviews of financial transactions, analyses of agency performance or public policy issues, conclusions regarding the causes of problems found, and recommendations for improvement.

Reports are submitted to the Joint Legislative Audit Committee and made available to other committees of the Legislature and to the public. The Audit Committee may arrange public hearings on the issues identified in a report and may introduce legislation in response to the audit recommendations. However, the findings, conclusions, and recommendations in the report are those of the Legislative Audit Bureau.

The Bureau accepts confidential tips about fraud, waste, and mismanagement in any Wisconsin state agency or program through its hotline at 1-877-FRAUD-17.

Senator Robert Cowles and
Representative Samantha Kerkman, Co-chairpersons
Joint Legislative Audit Committee
State Capitol
Madison, Wisconsin 53702

Dear Senator Cowles and Representative Kerkman:

As requested by the Department of Administration (DOA), we have completed an audit of the Schedule of Employer Allocations of the State Retiree Health Insurance program, the Schedule of OPEB Amounts by Participating Employer of the State Retiree Health Insurance program, and the related notes to these schedules as of and for the year ended June 30, 2020. These schedules, and our unmodified opinions on them, may be found on DOA's website. These schedules will be used by DOA and other employers that are part of the State's financial reporting entity, but that prepare separately issued financial statements.

The State Retiree Health Insurance program, which is one of the other postemployment benefits (OPEB) plans offered by the State of Wisconsin to eligible retirees, is administered by the Department of Employee Trust Funds (ETF). OPEB refers to the benefits, other than pensions, that a state or local government employee may receive after they have left employment, generally upon retirement. An OPEB plan may include medical, prescription drug, dental, vision, and other health-related benefits, whether provided separately or through a pension plan. An OPEB plan may also include death benefits, life insurance, and long-term care coverage, when provided separately from a pension plan.

Under the State Retiree Health Insurance program, the State offers retirees who are not yet eligible for Medicare the option to participate in the State's Group Health Insurance program. Although the State does not directly pay any portion of the premium for retirees who choose to participate in the program, the State does pay higher premiums for its active employees than it otherwise would if retirees were excluded. Therefore, the State implicitly subsidizes the premiums paid by participating retirees by offering these individuals access to health insurance coverage at a lower rate than they might otherwise pay based upon their age. This, in turn, creates an OPEB liability the State must recognize for purposes of financial reporting.

DOA reported a total OPEB liability of \$642.0 million as of June 30, 2020, for the State Retiree Health Insurance program. This liability will be reported in the State's financial statements, which will be included in the State of Wisconsin's Annual Comprehensive Financial Report for the year ended June 30, 2021. This is a decrease of \$40.5 million from the \$682.5 million liability as of June 30, 2019, which was reported in the State of Wisconsin's Comprehensive Annual Financial Report for the year ended June 30, 2020. This decrease is primarily related to changes in actual benefit payments and contributions paid and changes in health care cost trend rates and the discount rate assumptions.

The Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters, which is required by *Government Auditing Standards*, begins on page 9. We did not identify any control or compliance concerns that were required to be reported under these standards.

We appreciate the courtesy and cooperation extended to us by DOA and ETF staff during our audit.

Respectfully submitted,

Joe Chrisman
State Auditor

JC/BG/ss

State Retiree Health Insurance Program

Under s. 40.51, Wis. Stats., the State Retiree Health Insurance program provides postemployment health insurance coverage to all eligible retired employees of the State of Wisconsin. Through the program, the State offers certain retirees who are not yet eligible for Medicare benefits the option to continue participating in the State's Group Health Insurance program and to pay for coverage at the premium rate set for active state employees. Although the State does not directly pay any portion of the premium for retirees who choose to participate in the program, the State does pay higher premiums for its active employees than it otherwise would if retirees were excluded. Therefore, the State implicitly subsidizes the premiums paid by participating retirees by offering these individuals access to health insurance coverage at a lower rate than they might otherwise pay based upon their age. This subsidy, in turn, creates an other postemployment benefits (OPEB) liability, which the State must recognize and report under Governmental Accounting Standards Board (GASB) standards.

Calculating the Total OPEB Liability

The State Retiree Health Insurance program is considered a non-trusted OPEB plan.

Under GASB standards, the State Retiree Health Insurance program is considered a non-trusted OPEB plan because the program does not accumulate assets dedicated to providing benefits to plan members. With the oversight of the Group Insurance Board, the Department of Employee Trust Funds (ETF) has administrative responsibilities for the program, including collecting premiums and paying the providers. However, because it is a non-trusted OPEB plan, ETF is not responsible for calculating the total OPEB liability. Instead, the Department of Administration (DOA), which is the entity responsible for preparing the financial statements of the State of Wisconsin on the basis of generally

accepted accounting principles (GAAP), is responsible for ensuring that the employer reporting requirements of the standards are being met, including the calculation of the total OPEB liability.

The total OPEB liability is the sum of amounts needed to pay for the OPEB benefits earned by each participant as of the date of the actuarial valuation. A liability exists because the State has committed to providing the benefit at some point in the future. The calculation of the total OPEB liability is complex and includes various actuarial assumptions and calculations, such as:

- a projection of future benefit payments for active and retired participants and their beneficiaries based upon the current terms of the plan;
- a discount of those payments to their present value, which is the amount of funds currently needed to provide the projected payments in the future; and
- an allocation of the present value of benefit payments over past, present, and future periods of employee service.

Assumptions Used to Calculate the Total OPEB Liability

Premiums are established and collected based on the current needs of the program, and assets are not accumulated to pay future benefits.

Three important assumptions used in the calculation of the total OPEB liability include the discount rate, health care cost trend rates, and participation rates. In determining the total OPEB liability for the program, the actuary for the State Retiree Health Insurance program used these and other assumptions to perform an actuarial valuation as of January 1, 2019. This valuation was adjusted for changes such as interest earned, contributions paid, and benefits paid through June 30, 2020. Based on this valuation and the adjustments, the total OPEB liability for the program as of June 30, 2020 was \$642.0 million, which was a decrease of \$40.5 million from the \$682.5 million total OPEB liability calculated as of June 30, 2019. This decrease is primarily related to changes in actual benefit payments and contributions paid and changes in health care cost trend rates and the discount rate assumptions. Because the program is funded on a “pay-as-you-go” basis, premiums are established and collected based on the current needs of the program, and assets are not accumulated to pay future benefits.

Discount Rate

The discount rate is the interest rate used to calculate the present value of projected benefit payments and is used to calculate the total OPEB liability for the State Retiree Health Insurance program. For a non-trusted OPEB plan, GASB standards require the discount rate to be

the 20-year, tax-exempt general obligation municipal bond index rate (with an average rating of AA/Aa or higher), which was 2.21 percent as of June 30, 2020, using the Bond Buyer 20-year General Obligation Municipal Bond Index.

A change in the discount rate can have a significant effect on the amount of the total OPEB liability.

The discount rate is a critical factor in calculating the total OPEB liability and can have a significant effect on the amount of the total OPEB liability. A one percentage point increase in the discount rate for the program reduces the total OPEB liability to \$600.8 million (at 3.21 percent), and a one percentage point decrease in the discount rate increases the liability to \$684.9 million (at 1.21 percent).

Health Care Cost Trend Rates

The health care cost trend rates measure the rate of change in per capita health costs over time and are calculated for significant portions of costs, such as medical, prescription drug, and dental. For the State Retiree Health Insurance program, the actuary develops the assumption using its internal guidelines, including various data sources and actual premium equivalent rates.

Changes in the health care cost trend rates can have a significant effect on the amount of the total OPEB liability.

These trend rates can have a significant effect on the amount of the total OPEB liability. A one percentage point increase in each health care cost trend rate increases the total OPEB liability to \$737.9 million, and a one percentage point decrease in each health care cost trend rate decreases the total OPEB liability to \$562.1 million.

Participation Rates

Participation rate assumptions measure how many retirees are expected to continue health insurance coverage after retirement as well as when retirees may discontinue coverage. Several factors can affect participation rates, including the cost of insurance on the open market, age at retirement, and eligibility for subsidized health care on public health care exchanges. Participation rates also can be affected by the option for retired state employees to use accumulated sick leave balances to pay health insurance premiums under the State's Accumulated Sick Leave Conversion Credit or the Supplemental Health Insurance Conversion Credit programs, which are separate programs funded by employer contributions and administered by ETF.

Employer Reporting

As of June 30, 2020, the total OPEB liability for the State Retiree Health Insurance program was \$642.0 million.

The total OPEB liability of \$642.0 million for the State Retiree Health Insurance program, as well as other collective amounts presented on the employer schedules, will be presented in the State's financial statements in the State of Wisconsin's Annual Comprehensive Financial Report for the year ended June 30, 2021. In addition, some state agencies, such as the University of Wisconsin (UW) System,

6 › STATE RETIREE HEALTH INSURANCE PROGRAM

and various authorities, including the UW Hospitals and Clinics Authority, that are reported in the State's Annual Comprehensive Financial Report, also separately issue GAAP-based financial statements. To assist each of these agencies and authorities in determining its proportionate share of the total OPEB liability, DOA prepared employer schedules that include these amounts. We audited and provided unmodified opinions on these schedules, which are published on DOA's website. In addition, the Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters, which is required by *Government Auditing Standards*, begins on page 9.

Financial Reporting and on Compliance and Other Matters**

Senator Robert Cowles and
Representative Samantha Kerkman, Co-Chairpersons
Joint Legislative Audit Committee

Mr. Joel Brennan, Secretary
Department of Administration

We have audited the Schedule of Employer Allocations of the State Retiree Health Insurance program as of and for the year ended June 30, 2020, and the related notes. We have also audited the totals for the columns titled Ending Total OPEB Liability, Total Deferred Outflows of Resources, Total Deferred Inflows of Resources, and Total Employer OPEB Expense included in the Schedule of OPEB Amounts by Participating Employer of the State Retiree Health Insurance program as of and for the year ended June 30, 2020, and the related notes. We have issued our report on these schedules thereon dated August 11, 2021. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, which is issued by the Comptroller General of the United States. The schedules and related auditor's opinions have been included in the *State of Wisconsin's Retiree Health Insurance Plan 2021 GASB 75 Employer Schedules* report.

Internal Control over Financial Reporting

Management of the Department of Administration (DOA) is responsible for establishing and maintaining effective internal control over financial reporting (internal control). In planning and performing our audit of the State Retiree Health Insurance program schedules, we considered DOA's internal control to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the schedules, but not for the purpose of expressing an opinion on the effectiveness of DOA's internal control. Accordingly, we do not express an opinion on the effectiveness of DOA's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent misstatements, or to detect and correct misstatements on a timely basis. A *material weakness* is a deficiency or a combination of deficiencies in internal control such that there is a reasonable possibility that a material misstatement of the schedules will not be prevented, or that a material misstatement will not be detected and corrected on a timely basis. A *significant deficiency* is a deficiency or a combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material

weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

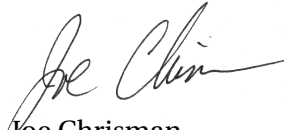

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State Retiree Health Insurance program schedules are free from material misstatement, we performed tests of compliance with certain provisions of laws, regulations, and contracts, noncompliance with which could have a material effect on the schedules. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be used when considering DOA's internal control and compliance. The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of DOA's internal control or on compliance. Accordingly, this report is not suitable for any other purpose.

LEGISLATIVE AUDIT BUREAU

Joe Chrisman
State Auditor
