The Legislative Audit Bureau supports the Legislature in its oversight of Wisconsin government and its promotion of efficient and effective state operations by providing nonpartisan, independent, accurate, and timely audits and evaluations of public finances and the management of public programs. Bureau reports typically contain reviews of financial transactions, analyses of agency performance or public policy issues, conclusions regarding the causes of problems found, and recommendations for improvement.

Reports are submitted to the Joint Legislative Audit Committee and made available to other committees of the Legislature and to the public. The Audit Committee may arrange public hearings on the issues identified in a report and may introduce legislation in response to the audit recommendations. However, the findings, conclusions, and recommendations in the report are those of the Legislative Audit Bureau.

The Bureau accepts confidential tips about fraud, waste, and mismanagement in any Wisconsin state agency or program through its hotline at 1-877-FRAUD-17.

May 25, 2022

Senator Robert Cowles and
Representative Samantha Kerkman, Co-chairpersons
Joint Legislative Audit Committee
State Capitol
Madison, Wisconsin 53702

Dear Senator Cowles and Representative Kerkman:

We have completed our annual financial and compliance audit of the State of Wisconsin. This audit satisfies state agencies' audit requirements under the federal Single Audit Act of 1984, as amended, and of the federal Office of Management and Budget *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). The audit also assists us in fulfilling our audit responsibilities under s. 13.94, Wis. Stats.

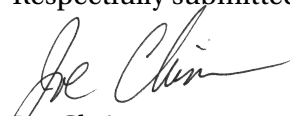

Our report contains the auditor's reports on internal control and compliance related to financial reporting and federal program administration, and our audit opinion on the State of Wisconsin's Schedule of Expenditures of Federal Awards (SEFA). In fiscal year (FY) 2020-21, state agencies administered \$20.8 billion in federal financial assistance, including \$6.6 billion in assistance expended as a result of the public health emergency and separately identified in the SEFA. We qualified our opinion on compliance related to certain requirements for the Emergency Rental Assistance Program and the Unemployment Insurance program.

We tested internal controls and compliance with laws and regulations for 24 federal programs that were selected for review using risk-based assessment criteria established by the federal government and specified in Uniform Guidance. We found state agencies generally complied with federal requirements. We made 25 recommendations to improve administration of federal programs and to address deficiencies in internal controls over financial reporting. We also identified \$314,531 of questioned costs that state agencies charged inappropriately to federal funds.

We followed up on the status of corrective actions to address audit findings we reported in our FY 2019-20 single audit report (report 21-6). The federal government will work with state agencies to resolve the new and continuing concerns we identified.

We appreciate the courtesy and cooperation extended to us by state agency staff during our audit. Agency responses to individual findings are included within each chapter. As required by Uniform Guidance, agency corrective action plans to address these findings are included separately in the auditee section of this report.

Respectfully submitted,

Joe Chrisman
State Auditor

JC/CS/ss

Introduction

State agencies administered \$20.8 billion in federal financial assistance in FY 2020-21.

Wisconsin state agencies administered a total of \$20.8 billion in federal financial assistance during fiscal year (FY) 2020-21 including \$18.6 billion in cash assistance, \$2.0 billion in noncash assistance, and \$127.8 million in outstanding loan balances. This total also includes \$6.6 billion in federal financial assistance the State expended related to the public health emergency, and that it separately identified in the State of Wisconsin's Schedule of Expenditures of Federal Awards (SEFA).

As a condition of receiving federal funds, state agencies must meet the audit requirements of the federal Single Audit Act of 1984, as amended, and of the federal Office of Management and Budget *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). We performed our FY 2020-21 audit at the request of state agencies that administered federal financial assistance and to assist us in fulfilling our audit responsibilities under s. 13.94, Wis. Stats. We focused our audit on the internal controls over 24 selected federal programs and tested compliance with laws and regulations related to these programs.

In performing this audit, we were required by federal rules to:

- render an opinion on the State's basic financial statements;
- issue a report on the State's internal control and compliance related to financial reporting; and
- issue a report on the State's compliance with requirements applicable to each major program, on its internal control over compliance, and on its SEFA.

Our opinion on the State's FY 2020-21 financial statements was included in the State's Annual Comprehensive Financial Report (ACFR), which was issued by the Wisconsin Department of Administration (DOA) in December 2021 and is available on DOA's website. The other required auditor's reports, accompanied by each agency's response to our findings and its corrective action plans, are included in this single audit report. This single audit report, along with other required information, is required to be submitted to the federal government under Uniform Guidance.

Typically, auditors receive information from the federal government each summer that helps to determine the federal grants that must be audited and the specific audit requirements for expenditures made from these grants. As a result of the increase in federal assistance provided due to the public health emergency, it was not until late January 2022 that the federal government gave auditors all information necessary to plan and execute audit work for the FY 2020-21 single audit. Although the State's single audit typically must be filed annually with the federal government by March 31, the federal Office of Management and Budget created a six-month extension for the FY 2020-21 single audit.

Federal Programs

In FY 2020-21, 14 programs accounted for 87.0 percent of the \$20.8 billion in federal financial assistance state agencies administered.

In FY 2020-21, the State administered 14 federal programs or clusters with expenditures greater than \$200.0 million. Uniform Guidance requires that certain federal programs be grouped into clusters, combined for federal reporting purposes, and audited as one overall program. The 14 largest programs accounted for 87.0 percent of the \$20.8 billion in federal financial assistance state agencies administered in FY 2020-21, as shown in Table 1.

Table 1

State of Wisconsin
Federal Programs or Clusters with Expenditures Greater than \$200.0 Million

Presidential Declared Disaster Assistance to Individuals and Households—Other Needs	Department of Workforce Development	230,256,039	1.1
Special Education Cluster (IDEA)	Department of Public Instruction	224,564,799	1.1
Subtotal		18,056,302,566	87.0
Other Federal Programs or Clusters ⁴		2,694,037,312	13.0
Total		\$20,750,339,878	100.0%

¹ Uniform Guidance requires that certain federal programs be grouped into clusters, combined for federal reporting purposes, and audited as one overall program.

² Includes cash assistance; noncash assistance, such as food commodities; and outstanding loan balances.

³ In accordance with federal requirements, consists of insurance benefits paid from employer contributions and direct federal funding.

⁴ Federal programs or clusters with expenditures less than \$200.0 million.

Table 2 shows the amount of federal financial assistance administered by each state agency. Seven state agencies accounted for 94.3 percent of the federal expenditures and had primary responsibility for administering the State's largest federal programs or clusters during FY 2020-21 including:

- the Department of Health Services (DHS), which administered the Medicaid Cluster, the Supplemental Nutrition Assistance Program (SNAP) Cluster for Wisconsin's FoodShare program, and the Children's Health Insurance Program (CHIP);
- the Department of Workforce Development (DWD), which administered the Unemployment Insurance (UI) program and the Presidential Declared Disaster Assistance to Individuals and Households—Other Needs program;
- the University of Wisconsin (UW) System, which administered federal student financial assistance under the Student Financial Assistance Cluster, a variety of research and development grants under the Research and Development Cluster, and portions of the Education Stabilization Fund (ESF) program;
- the Department of Public Instruction (DPI), which administered the Child Nutrition Cluster, the Special Education Cluster (IDEA), Title I Grants to Local Educational Agencies, and portions of the ESF program;
- the Department of Transportation (DOT), which administered the Highway Planning and Construction Cluster;
- DOA, which administered the Coronavirus Relief Fund (CRF), the Coronavirus State and Local Fiscal Recovery Funds (CSLFRF), and the Emergency Rental Assistance Program; and
- the Department of Children and Families (DCF), which administered the Child Care and Development Fund (CCDF) Cluster, and the Temporary Assistance for Needy Families (TANF) program.

Department of Corrections	6,252,355
Other State Agencies ²	3,421,205
Total	\$20,750,339,878

¹ Includes cash assistance; noncash assistance, such as food commodities; and outstanding loan balances.

² Includes the federal expenditures incurred by the following state agencies: Board for People with Developmental Disabilities, Wisconsin Court System, Wisconsin Historical Society, Department of Safety and Professional Services, Child Abuse and Neglect Prevention Board, Public Defender Board, Educational Communications Board, Department of Financial Institutions, Department of Employee Trust Funds, Office of the Governor, Labor and Industry Review Commission, Secretary of State, and State Fair Park Board.

Uniform Guidance establishes the process for selecting the grant programs or clusters to be audited. Uniform Guidance categorizes federal programs as “type A” (large programs or clusters) and “type B” (smaller programs or clusters). For the State, type A programs or clusters had expenditures of \$31.1 million or more in federal funds. The type A and B programs or clusters selected for audit were those determined to be subject to a higher risk of noncompliance based on the risk factors established by Uniform Guidance.

Our audit focused on 24 federal programs or clusters administered by state agencies in FY 2020-21.

As shown in Table 3, our FY 2020-21 audit focused on 19 type A programs or clusters and 5 type B programs or clusters. These programs or clusters were administered primarily by 10 state agencies and accounted for 82.3 percent of the \$20.8 billion in federal financial assistance administered by state agencies.

We also followed up on the status of corrective actions agencies took to address the audit findings we reported in our FY 2019-20 single audit report (report 21-6). Our FY 2020-21 single audit report also includes those findings that are required to be reported under Uniform Guidance, such as findings related to the audit of the State’s financial statements. In addition, we noted certain additional internal control or compliance matters that we conveyed to agency management in separate communications.

Total		\$17,070,879,389

¹ Uniform Guidance requires that certain federal programs be grouped into clusters, combined for federal reporting purposes, and audited as one overall program.

² Includes cash assistance; noncash assistance, such as food commodities; and outstanding loan balances.

³ In accordance with federal requirements, consists of insurance benefits paid from employer contributions and direct federal funding.

Federal Funding for the Public Health Emergency

Total federal financial assistance increased by \$9.2 billion from \$11.6 billion in FY 2016-17 to \$20.8 billion in FY 2020-21, or by 79.3 percent. As shown in Figure 1, total federal financial assistance was relatively constant from FY 2016-17 through FY 2018-19, before increasing in FY 2019-20 and FY 2020-21 as a result of additional federal financial assistance to address the effects of the public health emergency.

Figure 1

State of Wisconsin Total Federal Financial Assistance¹ (in billions)

¹ Includes cash assistance; noncash assistance, such as food commodities; and outstanding loan balances.

² Includes \$3.4 billion of federal financial assistance related to the public health emergency, and separately identified in the SEFA.

³ Includes \$6.6 billion of federal financial assistance related to the public health emergency, and separately identified in the SEFA.

In March 2020, the federal government and the State declared a public health emergency in response to COVID-19. In response to the public health emergency, the federal government enacted legislation, including:

- Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020;
- Families First Coronavirus Response Act;
- Coronavirus Aid, Relief, and Economic Security (CARES) Act;
- Consolidated Appropriations Act of 2021;
- Continued Assistance Act of 2020;
- Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA); and
- American Rescue Plan Act (ARPA) of 2021.

In the Schedule of Expenditures of Federal Awards, the State expended \$6.6 billion in federal funding provided to address the public health emergency during FY 2020-21.

Under these and other federal laws, the State received additional federal funding for certain existing programs or clusters, including UI, as well as funding under new programs, including the Coronavirus State and Local Fiscal Recovery Funds program and Emergency Rental Assistance Program. As reported in its SEFA, the State expended \$3.4 billion in FY 2019-20 and \$6.6 billion in FY 2020-21, in federal funding provided to address the public health emergency. The largest amount of expenditures reported in the SEFA by the State in FY 2020-21 for the public health emergency was the \$2.2 billion in expenditures reported for the UI program. Other programs or clusters that received additional federal funding for the public health emergency as separately identified in the SEFA, are shown in Table 4.

Table 4

**State of Wisconsin
Federal Expenditures Related to the Public Health Emergency¹
FY 2020-21**

Total		\$6,569,758,833

¹ Expenditures for federal funding separately identified in the SEFA as related to the public health emergency.

² Uniform Guidance requires that certain federal programs be grouped into clusters, combined for federal reporting purposes, and audited as one overall program.

³ Includes cash assistance; noncash assistance, such as food commodities; and outstanding loan balances.

⁴ In accordance with federal requirements, consists of insurance benefits paid from employer contributions and direct federal funding.

⁵ Under Uniform Guidance, this cluster was not selected for audit in FY 2020-21.

⁶ Includes expenditures under an additional 51 programs as reported in the SEFA.

Unemployment Insurance Program

During FY 2020-21, DWD expended \$2.2 billion in federal funds to fund Unemployment Insurance program benefits.

The federal CARES Act created several new types of unemployment benefit programs to provide UI benefits to individuals whose employment was affected by the public health emergency. These programs, which began in March 2020, continued into FY 2020-21 and were extended by the federal Continued Assistance Act and ARPA. The CARES Act also established programs to provide relief to employers through federal reimbursement of certain regular unemployment

benefits. During FY 2020-21, DWD reported in the SEFA \$2.2 billion of additional federal assistance to fund unemployment insurance benefits for individuals whose employment was affected by the public health emergency. These federal unemployment benefits expired on September 4, 2021.

Coronavirus Relief Fund

During FY 2020-21, state agencies expended \$1.6 billion under the Coronavirus Relief Fund.

The federal CARES Act created the CRF to distribute money directly to state, local, tribal, and territorial governments. The federal government advanced \$2.0 billion in CRF funds to the State of Wisconsin in April 2020. The State was required to use the funds for expenses that were incurred in response to the public health emergency between March 1, 2020, and December 30, 2020. Although the CARES Act required that funds received from the CRF and not used by December 30, 2020, were to be returned to the U.S. Department of the Treasury, the federal Consolidated Appropriations Act of 2021, extended the time for expenditures to be funded by the CRF to December 31, 2021. CRF funds were expended in various ways to address the public health emergency, including on the statewide COVID-19 testing program; contact tracing; personal protective equipment and ventilators; assistance to local governments and businesses negatively affected by the public health emergency; and assistance to providers and hospitals to compensate for additional expenditures to address the public health emergency. DOA, which has primary responsibility for administering the CRF, reported in the SEFA that state agencies expended \$1.6 billion in funds from the CRF during FY 2020-21.

Supplemental Nutrition Assistance Program

During FY 2020-21, DHS provided \$702.1 million in emergency SNAP benefits.

The federal Families First Coronavirus Response Act granted additional flexibilities under SNAP, also known as FoodShare, that increased benefits and the number of individuals eligible for benefits. For example, the State received an emergency allotment to address temporary food needs to bring households up to the maximum benefit available during the early months of the public health emergency. In addition, in January 2021 monthly benefits increased by 15.0 percent. In April 2021, recipients who were already receiving the maximum monthly benefit received an additional \$95 per month. DHS reported in the SEFA that it provided \$702.1 million in emergency SNAP benefits specifically related to the public health emergency during FY 2020-21.

DHS reported \$511.7 million in additional federal funds for the Medical Assistance Program as a result of an increase in Wisconsin's FMAP.

Medical Assistance Program

The federal Families First Coronavirus Response Act provided a temporary 6.2 percent increase in Wisconsin's Federal Medical Assistance Percentage (FMAP) for benefit payments, subject to certain requirements to maintain benefits under the provisions in place as of January 2020. The FMAP is the percentage of Medical Assistance (Medicaid) expenditures the federal government will fund for the State. The increase in the FMAP is anticipated to be in place until the federal government determines the public health emergency period for COVID-19 has ended. DHS reported in the SEFA that additional federal funds for the public health emergency totaled \$511.7 million during FY 2020-21.

Education Stabilization Fund

The ESF was created by the CARES Act, with additional funding provided by CRRSAA and ARPA. The purpose of the fund is to prevent, prepare for, and respond to the effects of the public health emergency on education. The ESF consists of four funds:

- Elementary and Secondary School Emergency Relief (ESSER) Fund;
- Emergency Assistance for non-Public Schools (EANS) Fund;
- Governor's Emergency Education Relief (GEER) Fund; and
- Higher Education Emergency Relief Fund (HEERF).

During FY 2020-21, UW System and DPI reported in the SEFA that they expended a combined total of \$333.2 million under ESF.

During FY 2020-21, UW System expended \$197.4 million under the Education Stabilization Fund.

UW System expended ESF funds from the GEER Fund and HEERF. These funds were primarily used by UW institutions to provide grants to students affected by the public health emergency; recover lost revenues as a result of the public health emergency; provide COVID-19 testing; and to cover other costs associated with the public health emergency. UW System reported in the SEFA that it expended \$197.4 million from the ESF during FY 2020-21.

During FY 2020-21, DPI expended \$135.8 million under the Education Stabilization Fund.

DPI expended ESF funds from the ESSER Fund, the EANS Fund, and the GEER Fund. These funds were primarily provided to local educational agencies and private schools to address various needs related to the public health emergency, including personal protective equipment, sanitation, and technology and equipment. DPI reported in the SEFA that it expended \$135.8 million from the ESF during FY 2020-21.

Coronavirus State and Local Fiscal Recovery Funds

The CSLFRF was created by ARPA to distribute money directly to state, local, tribal, and territorial governments. The State was allocated \$2.5 billion in CSLFRF funding, and was advanced \$1.5 billion in May 2021. The State was required to distribute to local governments \$205.8 million, which is not reported on the State's SEFA. The State is expected to be advanced the second round of the funding in the spring of 2022. The CSLFRF funding included certain stipulations, including that the funds must be used to:

- respond to the public health emergency or its negative economic effects;
- respond to the needs of workers performing essential work during the public health emergency;
- provide government services to the extent revenue losses due to the public health emergency reduced revenues; and
- make necessary investments in water, sewer, or broadband infrastructure.

During FY 2020-21, state agencies expended \$274.9 million under CSLFRF.

Further, federal regulations stipulate that eligible expenditures must be incurred between March 3, 2021, and December 31, 2024. DOA, which has primary responsibility for administering the CSLFRF, reported in the SEFA that state agencies expended \$274.9 million in funds from the CSLFRF during FY 2020-21. The largest portion of these expenditures were incurred by the Department of Revenue for the Wisconsin Tomorrow and We're All In grant programs.

Presidential Declared Disaster Assistance to Individuals and Households—Other Needs (Lost Wages Assistance Program)

During FY 2020-21, DWD provided benefit payments of \$230.3 million under the Lost Wages Assistance program.

In FY 2020-21, the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) provided an additional benefit program to assist unemployed individuals. The Presidential Declared Disaster Assistance to Individuals and Households—Other Needs program, commonly called the Lost Wages Assistance program, was funded through FEMA's Disaster Relief Fund. This program provided an additional \$300 benefit to eligible individuals who received at least \$100 in regular or federally funded unemployment benefits for a six-week period from late July 2020 through early September 2020. DWD reported in the SEFA that it expended \$230.3 million on this program during FY 2020-21.

Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) Program

During FY 2020-21, DHS expended \$169.1 million in funding related to the public health emergency under the Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) program.

The Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) program assists states in protecting public health and safety by enhancing the capacity of public health agencies to effectively detect, respond, prevent and control known and emerging infectious diseases. DHS received a significant increase in funding for this program during the public health emergency, including COVID-19 awards totaling \$667.3 million through FY 2020-21. DHS, with the Wisconsin State Lab of Hygiene, expended ELC funds to increase the testing capacity for COVID-19, including payments to local public health agencies, testing sites, and laboratories. During FY 2020-21, DHS reported in the SEFA that it expended \$169.1 million in funding related to the public health emergency under the ELC program.

Pandemic EBT Food Benefits Program

During FY 2020-21, DHS provided \$136.4 million in benefits under the Pandemic EBT Food Benefits program.

Under the federal Families First Coronavirus Response Act, the Pandemic Electronic Benefits Transfer (EBT) Food Benefits program was created to provide nutrition assistance on EBT cards as temporary assistance for households with children affected by a school closure during the public health emergency. The federal government approved the State's plan to distribute these benefits for the 2019-2020 school year in April 2020, and approved the State's plan for the 2020-2021 school year in February 2021. DHS largely determined eligibility based on DPI student data for children eligible for the National School Lunch Program. DPI also surveyed schools to identify the educational model in place each month, which included virtual, hybrid, or in-person with virtual options. Monthly benefits were calculated using the daily meal reimbursement rate with adjustments for the educational model in place. DHS reported issuing benefits to 293,015 children for the 2020-2021 school year. DHS reported in the SEFA that it provided \$136.4 million in benefits for this program during FY 2020-21.

Child Care and Development Fund Cluster

During FY 2020-21, DCF expended \$114.3 million in funding related to the public health emergency under the Child Care and Development Fund Cluster.

The CCDF Cluster is the primary federal funding source to help certain low-income families access child care and to improve the quality of child care for all children. DCF was awarded additional federal funding for this program during the public health emergency, including \$51.6 million under the CARES Act, \$148.8 million under CRRSAA, and \$357.0 million under ARPA. As approved by the Joint Committee on Finance, this additional federal funding was primarily used for the Child Care Counts program, which provides assistance to child care providers affected by the public health emergency. During FY 2020-21, DCF reported in the SEFA that it expended \$114.3 million in funding related to the public health emergency under the CCDF.

Child Nutrition Cluster

During FY 2020-21, DPI expended \$63.5 million in funding related to the public health emergency under the Child Nutrition Cluster.

Under the federal Families First Coronavirus Response Act, the State received additional funding for the Child Nutrition Cluster to meet the additional demands and costs to serve school children. DPI administers the Child Nutrition Cluster, which traditionally funds free and reduced priced meals for children in attendance at local schools. In response to the public health emergency, the U.S. Department of Agriculture provided waivers for several program requirements under the Child Nutrition Cluster including a waiver of the operation deadlines for the Summer Food Service Program and National School Lunch Program, which allowed schools to choose which program to operate under through June 30, 2021. During FY 2020-21, DPI reported in the SEFA that it expended \$63.5 million in funding related to the public health emergency under the Child Nutrition Cluster.

Emergency Rental Assistance Program

During FY 2020-21, DOA expended \$50.2 million under the Emergency Rental Assistance Program.

The Emergency Rental Assistance (ERA) Program was established under the federal Consolidated Appropriations Act of 2021 to assist households that are unable to pay rent or utilities. The State was advanced \$322.2 million in ERA Program funding in January 2021, and \$112.5 million in May 2021. DOA is responsible for administering the program and reported in its eligibility and benefit determination system that a total of 10,324 individuals received rental and utility assistance benefit payments in FY 2020-21. In report 22-3, we completed a limited-scope review of the ERA Program. During FY 2020-21, DOA reported in the SEFA that it expended \$50.2 million under the ERA Program.

Other Federal Funding for the Public Health Emergency

The remaining \$179.4 million in Table 4 related to other programs or clusters that received additional federal funding for the public health emergency as separately identified in the SEFA. The largest of these other expenditures included:

- \$49.6 million reported by DOA under the Low-Income Home Energy Assistance program;
- \$19.0 million reported by DOT under the Formula Grants for Rural Areas and Tribal Transit Program;
- \$15.7 million reported by DHS under the Immunization Cooperative Agreements program;
- \$16.0 million reported by DHS under the Aging Cluster;

- \$12.9 million reported by DHS under the Children’s Health Insurance Program (CHIP); and
- \$10.2 million reported by DOA under the Emergency Solutions Grant Program.

Future Federal Funding

During FY 2021-22, and subsequent to our audit period, state agencies continued to spend federal funding provided to address the public health emergency. In addition, in November 2021 the federal government enacted the Infrastructure Investment and Jobs Act, which includes funding for transportation, drinking water programs, broadband programs, and cybersecurity initiatives. Portions of this funding will be received by the State through existing federal programs, such as the Highway Planning and Construction grant and the Low-Income Home Energy Assistance Program. We anticipate future single audits will also include audit work related to funding provided for new federal programs established under this federal law.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters

Honorable Members of the Legislature

The Honorable Tony Evers, Governor

We have audited the financial statements and the related notes of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin, which collectively comprise the State's basic financial statements, as of and for the year ended June 30, 2021, and have issued our report thereon dated December 20, 2021.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, which is issued by the Comptroller General of the United States. The basic financial statements and related auditor's opinions have been included in the State of Wisconsin's Annual Comprehensive Financial Report (ACFR) for the fiscal year ended June 30, 2021.

Our report includes a reference to other auditors who audited the financial statements of the Environmental Improvement Fund, the Deferred Compensation Fund, the Wisconsin Housing and Economic Development Authority, the University of Wisconsin (UW) Hospitals and Clinics Authority, and the UW Foundation, as described in our report on the State of Wisconsin's basic financial statements. The financial statements of the Environmental Improvement Fund and the Wisconsin Housing and Economic Development Authority were audited in accordance with auditing standards generally accepted in the United States of America and *Government Auditing Standards*. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that were reported on separately by those auditors. Although the financial statements of the Deferred Compensation Fund, the UW Hospitals and Clinics Authority, and the UW Foundation were audited in accordance with auditing standards generally accepted in the United States of America, they were not audited in accordance with *Government Auditing Standards* and, accordingly, this report does not include reporting on internal control over financial reporting or instances of reportable noncompliance associated with the Deferred Compensation Fund, the UW Hospitals and Clinics Authority, or the UW Foundation.

Internal Control over Financial Reporting

Management of the State of Wisconsin is responsible for establishing and maintaining effective internal control over financial reporting (internal control). In planning and performing our audit of the financial statements, we considered the State's internal control as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, we do not express an opinion on the effectiveness of the State's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent misstatements, or to detect and correct misstatements on a timely basis. A *material weakness* is a

deficiency or a combination of deficiencies in internal control such that there is a reasonable possibility that a material misstatement of the State's basic financial statements will not be prevented, or that a material misstatement will not be detected and corrected on a timely basis. A *significant deficiency* is a deficiency or a combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify certain deficiencies in internal control that we consider to be significant deficiencies. Specifically, we consider the deficiencies in internal control, described in Section II of the Schedule of Findings and Questioned Costs as Findings 2021-001, 2021-002, 2021-003, and 2021-004, to be significant deficiencies.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State's basic financial statements are free from material misstatement, we performed tests of compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

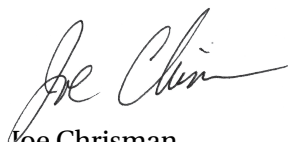

Responses to Findings

Agency-specific responses to the findings identified in our audit are described in Section II of the Schedule of Findings and Questioned Costs. Agency-specific corrective action plans for the findings identified in our audit are included in the Corrective Action Plans chapter. The responses and corrective action plans were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

Purpose of This Report

This report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be used when considering the State's internal control and compliance. The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the State's internal control or on compliance. Accordingly, this report is not suitable for any other purpose.

Independent Auditor’s Report on Compliance for Each Major Federal Program; Report on Internal Control over Compliance; and Report on the Schedule of Expenditures of Federal Awards Required by Uniform Guidance

Honorable Members of the Legislature

The Honorable Tony Evers, Governor

Report on Compliance for Each Major Federal Program

We have audited the State of Wisconsin’s compliance with the types of compliance requirements described in the federal Office of Management and Budget (OMB) Compliance Supplement that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2021. The State of Wisconsin’s major federal programs are identified in the Summary of Auditor’s Results section of the accompanying Schedule of Findings and Questioned Costs.

The State of Wisconsin’s basic financial statements include the operations of the Wisconsin Housing and Economic Development Authority, the Wisconsin Economic Development Corporation, and the University of Wisconsin Hospitals and Clinics Authority. These entities are not included in the State of Wisconsin’s Schedule of Expenditures of Federal Awards for the year ended June 30, 2021. Our audit, as described under the Auditor’s Responsibility section of this report, did not include the operations of these entities because these entities engaged other auditors to perform an audit of compliance, if required.

Management’s Responsibility

Management of each Wisconsin state agency is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor’s Responsibility

Our responsibility is to express an opinion on compliance for each of the State of Wisconsin’s major federal programs based on our audit of the types of compliance requirements referred to in the first paragraph. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, which is issued by the Comptroller General of the United States; and the audit requirements of 2 CFR Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance occurred with the types of compliance requirements that could have a direct and material effect on a major federal program. An audit includes examining, on a test basis, evidence about the State of Wisconsin’s compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our qualified and unmodified opinions on compliance for each major federal program. However, our audit does not provide a legal determination on the State of Wisconsin’s compliance.

Basis for Qualified Opinion on Certain Major Federal Programs

As described in the accompanying agency report narratives and in Section III of the Schedule of Findings and Questioned Costs, the State of Wisconsin did not comply with requirements regarding the following:

Assistance Listing Number	Major Federal Program	Compliance Requirement	Finding Number
17.225	Unemployment Insurance	Reporting	2021-600
21.023	COVID-19—Emergency Rental Assistance Program	Activities Allowed or Unallowed, Allowable Costs/Cost Principles, and Eligibility	2021-104

Compliance with such requirements is necessary, in our opinion, for the State of Wisconsin to comply with the requirements applicable to these programs.

Qualified Opinion on Certain Major Federal Programs

In our opinion, except for the noncompliance described in the Basis for Qualified Opinion section, the State of Wisconsin complied, in all material respects, with the types of compliance requirements referred to in the first paragraph that could have a direct and material effect on the Unemployment Insurance program (Assistance Listing number 17.225) and Emergency Rental Assistance Program (Assistance Listing number 21.023) for the year ended June 30, 2021.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the State of Wisconsin complied, in all material respects, with the types of compliance requirements referred to in the first paragraph that could have a direct and material effect on each of its other major federal programs identified in the Summary of Auditor's Results section of the accompanying Schedule of Findings and Questioned Costs, for the year ended June 30, 2021.

Other Matters

The results of our auditing procedures disclosed instances of noncompliance, which are required to be reported in accordance with Uniform Guidance and which are described in the accompanying agency report narratives and in Section III of the Schedule of Findings and Questioned Costs as Findings 2021-003, 2021-100 through 2021-103, 2021-105, 2021-300 through 2021-308, 2021-400, 2021-401, 2021-601, 2021-602, and 2021-900. Our opinion on each major federal program is not modified with respect to these matters.

Wisconsin state agencies' responses and corrective action plans to the noncompliance findings identified in our audit are in the accompanying agency report narratives and the Corrective Action Plans chapter, respectively. The responses and corrective action plans were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on them.

Report on Internal Control over Compliance

Management of the State of Wisconsin is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to in the first paragraph. In planning and performing our audit, we considered the State of Wisconsin's internal control over compliance with the types of compliance requirements that could have a direct and material effect on a major federal program. This consideration was solely to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with Uniform Guidance. This consideration was not for the purpose of expressing an opinion on the effectiveness of

internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the State of Wisconsin's internal control over compliance.

Our consideration of the internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below we did identify certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying agency report narrative and in Section III of the Schedule of Findings and Questioned Costs as Findings 2021-104 and 2021-600 to be material weaknesses.

A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance, described in the accompanying agency report narratives and in Section III of the Schedule of Findings and Questioned Costs as Findings 2021-003, 2021-004, 2021-100 through 2021-103, 2021-105, 2021-301 through 2021-303, 2021-305, 2021-308, 2021-400, 2021-401, 2021-601, 2021-602, and 2021-900 to be significant deficiencies.

Wisconsin state agencies' responses and corrective action plans to the internal control over compliance findings identified in our audit are in the accompanying agency report narratives and the Corrective Action Plans chapter, respectively. The responses and corrective action plans were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on them.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Expenditures of Federal Awards

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information for the State of Wisconsin as of and for the year ended June 30, 2021, and the related notes to the financial statements, which collectively comprise the State of Wisconsin's basic financial statements. We have issued our report thereon dated December 20, 2021, which contains unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. We have not performed any procedures with respect to the audited financial statements subsequent to December 20, 2021. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis, as required by Uniform Guidance, and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying

28 › AUDITOR'S REPORTS ON FEDERAL PROGRAMS

accounting and other records used to prepare the basic financial statements, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

LEGISLATIVE AUDIT BUREAU

Legislative Audit Bureau

May 24, 2022

Department of Administration

The Wisconsin Department of Administration (DOA) provides support services to other state agencies, manages certain housing and economic development activities, and performs other functions prescribed by law. DOA is also responsible for providing the Governor with fiscal management information and the policy alternatives required for preparing Wisconsin's biennial budget. In FY 2020-21, DOA administered \$0.9 billion in federal financial assistance.

We tested DOA's internal controls and compliance with grant requirements for three type A programs: Coronavirus Relief Fund (CRF) (Assistance Listing number 21.019), Emergency Rental Assistance (ERA) Program (Assistance Listing number 21.023), and Coronavirus State and Local Fiscal Recovery Funds (Assistance Listing number 21.027). We also tested the Emergency Solutions Grant (ESG) Program (Assistance Listing number 14.231), which is a type B program. We identified the following internal control and compliance concerns:

- Coronavirus Relief Fund—Subrecipient Designation (Finding 2021-100);
- Coronavirus Relief Fund—Lack of Documentation (Finding 2021-101);
- Emergency Rental Assistance Program—Subrecipient Monitoring (Finding 2021-102);
- Emergency Rental Assistance Program—Prioritization of Applications (Finding 2021-103);
- Emergency Rental Assistance Program—Applicant Eligibility (Finding 2021-104); and
- Emergency Solutions Grant Program—Monitoring Controls over Allowable Costs (Finding 2021-105).

Finding 2021-104 resulted in a qualified opinion for certain compliance requirements on the Emergency Rental Assistance Program.

In addition, we followed up on DOA's progress in addressing Finding 2020-100 of our FY 2019-20 audit (report 21-6). DOA implemented corrective action to address this finding. We also followed up on the progress of DOA in addressing financial reporting concerns related to information technology security controls (Findings 2020-001 and 2020-002 from report 21-6). DOA implemented corrective actions to address Finding 2020-001 and to partially address Finding 2020-002. It will be important for DOA to continue to work to resolve this finding. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of this finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

Finding 2021-100: Subrecipient Designation—Coronavirus Relief Fund

Background:

During FY 2019-20, the State of Wisconsin was advanced \$2.0 billion in federal funds from the CRF as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act, which was enacted in March 2020. DOA administers the CRF. DOA used CRF funding to establish various programs to provide funding to local governments, not-for-profit organizations, and certain businesses affected by the public health emergency. In administering the programs, DOA determined that these organizations were subrecipients of the CRF. This determination is important because subrecipients are required to follow the audit requirements in 2 CFR Part 200, Subpart F in administering the funding. Subrecipients are also required to obtain a single audit, if applicable to the organization.

Criteria:

2 CFR s. 200.1 defines a subrecipient as an entity that receives a subaward from a pass-through entity to carry out part of a federal award on behalf of the recipient, and subrecipients do not include individuals that are beneficiaries of a federal award.

U.S. Department of the Treasury guidance published in the Federal Register in January 2021 provided clarification on the definition of subrecipient for the CRF, indicating that subrecipients do not include individuals and organizations that are beneficiaries of an assistance program established using payments from the CRF.

Condition:

Although Treasury guidance was published in January 2021, DOA did not reassess its subrecipient designation for certain local and tribal governments, not-for-profit organizations, and businesses that were awarded CRF funding. In our review of the CRF programs established by DOA, we identified that, in some cases, these organizations were CRF program beneficiaries. For example, DOA provided \$201.1 million in financial assistance to local and tribal governments to address needs resulting from the public health emergency, such as the need to purchase cleaning and sanitizing supplies or to address contact-tracing costs. These local and tribal governments were not provided funding to carry out a federal award on behalf of DOA.

Context:

During FY 2020-21, DOA expended \$627.7 million in CRF funding, including providing \$299.3 million to local and tribal governments, not-for-profit organizations, and businesses to assist the entities in addressing their needs resulting from the public health emergency. We interviewed DOA staff to understand the administration of the various programs funded by the CRF, DOA’s procedures for designating entities as subrecipients or beneficiaries, and development of monitoring procedures to ensure funding was expended in accordance with the CRF and CARES Act requirements.

Questioned Costs:

None.

Effect:

The organizations that were provided CRF funding from DOA may have reported or classified amounts received from DOA as a federal grant subject to a single audit because of the incorrect designation made by DOA.

DOA incorrectly reported \$299.3 million in expenditures as “Amounts Provided to Subrecipients” on the Schedule of Expenditures of Federal Awards that it submitted to the DOA State Controller’s Office. After further review, DOA determined that only \$7.5 million should have been classified as “Amounts Provided to Subrecipients.”

Cause:

DOA did not determine in a timely manner that it needed to change its designation of certain organizations to beneficiaries after the Treasury guidance was published in January 2021.

Recommendation

We recommend the Wisconsin Department of Administration:

- *complete a timely assessment of changes in federal regulations and revise its policies and practices, as appropriate;*
- *ensure the Schedule of Expenditures of Federal Awards accurately reflects the amounts provided to subrecipients; and*
- *communicate the change in designation and the effect of the change to those organizations that were provided Coronavirus Relief Fund funding.*

Finding 2021-100: Subrecipient Designation—Coronavirus Relief Fund

COVID-19—Coronavirus Relief Fund (Assistance Listing number 21.019)

<u>Award Number</u>	<u>Award Year</u>
---------------------	-------------------

None	2020
------	------

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Administration: The Wisconsin Department of Administration agrees with the finding and the recommendation.

Finding 2021-101: Lack of Documentation—Coronavirus Relief Fund

Background:

During FY 2019-20, the State of Wisconsin was advanced \$2.0 billion in federal funds from the CRF as part of the CARES Act, which was enacted in March 2020. DOA administers the CRF. In June 2020, DOA used CRF funding to establish the Routes to Recovery Program to provide financial assistance to local governments, including tribal governments, to address needs resulting from the public health emergency. In administering the Routes to Recovery Program, DOA developed a database, called the online expense reporter, for local governments to submit a request for reimbursement.

Criteria:

DOA is required to follow Treasury guidance that requires it to keep records sufficient to demonstrate the CRF funding was used in accordance with federal regulations. Further, in accordance with 2 CFR s. 200.303, DOA must establish and maintain effective internal control over federal funding that provides reasonable assurance that it is managing the federal award in compliance with federal statutes, regulations, and the terms and conditions of the award.

DOA's procedures required local governments to certify agreement to the following terms and conditions when requesting reimbursement for costs incurred under the program:

- All items submitted for reimbursement were actual expenditures paid.
- All items submitted for reimbursement were unanticipated expenditures not accounted for in the last-approved budget prior to March 27, 2020.
- All items submitted for reimbursement were, in the reasonable judgment of the public officials responsible for incurring them, reasonably necessary expenditures incurred due to the public health emergency.
- All items submitted for reimbursement were expenditures paid on or after March 1, 2020.

Further, DOA's procedures indicated that, after review of the reimbursement request, DOA staff would assess whether the expenditures were allowable and would approve the request in the online expense reporter.

Condition:

Although guidance prepared by DOA for the local governments indicates that the certifications were required and that DOA staff approval was part of the online expense reporter, DOA did not have documentation to support that the local governments made these certifications or that DOA approved the reimbursement requests in the online expense reporter.

Context:

During FY 2020-21, DOA provided \$201.1 million in CRF funding to local governments under the Routes to Recovery Program. We interviewed DOA staff to understand the administration of the Routes to Recovery Program, including its use of the online expense reporter. To complete testing, we requested access to the online expense reporter as well as the underlying data in the expense reporter database.

Questioned Costs:

None.

Effect:

DOA did not provide documentation to support that the controls it implemented ensured only allowable costs were charged to the CRF.

Cause:

DOA staff indicated that the local government certifications and the DOA approval of the requests for reimbursement were maintained in the online expense reporter. However, the online expense reporter was decommissioned in July 2021 because DOA did not plan to complete a needed update to the underlying database.

 Recommendation

We recommend the Wisconsin Department of Administration ensure it maintains documentation related to federal program administration in accordance with federal regulations.

Finding 2021-101: Lack of Documentation—Coronavirus Relief Fund

COVID-19—Coronavirus Relief Fund (Assistance Listing number 21.019)

<u>Award Number</u>	<u>Award Year</u>
None	2020

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Administration: The Wisconsin Department of Administration agrees with the finding and recommendation.

Finding 2021-102: Emergency Rental Assistance Program—Subrecipient Monitoring**Background:**

The ERA Program was established in FY 2020-21 under the Consolidated Appropriations Act of 2021 and is administered by the U.S. Department of the Treasury. The ERA Program was established to assist households that are unable to pay rent or utilities. The DOA Division of Energy, Housing, and Community Resources

(DEHCR) was advanced \$322.2 million in ERA funding (ERA 1) in January 2021. DOA established the Wisconsin Emergency Rental Assistance (WERA) program using federal ERA Program funding.

To administer the WERA program, DOA contracted with community action agencies, including the Wisconsin Community Action Program (WISCAP) Association, and Energy Services, Inc., to intake and review individual applications for eligibility. The community action agencies and Energy Services, Inc., were responsible for entering the applications into DOA's eligibility and benefit determination system, which was used to determine and process the payment amount. The community action agencies and Energy Services, Inc., are subrecipients.

Criteria:

DOA administers federal programs that are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Uniform Guidance includes three requirements related to DOA's monitoring of subrecipients:

- 2 CFR s. 200.332 (a) requires DOA to communicate certain information to subrecipients at the time of the subaward, including the federal award identification number, the period of the federal award to DOA, the assistance listing number, the title of the federal award, and all requirements imposed by DOA on the subrecipient so that the federal award is used in accordance with federal requirements;
- 2 CFR s. 200.332 (b) requires DOA to evaluate each subrecipient's risk of noncompliance with federal regulations and the terms and conditions of each subaward for purposes of determining the appropriate nature and level of subrecipient monitoring; and
- 2 CFR s. 200.332 (d) through (f) requires DOA to monitor the activities of the subrecipient as necessary to ensure that the subrecipient uses the subaward for authorized purposes, complies with the terms and conditions of the subaward, and achieves performance goals.

Condition:

DOA did not comply with two of the three federal subrecipient monitoring requirements in administering the WERA program during FY 2020-21. First, DOA did not communicate all of the required information within the grant agreements to the community action agencies. For example, we found that DOA did not include the assistance listing number in the agreements and noted incorrectly in one section of the agreements that Uniform Guidance did not apply to the program. Further, DOA did not include information in the grant agreements indicating the community action agencies' responsibilities regarding suspension and debarment.

Second, DOA did not perform risk assessments specific to the WERA program on any of the community action agencies that DOA contracted with to administer the WERA program in FY 2020-21. Although DOA performed some subrecipient monitoring procedures, DOA cannot be assured that the monitoring procedures it completed were sufficient without having first completed a formal risk assessment.

Context:

During FY 2020-21, DOA reimbursed the community action agencies approximately \$1.4 million related to administrative costs. We discussed subrecipient monitoring requirements and procedures with DOA staff. We reviewed DOA's grant agreements to identify whether DOA included information required to be communicated to WERA subrecipients.

We requested information from DOA on risk assessment procedures it completed during FY 2020-21 and the related monitoring activities to assess whether DOA completed the required risk assessments and adequately monitored the WERA subrecipients.

Questioned Costs:

None.

Effect:

DOA did not comply with all of the subrecipient monitoring requirements for the WERA program. As a result, WERA subrecipients did not receive all the required information at the time of the subaward. In addition, because DOA did not evaluate each subrecipient's risk of noncompliance, it cannot be assured that the nature and level of the subrecipient monitoring procedures it completed were sufficient to ensure subrecipient compliance with the terms and conditions of the subrecipient agreement. In addition, without a risk assessment it would have been difficult for DOA to assess whether a subrecipient needed additional monitoring procedures to ensure compliance with requirements.

Cause:

DOA staff indicated that the agreements with the community action agencies did not include the assistance listing number for the federal ERA Program as that information was not available at the time the agreements were established. DOA did not subsequently communicate the assistance listing number to the agencies.

DOA staff stated that the community action agencies have a long-standing relationship with DOA as those agencies administer other DOA programs and are monitored independently for each of those respective programs. Therefore, DOA did not believe further risk assessment procedures were necessary.

 Recommendation

We recommend the Wisconsin Department of Administration:

- *inform the community action agencies of the assistance listing number for the Emergency Rental Assistance Program and the applicability of this program to the audit requirements of Uniform Guidance;*
- *ensure that all subaward agreements include all information required by federal regulations;*
- *establish and implement procedures to conduct risk assessments for each federal program and contract period; and*
- *provide additional training to DOA staff responsible for subrecipient monitoring procedures.*

Finding 2021-102: Emergency Rental Assistance Program—Subrecipient Monitoring

COVID-19—Emergency Rental Assistance Program
(Assistance Listing number 21.023)

<u>Award Number</u>	<u>Award Year</u>
ERA-2101060157	2021

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Administration: The Wisconsin Department of Administration agrees with the finding and recommendation.

Finding 2021-103: Emergency Rental Assistance Program—Prioritization of Applications

Background:

The ERA Program was established in FY 2020-21 under the federal Consolidated Appropriations Act of 2021 and is administered by the U.S. Department of the Treasury. The ERA Program was established to assist households that are unable to pay rent or utilities. DEHCR was advanced \$322.2 million in ERA 1 funding in January 2021. DOA established the WERA program using federal ERA Program funding.

To receive assistance through the WERA program, an individual must first apply for the Wisconsin Heating and Energy Assistance Program (WHEAP) and have an active application in DOA's eligibility and benefit determination system.

Criteria:

In administering the WERA program, DOA must follow federal Consolidated Appropriations Act of 2021 requirements to prioritize consideration of applications of households that either:

- have incomes less than or equal to 50.0 percent of the area median household income; or
- have one or more individuals who are unemployed as of the date of the application and have not been employed for the 90-day period preceding that date.

Further, Treasury guidance indicates that DOA must document in its policies and procedures its process for determining the prioritization of households in compliance with the Consolidated Appropriations Act.

Condition:

In administering the WERA program, DOA did not establish procedures to comply with the prioritization requirements of the federal Consolidated Appropriations Act of 2021. According to DOA's WERA manual, WERA funding will be provided for applications in the order they are received. Further, the nine community action agencies we contacted and Energy Services, Inc., indicated that they typically considered applications in the order received, but 8 of these 10 entities indicated they prioritized applications from individuals with pending eviction notices or court summonses for eviction.

Context:

During FY 2020-21, DOA made \$36.1 million in WERA benefit payments to either landlords or tenants using its eligibility and benefit determination system. We discussed the application procedures with DOA staff and staff at nine community action agencies and Energy Services, Inc., and we reviewed DOA's WERA manual.

Questioned Costs:

None.

Effect:

Because DOA processed WERA applications in the order they were received, it may not have met the federal ERA Program requirement to serve lower-income populations first.

Cause:

DOA indicated that a system for prioritization was not needed because it believed there was sufficient funding to provide assistance to all eligible applicants.

 Recommendation

We recommend the Wisconsin Department of Administration update its procedures to prioritize Wisconsin Emergency Rental Assistance program applications as required by federal regulations.

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Administration: The Wisconsin Department of Administration agrees with the finding and recommendation.

Finding 2021-104: Emergency Rental Assistance Program—Applicant Eligibility

Background:

The ERA Program was established in FY 2020-21 under the federal Consolidated Appropriations Act of 2021 and is administered by the U.S. Department of the Treasury. The ERA Program was established to assist households that are unable to pay rent or utilities. DEHCR was advanced \$322.2 million in ERA 1 funding in January 2021. DOA established the WERA program using federal ERA Program funding.

To administer the WERA program, DOA contracted with community action agencies, including the Wisconsin Community Action Program (WISCAP) Association, and Energy Services, Inc., to intake and review individual applications for eligibility. The community action agencies and Energy Services, Inc. were responsible for entering the applications into DOA's eligibility and benefit determination system, which was used to determine and process the benefit payment amount. To receive assistance through the WERA program, an individual must first apply for WHEAP and have an active application in DOA's eligibility and benefit determination system.

Criteria:

In accordance with Treasury guidance, to be eligible for DOA's WERA program, a household must be obligated to pay rent on a residential dwelling and meet all of the following criteria:

- at least one individual within the household qualifies for unemployment benefits or has experienced a reduction in household income, incurred significant costs, or experienced other financial hardship because of the public health emergency;
- at least one individual within the household is at risk of experiencing homelessness or housing instability; and
- the total household income is 80 percent or less of the median income in the county where the household is located.

Treasury guidance requires DOA to obtain documentation of household income and current, signed leases from individuals who apply for program benefits. If such information is unavailable, Treasury guidance indicates that individuals could provide written attestations.

If a household meets the eligibility requirements based on monthly income or based on a written attestation without further documentation, under Treasury guidance, DOA must re-determine household income every three months by requesting applicants to submit documentation or a written attestation.

To make benefit payments using WERA funding, DOA required the following documents:

- income and housing attestation form, which indicates that at least one individual within the household qualifies for unemployment benefits or has experienced a reduction in household income, incurred significant costs, or experienced other financial hardship because of the public health emergency; and that the applicant is

unable to pay rent or utility costs and is at risk of losing housing or facing eviction due to the public health emergency;

- renter verification form, which can be used in place of a written lease if one is not available; and
- supporting documentation such as leases, income statements, and utility bills.

Condition:

We tested a sample of 40 individuals who applied for and received benefits under the WERA program. In our testing, we found DOA did not have sufficient documentation in its eligibility and benefit determination system to demonstrate all of the applicants were eligible to receive benefits under the program. We found the following:

- for 5 of the 40 individuals, DOA did not have a completed income and housing attestation form;
- for 8 of the 40 individuals, DOA did not have documentation of a completed rental verification form or a lease; and
- for 6 of 26 individuals in our sample that required a three-month income re-certification, DOA did not have documentation to support that a timely income re-certification was completed.

Context:

During FY 2020-21, DOA processed \$36.1 million in ERA Program benefit payments using its eligibility and benefit determination system, of which:

- \$32.5 million was made to either landlords or tenants for rental assistance; and
- \$3.6 million was made to utility companies for utility assistance.

A total of 10,324 individuals were reported in DOA's eligibility and benefit determination system as having received rental and utility assistance benefit payments in FY 2020-21.

We discussed the application procedures with DOA staff and reviewed DOA's WERA manual. We selected a random sample of 40 individuals who received program benefits in FY 2020-21 and reviewed available documentation in DOA's eligibility and benefit determination system.

Questioned Costs:

For the exceptions we noted, we question \$22,800 in rental and utility assistance payments for which DOA did not have adequate supporting documentation in its eligibility and benefit determination system. We determined questioned costs as follows:

- \$4,155 in benefit payments made to five individuals for whom DOA did not have a completed income and housing attestation form or a completed rental verification form or a lease;

- \$10,399 in benefit payments made to three individuals for whom DOA did not have documentation of a completed rental verification form or a lease; and
- \$8,246 in benefit payments made to six individuals after the time frame within which they should have had an income re-certification.

We also question an undetermined amount for individuals that we did not test.

Effect:

DOA provided rental and utility assistance to individuals who may have been ineligible to receive the benefits, resulting in improper payments.

Cause:

DOA did not provide sufficient oversight and training to Energy Services, Inc., and the community action agencies that were responsible for entering the applicant information into DOA’s eligibility and benefit determination system and ensuring the appropriate supporting documentation was entered into the system.

Recommendation

We recommend the Wisconsin Department of Administration:

- *obtain the required documentation for the 14 individuals we identified or seek to recoup improper benefit payments it made to these individuals;*
- *update its procedures to ensure that it is following the U.S. Department of the Treasury guidance in administering the Wisconsin Emergency Rental Assistance program; and*
- *provide additional training and improve oversight over Energy Services, Inc., and the community action agencies to ensure only eligible individuals receive benefit payments.*

Finding 2021-104: Emergency Rental Assistance Program—Applicant Eligibility

(Assistance Listing number 21.023)

<u>Award Number</u>	<u>Award Year</u>
ERA-2101060157	2021

Questioned Costs: \$22,800

Type of Finding: Material Weakness, Material Noncompliance

Response from the Wisconsin Department of Administration: The Wisconsin Department of Administration agrees with the finding and recommendation.

Finding 2021-105: Emergency Solutions Grant Program—Monitoring Controls over Allowable Costs

Background:

The ESG Program provides grants to states, metropolitan cities, urban counties, and territories for:

- the rehabilitation or conversion of buildings for use as emergency shelter for the homeless;
- the payment of certain expenses related to operating emergency shelters;
- essential services related to emergency shelters and street outreach for the homeless; and
- homelessness prevention and rapid re-housing assistance.

In addition to regular ESG Program funding, the CARES Act provided additional funding through the ESG Program. These funds must be used to prevent, prepare for, and respond to the public health emergency for individuals and families who are homeless or receiving homeless assistance, and to support additional homeless assistance and homelessness prevention activities to mitigate the effects of the public health emergency.

DOA subawarded ESG Program funding to 24 coalitions of entities, each of which included a lead agency that was responsible for accepting and distributing the funding to other entities within the coalition. DOA's manual for the ESG Program indicates that lead agencies must complete a payment request form in order to be reimbursed for eligible expenditures incurred in the prior month. The payment request form requires lead agencies to specify the expenditures for which they request reimbursement in broad categories, such as "rapid re-housing rental assistance." The payment request form includes expenditures of the entities participating in a given coalition, and the completed form is the only documentation required for reimbursement. DOA performs monitoring through an annual review of client files to ensure expenditures were made for allowable purposes. As part of this annual review, DOA completes a client case file review in which it reviews information in three case files for each entity that receives program funds. Client case files contain confidential information, such as social security numbers, personal health information, and personal addresses for individuals fleeing domestic violence. DOA's review of case files helps to ensure that clients are eligible for assistance under the ESG Program.

Criteria:

Under 2 CFR s. 200.62, DOA is responsible for ensuring costs charged to federal grant programs it administers are allowable under federal statutes, federal regulations, and the terms and conditions of the federal award.

Under 2 CFR s. 200.332, DOA has responsibilities for subaward monitoring, which is an important step in ensuring only allowable costs are charged to the ESG Program. These responsibilities include:

- evaluating each subrecipient's risk of noncompliance with federal regulations and the terms and conditions of each subaward for

purposes of determining the appropriate nature and level of subrecipient monitoring; and

- monitoring the activities of the subrecipient as necessary to ensure that the subrecipient uses the subaward for authorized purposes, complies with the terms and conditions of the subaward, and achieves performance goals.

Further, DOA established monitoring procedures to allow it to monitor expenditures incurred by its ESG Program subrecipients. On an annual basis, DOA requires lead agencies to send DOA supporting documentation, including payroll records and invoices, for one month of ESG Program expenditures and three case files for each entity that received funding. DOA reviews this documentation to ensure only allowable costs are being charged to the ESG Program and only eligible individuals are being served by the ESG Program.

Finally, under 2 CFR s. 200.303 (e), DOA is required to take reasonable measures to safeguard protected personally identifiable information.

Condition:

DOA did not establish sufficient monitoring procedures for its review of subrecipient activities. During the public health emergency, DOA's monitoring procedures relied on the lead agencies and not DOA to select the month of expenditures and the three case files to review.

In addition, in FY 2020-21 DOA did not assess the risk of subrecipient noncompliance with federal regulations and the terms and conditions of federal awards when establishing its monitoring procedures.

Finally, DOA indicated that some entities used email to send their case files to be reviewed as part of DOA's annual monitoring, and that only approximately one-half of these entities redacted confidential information before emailing the case files. Of the 10 lead agencies we reviewed that had emailed case files, 2 lead agencies emailed case files that contained un-redacted confidential information.

Context:

In FY 2020-21, DOA expended \$13.6 million in ESG Program funding, including reimbursing the lead agencies \$13.4 million. Of the total funds expended, \$10.3 million was related to funding received under the CARES Act. We discussed subrecipient monitoring requirements and procedures with DOA staff. We requested information from DOA on the risk assessment procedures it completed during FY 2020-21, and its related monitoring activities.

Questioned Costs:

None.

Effect:

Because DOA did not establish sufficient monitoring procedures in its review of subrecipient activities, lead agencies may have charged unallowable costs to the ESG Program or provided services to ineligible individuals.

Confidential information was contained in case files that were sent un-redacted through email and could be at risk of being accessed by unauthorized individuals.

Cause:

DOA indicated that it conducted remote monitoring during the public health emergency and allowed the lead agencies to select the month for which expenditures and case files were reviewed in order to expedite the monitoring process. Further, DOA noted that the documentation submitted by the lead agencies often had issues that required follow-up, and DOA believed it had identified most of the issues by reviewing the information for the month and case files the lead agencies had chosen to submit.

DOA indicated that it did not perform an assessment of the risk of noncompliance by its subrecipients in FY 2020-21 because it believed it could rely on the risk assessment that it performed in FY 2018-19.

DOA indicated that it was unsuccessful in establishing a secure method for accepting client case files during the public health emergency. Therefore, DOA chose to use emails instead. DOA indicated that it is currently in the process of creating a secure method to accept files from the lead agencies.

Recommendation

We recommend the Wisconsin Department of Administration:

- *establish, implement, and consistently follow procedures for DOA staff to randomly select the month of program expenditures and the case files for which it plans to review supporting documentation;*
- *provide additional training to DOA staff responsible for subrecipient monitoring procedures; and*
- *ensure its method for accepting confidential information in client case files is secure.*

■ ■ ■ ■

Department of Health Services

The Wisconsin Department of Health Services (DHS) provides services to clients in communities and institutions, regulates certain care providers, and supervises and consults with local public and volunteer agencies. It administers state and federal programs involving public health, mental health, substance abuse, long-term care, services to people with disabilities, and medical care. In FY 2020-21, DHS administered \$10.2 billion in federal financial assistance.

We tested DHS's internal controls and compliance with grant requirements for seven type A programs: Pandemic Electronic Benefits Transfer (EBT) Food Benefits (Assistance Listing number 10.542), Supplemental Nutrition Assistance Program (SNAP) Cluster (Assistance Listing numbers 10.551/10.561), Food Distribution Cluster (Assistance Listing numbers 10.565/10.568/10.569), Coronavirus Relief Fund (CRF) (Assistance Listing number 21.019), Coronavirus State and Local Fiscal Recovery Funds (Assistance Listing number 21.027), Epidemiology and Laboratory Capacity for Infectious Diseases (ELC) (Assistance Listing number 93.323), and Medicaid Cluster (Assistance Listing numbers 93.775/93.777/93.778). We also tested HIV Care Formula Grants (Assistance Listing number 93.917) and Block Grants for Prevention and Treatment of Substance Abuse (Assistance Listing number 93.959), which are type B programs. We identified the following internal control and compliance concerns:

- Medical Assistance Program—Payments to Terminated Providers (Finding 2021-300);
- Epidemiology and Laboratory Capacity for Infectious Diseases Program—Subrecipient Monitoring (Finding 2021-301);
- Supplemental Nutrition Assistance Program—EBT Card Security (Finding 2021-302);

- Epidemiology and Laboratory Capacity for Infectious Diseases Program—Performance Reporting (Finding 2021-303);
- Medical Assistance Program—Audit Requirements for Managed Care Providers (Finding 2021-304);
- Coronavirus Relief Fund—Skilled Nursing Facility Incentive Program (Finding 2021-305);
- HIV Care Formula Grants Program—Eligibility (Finding 2021-306);
- Coronavirus Relief Fund—Unallowable Costs (Finding 2021-307); and
- Block Grants for Prevention and Treatment of Substance Abuse—Federal Funding Accountability and Transparency Act Reporting (Finding 2021-308).

In addition, we followed up on the progress of DHS in addressing Findings 2020-300 through 2020-310 of our FY 2019-20 audit (report 21-6), as well as Finding 2019-304 of our FY 2018-19 audit (report 20-3) and Findings 2018-301 and 2018-303 of our FY 2017-18 audit (report 19-3). DHS implemented corrective actions to address our concerns related to Findings 2020-300, 2020-302, 2020-305, 2020-308, 2020-310, 2019-304, 2018-301, and to partially address Findings 2020-301, 2020-303, 2020-306, 2020-307, and 2018-303. DHS did not implement corrective actions to address our concerns related to Findings 2020-304 and 2020-309. It is important for DHS to continue to work to resolve these findings. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of each finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

Finding 2021-300: Medical Assistance Program—Payments to Terminated Providers

Background:

The U.S. Department of Health and Human Services provides funding to the Department of Health Services (DHS) for the Medical Assistance (MA) Program. Funding under the MA Program is used to assist states in maintaining and expanding health care services to certain categories of low-income persons. We first reported noncompliance with MA Program regulations for making payments to providers subsequent to their termination dates during our FY 2017-18 audit (report 19-3). We again identified noncompliance during FY 2019-20 and, in report 21-6, we recommended that DHS recoup improper MA Program payments it made to ineligible providers and implement a timely process to identify improper payments made to terminated MA Program providers for services provided after their termination dates (Finding 2020-302).

Criteria:

As required by 42 CFR ss. 431.107 and 447.10, DHS is to ensure each provider of medical services that participates in the MA Program and receives payment is licensed in accordance with federal, state, and local laws and regulations. Chapter DHS 105, Wis. Adm. Code, further requires all MA Program providers to be certified in order to provide medical services, and s. DHS 106.06 (4), Wis. Adm. Code, authorizes DHS to suspend or terminate the certification of health care providers under the MA Program. Providers that are suspended or terminated are ineligible to receive MA Program payments, except for medical services provided prior to the date of the suspension or termination, and DHS may recover payments made in error.

Condition:

DHS authorizes the MA Program fiscal agent to terminate providers because they are no longer certified, including for failure to renew a required license. The fiscal agent enters information on terminated providers into the Medicaid Management Information System (MMIS), which verifies an MA Program provider's status when the provider's claim for payment is processed. The fiscal agent establishes the effective termination date as the date the termination event occurred. Information on a termination event is rarely available to the fiscal agent prior to the event, and termination information is typically entered into MMIS subsequent to the date that the provider became ineligible to provide services under the MA Program.

In August 2020, DHS developed a weekly report to identify instances in which payments were made to providers who were identified as eligible in MMIS at the time the claim was processed but who were subsequently identified to be ineligible. DHS then took steps to recoup such payments. However, during our FY 2020-21 audit, we identified 5 providers that received payment for all or a portion of 518 MA Program claims that were for services provided after the provider's effective termination date.

Context:

As of June 30, 2021, DHS had more than 152,900 eligible providers within the MA Program. During FY 2020-21, the fiscal agent processed over 23.5 million claims in MMIS. To review if payments were made only to eligible providers, we obtained a listing of MA Program providers that were terminated during FY 2020-21 and the effective termination date for each provider. The fiscal agent terminated 10,196 providers during FY 2020-21. To identify if claims were paid to providers subsequent to a provider's effective termination date, we performed a match between a listing of these providers and the FY 2020-21 MA Program fee-for-service claims data. We then reviewed the weekly report to determine if any matched claims were identified in the report. Finally, we interviewed DHS and fiscal agent staff regarding payments not identified by the report.

Questioned Costs:

We estimated that a total of \$215,480 in improper MA Program payments were paid with federal funds during FY 2020-21. This estimate was calculated by applying the applicable federal medical assistance percentage (FMAP) to 518 MA Program claims for payments that we found DHS made to providers who were ineligible to receive payments at the time the services were provided.

Effect:

We found that DHS did not identify or seek to recoup MA Program claims to all providers who did not meet applicable laws and requirements at the time services were provided. DHS received federal reimbursement for payments made to the ineligible providers resulting in an improper payment of federal funds.

Cause:

The weekly report developed by the fiscal agent did not accurately identify all instances in which payments were made to providers who were subsequently identified to be ineligible. For example, for certain claims where a range of service dates are applicable, the weekly report focused only on the end date instead of considering the entire range of dates, which would have identified additional overpayments to pursue.

Recommendation

We recommend the Wisconsin Department of Health Services:

- seek to recoup improper Medical Assistance Program payments it made to 5 ineligible providers during FY 2020-21 for services provided after their effective termination dates; and
- implement by June 30, 2022, changes to its weekly report to accurately identify all instances in which payments were made to providers who were subsequently identified to be ineligible, including identifying all claims where providers were terminated between the beginning and ending date of a service range.

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services agrees with the finding and recommendation.

Finding 2021-301: Epidemiology and Laboratory Capacity for Infectious Diseases Program—Subrecipient Monitoring

Background:

The Centers for Disease Control and Prevention (CDC) provides funding to DHS for the ELC program. DHS provided a portion of the funding under this program to subrecipients, including some that received multiple subawards for different ELC projects during FY 2020-21.

Criteria:

Federal programs at DHS are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Uniform Guidance includes three requirements related to DHS's monitoring of subrecipients:

- under 2 CFR s. 200.332 (a), DHS is required to communicate certain information to subrecipients at the time of the subaward, including the federal award identification number, the period of the federal award to DHS, the assistance listing number, and the title of the federal award;
- under 2 CFR s. 200.332 (b), DHS is required to evaluate each subrecipient's risk of noncompliance with federal regulations and the terms and conditions of each subaward for purposes of determining the appropriate nature and level of subrecipient monitoring; and
- under 2 CFR s. 200.332 (d) through (f), DHS is required to monitor the activities of the subrecipient as necessary to ensure that the subrecipient uses the subaward for authorized purposes, complies with the terms and conditions of the subaward, and achieves performance goals.

DHS had established a central grant agreement template to include all required information to communicate to subrecipients, and a standard risk assessment form, and made it available to all staff administering grant programs. DHS further established central policies to ensure compliance with federal subrecipient monitoring requirements, including the requirement to complete risk assessments for each subaward for each contract period.

Condition:

DHS did not complete 106 of 203 required risk assessments for ELC subawards made to subrecipients during FY 2020-21. Although DHS performed some monitoring activities for these subawards, DHS cannot be assured that the monitoring activities it completed were sufficient without first completing a formal risk assessment.

Context:

DHS annually subawards federal funds to counties, tribes, cities, and nonprofit organizations to support ELC program objectives. During FY 2020-21, DHS expended \$173.7 million in ELC program funding, including \$15.6 million in payments to 99 subrecipients. We discussed subrecipient monitoring requirements and procedures with DHS staff. We requested information from DHS on risk assessment procedures it completed during FY 2020-21 and the related monitoring activities to assess whether DHS completed the required risk assessments and adequately monitored the program subrecipients. DHS made multiple subawards to some subrecipients. Because DHS completes risk assessments for each subaward, the number of required risk assessments was higher than the number of subrecipients.

Questioned Costs:

None.

Effect:

Because DHS did not evaluate each subrecipient's risk of noncompliance, it cannot be assured that the nature and level of subrecipient monitoring procedures it completed were sufficient to ensure that the subrecipients used the funds appropriately for each subaward.

Cause:

DHS staff administering the ELC program did not follow all federal requirements or DHS policies related to subrecipient monitoring. DHS staff did not follow procedures and complete risk assessments for its ELC subawards with local and tribal health departments. DHS staff indicated that because risk assessments had been completed for these entities by other DHS staff for other federal program subawards, staff did not believe they were required for the ELC subawards. DHS staff also indicated that they believed risk assessments were needed only once during the grant award project period, which may be multiple years, instead of completing them for each annual contract period. Finally, DHS did not have a central process to manage or track whether required risk assessments were completed in a timely manner for all ELC subawards.

 Recommendation

We recommend the Wisconsin Department of Health Services:

- *train all staff administering grant programs on existing policies for subrecipient monitoring requirements;*
- *follow policies for conducting risk assessments for each federal subaward and for each federal program and contract period; and*
- *implement a tracking system to ensure that it conducts risk assessments for all subawards in a timely manner.*

6 NU50CK000534-02-00	2021

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services agrees with the finding and recommendation.

Finding 2021-302: Supplemental Nutrition Assistance Program—EBT Card Security

Background:

In administering SNAP, DHS is responsible for determining eligible participants. Benefits are provided to these eligible participants through an EBT card with a monetary balance that can be used by the participant to purchase food. DHS contracts with a fiscal agent to mail cards to participants and to maintain a participant's monetary balance. Each card has an address printed on it that requests that lost cards be returned to the fiscal agent or to DHS.

Criteria:

Under 7 CFR s. 274.8 (b) (3), DHS is required to maintain adequate security over, and documentation of, EBT cards to prevent their theft, embezzlement, loss, damage, destruction, unauthorized transfer, negotiation, or use. DHS procedures require two persons to be present when returned EBT cards are collected, processed, and destroyed, unless a waiver of this two-person requirement is approved by a supervisor. These procedures also include maintaining a log that identifies the EBT cards that were

destroyed, the date of destruction, and the signature of the two employees present for the destruction. This log is required to be reviewed monthly by a DHS supervisor.

Condition:

DHS did not provide documentation that two persons were present when returned EBT cards were destroyed for the six weeks we selected for review. Further, for 11 of 12 months during FY 2020-21, DHS indicated that it did not follow its procedures to have two persons present. DHS also did not provide documentation that a supervisor had waived the two-person requirement or had reviewed the returned-card log each month.

Context:

We discussed with DHS its procedures for the destruction of returned EBT cards. DHS reported that approximately 40 EBT cards are returned directly to DHS for destruction each month. To review DHS's process and documentation of EBT card destruction, we selected logs for six weeks of FY 2020-21.

Questioned Costs:

None.

Effect:

Proper security over returned EBT cards was not maintained throughout most of FY 2020-21, which increased the risk of theft, unauthorized transfer, negotiation, or improper use of the EBT cards.

Cause:

DHS staff responsible for this process reported that the requirement to have two employees present during the destruction of returned EBT cards was waived by a DHS supervisor because it was not always feasible during the public health emergency. DHS procedures did not require documentation of the duration for which a waiver was authorized nor did the procedures specify what alternative should have been implemented to maintain security over returned EBT cards during the public health emergency. Further, DHS procedures did not require documentation of the monthly supervisory review.

Recommendation

We recommend the Wisconsin Department of Health Services:

- *update its written procedures to require documentation of any approval to waive the two-person requirement, including the reasons a waiver was requested, the duration of the waiver, and steps required to mitigate the increased risk; and*
- *document the supervisor's monthly review of the returned-card log.*

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services agrees with the finding and recommendation.

Finding 2021-303: Epidemiology and Laboratory Capacity for Infectious Diseases Program—Performance Reporting

Background:

The CDC provides funding to DHS for the ELC program. This funding is used for various projects to detect, respond, prevent and control infectious diseases. During FY 2020-21, DHS expended \$173.7 million under the program.

Criteria:

Under 45 CFR s. 75.342 (b) (1), DHS is required to submit performance reports, including progress reports, to the federal government. In addition, 2 CFR s. 200.334 requires that DHS retain documents supporting a federal award for three years after the final award expenditure report is submitted.

Condition:

DHS staff did not retain copies of performance information DHS entered into a specified federal system, which overwrites most previously reported information when a subsequent report is entered. Although some cumulative information was accessible for certain activities from the federal system, DHS could not provide us with all reported information it had entered at specific dates. DHS also could not provide any documentation to support three of the eight performance reports for which we requested information.

Context:

We interviewed DHS staff to gain an understanding of the procedures for compiling information for the ELC financial reports and performance reports, including progress

reports, and submitting the reports to the federal government. Based on federal requirements and guidance, DHS was required to complete and submit 96 financial reports and 45 performance reports to CDC during FY 2020-21. We requested copies of 8 performance reports and related supporting documentation. To fulfill our request, DHS requested and received certain performance information directly from CDC, which identified the specific information DHS had entered into the federal system and the date the information was entered.

Question Costs:

None.

Effect:

DHS did not comply with federal requirements to retain documentation to support federal awards. DHS cannot be assured that it reported complete and accurate information to enable CDC to assess the outcomes of the ELC program.

Cause:

DHS indicated that performance reporting responsibilities are decentralized among staff working on specific ELC activities. DHS did not establish formal, written procedures for the ELC performance reports, including the steps needed to compile the information, a process for retaining copies of information submitted for each required report in a central location, and a process for retaining all supporting documentation in a central location.

Recommendation

We recommend the Wisconsin Department of Health Services:

- *develop formal, written procedures to identify the steps needed to compile accurate and complete information for the ELC performance reports;*
- *retain in a central location for the time period required by federal regulations copies of all performance reports it submits to the federal government;*
- *retain in a central location for the time period required by federal regulations all documentation that is used to support information included in each performance report it submits to the federal government; and*
- *provide training to staff responsible for preparing reports.*

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Health Services: The Department of Health Services agrees with the finding and recommendation.

Finding 2021-304: Medical Assistance Program—Audit Requirements for Managed Care Providers

Background:

The U.S. Department of Health and Human Services provides funding to DHS for the MA Program, which provides health care services to certain categories of low-income persons. To provide medical services to some eligible participants, DHS contracts with managed care providers that are responsible for managing patient care for several programs, including managed care organizations for the Family Care program and health maintenance organizations and prepaid inpatient hospital plans for the BadgerCare Plus program. DHS pays managed care providers a capitation rate each month for each eligible participant. DHS establishes these rates from financial information it receives from these providers, including required financial templates and audited financial statements. Further, DHS periodically monitors each managed care provider through reviews of the financial information reported and used in establishing these capitation rates.

Criteria:

Federal regulations required that DHS obtain specific financial information from managed care providers to assist in setting capitation rates and ensuring financial solvency. Applicable federal regulations include:

- under 42 CFR s. 438.3 (m), states must contractually require each managed care provider to submit each year an audited financial report conducted in accordance with generally accepted accounting principles and generally accepted auditing standards specific to the MA contract;
- under 42 CFR s. 438.602 (e), states must periodically, but no less than once every three years, conduct an audit, or contract for an audit, of the accuracy, truthfulness, and completeness of certain financial data submitted by each managed care provider; and
- under 42 CFR s. 438.602 (g), states must post the results of the periodic audits conducted for each managed care provider to the state's website.

Condition:

DHS did not obtain, nor provide, audited financial statements for 1 of 7 managed care providers we reviewed. Although this provider, a prepaid inpatient hospital plan, submitted financial data required by DHS for use in the calculation of capitation rates, DHS did not provide audited financial statements for the provider.

In addition, DHS posted to its website the results of the periodic audits conducted for health maintenance organizations in a summary rather than specifically identifying the results of the review for each provider.

Context:

During FY 2020-21, DHS contracted with 26 managed care providers. Depending upon the type of managed care provider, DHS has varying requirements for the submission of financial information and different processes for completing periodic audits. For instance, DHS has differing templates for the submission of required financial information depending on the type of managed care provider. In addition, DHS has contracted with an outside audit firm to perform periodic audits of 18 health maintenance organizations and prepaid inpatient hospital plans, and has a memorandum of understanding with the Wisconsin Office of the Commissioner of Insurance to perform reviews of 8 managed care organizations.

Questioned Costs:

None.

Effect:

Without submission of audited financial statements, DHS does not have assurance from an independent auditor that the financial statements are fairly presented and free of material misstatements. Because this information is used, in part, in establishing capitation rates, DHS does not have independent assurance that financial information used in the calculation of capitation rates is accurate. In addition, summary results of the periodic audits for health maintenance providers do not provide sufficient detail on the state's website for the public to assess the audit results for each managed care provider.

Cause:

Although required by its contracts with the prepaid inpatient hospital plans, DHS indicated that it had not enforced the submission of financial statements for this particular prepaid inpatient hospital plan because it is part of a county government and separate financial statements specific to the MA contract were not prepared. In posting the periodic audits of health maintenance organizations, DHS indicated that it considered disclosure of information specific to an audited provider to be sensitive and instead determined that reporting information in summary was appropriate.

 Recommendation

We recommend the Wisconsin Department of Health Services:

- *ensure it requires and obtains audited financial statements specific to the Medical Assistance contract from all managed care providers each year; and*

- ensure it complies with all federal requirements for posting audit results for each managed care provider to the state website.

Finding 2021-304: Medical Assistance Program—Audit Requirements for Managed Care Providers

Medical Assistance Program (Assistance Listing number 93.778)

<u>Award Numbers</u>	<u>Award Years</u>
2005WI5MAP	2020
2105WI5MAP	2021

Questioned Costs: None

Type of Finding: Noncompliance

Response from the Wisconsin Department of Health Services: The Department of Health Services agrees with the recommendation to ensure it requires and obtains audited financial statements specific to the Medical Assistance contract from all managed care providers each year.

The Department of Health Services disagrees with the finding and recommendation that it does not comply with all federal requirements for posting audit results for each managed care provider to the state website.

Rebuttal from the Wisconsin Legislative Audit Bureau: In its response to Finding 2021-304, DHS disagreed in part with our recommendation. Specifically, DHS disagreed with our interpretation of the requirement in 42 CFR s. 438.602(g), which states that the results of any audits under paragraph (e) of this section be posted to the state’s website. Under 42 CFR 438.602(e), the State is required to conduct periodic audits of the accuracy, truthfulness, and completeness of the encounter and financial data submitted by, or on behalf of, each managed care provider. It is not our interpretation that DHS must post on the State’s website the entire audit for each provider. However, when DHS posted results of the audits in aggregate or summary format, DHS did not provide sufficient detail to allow a reader to assess the results of the audits for each managed care provider. In response, DHS could choose to reach out to the federal government to seek further clarification. As part of our FY 2021-22 audit, we will follow up on the status of this finding.

Finding 2021-305: Coronavirus Relief Fund—Skilled Nursing Facility Incentive Program

Background:

The Department of Administration (DOA) contracted with DHS to administer the Skilled Nursing Facility Incentive Program. The program was funded with \$30.0 million from the CRF. The goal of the program was to increase the capacity of skilled nursing facilities to accept patients being discharged from acute-care hospitals. The program was in operation from October 18, 2020, through December 30, 2020. DHS provided an incentive payment of \$2,900 to participating skilled nursing facilities for each person directly admitted from an acute-care hospital to the skilled nursing facility.

Criteria:

DHS is required to follow U.S. Department of the Treasury guidance that requires it to keep records sufficient to demonstrate the CRF funding was used in accordance with federal regulations. Under 2 CFR s. 200.303, DHS must establish and maintain effective internal control over its federal awards to provide reasonable assurance that it is managing its federal awards in compliance with federal statutes, regulations, and the terms and conditions of the award.

Condition:

DHS could not provide documentation of the approval of the calculation of the amount paid to each facility for the Skilled Nursing Facility Incentive Program payments. The calculation involved examining skilled nursing facility admission information to ensure duplicate payments were not made for the same patient over the term of the program.

Context:

During FY 2020-21, DHS provided incentive payments to a total of 358 skilled nursing facilities who participated in the Skilled Nursing Facility Program. We requested documentation of the program from DHS staff, including written procedures on the administration of the program; documentation of the attestations made by the facilities; documentation of the approval of the payments, including the calculation of the amount paid and the facility; and the underlying data used to calculate the payment amount.

Questioned Costs:

None.

Effect:

DHS is in noncompliance with federal regulations that require it to maintain documentation related to its administration of federal funding. Without adequate documentation, it is not clear that the payments were reviewed to ensure amounts were calculated correctly and for the correct facility.

Cause:

DHS staff indicated that the employees who administered this program are no longer with the department. DHS staff had significant difficulty providing documentation related to the program, including the underlying data necessary for our auditors to

substantiate the payments. After our first inquiries and requests for information on March 2, 2022, and March 8, 2022, we were provided the underlying data used to calculate payments on April 13, 2022. Further, DHS staff indicated that this program was established in a short time frame during the public health emergency, which may have contributed to the documentation issues.

Recommendation

We recommend the Wisconsin Department of Health Services ensure it maintains documentation related to federal program administration in accordance with federal regulations.

Questioned Costs: None.

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services agrees with the finding and recommendation.

Finding 2021-306: HIV Care Formula Grants Program—Eligibility

Background:

DHS receives funding from the U.S. Department of Health and Human Services Health Resources and Services Administration (HRSA) to administer the HIV Care Formula Grants program. The AIDS Drug Assistance Program (ADAP), which is authorized under the HIV Care Formula Grants program, provides low-income Wisconsin residents living with HIV access to medication and medical services. ADAP covers the cost of medications, medication deductions, and health insurance premiums for eligible individuals.

Criteria:

Under 42 USC 300ff-26 (b), to receive benefits under the ADAP program an individual must have a medical diagnosis of HIV/AIDS and be low-income as defined by the state. DHS defined the low-income threshold as households with gross income at or below 300 percent of the federal poverty level. DHS also established a policy manual to include documentation requirements to determine eligibility, including certain information that must be verified during the eligibility determination process. According to federal regulations and DHS policy, eligibility is recertified every six months. When a participant is determined to be eligible, DHS requires that it send letters to the participant and relevant pharmacies indicating that the participant is

eligible and, if the participant has other insurance coverage, that ADAP is the payer of last resort.

Condition:

Without an automated system to perform certain calculations, DHS manually reviews ADAP applications and related supporting documentation. There is no established review process for eligibility determinations. Of the 25 participants we selected for review, we identified one who was ineligible for ADAP funding because this participant exceeded the established income requirement. In addition, DHS could not provide documentation that it had sent a letter to a different participant in March 2021 communicating that the participant was eligible for ADAP.

Context:

We interviewed DHS staff to gain an understanding of the procedures for reviewing ADAP applications and completing the eligibility determination process. To review DHS's eligibility determination process, we reviewed the DHS ADAP policy manual and obtained from DHS a listing of participants active during FY 2020-21. To review compliance with eligibility requirements, we selected 25 of 1,352 participants.

Questioned Costs:

We determined that \$3,728 in unallowable costs were claimed in federal funds during FY 2020-21. We also question an undetermined amount for other ADAP participants for whom DHS continued to claim federal funds when participant income may have exceeded established income requirements.

Effect:

We found DHS did not comply with its established income requirement for ADAP funding. As a result, DHS granted ADAP funding to an ineligible individual and inappropriately claimed federal funds during FY 2020-21. In addition, DHS cannot be assured that it communicated complete and accurate information to participants about their eligibility status.

Cause:

In October 2020, DHS did not document whether it clarified inconsistent information noted for the household size on an initial application. During the recertification of eligibility in March 2021, DHS identified that the household size was incorrect, which resulted in the participant's income exceeding established income requirements. DHS subsequently terminated the participant from the program. DHS indicated that because it did not clarify the household size appropriately at the time of initial application, it did not seek to recoup any costs incurred during the period the participant was ineligible.

Regarding its requirement to communicate to participants, in March 2020 DHS transitioned from a paper to an electronic document management process and developed a template to compile the letters. DHS indicated that some letters may have been misplaced or the template was not saved for each participant during the transition to these new processes.

☑ Recommendation

We recommend the Wisconsin Department of Health Services:

- return to the federal government the unallowable costs identified;
- train all staff reviewing eligibility applications on existing policies for verification requirements;
- retain all documentation to support participant eligibility determinations; and
- communicate the eligibility status to all participants.

5 X07HA00027-31-00	4/1/2021–3/31/2022

Questioned Costs: \$3,728

Type of Finding: Noncompliance

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services agrees with the finding and recommendation.

Finding 2021-307: Coronavirus Relief Fund—Unallowable Costs***Background:***

During FY 2019-20, the State of Wisconsin was advanced \$2.0 billion in federal funds from the CRF as part of the CARES Act, which was enacted in March 2020. DOA administers the CRF and works with other state agencies to identify allowable uses of the CRF. DOA contracted with DHS to administer various programs established by DHS to respond to the public health emergency.

Criteria:

DHS is responsible for ensuring costs charged to federal grant programs it administers are allowable under federal statutes, federal regulations, and the terms and conditions of the federal award. According to Section 5001 of the CARES Act, states are required to use payments from the CRF to fund:

- necessary expenditures incurred due to the public health emergency;
- costs that were not accounted for in the State's budget that was in place when the CARES Act was enacted; and

- costs that were incurred between March 1, 2020, and December 30, 2020. The Consolidated Appropriations Act, 2021, which was enacted in December 2020, extended the time period during which allowable costs could be funded by the CRF to December 31, 2021.

The U.S. Department of the Treasury established guidance for recipients of the CRF to provide additional clarity and its interpretation on the allowable uses of the CRF. For example, Treasury guidance indicates that administrative expenses may be allowable if the administrative expenses represent an increase over previously budgeted amounts and are limited to what is necessary. Treasury guidance indicates that charging indirect costs to the CRF is not allowable.

Condition:

During FY 2020-21, DHS charged the CRF \$72,523 in STAR development costs, which are assessed annually by DOA to recover the State's costs to develop STAR, the State's enterprise resource planning system implemented in FY 2015-16. We note that the FY 2020-21 STAR development costs allocation to DHS increased by \$30,121, or 2.3 percent over the prior year. These costs do not meet the requirements of the CARES Act as necessary expenditures incurred to address the public health emergency that were not accounted for in the budget.

In addition, DHS charged the CRF \$456,196 in central human resources costs that were allocated by the DOA Division of Personnel Management. These costs relate to the oversight and management of the State's human resources laws, policies, and procedures performed by DOA, and would have included costs incurred by DOA in the hiring of employees to address the public health emergency. However, we are concerned that the total assessment to DHS increased by \$210,998, or 2.8 percent over the prior year, and yet the CRF was charged more than twice the amount of the increase.

Context:

During FY 2020-21, DHS used CRF funding for \$435.7 million in expenditures. We reviewed various programs administered by DHS and conducted testing to assess if expenditures met the requirements of Section 5001 of the CARES Act and Treasury guidance. To complete our testing, we requested supporting documentation for the expenditure transactions and interviewed DHS staff.

Questioned Costs:

We question the total STAR development cost assessment of \$72,523, as these costs would not have been incurred to address the public health emergency. We question an undetermined amount of the DOA Division of Personnel Management assessment as the amount charged to the CRF was higher than the total increase in the share of the assessment billed to DHS.

Effect:

Because unallowable costs were charged to the CRF, DHS was not in compliance with federal requirements for the use of CRF funding.

Cause:

DHS indicated that it used its established cost allocation methodology to allocate STAR and DOA Division of Personnel Management costs, and DHS believed this was a

reasonable methodology for allocating these costs. DHS also expressed that STAR and DOA Division of Personnel Management assessments increased from FY 2019-20 to FY 2020-21, providing an indication that spending related to the public health emergency had an effect on the allocation and thus some portion of these costs should be funded by federal grants, such as the CRF.

Recommendation

We recommend the Wisconsin Department of Health Services:

- *return the \$72,523 in questioned costs related to the allocation of STAR development costs to the Wisconsin Department of Administration (DOA) for reallocation to allowable uses or return the \$72,523 to the federal government; and*
- *reassess and determine the appropriate amount of the DOA Division of Personnel Management allocation to charge to the Coronavirus Relief Fund and return the remaining amount to DOA for reallocation to allowable uses or return the amount to the federal government.*

Finding 2021-307: Coronavirus Relief Fund—Unallowable Costs

COVID-19—Coronavirus Relief Fund (Assistance Listing number 21.019)

<u>Award Number</u>	<u>Award Year</u>
None	2020

Questioned Costs: \$72,523

Type of Finding: Noncompliance

Response from the Wisconsin Department of Health Services: The Wisconsin Department of Health Services disagrees with the finding and recommendation.

Rebuttal from the Wisconsin Legislative Audit Bureau: In its response to Finding 2021-307, DHS disagreed with our finding regarding allowable costs and the CRF. The CARES Act states that costs charged to the CRF must be:

- necessary expenditures incurred due to the public health emergency;
- not accounted for in the State's budget that was in place when the CARES Act was enacted; and
- incurred prior to December 31, 2021.

Treasury guidance does not address the appropriateness of allocating costs to the CRF and further indicates that administrative expenses may be allowable if they represent an increase over previously budgeted amounts.

Although DHS indicated that it followed its established cost allocation plans in charging the questioned costs to the CRF, the STAR development costs are an

allocation of costs from the development of the State's ERP System, which was implemented in FY 2015-16, and outside the period of performance of the CRF. These costs do not appear to be necessary costs incurred to address the public health emergency. We further note that both the STAR development costs and the central human resources allocation were reoccurring costs that DHS would have been planning for when the CARES Act was passed. In response to this finding, DHS could choose to reach out to the federal government to seek further clarification. As part of our FY 2021-22 audit, we will follow up on the status of this finding.

Finding 2021-308: Block Grants for Prevention and Treatment of Substance Abuse—Federal Funding Accountability and Transparency Act Reporting

Background:

The U.S. Department of Health and Human Services Substance Abuse and Mental Health Services Administration provides funding to DHS for the Substance Abuse Prevention and Treatment Block Grant (SABG) program, also referred to as the Block Grants for Prevention and Treatment of Substance Abuse program. DHS provided a portion of SABG funding to subrecipients during FY 2020-21.

SABG subawards of \$30,000 or more are subject to Federal Funding Accountability and Transparency Act (FFATA) reporting. The intent of FFATA is to provide information about federal awards to allow the public access to the information to hold the government accountable for decisions.

Criteria:

Under 2 CFR s. 170, DHS is required to report in the FFATA Subaward Reporting System (FSRS) subawards of \$30,000 or more, including any amendments or modifications to a subaward. This reporting is to be completed no later than the last day of the month following the month in which the subaward was made. For example, if DHS signed a subaward contract on November 7, 2020, it must be reported in FSRS no later than December 31, 2020.

Condition:

We found that none of the 12 SABG subawards we reviewed were reported in a timely manner in FSRS, including one subaward totaling \$245,000 that had yet to be reported in FSRS at the time of our fieldwork in April 2022. The contract for this subaward was signed on June 2, 2021, and, therefore, DHS should have reported the subaward in FSRS by July 31, 2021. The contracts for the remaining 11 SABG subawards we reviewed, totaling \$1.3 million, were signed between November 3, 2020, and February 12, 2021. DHS should have reported these subawards in FSRS between December 31, 2020, and March 31, 2021, but did not do so until April 28, 2021. For each of these 11 subawards, we also found DHS incorrectly reported the subaward contract signature date.

Context:

During FY 2020-21, DHS expended approximately \$21.5 million in subawards for the SABG program. We interviewed DHS staff to gain an understanding of the procedures for compiling information for subawards and reporting the information in FSRS. We found that DHS staff periodically identified subawards required to be reported in FSRS

using information compiled from several DHS systems. We reviewed 12 of 141 SABG subawards, totaling \$1.6 million, that were awarded during FY 2020-21. We requested from DHS screenshots from FSRS and subaward documentation to support the information reported in FSRS.

Questioned Costs:

None.

Effect:

DHS is not in compliance with FFATA requirements for the reporting of subawards in FSRS.

Cause:

DHS indicated that it prioritized other federal reporting during the public health emergency and did not consistently review information that was required to be reported in FSRS. DHS did not accurately report the date the subaward contract was signed in FSRS because it did not compile this key data element for its subawards in the same manner as it did for other required key data elements.

Recommendation

We recommend the Wisconsin Department of Health Services improve its written procedures related to the Federal Funding Accountability and Transparency Act reporting process, including:

- *reviewing monthly that all required subawards are reported;*
- *identifying and reporting accurately all key data elements for each subaward; and*
- *ensuring all subawards, including any amendments or modifications to a subaward, greater than \$30,000 are reported in the Federal Funding Accountability and Transparency Act Subaward Reporting System in a timely manner.*

1B08TI083482-01	10/1/2020-9/30/2022

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Health Services: The Department of Health Services agrees with the finding and recommendation.

Department of Public Instruction

The Wisconsin Department of Public Instruction (DPI) provides guidance and technical assistance to support public elementary and secondary education in Wisconsin. It also provides assistance for the development and improvement of public and school libraries. In FY 2020-21, DPI administered \$1.0 billion in federal financial assistance.

We tested DPI's internal controls and compliance with grant requirements for four type A programs: Child Nutrition Cluster (Assistance Listing numbers 10.553/10.555/10.556/10.559/10.579), Title I Grants to Local Educational Agencies (Assistance Listing number 84.010), Special Education Cluster (IDEA) (Assistance Listing numbers 84.027/84.173), and Education Stabilization Fund (Assistance Listing number 84.425). We identified the following internal control and compliance concerns:

- Education Stabilization Fund—ESSER Reporting (2021-400); and
- Education Stabilization Fund—Federal Funding Accountability and Transparency Act Reporting (2021-401).

In addition, we followed up on DPI's progress in addressing Finding 2020-400 of our FY 2019-20 audit (report 21-6). DPI implemented corrective actions to address this finding. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of the finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

Finding 2021-400: Education Stabilization Fund—ESSER Reporting

Background:

The U.S. Department of Education provides funding to DPI for several subprograms of the Education Stabilization Fund grant program, which includes the Elementary and Secondary School Emergency Relief (ESSER) Fund. The purpose of the ESSER Fund is to provide local educational agencies (LEAs), including charter schools that are LEAs, with emergency relief funds to address the effects of the public health emergency on elementary and secondary schools. The ESSER Fund includes two rounds of funding. ESSER I was created by the Coronavirus Aid, Relief, and Economic Security (CARES) Act, and ESSER II was created by the Coronavirus Response and Relief Supplemental Appropriations (CRRSAA) Act. DPI uses ESSER funding to address various LEA needs related to the public health emergency, including personal protective equipment, sanitation, and technology equipment. During FY 2020-21, DPI expended \$120.2 million under the ESSER Fund, of which \$106.5 million was expended under ESSER I and \$13.7 million was expended under ESSER II.

Criteria:

Under 2 CFR s. 200.303, DPI is required to establish and maintain effective internal controls over its federal programs to provide reasonable assurance that the federal programs are administered in compliance with federal laws and regulations as well as the terms and conditions of its federal awards. This includes effective internal controls over the preparation of reports for the federal government. Under 34 CFR s. 76.720 (b), DPI is required to submit an annual report to the U.S. Department of Education on the uses of ESSER funds. In addition, 34 CFR s. 76.730 requires that DPI retain supporting documentation for a federal award. DPI was required to submit its first ESSER annual report by February 1, 2021. This report was to include activity from March 13, 2020, through September 30, 2020.

Condition:

DPI could not provide supporting documentation for the amounts it reported in the ESSER annual report or for the steps it took to compile and review the report. Although DPI did not maintain a copy of the original report submitted to the U.S. Department of Education, it did maintain a version of the report that was revised to correct errors identified by the U.S. Department of Education during a data quality review. The revised annual report was submitted at the request of the U.S. Department of Education.

Context:

We interviewed DPI staff to gain an understanding of the procedures for preparing the ESSER Fund annual report and for submitting the report to the U.S. Department of Education. During FY 2020-21, DPI was required to submit one annual report for the ESSER Fund. However, DPI was required to resubmit its annual report to correct errors identified during a data quality review performed by the U.S. Department of Education. We requested copies of the original and resubmitted versions of the annual report, as well as the supporting documentation for the amounts included in the reports.

Questioned Costs:

None.

Effect:

DPI cannot be assured that it reported complete and accurate information on the State's uses of the ESSER Fund to the U.S. Department of Education.

Cause:

DPI did not have formal, written procedures for compiling the ESSER Fund annual report, such as:

- procedures that identify the specific information that is needed from LEAs or other sources;
- the steps needed to compile the information;
- the steps taken to review the report; or
- the process for retaining all supporting documentation.

DPI indicated that it did not develop formal written procedures because report submission requirements changed during the compilation period. Further, DPI anticipated that reporting requirements would change for the second reporting period. In addition, DPI indicated that employee turnover affected its ability to provide supporting documentation because the individual involved in the preparation of the reports left DPI in August 2021.

 Recommendation

We recommend the Wisconsin Department of Public Instruction:

- *develop formal written procedures to identify the sources of information necessary and steps needed to compile complete and accurate information for the ESSER Fund annual reports; and*
- *retain in a central location all supporting documentation for the amounts included in the annual report it submits to the U.S. Department of Education.*

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Public Instruction:

The Wisconsin Department of Public Instruction agrees with the finding and recommendation.

Finding 2021-401: Education Stabilization Fund—Federal Funding Accountability and Transparency Act Reporting

Background:

The U.S. Department of Education provides funding to DPI for several subprograms of the Education Stabilization Fund grant program, which includes the ESSER Fund. The purpose of the ESSER Fund is to provide LEAs, including charter schools that are LEAs, with emergency relief funds to address the effects of the public health emergency on elementary and secondary schools. The ESSER Fund includes two rounds of funding. ESSER I was created by the CARES Act, and ESSER II was created by the CRRSAA Act. DPI uses the ESSER funding to address various LEA needs related to the public health emergency, including the need for personal protective equipment, sanitation, and technology equipment.

ESSER subawards of \$30,000 or more are subject to Federal Funding Accountability and Transparency Act (FFATA) reporting. The intent of FFATA is to provide information about federal awards to allow the public access to the information to hold the government accountable for decisions.

Criteria:

Under 2 CFR s. 170, DPI is required to report in the FFATA Subaward Reporting System (FSRS) subawards of \$30,000 or more, including any amendments or modifications to a subaward. This reporting is to be completed no later than the last day of the month following the month in which the subaward was made. For example, if the subaward was made on November 7, 2020, it must be reported in FSRS by no later than December 31, 2020.

Condition:

We found that 35 of the 40 ESSER I subawards we reviewed were not reported in a timely manner in FSRS. These subawards were made in July 2020 and should have been reported in FSRS by August 31, 2020. However, DPI did not report the subawards in FSRS until December 1, 2020. DPI indicated that 353 of 442 ESSER I subawards that should have been reported in August 2020 were not reported until December 2020.

We also found that 20 of the 20 ESSER II subawards we reviewed were not reported in a timely manner in FSRS. These subawards were made in April 2021 and should have been reported in FSRS by May 31, 2021. However, DPI did not report the subawards in FSRS until September 1, 2021. DPI indicated that all 452 ESSER II subawards made in April 2021 were not reported until September 2021.

We did not identify concerns with the accuracy of the ESSER I and ESSER II subaward information, including key data elements and amounts, in FSRS.

Context:

DPI awarded 442 ESSER I subawards and 452 ESSER II subawards during FY 2020-21. During FY 2020-21, DPI expended \$120.2 million under the ESSER Fund, of which \$114.1 million was provided to subrecipients.

We interviewed DPI staff to gain an understanding of the procedures for compiling information for subawards and submitting the information in FSRS. We found that DPI staff periodically identify subawards required to be reported in FSRS using information

from DPI’s subaward tracking system. We sampled the ESSER subawards of \$30,000 or more and requested screenshots from FSRS and subaward documentation from DPI to support the information reported in FSRS.

Questioned Costs:

None.

Effect:

DPI is not in compliance with FFATA requirements for the timely reporting of subawards in FSRS.

Cause:

For the ESSER I subawards made in July 2020, DPI staff indicated that an upload error occurred when the subawards were originally reported in FSRS in August 2020. DPI staff did not identify that 353 subawards were not reported until DPI staff reviewed ESSER I information reported by the U.S. Department of Education in November 2020.

For the ESSER II subawards made in April 2021, DPI staff did not report the 452 subawards until September 2021 because they did not compile information for FFATA reporting on a monthly basis.

Recommendation

We recommend the Wisconsin Department of Public Instruction improve its Federal Funding Accountability and Transparency Act submission process to ensure all required subawards, including any amendments or modifications to a subaward, greater than \$30,000 are identified in a timely manner and submitted to the Federal Funding Accountability and Transparency Act Subaward Reporting System.

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Public Instruction: The Wisconsin Department of Public Instruction agrees with the finding and recommendation.

Department of Workforce Development

The Department of Workforce Development (DWD) administers programs for unemployment insurance, workers' compensation, equal rights in employment and housing, apprenticeship job training, employment services and training, vocational rehabilitation, and other related programs. Excluding unemployment insurance benefits, federal grants funded \$504.4 million of DWD's FY 2020-21 expenditures. In addition, the Wisconsin Unemployment Reserve Fund paid \$1.0 billion in regular unemployment insurance benefits and \$2.2 billion in federally funded benefits.

We tested DWD's internal controls and compliance with grant requirements for two type A programs: Unemployment Insurance (UI) (Assistance Listing number 17.225) and the Presidential Declared Disaster Assistance to Individuals and Households—Other Needs Assistance, commonly called the Lost Wages Assistance (LWA) program (Assistance Listing number 97.050). We identified the following internal control and compliance concerns:

- Reporting—Unemployment Insurance Program (Finding 2021-600);
- Unemployment Insurance Benefit Accuracy Measurement Program—Compliance with Program Requirements (Finding 2021-601); and
- Unemployment Insurance Benefit Accuracy Measurement Program—Lack of Supervisory Review of Investigations (Finding 2021-602).

Finding 2021-600 resulted in a qualified opinion for the reporting compliance requirement for the Unemployment Insurance program.

In addition, we followed up on DWD's progress in addressing Findings 2020-600 and 2020-601 of our FY 2019-20 audit (report 21-6). DWD did not implement corrective actions to address our concerns related to Finding 2020-600, and DWD implemented corrective actions to partially address Finding 2020-601. Further, we followed up on the progress of DWD in addressing financial reporting concerns related to the Unemployment Insurance Benefit Payable (Finding 2020-004 from report 21-6). DWD implemented corrective actions to address this finding. It will be important for DWD to continue to work to resolve Finding 2020-601. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of each finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

In report 21-23, we evaluated DWD's internal control over financial reporting. In Section II of the Schedule of Findings and Questioned Costs, which begins on page 91, we include the following financial reporting findings at DWD:

- Monitoring and Use of Predictive Analytics for the Unemployment Insurance Program (Finding 2021-003); and
- Access Controls over Unemployment Insurance Program Systems (Finding 2021-004).

Findings 2021-003 and 2021-004 are also significant deficiencies in internal control over compliance and are referenced in Section III of the Schedule of Findings and Questioned Costs, which begins on page 105. Findings 2021-003 and 2021-004 relate to both our audit of the financial statements as well as compliance for the Unemployment Insurance program (Assistance Listing number 17.225) and the Presidential Declared Disaster Assistance to Individuals and Households—Other Needs program (Assistance Listing number 97.050).

Finding 2021-600: Reporting—Unemployment Insurance Program

Background:

As a part of its administration of the Unemployment Insurance (UI) program, DWD is required to complete and submit multiple performance and special reports to the U.S. Department of Labor (DOL), including the monthly ETA 9050, *Time Lapse of All First Payments except Workshare*, the monthly ETA 9052, *Nonmonetary Determination Time Lapse Detection*, and the ETA 2208A, *Quarterly UI Above-Base Report*. These reports contain information related to Wisconsin's UI program that assist DOL in evaluating the performance of the program or contain information that is of interest to DOL.

Criteria:

Pursuant to 2 CFR s. 200.303, DWD is required to establish and maintain effective internal controls over its federal programs to provide reasonable assurance that the federal programs are administered in compliance with federal statutes and regulations as well as the terms and conditions of its federal awards. This includes effective internal controls

over the preparation of reports for the federal government. 2 CFR s. 200.334 requires DWD to retain documentation supporting a federal award for three years after the final award expenditure report is submitted.

Condition:

DWD did not provide supporting documentation for all amounts we selected for review, or the supporting documentation DWD did provide did not agree with the amounts DWD reported. We identified the following specific concerns:

- For the September 2020 ETA 9050 performance report, amounts reported for 17 of the 66 key line items we selected for review did not agree with supporting documentation provided by DWD. After we requested the supporting documentation, DWD identified an error in the data it used to compile this report, and it submitted a revised report to DOL on February 16, 2022.
- For each of the three ETA 9052 performance reports we reviewed, DWD did not retain the supporting documentation when the report was prepared. As a result, we cannot verify the accuracy of these reports and because the data used in preparing the reports could change as additional actions on a claim take place, DWD cannot recreate the supporting documentation.
- For the September 2020 ETA 2208A special report, amounts reported for 15 of 18 key line items selected for review did not agree with the supporting documentation provided. For these items, DWD staff explained that an adjustment was made to the amounts reported that related to the public health emergency. DWD staff provided us with the totals for the adjustment, but DWD did not provide the supporting documentation for the adjustment.

Context:

We interviewed DWD staff to gain an understanding of the procedures for preparing the UI program performance and special reports. During FY 2020-21, DWD was required to submit 12 ETA 9050 performance reports, 12 ETA 9052 performance reports, and 4 ETA 2208A special reports to DOL. We reviewed the ETA 9050 and 9052 performance reports submitted for the months of September 2020, December 2020, and March 2021, and we reviewed the September 2020 and December 2020 quarterly ETA 2208A special reports. We also requested DWD's documentation to support the reported information for each section or amount that was identified by the federal government as a key section or key line item.

Questioned Costs:

None.

Effect:

DWD cannot be assured that it reported complete and accurate information to enable DOL to assess the outcomes of Wisconsin's UI program.

Cause:

DWD did not establish adequate procedures to ensure the accuracy of the ETA 9050 and the ETA 9052 performance reports as well as the ETA 2208A special report. For example, DWD's procedures did not include a process for centrally and consistently retaining all supporting documentation used to compile the reports. Further, DWD's procedures did not require a review, such as a supervisory review, of each report prior to DWD submitting the report.

☑ Recommendation

We recommend the Wisconsin Department of Workforce Development:

- *develop and implement adequate procedures for the preparation and review of the UI performance and special reports to ensure the accuracy of amounts reported to the federal government; and*
- *retain documentation that supports the amounts included in each report it submits to the federal government.*

UI-35684-21-55-A-55	2021

Questioned Costs: None

Type of Finding: Material Weakness, Material Noncompliance

Response from the Wisconsin Department of Workforce Development: The Wisconsin Department of Workforce Development agrees with the finding and recommendation.

Finding 2021-601: Unemployment Insurance Benefit Accuracy Measurement Program—Compliance with Program Requirements

Background:

As a part of its administration of the UI program, DWD is required to administer the Benefits Accuracy Measurement (BAM) program. As a part of this program, DWD is required to perform investigations to assess the accuracy of either the UI benefits paid to claimants or the accuracy of the decision to deny claimants benefits. The investigations are completed using a statistically valid sample of weekly claims. The investigation of each paid claim or denied claim in the sample is performed to assess adherence to federal and state law and to conduct new fact finding as necessary.

Criteria:

Pursuant to 20 CFR s. 602.11(d), DWD is required to administer the BAM program in accordance with instructions issued by DOL. As a way to promulgate standardized methods and procedures, DOL issued the *BAM State Operations Handbook*. The handbook establishes both timeliness requirements for the completion of the investigations and requirements related to the minimum number of paid and denied claim investigations that should be reviewed each quarter. These requirements include:

- completing 95 percent of paid claim investigations and 85 percent of denied claim investigations within 90 days of the week that the claim was selected; and
- completing 450 paid claim investigations and 450 denied claim investigations for each year, with a minimum of 108 paid claim investigations and 96 denied claim investigations each quarter. DWD received approval from DOL to suspend the denied claim investigations for two quarters of FY 2020-21, reducing the number of required denied claim investigations to a minimum of 192 during FY 2020-21.

Condition:

DWD did not complete investigations within the timeliness requirements established by DOL. Per DOL's time-lapse reports for investigations of claims for weeks during FY 2020-21, DWD completed 93.8 percent of paid claim investigations within 90 days, which was 1.2 percentage points below the timeliness requirements. For the same period, DWD completed 79.0 percent of denied claim investigations within 90 days, which was 6.0 percentage points below the timeliness requirement. Further, DWD did not complete the required number of denied claim investigations. For weeks during FY 2020-21, DWD completed 162 denied claim investigations, or 30 investigations less than the minimum requirement of 192 investigations.

Context:

We interviewed DWD staff and reviewed federal regulations related to the BAM program, including requirements for the timeliness of reviews and the required number of paid claim and denied claim investigations. We obtained a listing of paid claim and denied claim investigations that were selected for review for weeks during

FY 2020-21 and reviewed time-lapse reports available from DOL that summarized the outcome and timing of Wisconsin’s investigations performed for weeks during FY 2020-21.

Questioned Costs:

None.

Effect:

DWD is not in compliance with BAM program requirements established by DOL related to timeliness of investigations and number of denied claim investigations required to be performed. As a result, improper payments may have gone undetected for a longer period of time or eligible individuals may have been inappropriately denied UI benefits.

Cause:

DWD indicated that it did not follow its procedures to meet the requirements as a result of the lack of staff, the complexity of the claims, and workload issues as a result of the public health emergency.

Recommendation

We recommend the Wisconsin Department of Workforce Development ensure that the timeliness requirements of the Benefit Accuracy Measurement program are being met and that the minimum number of denied claims are being investigated.

Finding 2021-601: Unemployment Insurance Benefit Accuracy Measurement Program—Compliance with Program Requirements

Unemployment Insurance (Assistance Listing number 17.225)

<u>Award Numbers</u>	<u>Award Years</u>
None	2020
None	2021

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Department of Workforce Development: The Wisconsin Department of Workforce Development agrees with the finding and recommendation.

Finding 2021-602: Unemployment Insurance Benefit Accuracy Measurement Program—Lack of Supervisory Review of Investigations

Background:

As a part of its administration of the UI program, DWD is required to administer the BAM program. As a part of this program, DWD is required to perform investigations to assess the accuracy of either the UI benefits paid to claimants or the accuracy of the decision to deny claimant benefits. The investigations are completed using a statistically valid sample of weekly claims. The investigation of each paid claim or denied claim in the sample is performed to assess adherence to federal and state law and to conduct new fact finding as necessary.

Criteria:

Pursuant to 20 CFR s. 602.11(d), DWD is required to administer the BAM program in accordance with instructions issued by DOL. In addition, pursuant to 2 CFR s. 200.303, DWD is required to establish and maintain effective internal controls that provide reasonable assurance that its federal programs are administered in accordance with federal statutes and regulations and the terms and conditions of its federal awards. DWD has established written procedures intended to provide assurance that the BAM program complies with federal requirements. These procedures include a sign-off that a detailed supervisory review of each investigation report was completed before the report was submitted to DOL.

Condition:

During our review of 40 investigations completed by DWD, we identified that the results of 4 investigation reports were submitted to DOL without a sign-off that a detailed supervisory review was performed.

Context:

We interviewed DWD staff about their procedures for performing investigations and the controls in place to ensure reviews were accurately performed and followed prescribed guidelines. We obtained and reviewed the investigation reports DWD submitted to DOL for 40 of the 612 investigations performed for weeks during FY 2020-21.

Questioned Costs:

None.

Effect:

DWD cannot be assured that each investigation was performed accurately and in compliance with program requirements. As a result, improper payments may have gone undetected for a longer period of time or eligible individuals may have been inappropriately denied UI benefits.

Cause:

DWD indicated that it did not follow its written procedures for a detailed supervisory review of each investigation in all cases. According to DWD staff, some investigations had a simple review that was intended to identify unusual or complex issues with the investigation. If such conditions were identified, a detailed supervisory review would

have been performed. DWD indicated that these simple reviews were used in response to staff and time constraints resulting from the public health emergency.

☑ Recommendation

We recommend the Wisconsin Department of Workforce Development follow its written procedures for the Benefit Accuracy Measurement program and ensure that a detailed supervisory review of each investigation report occurs before the report is submitted to the U.S. Department of Labor.

■ ■ ■ ■

Office of the Commissioner of Insurance

The Office of the Commissioner of Insurance (OCI) supervises the insurance industry in Wisconsin. The office is responsible for examining insurance industry financial practices and market conduct, licensing insurance agents, reviewing policy forms for compliance with state insurance statutes and regulations, investigating consumer complaints, and providing consumer information. The office administers two segregated insurance funds: the State Life Insurance Fund and the Injured Patients and Families Compensation Fund. We tested OCI's internal control and compliance for one type A program—1332 State Innovation Waivers (Assistance Listing number 93.423)—and we identified an internal control concern related to verification audits for this program (Finding 2021-900).

Finding 2021-900: 1332 State Innovation Waivers Program— Verification Audits

Background:

Section 1332 of the federal Patient Protection and Affordable Care Act of 2010 (Affordable Care Act) permits a state to apply for a waiver to pursue innovative strategies for providing residents with access to high quality, affordable health insurance while retaining the basic protections of the Affordable Care Act. 2017 Wisconsin Act 138 created the Wisconsin Healthcare Stability Plan (WIHSP), under which the State covers a portion of the financial risk of health insurers. Act 138 required OCI to implement WIHSP if Wisconsin's waiver plan was approved by the federal government. OCI applied for a waiver, which was approved by the U.S. Department of Health and Human Services (DHHS) in July 2018. Under the approved waiver, a health insurer in the health care insurance exchange may be reimbursed a portion of the claims it incurred in the prior calendar year. In report 22-4, we performed a limited-scope review of WIHSP.

In 2019, DHHS awarded OCI \$127.7 million under the 1332 State Innovation Waivers program to administer the WIHSP. The federal funding is used, along with

state appropriations, to reimburse insurance carriers participating in the health care insurance exchange for a portion of enrollee claims. Insurance carriers submit various attestations and enrollee claim information to OCI.

Criteria:

OCI is responsible for ensuring costs charged to federal grant programs it administers are allowable under federal statutes, federal regulations, and the terms and conditions of the federal award. To ensure the attestations were completed and to assess the validity of the enrollee claims submitted by the insurance carriers, the WIHSP Administrator at OCI conducts a verification audit. OCI's written procedures for conducting the verification audit require OCI to:

- test a random sample of 60 enrollees across all the participating insurance carriers for the phase I audit; and
- randomly choose two of the enrollees selected for review under the phase I audit for each insurance carrier, and then randomly select two claims for each of the two enrollees sampled. Therefore, there are four specific claims for each insurance carrier that are under review for the phase II audit.

2 CFR s. 200.303 requires OCI to establish and maintain effective internal control over its federal programs to provide reasonable assurance that the federal programs are administered in compliance with federal statutes, regulations, and the terms and conditions of its federal awards. Such internal control would include establishing appropriate secondary review of processes to ensure accuracy and completeness of the processes.

Condition:

We noted three concerns with OCI's administration of the verification audits it performs related to its 1332 waiver program:

- For the phase I audit conducted for benefit year 2019, OCI did not use a random sample to select the enrollees for review. In addition, when auditing the insurance carrier attestations and confirming total claims, OCI tested only 58 enrollees, which was two less than required by its written procedures.
- For the phase II audit for benefit year 2019, OCI did not use a random sample to test enrollees' claims documentation. In addition, OCI tested only 46 claims, which was 10 less than required by its written procedures.
- OCI's written procedures for conducting the verification audits did not include a secondary review of the audit process and results.

Context:

We interviewed the WIHSP Administrator to gain an understanding of the phase I and II verification audit procedures. We reviewed OCI's written procedures for conducting the verification audits. Finally, we reviewed the documentation of the audits completed for benefit year 2019, which supported payments made to insurance carriers in FY 2020-21. For benefit year 2019, 14 insurance carriers participated in the

health care insurance exchange in Wisconsin and received reimbursement for claims provided to participating enrollees.

Questioned Costs:

None.

Effect:

As a result of not following its established written procedures and not having a secondary review of its verification audit process, OCI may not have identified claims that lacked appropriate supporting documentation, which could result in unallowable costs.

Cause:

OCI staff indicated that an employee who no longer works at OCI had completed the phase I testing for benefit year 2019. Therefore, current staff did not know why the employee did not complete a random sample or select 60 enrollees.

Rather than using a random sample of claims to test in the phase II audit, OCI staff indicated that claims were selected manually in order to target higher-dollar claims. Further, OCI staff noted that the selection of claims to test in the phase II audit was developed based on the phase I audit, which resulted in only 46 claims being tested.

Finally, OCI staff indicated that a secondary review of the audit process was not implemented due to limited staff resources for WIHSP administration.

Recommendation

We recommend the Wisconsin Office of the Commissioner of Insurance:

- *follow its established, written procedures for conducting verification audits; and*
- *develop written procedures for a secondary review of the audits, including steps for conducting a secondary review and documentation of the secondary review.*

Finding 2021-900: 1332 State Innovation Waivers Program—Verification Audits

1332 State Innovation Waivers (Assistance Listing number 93.423)

<u>Award Number</u>	<u>Award Year</u>
SIWIW0008A	2019

Questioned Costs: None

Type of Finding: Significant Deficiency, Noncompliance

Response from the Wisconsin Office of the Commissioner of Insurance: The Wisconsin Office of the Commissioner of Insurance agrees with the finding and recommendation.

Other Agencies

In addition to the departments of Administration, Health Services, Public Instruction, and Workforce Development, and the Office of the Commissioner of Insurance, we also audited federal programs or followed up on the status of prior audit findings at seven other state agencies. The following is a summary of the work we performed at the departments of Children and Families, Natural Resources, Veterans Affairs, Revenue, Military Affairs, and Employee Trust Funds, and the University of Wisconsin (UW) System.

Department of Children and Families

The Wisconsin Department of Children and Families (DCF) administers programs such as adoption assistance, foster care, and child support enforcement. It also administers the Wisconsin Shares child care subsidy program and Wisconsin's work-based public assistance program, Wisconsin Works (W-2). In FY 2020-21, DCF administered \$801.3 million in federal financial assistance.

We tested DCF's internal controls and compliance with grant requirements for Temporary Assistance for Needy Families (Assistance Listing number 93.558), and Child Support Enforcement (Assistance Listing number 93.563), both of which are type A grant programs, and the Community Services Block Grant (Assistance Listing number 93.569), which is a type B grant program. Our audit of these programs identified no issues that required reporting.

In addition, we followed up on the progress of DCF in addressing Finding 2020-200 of the FY 2019-20 audit (report 21-6). DCF implemented corrective actions to address our concerns related to this finding. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of this finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

Department of Natural Resources

The Wisconsin Department of Natural Resources (DNR) administers programs related to protecting and enhancing Wisconsin's natural resources, including its air, land, water, forests, wildlife, fish, and plants. In FY 2020-21, DNR administered \$96.6 million in federal financial assistance. We tested DNR's internal controls and compliance with grant requirements for the Clean Water State Revolving Loan Fund Cluster (Assistance Listing number 66.458), which is a type A program. Our audit of this program identified no issues that required reporting.

Department of Veterans Affairs

The Department of Veterans Affairs (DVA) provides benefits, programs, and services for veterans living in Wisconsin. DVA also operates three veterans homes that provide care for veterans. In FY 2020-21, DVA administered \$86.9 million in federal financial assistance. We tested DVA's internal controls and compliance with grant requirements for the Grants to States for Construction of State Home Facilities (Assistance Listing number 64.005) program, which is a type B program. Our audit of this program identified no issues that required reporting.

Department of Revenue

The Department of Revenue (DOR) administers the State's major tax laws, including collecting individual income taxes, sales taxes, and corporate income taxes; programs that provide financial assistance to local governments; the Wisconsin Lottery; and the Unclaimed Property program. In FY 2020-21, DOR administered \$559.9 million in federal financial assistance. We tested DOR's internal controls and compliance with grant requirements for the Coronavirus Relief Fund (CRF) (Assistance Listing number 21.019) and the Coronavirus State and Local Fiscal Recovery Funds (CSLFRF) (Assistance Listing number 21.027), both of which are type A programs. DOA entered into memoranda of understanding with DOR to use CRF and CSLFRF funding to administer various programs to assist local governments and businesses to address the effects of the public health emergency. Our audit of these programs at DOR identified no issues that required reporting.

Department of Military Affairs

The Department of Military Affairs (DMA) provides a military force through the Wisconsin National Guard, which is available for use in state and national emergencies. Through the Division of Emergency Management, DMA also implements statewide emergency preparedness plans and administers federal disaster and emergency relief funds. In FY 2020-21, DMA administered \$93.9 million in federal financial assistance.

For our FY 2020-21 audit, no grants administered by DMA were selected for audit based on risk factors established by *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). However, we followed up on the progress of DMA in addressing Finding 2019-811 of the FY 2018-19 audit (report 20-3). DMA implemented corrective actions to address our concerns related to Finding 2019-811. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of this

finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

Department of Employee Trust Funds

The Department of Employee Trust Funds (ETF) administers employee benefit programs including the Wisconsin Retirement System, for participating state and local government employees. For our FY 2020-21 audit, no grants or subgrants administered by ETF were selected for audit based on risk factors established by Uniform Guidance. However, we followed up on the progress of ETF in addressing financial reporting concerns related to the Accumulated Sick Leave Conversion Credit Program Liability (Finding 2020-005 from report 21-6). ETF implemented corrective actions to address our concerns related to Finding 2020-005. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of this finding as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

University of Wisconsin System

UW System provides postsecondary academic education for approximately 164,800 students. The System includes 13 four-year universities, 13 two-year branch campuses associated with a university, and UW System Administration. Each of the 13 universities awards bachelor's and master's degrees, and several also confer doctoral degrees. The 13 two-year branch campuses offer general education associate degrees and course credits that transfer to other degree-granting universities. UW System Administration consists of the UW System President's staff who assist the Board of Regents in establishing and monitoring systemwide policies, financial planning for the system, and maintaining fiscal control. In FY 2020-21, UW System administered \$1.9 billion in federal financial assistance.

We tested UW System's internal controls and compliance with grant requirements for two type A programs: Student Financial Assistance Cluster (various Assistance Listing numbers) and the Education Stabilization Fund (Assistance Listing number 84.425). Our audit of these programs identified no issues that required reporting. In report 21-23, we evaluated UW System's internal control over financial reporting. In Section II of the Schedule of Findings and Questioned Costs, which begins on page 91, we include financial reporting concerns related to Information and Security Controls at UW System (Finding 2021-002).

In addition, we followed up on UW-Green Bay's progress in addressing Finding 2020-700 and UW System's progress in addressing Finding 2020-003 of the FY 2019-20 audit report (report 21-6). UW-Green Bay and UW System implemented corrective actions to address our concerns related to these findings. The Summary Schedule of Prior Audit Findings, which is prepared by management, begins on page 111 and describes the status of these findings as of the end of our audit period as well as ongoing steps to address findings that were not fully corrected.

We also included the Wisconsin Humanities Council in our FY 2020-21 audit of UW System. The Wisconsin Humanities Council is a nonprofit organization associated

with UW System, which is responsible for the fiscal and personnel administration of the Wisconsin Humanities Council. We tested internal controls and compliance with grant requirements for the Promotion of the Humanities—Federal/State Partnership (Assistance Listing number 45.129) grant. Our audit of this grant found no issues that required reporting.

■ ■ ■ ■

Schedule of Findings and Questioned Costs

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance) requires the auditor to prepare a schedule of findings and questioned costs that includes the following three sections:

- 1) a summary of the auditor's results;
- 2) findings relating to the financial statements, which are required to be reported in accordance with *Government Auditing Standards*; and
- 3) findings and questioned costs for federal awards.

Section I

Summary of Auditor's Results

As required by Uniform Guidance, the Wisconsin Legislative Audit Bureau is providing the following summary information related to the State of Wisconsin's single audit for FY 2020-21:

Financial Statements

Type of auditor's report issued:	Unmodified
Internal control over financial reporting:	
Material weaknesses identified?	No
Significant deficiencies identified?	Yes
Noncompliance material to financial statements noted?	No

Federal Awards

Internal control over major programs:	
Material weaknesses identified?	Yes
Significant deficiencies identified?	Yes
Type of auditor’s report issued on compliance for major programs:	Unmodified for all major federal programs except for Unemployment Insurance (Assistance Listing number 17.225) and COVID-19—Emergency Rental Assistance Program (Assistance Listing number 21.023), which were qualified.
Any audit findings disclosed that are required to be reported in accordance with s. 200.516 (a) of Uniform Guidance?	Yes
Dollar threshold used to distinguish between type A and type B programs:	\$31,125,510
Auditee qualified as a low-risk auditee?	No
The following were major federal programs, determined in accordance with s. 200.518 (b) of Uniform Guidance:	

Assistance Listing Number	Major Federal Program/Cluster
10.542	Pandemic EBT Food Benefits
10.551, 10.561	Supplemental Nutrition Assistance Program Cluster
10.553, 10.555, 10.556, 10.559, 10.579	Child Nutrition Cluster
10.565, 10.568, 10.569	Food Distribution Cluster
14.231	Emergency Solutions Grant Program
17.225	Unemployment Insurance
21.019	Coronavirus Relief Fund
21.023	Emergency Rental Assistance Program
21.027	Coronavirus State and Local Fiscal Recovery Funds
64.005	Grants to States for Construction of State Home Facilities
66.458	Clean Water State Revolving Fund Cluster
84.010	Title I Grants to Local Educational Agencies
84.027, 84.173	Special Education Cluster (IDEA)
84.425C, 84.425D, 84.425E, 84.425F, 84.425M, 84.425R	Education Stabilization Fund
93.323	Epidemiology and Laboratory Capacity for Infectious Diseases (ELC)
93.423	1332 State Innovation Waivers
93.558	Temporary Assistance for Needy Families
93.563	Child Support Enforcement
93.569	Community Services Block Grant
93.775, 93.777, 93.778	Medicaid Cluster
93.917	HIV Care Formula Grants
93.959	Block Grants for Prevention and Treatment of Substance Abuse
97.050	Presidential Declared Disaster Assistance to Individuals and Households—Other Needs
Various	Student Financial Assistance Cluster

Section II

Financial Statement Findings

This schedule includes four deficiencies in internal control over financial reporting that we consider to be significant deficiencies. These deficiencies in internal control over financial reporting are required to be reported by auditing standards generally accepted in the United States of America and Government Auditing Standards. Findings 2020-001, 2020-004, and 2020-005 from our prior-year audit (report 21-6) are no longer reportable. Repeat findings from report 21-6 are indicated with an asterisk (*). Findings 2021-003 and 2021-004 are also significant deficiencies in internal control over compliance and are referenced in Section III of the Schedule of Findings and Questioned Costs.

Finding 2021-001: Department of Administration Information Technology Oversight and Monitoring Responsibilities*

Background:

The Department of Administration (DOA) is responsible for the State's information technology (IT) services, including providing oversight and monitoring of executive branch agency IT operations. We first recommended that DOA develop and implement executive branch agency IT policies and standards and provide oversight and monitoring of executive branch agencies' IT operations during our fiscal year (FY) 2014-15 audit. During subsequent audits, we recommended that DOA take steps to identify, assess, and address risks for the State's IT environment. These steps were to include completion of a comprehensive risk management program across all executive branch agencies. During our FY 2018-19 audit, we found DOA had worked with executive branch agencies and implemented the State of Wisconsin *IT Security Policy Handbook*, which includes policies for IT security, and the related standards. Executive branch agencies are expected to comply with these policies and standards.

During our FY 2019-20 audit, we found DOA developed a risk assessment plan, which documented a plan for improving vulnerability management and completing penetration testing. However, we also found DOA had not taken sufficient steps to ensure executive branch agency compliance with the State of Wisconsin *IT Security Policy Handbook* and related standards, and we made recommendations for improvement.

One stated goal of DOA's *Wisconsin Strategic IT Plan 2020-2022*, which is developed to guide state IT operations, is strengthening cybersecurity and risk management practices on a long-term basis. Another goal is providing effective oversight of security policies, standards, and procedures.

Criteria:

Wisconsin Statutes give DOA responsibility for the State's IT services. Under s. 16.971 (2), Wis. Stats., DOA shall work with executive branch agencies to establish IT policies, procedures, and planning processes, and monitor adherence to these policies, procedures, and processes. Further, s. 16.971 (2), Wis. Stats., requires

DOA to provide oversight and monitoring of executive branch agency IT operations, which includes ensuring:

- management reviews of IT organizations are conducted;
- all executive branch agencies develop and operate with clear guidelines and standards in the areas of IT systems development and employ good management practices and cost-benefit justifications; and
- all state data-processing facilities develop proper privacy and security procedures and safeguards.

Finally, s. 16.973 (3), Wis. Stats., states that DOA shall facilitate the implementation of statewide initiatives, including the development and maintenance of policies and programs to protect the privacy of individuals who are the subjects of information contained in the agency databases.

National Institute of Standards and Technology (NIST) 800-137 *Information Security Continuous Monitoring (ISCM) for Federal Information Systems and Organizations* indicates that ongoing monitoring is a critical part of an organization's risk management process. In addition, an organization's overall IT security architecture and accompanying security program should be monitored to ensure that organization-wide operations remain within an acceptable level of risk despite any changes that occur. Key steps in effective monitoring include:

- developing and communicating the policies, procedures, and standards that form the security framework;
- collecting information on the effectiveness of the policies, standards, and procedures;
- analyzing the information collected;
- responding to the results of the analyses; and
- reviewing and updating the monitoring program.

Condition:

During our FY 2020-21 audit, we continued to find that DOA did not have oversight and monitoring in place sufficient to ensure executive branch agency adherence to the State of Wisconsin *IT Security Policy Handbook* and related standards, and sufficient to monitor executive branch agency IT operations. Although we found that, as of June 30, 2021, DOA had initiated efforts to develop a baseline understanding of agency compliance with the State of Wisconsin *IT Security Policy Handbook* and related standards and to publish the baseline results in a dashboard, DOA did not collect needed information from all executive branch agencies. Further, DOA had not established a plan for other important monitoring steps, such as analyzing the effectiveness of the procedures established by executive branch agencies.

We also found DOA purchased, implemented, and began configuration of a new vulnerability management tool at DOA. DOA indicated that some executive branch agencies have purchased the tool, and it is DOA's expectation that executive branch

agencies will purchase, implement, and configure the tool. The tool will provide DOA with information to improve its vulnerability management program and aid in meeting its responsibility to monitor executive branch agency IT operations. However, DOA has not specified completion dates for the executive branch agencies to purchase, implement, and configure the tool.

Finally, DOA's risk assessment plan did not include consideration of the risks related to known deviations from policies in the State of Wisconsin *IT Security Policy Handbook* and related standards. For example, DOA may approve an exception to allow an agency to deviate from an established IT security policy such as a password policy. Although deviations from the policies have been approved, the deviations may bring additional risk that DOA should consider in its oversight and monitoring of the State's IT environment. We determined that the detailed results of our review of DOA's process to approve policy exceptions were too sensitive to communicate publicly. Therefore, we communicated the results in a separate confidential communication to the Chief Information Officer at DOA.

Context:

State agencies rely on computer systems to complete critical functions, including processing checks, accounting for cash receipts, preparing financial statements, and administering federal grant programs. DOA is responsible for ensuring these computer systems are properly secured. We interviewed key DOA staff to gain an understanding of the steps that were taken by June 30, 2021, to provide oversight and monitoring of executive branch agency IT operations and adherence to the State of Wisconsin *IT Security Policy Handbook* and related standards, and to gain an understanding of DOA's plans for implementing the enterprise vulnerability management tool and identifying vulnerabilities with security patch, configuration, and regulatory compliance issues.

Because DOA has responsibility to provide oversight and monitoring over IT operations for executive branch agencies, and because there are connections among agencies in the State's network, IT weaknesses at one agency can affect IT security for other agencies.

Questioned Costs:

None.

Effect:

For FY 2020-21, DOA did not comply with s. 16.971 (2), Wis. Stats., which requires DOA to provide oversight and monitoring of executive branch agency IT operations and adherence to the State of Wisconsin *IT Security Policy Handbook* and related standards. Insufficient monitoring of agency IT environments can lead to vulnerabilities in the State's network, known or unknown, because there is no assurance that all systems are meeting the minimum level of security for the State's IT environment, as established in the State of Wisconsin *IT Security Policy Handbook* and related standards. Weaknesses in the security of the network can lead to inappropriate access to confidential or sensitive data, unauthorized changes to the data within the system, or a failure of the system.

Cause:

DOA did not collect the information necessary to monitor executive branch agency adherence to the State of Wisconsin *IT Security Policy Handbook* and related standards. DOA's initial efforts to develop a dashboard providing detail on the status of

implementation of the IT security policies resulted in insufficient and incomplete data from agencies because DOA did not require agencies to provide the information. Further, DOA did not establish a monitoring process to analyze the effectiveness of executive branch agency procedures, such as through reviews of agency procedures; respond to the results of its analyses; and review and update its monitoring program. Collecting information on the effectiveness of policies, standards, and procedures; analyzing this information; and responding to the analysis is important to effectively monitor an IT environment. In addition, regularly scanning, analyzing, reporting, and remediating known vulnerabilities is important in managing risk in an ever-changing IT environment.

Finally, DOA indicated that it encountered delays in implementing the new vulnerability management tool due to a lack of availability of vendor support and resources. Although DOA noted its expectation that executive branch agencies purchase, implement, and configure the new vulnerability management tool, DOA did not develop a detailed timeline for when agencies would do so. Establishing this timeline is important for DOA to meet its statutory requirement to monitor executive branch agency IT operations.

Recommendation

We recommend the Wisconsin Department of Administration:

- *complete collection of information to develop the dashboard and analyze executive branch agency adherence to the State of Wisconsin IT Security Policy Handbook and related standards by December 30, 2021;*
- *respond to the analyses by working with executive branch agencies that are not adhering to the State of Wisconsin IT Security Policy Handbook and related standards to bring them into compliance by September 30, 2022;*
- *review and update the monitoring program, including establishing specific ongoing monitoring processes that DOA will perform to be assured that executive branch agencies continue to adhere to the State of Wisconsin IT Security Policy Handbook and related standards by December 30, 2022;*
- *work with the executive branch agencies by January 31, 2022, to develop the timeline for purchase, implementation, and configuration of the vulnerability management tool;*
- *establish detailed plans by June 30, 2022, for how DOA will perform ongoing vulnerability assessments with the new vulnerability management tool, respond to those assessments, and make changes to further strengthen the State's IT environment; and*
- *review and continue to update its risk management program including considering the risks related to approved policy exceptions and remediating known vulnerabilities.*

In addition, we recommend the Wisconsin Department of Administration report to the Joint Legislative Audit Committee by April 1, 2022, on the status of its efforts to implement these recommendations.

Type of Finding: Significant Deficiency

Response from the Wisconsin Department of Administration: The Department of Administration agrees with the finding and recommendations.

Finding 2021-002: Information Security Controls at the University of Wisconsin System*

Background:

UW institutions rely on IT systems and are responsible for maintaining confidential and sensitive information, such as student data. UW System Administration maintains the Shared Financial System (SFS), which is UW System's accounting system, and the Human Resource System (HRS), which is UW System's payroll and personnel system. Both HRS and SFS data are stored on infrastructure managed by UW-Madison's Division of Information Technology (DoIT). These systems are used by all UW institutions. In addition, each institution maintains its own student information system to administer federal student financial assistance programs under the Student Financial Assistance Cluster, as well as other computer applications. UW System Administration is responsible for developing systemwide information security policies.

We first reported concerns with UW System Administration's information security policies, procedures, and controls in our financial audit of UW System for FY 2014-15 (report 16-3). During subsequent audits, we recommended UW System Administration take additional steps in its development of a comprehensive information security program. Most recently in report 20-29, we recommended that UW System Administration develop systemwide information security policies that align with NIST guidance, develop a structure to effectively monitor compliance with systemwide policies, and work with UW institutions to achieve compliance.

Criteria:

Under s. 36.09, Wis. Stats., the Board of Regents is responsible for the governance of UW System, including protecting institutional and research data. Board of Regents Information Security Policy 25-5, which was adopted in February 2016, delegates authority to the UW System President to implement and maintain an information security program. The policy specifies that this program be comprehensive to encompass all aspects of information security, including system access and authentication; system and data integrity; data access, privacy, and confidentiality; and incident response.

UW System Administration is responsible for developing systemwide policies that form the basis for a comprehensive information security program, and the policies are approved by the UW System President. Board of Regents Information Security Policy 25-5 requires that NIST standards be used as a guide in developing systemwide policies. Chancellors and chief information officers at each UW institution are responsible for monitoring compliance with the policies, but UW System Administration retains overall oversight authority and responsibility for ensuring implementation and adherence to

the information security program. In April 2018, UW System developed an information security program document that identified proposed information security policies, which were expected to be implemented over multiple years.

In February 2021, the UW System Board of Regents President and UW System Interim President directed each UW institution to implement specific action steps throughout the institution. For example, UW System Administration was to define data elements to be captured as part of a monitoring program, and each UW institution was to begin monthly reporting on those data elements on July 1, 2021.

Condition:

Although UW System Administration had taken corrective actions as of June 30, 2021, none of its new policies were in effect in FY 2020-21. As a result, we continued to identify concerns for FY 2020-21 that were similar to prior years. As of June 30, 2021, UW System Administration had developed information security policies that aligned with the five core functions of the specific NIST framework it adopted. For example, in FY 2020-21, UW System Administration developed five information security policies on IT asset management, risk management, privacy, logging and vulnerability management. The policies are expected to be in effect at staggered dates during FY 2021-22 and FY 2022-23.

Further, UW System Administration developed a structure to monitor UW institution compliance with systemwide policies in June 2021. However, the related reporting by UW institutions was not implemented until July 1, 2021, and included compliance with only those policies that were in effect at the time of reporting. As a result, UW institutions did not report on compliance with the five new policies developed in FY 2020-21.

Context:

We interviewed key UW System Administration staff to gain an understanding of the steps that were taken by June 30, 2021, in the development and implementation of a comprehensive security program, including systemwide policies and related oversight of UW institutions. We reviewed all systemwide policies developed before June 30, 2021, and compared them to the adopted NIST framework. We also reviewed documentation of periodic meetings between UW System Administration and UW institutions to discuss information system security topics throughout the year.

Questioned Costs:

None.

Effect:

Weaknesses in information security policies, standards, and procedures weaken the level of security provided by UW System Administration. For example, not providing guidance for the handling, protection, and privacy of an individual's personal data increases the risk that personally identifiable information could be accidentally or maliciously exposed.

Failure to monitor UW institution IT environments may lead to vulnerabilities in UW System's network, known or unknown, because there is no assurance that all systems are meeting the minimum level of security for UW System's IT environment, as established by systemwide policies and related standards and procedures. Weaknesses in the security of the network can lead to inappropriate access to

confidential or sensitive data, unauthorized changes to the data within the system, or a failure of the system.

Although it can be difficult to determine how information security concerns affect the financial statements and material compliance areas, ineffective information security controls may permit controls over individual systems to operate improperly and may allow financial statement misstatements and noncompliance to occur and not be detected.

Cause:

UW System Administration developed five new policies, yet none were in effect in FY 2020-21 nor was the related monitoring in place in FY 2020-21.

Recommendation

We recommend University of Wisconsin System Administration complete implementation of the systemwide policy monitoring program by:

- *collecting and analyzing UW institution compliance reports and;*
- *continuing to work with UW institutions to achieve compliance in a timely manner when noncompliance is identified.*

Type of Finding: Significant Deficiency

Response from University of Wisconsin System Administration: UW System Administration agrees with the finding and recommendations.

Finding 2021-003: Monitoring and Use of Predictive Analytics for the Unemployment Insurance Program

Background:

The Department of Workforce Development (DWD) administers the Unemployment Insurance (UI) program, which pays monetary benefits to certain individuals who have lost a job. Unemployed individuals file initial benefit claim applications and subsequent weekly benefit claims. When an initial claim or weekly claim is filed, DWD is required to verify the information provided in order to establish the statutory eligibility of individuals and the amount of weekly benefits to pay them. At times, DWD cannot verify the eligibility of an individual with the current information the individual filed. In these cases, it is DWD's process to review the issue and place a "hold" on the individual's account for each eligibility issue identified. A hold stops the processing of the claim until DWD staff review the hold. Holds are typically assigned for review to a claims specialist or an adjudicator, who is responsible for obtaining additional information to determine whether the hold can be removed or the claim should be denied.

In March 2020, the public health emergency resulted in a significant increase in unemployment insurance claims being filed. In addition, DWD began making payments through several new federal programs, created under the Coronavirus Aid, Relief, and Economic Security (CARES) Act, that were aimed at providing additional

benefits to unemployed individuals. DWD experienced a significant backlog of claims that needed to be processed, including claims that had holds in need of review. As of November 28, 2020, DWD reported a backlog of claims for 65,348 individuals with 98,915 holds requiring review.

To address the backlog of claims, DWD contracted with Google/SpringML to develop a predictive analytics model that DWD could use to remove eligibility holds. DWD provided the contractor with historical data, including information on holds related to claims and whether the holds had been removed. Using this data, the contractor developed the predictive analytics model that predicted whether or not a hold could be removed from an individual's account and assigned a confidence score to the prediction, which represented the level of confidence in the prediction. DWD reported that it reviewed the results of the predictive analytics model developed by the contractor through various analyses, including a comparison of the model's results with manual processes for holds removed in November 2020. DWD worked with the contractor to establish an acceptable confidence score threshold and then worked to refine the model through December 11, 2020.

In December 2020, DWD provided all outstanding holds to the contractor, which processed the information through the predictive analytics model. Beginning in January 2021 and each week thereafter, DWD loaded all outstanding holds to the contractor's platform, and DWD processed this information through the predictive analytics model. The predictive analytics model provided the results to DWD, including an assessment of the holds that could be removed and the assigned confidence score for each hold. DWD staff assessed the results; determined, in aggregate, which holds would be removed; and calculated an overall projected error rate using the assigned confidence scores and the results from the review performed in November 2020. DWD staff recommended the aggregate number of holds to be removed and the projected error rate for those holds to DWD management for approval.

Holds not removed through this process remained on the individual's account. DWD indicated that no individuals were denied benefits based upon the results of the predictive analytics model. According to DWD staff, holds for individuals who had applied for benefits under the Pandemic Unemployment Assistance program were not removed through the predictive analytics model due to insufficient history with this program.

Criteria:

DWD is responsible for ensuring the UI program adheres to federal statutes and federal regulations when determining the eligibility of an individual, including making this determination in a timely and accurate manner. Unemployment Insurance Program Letter (UIPL) 12-01, issued by the U.S. Department of Labor (DOL) in December 2000, states that the determination of an individual's eligibility for benefits involves determining the facts of an individual's situation and the adjudication of issues identified. Both of these actions are considered to be inherently governmental functions as they each require discretion in the interpretation of state law. An inherently governmental function is defined as a function that is so intimately related to the public interest as to mandate performance by governmental employees.

DOL released an update to UIPL 12-01 in January 2021, which indicates that states may outsource automated data processing functions provided the related activities:

- do not require the use of discretion in applying governmental authority; and
- do not affect decisions concerning whether or not an individual is eligible to receive unemployment insurance benefits.

To ensure outsourced functions operate correctly, it would be expected that procedures would be developed and implemented to adequately monitor the ongoing accuracy and reliability of the outsourced functions.

Condition:

DWD's approval process did not establish a projected error rate above which the removal of holds would not be approved. In addition, when making decisions to remove holds that could affect an individual's eligibility to receive benefits, DWD did not demonstrate that its predictive analytics model involved a review of each individual or each individual hold. Further, DWD did not adequately monitor the ongoing accuracy of the predictive analytics model, such as by reviewing and testing a sample of removed holds for accuracy. Instead, DWD relied on the review of the predictive analytics model that had been completed using the November 2020 data.

Context:

We interviewed DWD staff to gain an understanding of the process used to develop the predictive analytics model with the contractor, the process used to provide data to and receive data from the contractor, and the approval process for removing holds. Based on documentation provided by DWD staff, 169,257 holds were removed from individual accounts through the use of the predictive analytics model between December 2020 and June 2021. During FY 2020-21, DWD reported a total of 3.0 million holds were removed from individual accounts through both manual review and the predictive analytics model.

Questioned Costs:

Questioned costs cannot be determined because the removal of a hold from an individual's account may or may not result in a benefit payment.

Effect:

In data provided by DWD, the projected error rate that was calculated during the weeks in December 2020 to June 2021 ranged from a high of 26.8 percent to a low of 5.5 percent. For the period of December 11, 2020, to December 18, 2020, DWD removed 45,913 holds with calculated projected error rates that ranged from 22.7 percent to 23.7 percent. Therefore, while the removal of a hold from an individual's account may or may not have resulted in a benefit payment, it is likely that some payments were made to ineligible individuals as a result of a hold removed through the predictive analytics model. Collection of overpayments that were paid because of a hold removed through this process is limited since s. 108.22 (8) (c), Wis. Stats., would classify such overpayments as department error for which collection is not permitted.

DOL requires DWD to perform quarterly reviews of a sample of benefit payments to assess the accuracy of DWD's processes. As a result of these reviews, DWD staff

indicated errors were identified that were the result of department error and, since the predictive analytics model was implemented, these types of errors have increased.

In the absence of adequate monitoring over the predictive analytics model, and because DWD is not reviewing the facts and circumstances of each individual's eligibility in removing holds, it may be difficult for DWD to demonstrate that it retained its inherently governmental function, while outsourcing automatic data processes, as required by DOL.

Cause:

The predictive analytics model was implemented to address the backlog of claims that had holds in order to better meet DOL's timeliness requirement, as discussed in DOL's UIPL 04-01. However, DWD did not implement adequate procedures to monitor the ongoing accuracy of the predictive analytics model in assessing whether a hold could be appropriately removed.

☑ Recommendation

We recommend the Wisconsin Department of Workforce Development:

- *seek written assurance from the U.S. Department of Labor that the predictive analytics model is meeting federal requirements for DWD to review the facts and circumstances when making decisions that affect whether or not an individual is eligible to receive benefits; and*
- *implement and document adequate procedures to monitor the ongoing accuracy of the predictive analytics model in assessing whether a hold could be appropriately removed.*

Type of Finding: Significant Deficiency

Response from the Wisconsin Department of Workforce Development: The Department of Workforce Development agrees with the first finding and recommendation. DWD has already sought such written reassurance from the U.S. Department of Labor. DWD disagrees with the second finding in part but agrees with the recommendation.

In Finding 2021-003, regarding the Condition section, LAB writes, "Further, DWD did not adequately monitor the ongoing accuracy of the predictive analytics model, such as by reviewing and testing a sample of removed holds for accuracy." DWD disagrees with this finding as DWD did provide documentation to LAB demonstrating the agency's monitoring activities. Specifically, DWD—working with Google and SpringML—iteratively developed the predictive models based on 2,945,120 hold resolutions pertaining to 717,404 distinct UI claimants that occurred between January 1, 2019 and November 1, 2020. The accuracy of each model's prediction was compared to the actual, manually determined resolution of that hold, and this information was used to calculate an error rate by hold type.

While DWD may not have implemented and documented its monitoring the accuracy of the model in the way LAB describes, DWD believes that the agency's monitoring of the accuracy of the model (and minimizing the impact of any inaccuracy) is appropriate for the reasons stated in the accompanying Corrective Action Plan. Further, DWD has not

performed manual sampling of holds, as LAB describes, for several reasons described in the Correction Action Plan.

DWD acknowledges the need to ensure accuracy of its predictive models and to document this process but clarifies that its models, which are based on the data from January 2019 through November 2020 and have been in use since DWD began using predictive analytics in December 2020, were and continue to be accurate. Model retraining is generally performed when there are significant changes to the environment in which the model functions. Specifically, in the case of a UI holds prediction model, model retraining may be required when there are law or policy changes that alter eligibility or significant system modifications. Since the inception of the use of the models to date, there have been no such law or policy changes or significant system modifications that would require retraining of the model. Retraining the models or recalculating the error rates using more recent holds resolution data would likely result in a less accurate model, since such data would include those holds that were removed based on model predictions. That is, the model would be based on the model's results and would introduce uncertainty to the machine learning process. DWD is committed to ensuring that the automated processes are accurate. Until there is a change to law or policy that alters eligibility or significant system modifications that may require DWD to retrain models and recalculate error rates, it will continue to use the current and accurate models. Therefore, DWD agrees with the recommendation to document its monitoring procedures, and if there are changes to law or policy, any updates to the model and process will be documented.

Rebuttal from the Wisconsin Legislative Audit Bureau: During the course of our audit fieldwork, we obtained audit evidence to support the conclusions reported in the finding. Within its response to Finding 2021-003, DWD indicated its disagreement with the finding that DWD did not adequately monitor the ongoing accuracy of the predictive analytics model, as noted in the Condition section of the finding. In its response, DWD indicated that it provided documentation to LAB demonstrating in-depth monitoring activities. The documentation DWD provided to us demonstrated that the predictive analytics model was reviewed prior to its use. However, the documentation did not provide evidence of adequate monitoring of the ongoing accuracy of the predictive analytics model, which is the basis for the recommendation that is being made in the finding.

We would also like to clarify a few points made in DWD's response on pages 100 and 101 or corrective action plan on pages 239 through 244.

- DWD reported that retraining the predictive analytics model would result in using more-recent hold resolution data and would likely result in a less accurate model. However, we did not recommend that DWD retrain the predictive analytics model. We recommended that DWD implement monitoring of the ongoing accuracy of the predictive analytics model.
- DWD reported that a sample of a small number of more-recent holds would not likely be more accurate than the tests already performed. Although we did suggest that this could be an approach to assessing the on-going accuracy of the predictive analytics model, we did not recommend this approach.
- DWD reported that its improper payment rate was estimated to be 15.93 percent. Although this rate was reported by DWD to be better than the national average, it is

still above the improper payment error rate of 10 percent required by the Payment Integrity Information Act and established as a performance measure by the U.S. Department of Labor.

In its corrective action plan on pages 239 through 244, DWD discussed its current monitoring of the accuracy of the predictive analytics model. However, we were not provided audit evidence to support that DWD performed adequate monitoring of the ongoing accuracy of the predictive analytics model during FY 2020-21, which was the period we audited. As part of our FY 2021-22 audit, we will follow up on DWD's corrective actions and review the documentation of the monitoring DWD indicates is currently in place.

Finding 2021-004: Access Controls over Unemployment Insurance Program Systems

Background:

The Department of Workforce Development relies on IT systems to administer its programs, including the UI program. DWD uses several IT systems to maintain employer accounts and contributions, determine eligible program participants, and process UI benefit payments. For example, DWD uses the State Unemployment Insurance Tax Enterprise System (SUITES), which is used to maintain employer accounts and contributions. DWD is responsible for ensuring the security of SUITES.

We first identified concerns with access controls over DWD's IT systems during our FY 2018-19 audit, and we recommended DWD make improvements, including by completing required access reviews and removing access for terminated employees in a timely manner. During our FY 2019-20 audit, DWD noted that corrective actions were delayed due to the public health emergency. As a result, we continued to identify concerns related to the review of access controls over the SUITES system. We also identified concerns related to semiannual reviews of access to federal tax information. We recommended DWD improve controls (report 21-6).

Criteria:

As required by 2 CFR 200.303, DWD is responsible for establishing and maintaining effective internal control over its federal programs to provide reasonable assurance that the federal programs are administered in compliance with federal statutes and regulations. Controls over the security, maintenance, and processing of information in IT systems that are used to administer the UI program are part of an effective internal control system.

DWD is also required to follow Internal Revenue Service (IRS) Code regulations. Under 26 US Code 6103, every six months, the IRS requires a review of staff access to federal tax information. In addition, DWD is required to follow the Wisconsin *IT Security Policy Handbook* and associated standards established by the DOA. DOA standards require that access to all accounts be reviewed on an annual basis and access to privileged accounts must be reviewed every six months to determine whether access is still needed and remains appropriate. Further, the Wisconsin *IT Security Policy Handbook* and associated standards require that user accounts be disabled within a maximum of three days from the employee termination date.

Condition:

In response to the concerns identified in our prior audit, DWD developed a corrective action plan to review access to SUITES and federal tax information, establish a process to review access for both privileged and non-privileged accounts, and improve controls related to timely notification for employee terminations to allow for user accounts to be disabled.

Because implementation of the corrective action plan was delayed, we identified exceptions in our FY 2020-21 testing that were consistent with our prior concerns. For instance, access reviews for both privileged and non-privileged accounts, including employees with access to SUITES, were not completed during FY 2020-21. Although DWD completed a review of access to federal tax information in March 2021, the previous review was completed in FY 2018-19, which was less frequent than the required six-month period for these reviews. We also continued to identify accounts that were not disabled in a timely manner as a result of delays in notification of employee terminations to the IT staff. Finally, we identified a new concern related to DWD's monitoring of the IT system access granted to certain disabled accounts.

We determined that the detailed results of our review, both related to our findings identified in prior audits and the new concern related to monitoring of access, were too sensitive to communicate publicly. Therefore, we communicated the detailed results to DWD in a confidential communication.

Context:

We reviewed DWD IT procedures and compared them to federal regulations, state IT policies and standards issued by DOA, and NIST guidance. We requested an update from DWD on the status of planned corrective actions related to the concerns communicated as part of our prior audit. In addition, we interviewed DWD staff, requested information necessary to complete our testing, and performed testing to determine whether the concerns we identified in prior years continued into FY 2020-21.

Questioned Costs:

None.

Effect:

Procedures that do not align with federal regulations and state IT policies and standards weaken the level of security of IT systems. For example, not properly managing and maintaining appropriate access, or not performing access reviews for IT systems used to administer the UI program, could result in the issuance of erroneous or fraudulent payments, ineligible program participants, or inappropriate viewing of confidential data.

Cause:

DWD delayed implementation of the correction action plan it created in response to the recommendations we made in prior audits. DWD attributed this delay to the public health emergency. In addition, DWD indicated it did not monitor access granted to certain disabled accounts because DWD did not consider it necessary to monitor disabled accounts.

Recommendation

We recommend the Wisconsin Department of Workforce Development:

- *complete full implementation of its corrective action plan by March 2022;
and*
- *address the specific concerns included in the confidential
communication by June 2022.*

Type of Finding: Significant Deficiency

Response from the Wisconsin Department of Workforce Development:

The Department of Workforce Development agrees with these findings and recommendations. DWD has made substantial progress in implementing its corrective action plan and will achieve full implementation by March 2022. Further, DWD will address the specific concerns included in the confidential communication by June 2022.

Section III

Federal Award Findings and Questioned Costs

Uniform Guidance requires that audit findings be presented in sufficient detail for the auditee to prepare a corrective action plan and take corrective action, and for federal agencies and pass-through entities to make a management decision. The specific information that Uniform Guidance requires in audit findings can be found in the agency narratives on the page numbers referenced in this section. The agency narratives also include the agencies’ responses. Agencies’ corrective action plans for audit findings are included in the Corrective Action Plans chapter, which begins on page 235.

Repeat findings from report 21-6 are marked with an asterisk (*).

Status of Audit Finding: Partially Corrected

Our current completion rate for MMIS access reviews is just under 60 percent. For those access reviews completed, we have removed any unneeded or excessive access based on the supervisor's review and instruction. DMS continues to send reminders and partner with supervisors for completion. Additionally, DMS is currently engaged with Gainwell on a role-based access project for ForwardHealth that will improve access management and oversight for MMIS.

BITS completed the access review procedure for the CARES environment by June 30, 2021, as planned. The annual CARES access review was scheduled to be completed by December 31, 2021, and was completed ahead of schedule.

Finding: Medical Assistance Program Payments to Terminated Providers (2020-302)

Federal Program: Medical Assistance Program (CFDA #93.778)

Status of Audit Finding: Corrective Action Taken

DHS has completed the corrective action plan for this finding. The identified claims were sent for adjustment and the federal share of the claims was repaid. A weekly report that identifies claims potentially impacted by retroactive provider terminations was implemented in August 2020. Initially this was a manual process where the claims were reviewed weekly by impacted business areas and determinations were made regarding which claims should be adjusted. The identified claims were then sent for adjustment through a weekly adjustment job. The automation of this process was implemented on July 9, 2021.

Finding: Children's Health Insurance Program Participant Age (2020-303)

Federal Program: Children's Health Insurance Program (CFDA #93.767)

Status of Audit Finding: Partially Corrected

DHS agreed to work with the U.S. Department of Health and Human Services (DHHS) to repay the federal government for instances of incorrect payments made for the 215 ineligible CHIP individuals identified during this audit. DHHS informed DHS that it does not need to make a repayment.

DHS agreed to implement training and process and systems improvements that will ensure timely processing of CARES alerts. Given our current policy to not terminate health care coverage during the federal public health emergency, we expect to implement these improvements in 2022, after the federal public health emergency has ended.

DHS proposed to implement system changes that would prevent workers from assigning a CHIP participation status code to someone who is 19 years of age or older. Given our current policy to not terminate health care coverage during the federal public health emergency, we expect to implement these improvements in 2022, after the federal public health emergency has ended.

Status of Audit Finding: Not Corrected

The Department continues to disagree with this finding. The Department will be meeting with the Centers for Medicare and Medicaid Services (CMS) to discuss the finding and to understand if CMS's understanding of the legal framework around provider overpayments is the same as the Department's understanding.

Finding: Medical Assistance Program Payments to Terminated Providers (2018-301)

Federal Program: Medical Assistance Program (CFDA #93.778)

Status of Audit Finding: Corrective Action Taken

DHS has completed the corrective action plan for this finding. The identified claims were sent for adjustment and the federal share of the claims was repaid. A weekly report that identifies claims potentially impacted by retroactive provider terminations was implemented in August 2020. Initially this was a manual process where the claims were reviewed weekly by impacted business areas and determinations were made regarding which claims should be adjusted. The identified claims were then sent for adjustment through a weekly adjustment job. The automation of this process was implemented on July 9, 2021.

Finding: Medical Assistance Program Payments for Ineligible Services to Inmates (2018-303)

Federal Program: Medical Assistance Program (CFDA #93.778)

Status of Audit Finding: Partially Corrected

DHS has completed the corrective action plan for this finding. The identified claims were sent for adjustment and the federal share of the claims was repaid. A system project was implemented on June 30, 2021, that automates the identification and denial of claims for ineligible services provided to incarcerated members. The incarceration facility included in the feed are for DOC, jail, and federal prison. For this reason, the edit was taken out temporarily until the data in the feed is improved. A project is underway to improve the data quality. In October 2020, the Department of Corrections started automatically notifying DHS when Medicaid members became incarcerated through a new data exchange, allowing DHS to suspend the Medicaid eligibility for these members during their incarceration.

Status of Prior Year Audit Findings

Finding: Department of Administration Information Technology Oversight Responsibilities
(2020-002, 2019-003, 2018-004, 2017-005)

Status of Audit Finding:
Partially Corrected

Planned Corrective Action:

Goals and timelines have been established with agencies as a result of the recent (June 1, 2021) release of the updated Policy, Standards and Procedures template to gather the information from agencies on alignment of their procedures with the IT Policy Handbook and Standards. The template was updated based on the annual review and update of the IT Policy Handbook and Standards. A quarterly and annual review timeline has been established and a process to monitor and track to assist agencies not achieving compliance.

Work continues to establish the long-term plan and process with milestones to address Vulnerability Management, Penetration Testing and Risk assessments.

An evaluation of the baseline Risk Assessment Plan from June 2020 was conducted in December 2020 and identified gaps to be completed with the completion of the Vulnerability Mgmt tool (Tenable io) that is a dependency to complete a comprehensive long-term process and oversight schedule for assessments and remediation plans, when needed.

Finding: Information Technology Controls at the University of Wisconsin System (2020-003, 2018-700, 2017-003, 2016-12, 2015-030)

Status of Audit Finding as of 6/30/2021: Corrective Action Taken

This document explains the June 30, 2021 status of the University of Wisconsin (UW) System's Corrective Action Plan (CAP) for finding 2020-003: Information Technology (IT) Controls at the University of Wisconsin System within Fiscal Year 2019-20 Single Audit Report 21-6. The following summarizes the corrective actions taken.

Continue development and maintenance of a comprehensive information security program, including developing systemwide information security policies, standards, and procedures across the remaining critical information security areas, as recommended by National Institute of Standards and Technology publications.

A comprehensive set of policies and procedures were developed and maintained consistent with the five core functions of the National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF): identify, protect, detect, respond and recover.

UW System continues to mature its IT security program via revision of existing as well as the publication of several new information security (IS) policies. This policy set, including supporting procedures, is well-aligned with the NIST's CSF and substantially improves the UW System's ability to identify, protect, detect, respond, and recover from IS threats and associated incidents.

Updated policy sets include Authentication, Data Classification and Protection, Awareness, and Incident Response. New policy sets include General Terms and Definitions, IT Asset Management, Information Security Risk Management, Privacy, Logging and Monitoring and Threat and Vulnerability Management. Additionally, UW System's IT Disaster Recovery policy completed institutional vetting and is expected to be signed by the President in August 2021. An Endpoint Protection policy is nearing completion and is expected to be published in the first quarter, FY-22. Combined with existing UW Board of Regents Policies (Acceptable Use of Information Technology Resources, Strategic Planning and Large or High-Risk Projects, and Information Security), the UW System now provides policy coverage spanning the entire spectrum of the five core functions and all outcome categories detailed within the NIST's CSF.

Develop a structure to effectively monitor compliance with systemwide policies.

A structure has been developed for UW institutions to report policy compliance on a monthly basis. Monitoring is conducted through sharing of reports with UW institutions and UW System leadership, including Internal Audit.

In support of the February 8, 2021 UW System "Information Security Actions" joint letter issued by Andrew S. Petersen, President, UW System Board of Regents and Tommy G. Thompson, President, UW System, as well as in response to the Legislative Audit Bureau recommendation to ensure all University of

Wisconsin institutions comply with its policies and procedures, UW System developed an online IS policy compliance survey to collect data in a monthly report, beginning Fiscal Year 2022.

These reports are reviewed with UW institutions and UW System leadership, including Internal Audit. Data elements collected from each UW institution in this monthly survey include: status of compliance with the major components of existing IS policies, status of progress or completion of actions identified in "Information Security Actions" (letter of February 8, 2021 described above), description of cybersecurity incidents and optional feedback / suggestions for survey improvement. Information obtained from these monthly reports is used to assist UW institutions with compliance activities, through leveraging inter-campus resources and/or UW System Administration (UWSA) IT and IS resources, as requested.

Work with UW institutions to achieve compliance in a timely manner, when noncompliance is identified.

Coupled with on-going efforts over the past five years, additional resources have been identified to perform outreach activities, including assisting campuses with achieving compliance, while leveraging the above-mentioned compliance reporting and monitoring activities.

The UW System Office of Information Security (OIS) intensified efforts to enhance collaborative support of the UW System institutions, in relation to this ongoing objective. Over the course of the past year, OIS conducted monthly meetings with the Technology and Information Security Council (TISC), a group of IS professionals which represent the UW System institutions, across the State of Wisconsin. These meetings are dedicated to driving progress in areas in which individual institutions have been challenged to achieve policy compliance objectives. Monthly and bi-monthly meetings with UW institution CIOs and IS Designees have also been a priority, to drive compliance awareness and progress throughout the enterprise.

UWSA developed an IT as a Service (ITaaS) model in which core IT and security operations will be delivered in a standardized manner by a centralized and unified team. As part of the ITaaS service, UWSA's Office of Information Security expanded to provide awareness and outreach activities through the creation of an IS Training, Awareness and Outreach team. The Director position is staffed with an individual who has over a decade of hands-on experience managing IS at the institution level. With their existing knowledge of the UW System environment, it is expected that the individual in this new role will deliver immediate as well as long term benefit, by executing enhanced and standardized IS training and awareness activities throughout UW System. Additionally, a core component of this new role will be to assist the UW System institutions with understanding the implementation requirements of UW System IS policies. The combination of regular leadership meetings to discuss and solve UW institution compliance challenges, combined with ITaaS and the creation of the position of Director of IS Training, Awareness and Outreach, all demonstrate UW System's ongoing commitment to supporting and continually improving timely compliance with UW System IS policies.

UW System remains committed to the ongoing improvement of its information security posture and appreciates the assistance which the State of Wisconsin Legislative Audit Bureau has provided in illuminating areas for further improvement. It is recognized that mature information security is not a stationary destination, but rather, an unending journey. We look forward to continuing our collaborative relationship with the Legislative Audit Bureau.

Notes to the State of Wisconsin Schedule of Expenditures of Federal Awards

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Purpose

The Schedule of Expenditures of Federal Awards presents a summary of the State of Wisconsin's expenditures funded by the federal government for the fiscal year ended June 30, 2021. For purposes of the schedule, federal programs have been classified as follows: 1) Individual Programs and Other Clusters, including grants received directly from the federal government and subgrants received from other organizations; 2) the Research and Development (R&D) Cluster, including R&D grants received directly from the federal government and R&D subgrants received from other entities; and 3) the Student Financial Assistance (SFA) Cluster.

Direct federal awards and subgrants are presented for each federal agency by the Assistance Listing number when available in the grant agreements or determinable based on a grant's source and purpose. For grants that did not clearly state an Assistance Listing number, the schedule includes the grant, or a total for several grants, with an Assistance Listing number that ends in "N/A" for not available. An "other identifying number," when available, is required to be shown if the Assistance Listing number is not available. In order to separately identify expenditures associated with the response to the Novel Coronavirus (COVID-19), the designation of "COVID-19" has been added as a prefix to the applicable grant program names for grants that were fully or partially funded by COVID-19 legislation. For grants that had both COVID-19 and non-COVID-19 related expenditures, the COVID-19 and non-COVID-19 related expenditures are presented on separate lines in the schedule.

Because the schedule presents only a selected portion of the activities of the State, it is not intended to and does not present the financial position or results of operations of the State.

B. Basis of Accounting

The accompanying Schedule of Expenditures of Federal Awards has been prepared from the accounting and inventory records of Wisconsin state agencies, including the University of Wisconsin (UW) System, and from federal reports submitted by the state agencies to the various federal grantor agencies. The State's accounting records are maintained on a budgetary basis, in accordance with Wisconsin Statutes. State statutes and state accounting policies require that disbursements be recognized in the fiscal year in which they are recorded for payment, except for certain state employee fringe benefits and selected other items that are recognized in the period to which the payments relate, regardless of when paid. The State's centralized accounting records remain open for a period of time after June 30 to permit the recording of expenditures applicable to the fiscal year ended June 30, in accordance with Wisconsin Statutes. Expenditures and amounts provided to subrecipients in the schedule are presented in accordance with the budgetary basis of accounting as described in this paragraph, except for amounts related to Unemployment Insurance (UI) (Assistance Listing number 17.225), which are reported on the accrual basis of accounting (Note 7), and the Supplemental Nutrition Assistance Program (SNAP) (Assistance Listing number 10.551), which are reported based on settlement and issuance data (Note 20).

A timing variance may exist between the recording of federal grant expenditures in the accounting records and the reporting of the expenditures to the federal government or other subgrantor organizations.

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance) requires the Schedule of Expenditures of Federal Awards to include the amount provided to subrecipients under each federal program. The amount provided to subrecipients under each federal program was determined by the state agencies. Amounts provided to subrecipients on the schedule reflect subgrants made by a state agency to another entity outside of the State's reporting entity.

To eliminate double counting of subgrants between state agencies, the schedule includes expenditures reported by the state agency that received and ultimately expended the subgranted funds, but does not include these expenditures in the reported totals of the subgranting state agency. For subgrants between state agencies, the subgranting state agency is cited within parentheses after the program name.

C. State Agencies Included

The following state agencies were included in the scope of the federal compliance portion of the audit. State agencies that administered a major federal program audited during the FY 2020-21 single audit are indicated in **bold**.

1. Board for People with Developmental Disabilities (BPDD)
2. Child Abuse and Neglect Prevention Board (CANPB)
- 3. Department of Administration (DOA)**
- 4. Department of Agriculture, Trade and Consumer Protection (DATCP)**
- 5. Department of Children and Families (DCF)**
- 6. Department of Corrections (DOC)**
7. Department of Financial Institutions (DFI)
- 8. Department of Health Services (DHS)**
- 9. Department of Justice (DOJ)**
10. Department of Military Affairs (DMA)
- 11. Department of Natural Resources (DNR)**
- 12. Department of Public Instruction (DPI)**
- 13. Department of Revenue (DOR)**
14. Department of Safety and Professional Services (DSPS)
- 15. Department of Tourism (Tourism)**
16. Department of Transportation (DOT)
- 17. Department of Veterans Affairs (DVA)**
- 18. Department of Workforce Development (DWD)**
19. Educational Communications Board (ECB)
20. Elections Commission (Elections)
21. Employee Trust Funds (ETF)
22. Labor and Industry Review Commission (LIRC)
- 23. Office of the Commissioner of Insurance (OCI)**
24. Office of the Governor (GOV)
25. Public Defender Board (PDB)
26. Public Service Commission (PSC)
27. Secretary of State (SOS)
28. State Fair Park (SFP)

29. University of Wisconsin System

- 30. Wisconsin Court System (Courts)
- 31. Wisconsin Historical Society (WHS)
- 32. Wisconsin Technical College System (WTCS)

The Wisconsin Humanities Council is a nonprofit organization associated with UW System. Through a contract with the Wisconsin Humanities Council, UW System is responsible for fiscal and personnel administration of the Council. At the request of the Wisconsin Humanities Council, the Council was included as a unit within UW System.

Federal awards administered by the Wisconsin Housing and Economic Development Authority, the Wisconsin Economic Development Corporation, and the University of Wisconsin Hospitals and Clinics Authority were not included in the scope of this audit. These entities had single audits performed by other auditors, as necessary.

2. USE OF DE MINIMIS COST RATE

The following state agencies elected to use the 10 percent de minimis cost rate for indirect costs during FY 2020-21:

- DVA; and
- Elections.

No other state agencies elected to use the 10 percent de minimis cost rate permitted under 2 CFR s. 200.414 of the Uniform Guidance.

3. FEDERAL SANCTIONS AND DISALLOWANCES

There are actual or potential federal sanctions and disallowances for the Medical Assistance (MA) Program (Assistance Listing number 93.778) and the Community Development Block Grants/State's program and Non-Entitlement Grants in Hawaii (CDBG) (Assistance Listing number 14.228) program.

A. Reporting and Refunding the Federal Share of Medicaid-Related Settlements and a Judgment

On August 14, 2018, DHS received a draft report from the U.S. Department of Health and Human Services (DHHS) Office of Inspector General (OIG) recommending a disallowance related to the Medicaid Program. The OIG review covered the period from October 2008 through September 2016. The OIG concluded that DHS did not report and refund the full federal share of Medicaid-related settlements in the amount of \$27.6 million. DHS partially disagreed with the report. The Centers for Medicare & Medicaid Services (CMS) reviewed the report and determined that OIG underreported the settlement and requested that DHS refund

\$31.0 million to the federal government. DHS submitted a formal objection letter to CMS in February 2021.

B. Disallowances for Community Development Block Grant/State's Program and Non-Entitlement Grants in Hawaii

The U.S. Department of Housing and Urban Development (HUD) provided funding to the State through the CDBG Cluster. In FY 2015-16, HUD issued a finding of noncompliance related to the State's closeout system and directed the State to undertake a review of old, open activities. DOA took corrective action to close out activities as possible, reporting the status of its efforts to HUD on a periodic basis. In late FY 2017-18, HUD performed an on-site review of those activities and, in FY 2018-19, advised that it would require DOA to reimburse the State's local account with nonfederal funds in the amount of \$7.3 million, and to continue to collect \$2.2 million that is being repaid by the units of local government. In February 2020, the State requested HUD approve a \$7.3 million voluntary grant reduction over a two-year period to satisfy the reimbursement requirement from HUD. In January 2021, HUD notified the State of a grant reduction of \$3.7 million, which was applied to each of the federal fiscal year 2021 and 2022 grants and satisfied the reimbursement requirement.

C. Provider Overpayments—MA Program

The State of Wisconsin FY 2017-18 single audit report cited DHS for failure to comply with federal regulations and return to the federal government its share of MA Program provider overpayment amounts DHS had identified and communicated to providers. The CMS letter, dated September 17, 2019, requested DHS return these funds. DHS did not agree with the finding that addresses repayment of federal funds for overpayments identified by the MA Program, as it relates to the overpayment's date of discovery when not resulting from fraud. In addition, the circuit court issued an injunction in September 2016, which was reaffirmed in March 2017, prohibiting DHS from recovering payments for noncompliance with MA Program requirements other than those set forth in statute. In July 2020, the Wisconsin Supreme Court issued a decision that restricts the ability to identify and recoup overpayments. DHS is continuing to evaluate its ability to pursue the payments.

4. FOOD COMMODITIES

Food commodities distributed during the fiscal year are reported as expenditures in the Schedule of Expenditures of Federal Awards under the various federal programs that distributed the commodities. The value of food commodities distributed during the fiscal year and the amount of food commodities on hand as of June 30, 2021, are shown in the following table for each program distributing food commodities.

Food Commodity Assistance

Assistance Listing Number	Federal Program	Distributed	Inventory Balance June 30, 2021
10.555	National School Lunch Program	\$15,704,480	\$ 502
10.559	Summer Food Service Program for Children	159,304	0
10.565	Commodity Supplemental Food Program	3,357,371	1,190,618
10.569	Emergency Food Assistance Program	28,504,935	2,648,785
Total		\$47,726,090	\$3,839,905

5. WIC SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN REBATES

During FY 2020-21, DHS received \$21,919,129 in cash rebates from infant formula manufacturers from the sale of formula to participants in WIC (Assistance Listing number 10.557). Rebate contracts with infant formula manufacturers are authorized by 7 CFR s. 246.16 (m) as a cost containment measure. Rebates represent a reduction of expenditures previously incurred for WIC food benefit costs. Applying the rebates received to such costs enabled DHS to extend program benefits to 36,665 more people than could have been served during FY 2020-21 in the absence of the rebate contracts.

6. COMMUNITY DEVELOPMENT BLOCK GRANTS/STATE'S PROGRAM AND NON-ENTITLEMENT GRANTS IN HAWAII

CDBG provides funds to local units of government to complete infrastructure and facility projects or to grant or loan funds to businesses to assist with job creation and retention, or to homeowners or landlords to assist with housing rehabilitation and homebuyer assistance. Loan repayments received by units of local government in excess of certain limits must be returned to the State. Included in the Schedule of Expenditures of Federal Awards as expenditures of the program is a total of \$5,860,091 that was supported by funds returned to the State.

7. UNEMPLOYMENT INSURANCE

UI is a joint federal-state program financed by federal taxes under the Federal Unemployment Tax Act and by state payroll taxes under the State Unemployment Tax Act. The underlying framework of the UI system is contained in the Social Security Act (SSA). Title III of the SSA authorizes grants to states for the administration of state UI laws; Title IX authorizes the various components of the federal Unemployment Trust Fund. All reserves must be held

by the federal Unemployment Trust Fund and cannot be commingled with other state funds. With limited exceptions, reserves may be used only to pay unemployment benefits. For this reason, the Wisconsin Unemployment Reserve Fund is accounted for outside of the State's central accounting system, and expenditures for UI are reported on the accrual basis of accounting, which recognizes expenditures in the period incurred, regardless of when the payment is made.

FY 2020-21 expenditures in the Schedule of Expenditures of Federal Awards for UI include \$1,022,363,363 in benefits funded by the Wisconsin Unemployment Reserve Fund; \$4,547,834 in federally funded benefits; \$2,224,723,925 in COVID-19 federally funded benefits; \$124,240 in ARRA federally funded costs; and \$82,949,175 in federally funded administrative costs.

8. HIGHWAY PLANNING AND CONSTRUCTION

Expenditures in the Schedule of Expenditures of Federal Awards for Highway Planning and Construction (Assistance Listing number 20.205) include \$30,899 in project charges that have been incurred in excess of the federally approved project budget amount. DOT will seek federal approval for increases to project budgets, and federal reimbursements are expected in the next fiscal year.

9. DONATION OF FEDERAL SURPLUS PERSONAL PROPERTY

DOA is responsible for administration of the Donation of Federal Surplus Personal Property program (Assistance Listing number 39.003). DOA receives and distributes the federal surplus property. Reported federal expenditures of \$31,319 in the Schedule of Expenditures of Federal Awards for this program represent the fair market value of property distributed by DOA during FY 2020-21. During FY 2020-21, property with a fair market value of \$31,319 was received by DOA and, as of June 30, 2021, property with a fair market value of \$0 was on hand. The fair market value of the property is calculated at 23.34 percent of the property's original acquisition cost based on guidance provided by the U.S. General Services Administration.

10. CAPITALIZATION GRANTS FOR CLEAN WATER STATE REVOLVING FUNDS AND CAPITALIZATION GRANTS FOR DRINKING WATER STATE REVOLVING FUNDS

The Environmental Improvement Fund (EIF) is an enterprise fund of the State of Wisconsin and is jointly administered by DNR and DOA. Included in the EIF is the Clean Water Fund Program, funded primarily by the federal government under the Capitalization Grants for Clean Water State Revolving Funds (Assistance Listing number 66.458), and the Safe Drinking Water Loan Program, funded primarily by the federal government under the Capitalization Grants for Drinking Water State Revolving Funds (Assistance Listing number 66.468).

Federal reporting requirements for the Clean Water Fund Program and the Safe Drinking Water Loan Program include financial statements prepared in

accordance with generally accepted accounting principles, as well as information regarding loan recipients, loan amounts, loan terms, project categories of eligible costs, and similar details on other forms of assistance. DNR and DOA provided this information to the U.S. Environmental Protection Agency in audited financial statements and other documents. New federally funded loans provided under these programs are included as expenditures in the Schedule of Expenditures of Federal Awards. The following table shows the balance of loans outstanding as of June 30, 2021.

Clean Water and Safe Drinking Water Revolving Loan Funds

Assistance Listing Number	Federal Program	Outstanding Balance ¹ June 30, 2021
66.458	Capitalization Grants for Clean Water State Revolving Funds	\$1,655,027,830
66.468	Capitalization Grants for Drinking Water State Revolving Funds	385,807,047

¹ The outstanding balance amounts shown are comprised of both federal and state funding.

11. IMMUNIZATION COOPERATIVE AGREEMENTS

The value of vaccines distributed on behalf of the Wisconsin Immunization Program during FY 2020-21 was \$51,884,543. This amount is included as expenditures in the Immunization Cooperative Agreements (Assistance Listing number 93.268) program in the Schedule of Expenditures of Federal Awards.

12. FEE-FOR-SERVICE PROGRAMS AND FIXED-PRICE CONTRACTS

State agencies may receive fees for services or reimbursement under fixed-price contracts with the federal government or other subgrantor organizations. Actual costs to provide the services are not required to be reported to the federal government or other subgrantor organizations. The schedule includes actual amounts charged to the fixed-price contracts. These amounts may be more than, equal to, or less than the contract funds received from the federal grantor agency or other subgrantor organizations.

13. FEDERAL STUDENT LOAN PROGRAMS ADMINISTERED BY THE UNIVERSITY OF WISCONSIN SYSTEM

The federal student loan programs listed below are administered by UW System, and balances and transactions related to these programs are included in the UW System Fund financial statements. Loans outstanding at the beginning of the year and loans made during the year are included in the expenditures presented in

the Schedule of Expenditures of Federal Awards. The following table shows the balance of loans outstanding as of June 30, 2021.

Federal Student Loan Programs

Assistance Listing Number	Federal Program	Outstanding Balance June 30, 2021
84.038	Federal Perkins Loan Program—Federal Capital Contributions	\$ 89,047,860
93.264	Nurse Faculty Loan Program (NFLP)	2,160,240
93.342	Health Professions Student Loans, Including Primary Care Loans/Loans for Disadvantaged Students	5,128,182
93.364	Nursing Student Loans	6,605,230
Total		\$102,941,512

14. OTHER STUDENT LOAN PROGRAMS

UW System participates in Federal Direct Student Loans (Assistance Listing number 84.268), a program that makes interest-subsidized or unsubsidized Stafford loans available to students, or PLUS loans available to graduate or professional students or to parents of dependent students. Loan funds are provided by the U.S. Department of Education, and UW institutions are responsible for disbursing the loans. The Federal Direct Student Loans amounts disbursed to students during FY 2020-21 are reported in the Schedule of Expenditures of Federal Awards. However, the total outstanding loan balance for the Federal Direct Student Loans program is maintained by the U.S. Department of Education, which is responsible for loan collection. Therefore, the outstanding loan balance is not included in the Schedule of Expenditures of Federal Awards.

15. STUDENT FINANCIAL ASSISTANCE CLUSTER ADMINISTRATIVE COST ALLOWANCE

Included in the Schedule of Expenditures of Federal Awards are the total expenditures for the administrative cost allowance provided by Federal Supplemental Educational Opportunity Grants (Assistance Listing number 84.007), the Federal Work-Study Program (Assistance Listing number 84.033), the Federal Perkins Loan Program—Federal Capital Contributions (Assistance Listing number 84.038), and the Federal Pell Grant Program (Assistance Listing number 84.063). The actual administrative cost allowance amount earned during the award year is not always determined by each UW institution for each program. These amounts are reported as either “Administrative Cost Allowance” or included with the individual program in the Schedule of Expenditures of Federal Awards.

16. PROGRAM INCOME

In some cases, program income related to federal grants is deposited in federal grant accounts and is spent for activities related to the grants. Certain program income accounts were identified by the state agencies, including UW System, and excluded from the Schedule of Expenditures of Federal Awards. However, the Schedule of Expenditures of Federal Awards includes an unknown amount of expenditures funded by program income sources and not funded directly by federal grants.

**17. DONATED PERSONAL PROTECTIVE EQUIPMENT (PPE)
(UNAUDITED)**

During the emergency period of the COVID-19 pandemic, federal agencies donated PPE purchased with federal assistance funds to the State. In certain cases, donated PPE was provided without compliance or reporting requirements or assisting listing number information. The estimated fair value of PPE provided to the State during FY 2020-21 is \$1.9 million. In accordance with the 2021 Compliance Supplement released in August 2021, this note and the related estimated fair market value of PPE provided to the State during FY 2020-21 has not been audited because donated PPE has no bearing on the single audit.

**18. PANDEMIC RESPONSE DISASTER ALTERNATIVE CARE
FACILITY**

In April 2020, the State requested Direct Federal Assistance from the Federal Emergency Management Agency (FEMA) to design, build, and upgrade the Pandemic Response and Recovery Critical Public Facilities Disaster Alternative Care Facility (ACF) for acute patient care. As directed by the State and FEMA and in coordination with the U.S. Department of Health and Human Services, the U.S. Army Corp of Engineers provided facility assessments, planning, engineering, design, contracting, and construction support to address medical facility shortages arising from the COVID-19 pandemic in Wisconsin. FEMA originally estimated the cost to complete the ACF at \$25 million. Although this work was completed in FY 2019-20, and the ACF was decommissioned in FY 2020-21, the State has not been provided with a detailed listing of the costs. Therefore, these costs have not been shown within the Schedule of Expenditures of Federal Awards. The costs will be fully funded by FEMA.

19. FEMA COST SWAP

In February 2021, a presidential memorandum was issued extending certain federal support to increase the reimbursement and other assistance provided by FEMA to states in order to combat the COVID-19 pandemic. This memorandum allowed FEMA to pay 100 percent of the costs of activities that have previously been determined to be eligible, from the beginning of the pandemic in January 2020. The State of Wisconsin previously covered \$3.3 million of these costs using funding available through the Coronavirus Relief Fund

(Assistance Listing number 21.019). During FY 2021, these costs were transferred from the Coronavirus Relief Fund in anticipation of receiving reimbursement from FEMA.

20. SNAP EBT BENEFITS REPORTING

The total amount of Supplemental Nutrition Assistance Program (SNAP) (Assistance Listing number 10.551) benefits reported on the Schedule of Expenditures of Federal Awards is calculated from electronic benefits transfer (EBT) settlement data available to DHS. However, the amount reported for the COVID-19 portion of SNAP is based on EBT issuance data. Issuance data was used to approximate the relevant COVID-19 expenditures in the Schedule of Expenditures of Federal Awards due to the unavailability of SNAP EBT settlement data specific to the COVID-19 amounts.

LAB Recommendation	DOA Planned Corrective Action	Anticipated Completion Date
1. Complete collection of information to develop the dashboard and analyze executive branch agency adherence to the State of Wisconsin IT Security Policy Handbook and related standards by December 30, 2021.	The Division of Enterprise Technology (DET) completed collecting information from executive branch agencies via the Agency IT Policies, Standards and Procedures (PSP) dashboard template. DET will complete analysis of individual executive branch agency PSP responses to assess adherence to the State of Wisconsin IT Security Policy Handbook and related standards.	September 15, 2021 December 30, 2021
2. Respond to the analyses by working with executive branch agencies that are not adhering to the State of Wisconsin IT Security Policy Handbook and related standards to bring them into compliance by September 30, 2022.	DET will work with executive branch agencies that are not in compliance with the State of Wisconsin IT Security Handbook and related standards. and use the established PSP procedures to ensure compliance.	September 30, 2022
3. Review and update the monitoring program, including establishing specific ongoing monitoring processes that DOA will perform to be assured that executive branch agencies continue to adhere to the State of Wisconsin IT Security Policy Handbook and related standards by December 30, 2022.	DET has created and published the PSP Dashboard and Operational Procedures which establishes specific ongoing monitoring processes that DOA will perform to assure that executive branch agencies continue to adhere to the State of Wisconsin IT Security Policy and related standards. This process will be reviewed and updated annually.	Completed – October 12, 2021
4. Work with executive branch agencies by January 31, 2022, to develop the timeline for purchase, implementation, and configuration of the vulnerability management tool,	DET will work with executive branch agencies to gather their plans for vulnerability management implementation.	January 31, 2022
5. Establish detailed plans by June 30, 2022, for how DOA will perform ongoing vulnerability assessments with the new vulnerability management tool, respond to those assessments, and make changes to further strengthen the State's IT environment.	After completion of vulnerability management implementation, DET will work with the executive branch agencies to update the risk assessment plan, to assure that agencies are adhering to the Risk Assessment Policy and related standard.	June 30, 2022

LAB Recommendation	DOA Planned Corrective Action	Anticipated Completion Date
6. Review and continue to update its risk management program including considering the risks related to approved policy exceptions and remediating known vulnerabilities.	DET will review and update its risk management program and associated risk assessment plan to include consideration of risks related to approved policy exceptions and remediating known vulnerabilities.	June 30, 2022
7. The Wisconsin Department of Administration report to the Joint Legislative Audit Committee by April 1, 2022, on the status of its efforts to implement these recommendations.	The DOA will report the status of its efforts to implement the LAB recommendations for Finding 2021-001, per the DOA Corrective Plan to the Joint Legislative Audit Committee.	April 1, 2022

University of Wisconsin (UW) System – Corrective Action Plan

Finding 2021-002: Information Security Controls at the University of Wisconsin System

Planned Corrective Action:

In July 2021, UW System Administration (UWSA) began analyzing UW institution compliance with systemwide information security policies and directives issued through a February 2021 Information Security Actions Memo by President Thompson and Regent President Petersen. Compliance status is determined through bi-monthly surveys filled out by each institution. Summary policy compliance reports are generated by UWSA and shared with each institution. Further, compliance reports identifying trends and patterns in policy compliance are generated, analyzed, and shared with UWSA leadership where appropriate.

UWSA's Office of Information Security (OIS) will continue to engage with UW institutions on an ongoing basis to advance systemwide compliance with policy as well as UW System's overall security posture. UWSA will continue to identify commonalities of noncompliance across institutions and determine if enterprise efforts or additional investment may be needed to assist institutions in achieving compliance.

In November 2021, OIS resumed on-site campus visits, engaging with campus IT leadership to understand barriers to information security policy compliance and areas that UWSA may assist. The intent is that all campuses will be visited at least annually. Summary reports from these visits will be generated and analyzed by OIS and shared accordingly.

Corrective Action Plan – Department of Workforce Development

Finding 2021-003: Monitoring and Use of Predictive Analytics for the Unemployment Insurance Program

- 1. RECOMMENDATION: SEEK WRITTEN ASSURANCE FROM THE U.S. DEPARTMENT OF LABOR THAT THE PREDICTIVE ANALYTICS PROGRAM IS MEETING FEDERAL REQUIREMENTS FOR DWD TO REVIEW THE FACTS AND CIRCUMSTANCES WHEN MAKING DECISIONS THAT AFFECT WHETHER OR NOT AN INDIVIDUAL IS ELIGIBLE TO RECEIVE BENEFITS.**

Planned Corrective Action:

The Department of Workforce Development (DWD) agrees with the recommendation and, in fact, has already sought such written reassurance from the U.S. Department of Labor (US DOL). However, it is important to note that no formal process exists for a state unemployment agency to request a written assurance that a particular aspect of its program meets federal conformity requirements. The unemployment compensation program is a federal-state partnership based on federal law but administered by the states. The state's unemployment program laws must meet federal conformity requirements, but US DOL does not normally review and approve a state's policy decisions in operating its program. While, from time to time, DWD's Unemployment Insurance (UI) Division has sought informal guidance from US DOL about implementing its program, it is not required to seek such pre-approval.

DWD is committed to ensuring the accuracy and integrity of automated data processing functions in the processing of UI claims. As indicated in the Legislative Audit Bureau's interim audit memo regarding Finding 2021-003, in March 2020, the public health emergency resulted in a significant and rapid increase in unemployment insurance claims being filed with DWD's UI Division.

During the public health emergency, DWD's highest priority and focus has been to address the unprecedented rate of unemployment in Wisconsin. Never has the state experienced such an incredible surge in claims so quickly. During previous economic downturns, claims slowly increased over time. For instance, during the Great Recession, Wisconsin's highest weekly regular UI claim total (approximately 195,000 claims) occurred in January 2010, three years after the recession began. It was within just six weeks of the COVID-19 public health emergency that DWD saw a peak of approximately 321,000 weekly claims. A total of 14,089,763 weekly claims were filed between March 15, 2020 and November 27, 2021. Whereas, in 2018, a total of 1,644,316 weekly claims were filed, and 1,598,105 weekly claims were filed in 2019.

DWD onboarded hundreds of contracted resources, reassigned state staff from within and outside of the agency, and hired and trained project and limited-term staff to enable the online filing and processing of the unprecedented number of UI claims. DWD also incorporated and programmed many law changes resulting from various federally enacted programs under the Coronavirus Aid, Relief, and Economic Security (CARES) Act and its amendments, including Pandemic Emergency Unemployment Compensation (PEUC) and Pandemic Unemployment Assistance (PUA) programs, as well as changes to state laws, including changes to employer charging and waiver and, subsequently, the suspension of work search rules. In addition, DWD developed enhancements to the UI Claims

Portal to provide critical information to claimants. With this tremendous workload and the backlog of UI claims, DWD looked for innovative and sound IT solutions to assist in accurately providing much needed UI benefits to eligible claimants as quickly as possible.

Despite these efforts, without intervention, claims processing would have been further substantially delayed while holds were resolved manually and eligible individuals would have continued to experience a significant wait for determinations and benefits payments. As DWD's June 15, 2021 response to previous LAB findings documented, longstanding complexities in Wisconsin's UI laws and DWD's antiquated IT infrastructure, which had not been updated after the Great Recession, contributed to delays in claims processing. As noted in the LAB's interim audit memo regarding Finding 2021-003 on November 28, 2020, DWD reported unresolved claims for 65,348 individuals with 98,915 holds requiring review. So, in the fall of 2020, DWD looked into contracting with a vanguard technology company to use predictive analytics to handle the deluge of claims resulting from the economic disruption caused by the COVID-19 pandemic. Because this innovative approach was novel for the UI program, DWD apprised the US DOL of DWD's use of predictive analytics to combat the backlog in conversations with DOL leadership.

As part of the solution to address the backlog in UI claims processing, DWD engaged for services with industry leader Google Cloud Professional Services (Google) and Google's sub-contractor SpringML via a contract with public sector IT service reseller Carahsoft Technology Corp. The contract entailed collaborative efforts to develop comprehensive predictive analytics models as well as confidence scores associated with various holds and issues on pending UI claims. The period of performance for this project was October 26, 2020 to December 15, 2020.

At the outset of using the predictive analytics models, during December 2020, DWD passed the holds data to Google and SpringML and, at DWD's request, SpringML ran the models and provided DWD with the output, including confidence scores. At the end of December 2020, however, that process was taken over by entirely DWD staff. Thus, since January 2021, the entire process of passing data to the Google and SpringML, running the models, and passing the output back to the DWD environment has been performed (solely) by DWD staff. DWD staff used the results of these analyses to determine whether holds could accurately be removed.

DWD did not outsource its inherently governmental functions. The models were developed by Google and SpringML using past performance data on claims determinations made by merit-based staff. In addition, DWD staff, solely, made the discretionary decisions to release holds based on the models' output. After Google and SpringML completed the models' development in December 2020, they were not involved in running the models. At all times, discretionary decisions were made by DWD merit-based staff using the models to improve customer service and increase operational efficiency; thus, DWD has retained its inherently governmental functions.

Nonetheless, because of the interest that US DOL expressed in DWD's ability to address the UI claims backlog, DWD has kept DOL leadership apprised of how DWD's staff was able to use data analytics to make discretionary determinations to resolve claim holds and quickly process claims. In spring 2021, DWD leadership reached out to US DOL leadership to discuss the Google analytics models that DWD staff were using to resolve holds, and US DOL leadership was supportive of the project.

DWD leadership followed up with US DOL leadership earlier this year and explained DWD's use of Google's predictive artificially intelligent (AI) technology to develop confidence scores on the eligibility probability of the claims in the backlog, allowing DWD staff to work through the pending claims more strategically. During that conversation, DWD leadership asked if DOL would provide written support for DWD's use of predictive analytics in this manner. While impressed with the project, US DOL responded to the request during a subsequent call that US DOL declined to provide a written

assurance regarding Wisconsin's use of analytics because that was outside of the role of DOL. Rather, DOL would issue guidance in the form of an Unemployment Insurance Program Letter (UIPL) that would be applicable to all states.

In conclusion, DWD agrees with the recommendation and has already taken LAB's recommended action. DWD will review and comply with the guidance provided in any forthcoming UIPL that DOL referenced.

Anticipated Completion Date:

Completed. Review and implementation of any additional guidance or requirements is dependent on the date the US DOL issues any forthcoming UIPL.

2. RECOMMENDATION: IMPLEMENT AND DOCUMENT ADEQUATE PROCEDURES TO MONITOR THE ONGOING ACCURACY OF THE PREDICTIVE ANALYTICS MODEL IN ASSESSING WHETHER A HOLD COULD BE APPROPRIATELY REMOVED.

Planned Corrective Action:

DWD agrees with the recommendation to issue a written procedure stating the procedures it has implemented to monitor the ongoing accuracy of the predictive analytics models and to assess whether a hold can properly be removed using the predictive analytics models. However, DWD states that it has always ensured the accuracy of the predictive analytics models and has a process in place to monitor the accuracy of the use of the models. The predictive analytics models currently in use are accurate and use appropriate confidence scores and error rate thresholds. DWD has adequately monitored the models' outcomes and developed procedures to determine accuracy during the development of the predictive analytics models.

Consistent with methodology used to establish tools, the models continue to provide accurate prediction of whether a hold can be appropriately removed absent any law or policy changes that would change the outcomes of eligibility. Updates will be implemented based on program and policy changes that would alter the eligibility of claimants. (While there were significant law changes to federal and state laws during this time, they did not affect the accuracy of the models.) DWD will continue to comply with all federal reporting requirements related to proper payments and assessment procedures.

In Finding 2021-003, regarding the *Condition* section of the interim audit memo, LAB writes, "Further, DWD did not adequately monitor the ongoing accuracy of the predictive analytics model, such as by reviewing and testing a sample of removed holds for accuracy." DWD disagrees with this finding as DWD did provide documentation to LAB demonstrating the agency's monitoring activities. Specifically, DWD—working with Google and SpringML—iteratively developed the predictive models based on 2,945,120 hold resolutions pertaining to 717,404 distinct UI claimants that occurred between January 1, 2019 and November 1, 2020. The accuracy of each model's prediction was compared to the actual,

manually determined resolution of that hold, and this information was used to calculate an error rate by hold type.¹

While DWD may not be monitoring the accuracy of the model in the way LAB describes, DWD believes that the agency's monitoring of the accuracy of the model (and minimizing the impact of any inaccuracy) is appropriate. Further, DWD has not performed manual sampling of holds, as LAB describes, for several reasons. First, since there has been no significant change to the environment in which the model operates there is little reason to believe the accuracy of the predictions have changed since they were first tested with large samples of data in November 2020. Second, manually sampling a small number of more recent holds would not be likely to be more accurate than the tests already performed with much larger samples of data. Third, performing such a sample would require DWD to *not* resolve holds that would otherwise be resolved based on the model and instead manually resolve them; this could create delays for UI claimants and additional work for UI adjudication staff with little added value.

DWD is monitoring the expected error rate of the holds removed based on the original calculations. DWD's current monitoring of the accuracy of the predictive analytics model consists of: (a) monitoring the environment in which the model operates to identify when any such change might affect accuracy and necessitate re-training or re-validation, at which point such a thing would occur; (b) ensuring the accuracy and integrity of the process used to select holds for removal; and (c) working over time to reduce both the number of holds resolved in this way and their potential error rate by choosing to resolve fewer holds with more accurate predictions.

DWD acknowledges the need to ensure accuracy of its predictive models but clarifies that its models, which are based on the data from January 2019 through November 2020 and have been in use since DWD began using predictive analytics in December 2020, were and continue to be accurate. Model retraining is generally performed when there are significant changes to the environment in which the model functions. Specifically, in the case of a UI holds prediction model, model retraining may be required when there are law or policy changes that alter eligibility or significant system modifications. While law changes have occurred, those changes did not affect eligibility for the type of holds that were analyzed using the models. As LAB noted, DWD did not use the models for PUA claims, which included new eligibility criteria; whereas, it did use the models for the other federal CARES Act programs' claims that were an extension of existing state law eligibility. Further, while there were state law changes to the work search requirements—specifically, whether it was waived or not—DWD was able to use or not use the model depending on the status of the work search requirements waiver.

In fact, retraining the models or recalculating the error rates using more recent holds resolution data would likely result in a less accurate model, since such data would include those holds that were removed based on model predictions. That is, the model would be based on the model's results and would introduce uncertainty to the machine learning process. DWD is committed to ensuring that the automated processes are accurate. Until there is a change to law or policy that alters eligibility or significant system modifications that may require DWD to retrain models and recalculate error rates, it will continue to use the current and accurate models. DWD agrees with the recommendation document to monitoring procedures, and if there are changes to law or policy, any updates to the model and process will be documented.

¹ The models generate a confidence score between 0 and 1 to determine the level of confidence the models have in the accuracy of each hold prediction. DWD worked with Google and SpringML to set a minimum confidence score above which analysis showed there was a strong likelihood the prediction was accurate, and only considered resolving holds with confidence scores above these thresholds: 0.7 for the "Allows" model, 0.8 for the "Washouts" model. As a further measure of accuracy, DWD used the models to develop predictions for the 27,600 outstanding holds as of November 7, 2020 that were resolved by November 20, 2020.

Concerning the *Effect* section of the interim audit memo, Finding 2021-003 provides the range experienced in the error rates between December 2020 to June 2021. For context, the error rates drastically decreased by January 2021. DWD balanced the need to reduce the exceptionally large backlog that existed in late 2020 against the need to limit the potential for error in the holds resolution process. As LAB has noted, DWD accepted error rates that were potentially above 20 percent for several weeks in December 2020; however, DWD accepted far lower error rates once the backlog had been reduced to a more manageable level by the end of December. Accepted error rates in January and February 2021 varied between 9.5 percent and 13.4 percent, and have not exceeded 10 percent after February 2021. Since mid-September 2021, the accepted (and significantly decreased) error rate has fluctuated between 2.2 percent and 4.1 percent. While DWD does not have a measurement of "accepted error rates" under the traditional, manual processing of holds on claims by which to compare the current predictive analytics error rate, it should be noted that one measure of error prior to model use could be the rate in which claims determinations were overturned through the appeals process. For example, in 2019, of the 13,466 claimant appeals filed, 4,693 determinations were reversed by an Administrative Law Judge (ALJ), for a rate of 35 percent of appeals filed. Also, in 2019, of the 2,474 employer appeals filed, ALJ decisions reversed 647 of the determinations at a rate of 26 percent.

In addition, the *Effect* section of the interim audit memo seems to directly correlate "departmental error" under Wis. Stats. [s. 108.02\(10e\)](#) and errors (improper payments) reported to US DOL for the Benefit Accuracy Measurement (BAM) survey. As experienced by other states, Wisconsin's UI program recorded an overall increase in the number of errors with the dramatic influx of UI claims since the start of the COVID-19 public health emergency. While it is possible that some improper payments may have been made with the use of the predictive models, there are multiple factors that have caused an increase in improper payments: the unprecedented increase in and overwhelming volume of claims, number of complex claims, new federal benefits programs, policy changes, policy waivers, increased volume of staff needed to process claims, ongoing hiring and training of staff, the use of vendor staff allowed under the waiver of the federal merit-based staffing requirements, and other factors.

Wisconsin's experience is similar to that of other states with rates of improper payments. In fact, Wisconsin ranked better than the national average based on results published by US DOL of the most recent BAM reporting period covering the third quarter of 2020 through the first quarter of 2021. Wisconsin's improper payment rate was estimated to be 15.93 percent, below the national average of 17.47 percent for the same period.

Again, while DWD is confident with the accuracy of the predictive analytics models that it has implemented and that it continues to monitor, DWD will document the process that has been implemented and how to continue to monitor the accuracy going forward.

Anticipated Completion Date: DWD will issue a written procedure documenting its current practice that it employs to monitor the ongoing accuracy of the predictive analytics model used to assess whether a hold can be appropriately removed by January 31, 2022.

Finding 2021-003

Rebuttal from the Wisconsin Legislative Audit Bureau:

During the course of our audit fieldwork, we obtained audit evidence to support the conclusions reported in the finding. Within its response to Finding 2021-003, DWD indicated its disagreement with the finding that DWD did not adequately monitor the ongoing accuracy of the predictive analytics model, as noted in the Condition section of the finding. In its response, DWD indicated that it provided documentation to LAB demonstrating in-depth monitoring activities. The documentation DWD provided to us demonstrated that the predictive analytics model was reviewed prior to its use. However, the documentation did not provide evidence of adequate monitoring of the ongoing accuracy of the predictive analytics model, which is the basis for the recommendation that is being made in the finding.

We would also like to clarify a few points made in DWD's response on pages 100 and 101 or its corrective action plan on pages 239 through 244.

- DWD reported that retraining the predictive analytics model would result in using more-recent hold resolution data and would likely result in a less accurate model. However, we did not recommend that DWD retrain the predictive analytics model. We recommended that DWD implement monitoring of the ongoing accuracy of the predictive analytics model.
- DWD reported that a sample of a small number of more-recent holds would not likely be more accurate than the tests already performed. Although we did suggest that this could be an approach to assessing the on-going accuracy of the predictive analytics model, we did not recommend this approach.
- DWD reported that its improper payment rate was estimated to be 15.93 percent. Although this rate was reported by DWD to be better than the national average, it is still above the improper payment error rate of 10 percent required by the Payment Integrity Information Act and established as a performance measure by the U.S. Department of Labor.

In its corrective action plan on pages 239 through 244, DWD discussed its current monitoring of the accuracy of the predictive analytics model. However, we were not provided audit evidence to support that DWD performed adequate monitoring of the ongoing accuracy of the predictive analytics model during FY 2020-21, which was the period we audited. As part of our FY 2021-22 audit, we will follow up on DWD's corrective actions and review the documentation of the monitoring DWD indicates is currently in place.

Corrective Action Plan

Finding 2021-100: Subrecipient Designation – Coronavirus Relief Fund

Auditor Recommendation:

Complete a timely assessment of changes in federal regulations and revise its policies and practices, as appropriate

Planned Corrective Action:

The Wisconsin Department of Administration (the Department or DOA) will timely assess changes in federal regulations and revise its policies and practices, as appropriate. The Department's current, multidisciplinary efforts in this area will be further bolstered by the addition of newly authorized resources constituted within an expanded compliance and federal reporting function within the Department's Division of Legal Services.

Specific to this finding and recommendation, as the auditors indicated, DOA used federal funds from the Coronavirus Relief Fund (CRF) to provide funding to local governments, not-for-profit organizations, and certain businesses affected by the public health emergency. DOA also used federal CRF to provide funding to institutions of higher education (IHE). In administering these programs, and particularly at the time of program implementation, it was understood that most DOA recipients of such funding under the CRF met neither the 2 CFR 200.330 definition of "subrecipient" nor of "contractor" and were instead direct "beneficiaries" of federal financial assistance, evidenced by the lack of 2 CFR 200, Subpart F audit requirements for certain entities. This interpretation as it related to entities other than local governments, although undocumented, was supported by the guidance published by the Department of Treasury (Treasury) in January 2021. Treasury and the Office of Management and Budget (OMB) guidance on the issue did not make clear that government entities could be considered beneficiaries until Treasury's issuance of the Final Rule for use of Coronavirus State and Local Fiscal Recovery Funds (SLFRF) in January 2022.

With the issuance of the additional guidance regarding distinguishing between a subrecipient and beneficiary included in Treasury's SLFRF Final Rule, the Department established a process wherein each SLFRF program is evaluated within the framework of the final rule to designate recipients of the programs as subrecipients or beneficiaries. The Department later used the SLFRF framework to evaluate and document its previous determinations relative to CRF.

Corrective Action Plan

Finding 2021-102: Emergency Rental Assistance Program—Subrecipient Monitoring

Auditor Recommendation:

Inform the Community Action Agencies of the assistance listing number for the Emergency Rental Assistance Program and the applicability of this program to the audit requirements of Uniform Guidance.

Planned Corrective Action:

The Department of Administration (Department or DOA) will inform its subrecipients of the assistance listing number for the Emergency Rental Assistance (ERA) Program and of the applicability of the program to the audit requirements of Uniform Guidance. As noted by the auditors, the assistance listing number for ERA was not available at the time the Department contracted with the Community Action Agencies to implement the Wisconsin Emergency Rental Assistance (WERA) Program. In the absence of the assistance listing number, DOA provided the best information available to describe the Federal award and subaward.

Anticipated Completion Date: May 31, 2022

Auditor Recommendation:

Ensure that all subaward agreements include all information required by federal regulations.

Planned Corrective Action:

The Department will ensure that subaward agreements include all information required to be communicated under by 2 CFR 200.332 (a).

Anticipated Completion Date: May 31, 2022

Auditor Recommendation:

Establish and implement procedures to conduct risk assessments for each federal program and contract period.

Planned Corrective Action:

The Department will establish and implement procedures that require the evaluation of each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward for each federal program and contract period, for the purposes of determining the appropriate subrecipient monitoring. Consistent with the requirements of the Uniform Guidance, the risk of noncompliance will include consideration of subrecipient specific factors of which the Department has considerable knowledge based on its longstanding grantor relationship with the Community Action Agencies.

Anticipated Completion Date: June 30, 2022

Auditor Recommendation:

Provide additional training to DOA staff responsible for subrecipient monitoring procedures.

Planned Corrective Action:

The Department will provide its staff responsible for performing subrecipient monitoring procedures with additional training, including training related to subrecipient risk assessment.

Corrective Action Plan

Finding 2021-103: Emergency Rental Assistance Program— Prioritization of Applications

Planned Corrective Action:

The Wisconsin Department of Administration (Department) will update its program manual to comply with federal regulations to prioritize households that either have incomes less than or equal to 50% of the area median income or have one or more individuals who are unemployed as of the date of the application and have not been employed for the 90-day period preceding that date. The Department will also remove the “first come, first served” language that exists in the program manual.

Under its current prioritization model, the Department has assisted all eligible households applying to the WERA program and most households served through the WERA program have had incomes equal to or less than 30 percent of county median income. Currently, the Department and its partner agencies prioritize eligible households facing imminent eviction. With limited operational capacity, Department partner agencies have experienced operational efficiencies from taking applications fully through the process rather than halting the application after establishing income and or employment status.

Corrective Action Plan

Finding 2021-104: Emergency Rental Assistance Program—Applicant Eligibility

Auditor Recommendation:

Obtain the required documentation for the 14 individuals we identified or seek to recoup improper benefit payments it made to these individuals.

Planned Corrective Action:

Upon receipt of the cases identified by the auditors, the Department of Administration (Department) will review available documentation in its eligibility and benefit determination system, obtain sufficient supporting documentation to demonstrate applicant eligibility under the program, identify alternate Department funding sources or seek to recoup improper benefit payments made, as appropriate.

Anticipated Completion Date: December 31, 2022

Auditor Recommendation:

Update its procedures to ensure that it is following the U.S. Treasury guidance in administering the Wisconsin Emergency Rental Assistance program.

Planned Corrective Action:

The Department will update its procedures to ensure that it is following current Department of Treasury (Treasury) guidance in administering the Wisconsin Emergency Rental Assistance (WERA) program to support its goal of quickly and efficiently providing assistance to eligible Wisconsin families in need while ensuring compliance with federal program rules.

As identified in the guidance promulgated by Treasury on February 22, 2021, May 7, 2021, June 24, 2021, and August 25, 2021, and in compliance with the Department's Treasury-approved Program Improvement Plan, the Department is permitted to accept self-attestations of income and rental arrangements. Agencies are encouraged by Treasury to procure documentation of income and leases whenever possible. In the cases where a household is unable to procure a copy of income verification or a lease due to exigent circumstances, Treasury has allowed households to attest to their income and that they have entered into a legally binding lease agreement. Accordingly, WERA Manual updates will include language clarifying the requirements associated with income verification and lease documentation.

Anticipated Completion Date: June 30, 2022

Auditor Recommendation:

Provide additional training and improve oversight over Energy Services, Inc., and the Community Action Agencies to ensure only eligible individuals receive benefit payments.

Planned Corrective Action:

The Department will provide additional training and increased oversight over Energy Services, Inc., and the Community Action Agencies to ensure only eligible individuals receive benefit payments. The Department will provide written notification to Energy Services, Inc., and the Community Action Agencies of the WERA Manual changes to ensure that they will follow the Treasury guidance in administering the WERA Program and that only eligible individuals receive benefit payments.

Anticipated Completion Date: June 30, 2022

Corrective Action Plan

Finding 2021-105: Emergency Solutions Grant Program—Monitoring Controls over Allowable Costs

Auditor Recommendation:

Establish, implement, and consistently follow procedures for DOA staff to randomly select the month of program expenditures and the case files for which it plans to review supporting documentation.

Planned Corrective Action:

The Department of Administration (Department or DOA) will establish, implement, and consistently follow policies and procedures that require DOA staff to randomly select the month of program expenditures and the case files for which it plans to review supporting documentation to ensure only allowable cost are being charged to, and eligible persons are served by, the ESG program. The Department will implement the revised policies and procedures when it undertakes its next annual review of client files under each subaward.

Anticipated Completion Date: Concurrent with the completion of the next annual monitoring for all subawards, which is anticipated to be approximately December 31, 2022

Auditor Recommendation:

Provide additional training to DOA staff responsible for subrecipient monitoring procedures.

Planned Corrective Action:

The Department will provide its staff responsible for performing subrecipient monitoring procedures with additional training, including training related to subrecipient risk assessment.

Anticipated Completion Date: June 30, 2022

Auditor Recommendation:

Ensure its method for accepting confidential information in client case files is secure.

Planned Corrective Action:

The Department will ensure its method for accepting confidential case file information is secure. The Department has already begun evaluating available technical solutions to enable the secure transmission of confidential information.

SUBJECT: Corrective Action Plan – Medical
 Assistance Program Payments to
 Terminated Providers

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-300: Medical Assistance Program Payments to Terminated Providers. This is the department's Corrective Action Plan.

Recommendation (2021-300): Medical Assistance Program Payments to Terminated Providers

We recommend the Wisconsin Department of Health Services:

- Seek to recoup improper Medical Assistance Program payments it made to 5 ineligible providers during FY 2020-21 for services provided after their effective termination dates.

Wisconsin Department of Health Services Planned Corrective Action:

DHS agrees with the finding and recommendation. In addition to existing strategies to prevent inappropriate payments, DHS will seek to recoup improper Medical Assistance Program payments for all claims identified by the Legislative Audit Bureau during this period.

- Implement by June 30, 2022, changes to its weekly report to accurately identify all instances in which payments were made to providers who were subsequently identified to be ineligible, including identifying all claims where providers were terminated between the beginning and ending date of a service range.

Wisconsin Department of Health Services Planned Corrective Action:

DHS agrees with the finding and recommendation.

SUBJECT: Corrective Action Plan – Epidemiology and Laboratory Capacity
 for Infectious Diseases Program – Subrecipient Monitoring

Department staff has reviewed the Legislative Audit Bureau’s (LAB) interim audit memo for Finding 2021-301: Epidemiology and Laboratory Capacity for Infectious Diseases Program – Subrecipient Monitoring. This is the department’s Corrective Action Plan.

Recommendation (2021-301): Epidemiology and Laboratory Capacity for Infectious Diseases Program – Subrecipient Monitoring

We recommend the Wisconsin Department of Health Services:

- Train all staff administering grant programs on existing policies for subrecipient monitoring requirements.

Wisconsin Department of Health Services Planned Corrective Action:

In the Department of Health Services (DHS), Division of Public Health (DPH), Bureau of Communicable Diseases, Administration Section, current Grant Administrators and their designees who oversee federally awarded programs will continue to be informed in person and in writing of the federal requirements as they relate to 2 CRF s. 200.332.

Steps have been taken to inform staff of the Standard Operating Procedures currently in place at DHS pertaining to subrecipient risk assessments and subrecipient monitoring. They have been shown where to locate these procedures located on the DHS BPC Guidance Suite on the SharePoint website.

The Communicable Disease Administration Section has created an electronic risk assessment folder within our contracts folder. The plan is to save copies of all risk assessments conducted for each federal subaward and for each federal program and contract period.

Any future Grant Administrators and their designees who will be administering grant programs will continue to be trained on the federal requirements as they relate to 2 CRF s. 200.332. In addition, they will continue to receive the necessary training on existing policies for subrecipient monitoring

requirements and policies for conducting risk assessments for each federal subaward and for each federal program and contract period.

We recommend the Wisconsin Department of Health Services:

- Follow policies for conducting risk assessments for each federal subaward and for each federal program and contract period.

Wisconsin Department of Health Services Planned Corrective Action:

Procedures will be implemented for current and future staff to follow when issuing subawards.

There will be a procedure in place for requiring risk assessments to be conducted before an agreement can be issued to a subrecipient.

We recommend the Wisconsin Department of Health Services:

- Implement a tracking system to ensure that it conducts risk assessments for all subawards in a timely manner.

Wisconsin Department of Health Services Planned Corrective Action:

On an annual basis, the Grant Administrators or their designees will review the risk assessment file folder to ensure the risk assessments are properly completed and filed. In addition, as part of the contract close out for a subrecipient, the Grant Administrators will ensure the risk assessments have been conducted and properly filed. The Grant Administrators will be responsible for ensuring that these procedures are conducted and followed for each federal program and contract period.

Records of the subrecipient risk assessments and applicable subrecipient monitoring documentation will also be electronically filed on DHS shared drives within the Bureau of Communicable Diseases, Administration Section in DPH.

 Assistance Program – EBT Card Security

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-302: Supplemental Nutrition Assistance Program – EBT Card Security. This is the department's Corrective Action Plan.

Recommendation (2021-302): Supplemental Nutrition Assistance Program – EBT Card Security

We recommend the Wisconsin Department of Health Services:

- Update its written procedures to require documentation of any approval to waive the two-person requirement, including the reasons a waiver was requested, the duration of the waiver, and steps required to mitigate the increased risk.

Wisconsin Department of Health Services Planned Corrective Action:

DHS will update the written procedures to require documentation of an approval by the Bureau Deputy Director or the Bureau Director to waive any two-person requirement. Documentation will include the reason a waiver was requested, the duration of the waiver, and steps required to mitigate the increased risk. In addition, the supervisor's monthly review of the returned-card log will be documented. These EBT card security processes will be added to existing fraud prevention procedures. The Department remains committed to preventing and addressing FoodShare fraud.

- Document the supervisor's monthly review of the returned-card log.

Wisconsin Department of Health Services Planned Corrective Action:

Written procedures will be updated by May 20, 2022. Documentation of the supervisor's monthly review of the returned-card log will commence on April 29, 2022.

SUBJECT: Corrective Action Plan – Epidemiology and Laboratory Capacity
 for Infectious Diseases Program – Performance Reporting

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-303: Epidemiology and Laboratory Capacity for Infectious Diseases Program – Performance Reporting. This is the department's Corrective Action Plan.

Recommendation (2021-303): Epidemiology and Laboratory Capacity for Infectious Diseases Program – Performance Reporting

We recommend the Wisconsin Department of Health Services:

- Develop formal, written procedures to identify the steps needed to compile accurate and complete information for the ELC performance reports.

Wisconsin Department of Health Services Planned Corrective Action:

In the Department of Health Services (DHS), Division of Public Health (DPH), Bureau of Communicable Diseases, Administration Section, current Grant Administrators and their designees who oversee federally awarded programs will continue to be informed in person and in writing of the federal requirements as they relate to 2 CRF s. 200.511.

Steps have been taken to begin authoring a Standard Operating Procedure (SOP) regarding the appropriate steps needed to compile accurate and complete information for the ELC performance reports. This SOP will be completed and saved in the same location as other pertinent procedures, on the DHS Bureau of Procurement and Contracting (BPC) Guidance Suite on the SharePoint website.

We recommend the Wisconsin Department of Health Services:

- Retain in a central location for the time period required by federal regulations copies of all performance reports it submits to the federal government.

Memo to Sherry Haakenson
May 11, 2022
Page 2

Wisconsin Department of Health Services Planned Corrective Action:

A central location for retaining copies of all performance reports submitted to the federal government has been established on DHS shared drives within the Bureau of Communicable Diseases, Administration Section in DPH.

The Grant Administrators will save PDF copies of all performance reports submitted to the federal government after each required time frame of reporting; whether monthly, quarterly or yearly. These PDF copies, when pulled from the federal system, will be named according to the date and time they were pulled.

We recommend the Wisconsin Department of Health Services:

- Retain in a central location for the time period required by federal regulations all documentation that is used to support information included in each performance report it submits to the federal government.

Wisconsin Department of Health Services Planned Corrective Action:

A central location for retaining copies of all documentation that is used to support information included in each performance report submitted to the federal government has been established on DHS shared drives within the Bureau of Communicable Diseases, Administration Section in DPH.

The ELC program designees will be notified of this location and expected to save copies of all documentation types being used to support information included in each performance report. The Grant Administrator(s) will be responsible for reviewing the established folder to ensure appropriate documentation was provided for the performance reports submitted to the federal government after each required time frame of reporting; whether monthly, quarterly or yearly.

We recommend the Wisconsin Department of Health Services:

- Provide training to staff responsible for preparing reports.

Wisconsin Department of Health Services Planned Corrective Action:

The appropriate Grant Administrators and their designees who will be administering grant programs will continue to be trained on the federal requirements as they relate to 2 CFR s. 200.511. In addition, they will receive the necessary training on the new procedure which will identify the steps needed to compile accurate and complete information for all ELC performance reporting, upon its completion.

SUBJECT: Explanation and Reasons Why Corrective Action Plan is Not Needed
for Interim Audit Memo – Audit Requirements for Managed Care
Providers – Audit Posting Requirements

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-304: Medical Assistance Program – Audit Requirements for Managed Care Providers. We do not believe a corrective action is required for one of the recommendations.

Recommendation (2021-304): Medical Assistance Program – Audit Requirements for Managed Care Providers

We recommend the Wisconsin Department of Health Services ensure it complies with all federal requirements for posting audit results for each managed care provider to the state website.

Wisconsin Department of Health Services Explanation and Reasons Why Corrective Action Plan is Not Needed:

The Wisconsin Department of Health Services disagrees with this recommendation.

The LAB finding interprets 42 CFR s. 438.602 (g) to mean each MCO's audit must be posted in full on the DHS website. DHS interprets 42 CFR s. 438.602(g)(4) to mean the "results" of the audit, not the entire audit, must be posted to the DHS website.

This regulation is reproduced in full as follows:

42 CFR s.438.602 (g) **Transparency.** The State must post on its Website, as required in [§ 438.10\(c\)\(3\)](#), the following documents and reports:

- (1) The MCO, PIHP, PAHP, or PCCM entity contract.
- (2) The data at [§ 438.604\(a\)\(5\)](#).

1 West Wilson Street • Post Office Box 7850 • Madison, WI 53707-7850 • Telephone 608-266-9622 •

Finding 2021-304

Rebuttal from the Wisconsin Legislative Audit Bureau:

In its response to Finding 2021-304 (page 55), DHS disagreed in part with our recommendation. Specifically, DHS disagreed with our interpretation of the requirement in 42 CFR s. 438.602(g), which states that the results of any audits under paragraph (e) of this section be posted to the state's website. Under 42 CFR 438.602(e), the State is required to conduct periodic audits of the accuracy, truthfulness, and completeness of the encounter and financial data submitted by, or on behalf of, each managed care provider. It is not our interpretation that DHS must post on the State's website the entire audit for each provider. However, when DHS posted results of the audits in aggregate or summary format, DHS did not provide sufficient detail to allow a reader to assess the results of the audits for each managed care provider. In response, DHS could choose to reach out to the federal government to seek further clarification. As part of our FY 2021-22 audit, we will follow up on the status of this finding.

Department of Health Services

SUBJECT: Corrective Action Plan – Coronavirus Relief Fund – Skilled
Nursing Facility Incentive Program

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-305: Coronavirus Relief Fund – Skilled Nursing Facility Incentive Program. This is the department's Corrective Action Plan.

Recommendation (2021-305): Coronavirus Relief Fund – Skilled Nursing Facility Incentive Program

We recommend the Wisconsin Department of Health Services ensure it maintains documentation related to federal program administration in accordance with federal regulations.

Wisconsin Department of Health Services Planned Corrective Action:

DHS will create a process to ensure reviewers and approvers in the Bureau of Rate Setting can mark documentation with their review/approval and a centralized system for storage of this documentation. DHS will communicate this new policy to rate setting staff to ensure compliance.

The information in the following paragraphs is provided for additional clarification.

The intent of the program was to pay for up to one resident/facility combination for the duration of the program. If a facility received an incentive payment for a member's admission during the program, DHS did not pay for a readmission for that same member. Under the provisions of the program, if a member was already in the facility before the start of the program, went to a hospital, and came back, DHS did pay for that readmission when it resulted in a new MDS assessment and met the criteria set forth by DHS. The department examined specific MDS codes to locate duplicate payments and ensure that each resident/facility combination was paid once during the duration of the program. The department maintained documentation of all data and transactions related to this program.

SUBJECT: Corrective Action Plan – HIV Care Formula Grants Program – Eligibility

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-306: HIV Care Formula Grants Program - Eligibility. This is the department's Corrective Action Plan.

Recommendation (2021-306): HIV Care Formula Grants Program – Eligibility

We recommend the Wisconsin Department of Health Services:

- Return to the federal government the unallowable costs identified.

Wisconsin Department of Health Services Planned Corrective Action:

DHS staff will return the unallowable costs identified to the federal government.

- Train all staff reviewing eligibility applications on existing policies for verification requirements.

Wisconsin Department of Health Services Planned Corrective Action:

DHS currently trains ADAP staff to follow existing policies and procedures for reviewing applications, provides new ADAP staff with mentoring on processing applications, and provides ongoing technical assistance from other staff and supervisors on complex applicant situations. DHS will continue to provide training and technical assistance on complex program applications and reinforce the current practice of documenting clarifications of inconsistent information on applications.

- Retain all documentation to support participant eligibility determinations.

Memo to Sherry Haakenson
May 11, 2022
Page 2

Wisconsin Department of Health Services Planned Corrective Action:

DHS has moved to electronic filing of eligibility documentation. ADAP policies have been updated to reflect this policy change. DHS will reinforce the current practice of retaining all documentation supporting client eligibility determinations.

- Communicate the eligibility status to all participants.

Wisconsin Department of Health Services Planned Corrective Action:

DHS staff will continue to communicate eligibility status to all participants. Though an electronic copy of the letter was not kept for this individual, DHS is certain that this individual was notified of their eligibility status because claims were subsequently made.

SUBJECT: Explanation and Reasons Why Corrective Action Plan is Not Needed
for Interim Audit Memo – Coronavirus Relief Fund – Unallowable
Costs

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-307: Coronavirus Relief Fund – Unallowable Costs. We do not believe a corrective action is required.

Recommendation (2021-307): Coronavirus Relief Fund – Unallowable Costs

We recommend the Wisconsin Department of Health Services:

- return the \$72,523 in questioned costs related to the allocation of STAR development costs to the Wisconsin Department of Administration (DOA) for reallocation to allowable uses or return the \$72,523 to the federal government; and
- reassess and determine the appropriate amount of the DOA Division of Personnel Management allocation to charge to the Coronavirus Relief Fund and return the remaining amount to DOA for reallocation to allowable uses or return the amount to the federal government.

Wisconsin Department of Health Services Explanation and Reasons Why Corrective Action Plan is Not Needed:

The Wisconsin Department of Health Services disagrees with the audit finding and recommendation.

DHS directly allocates assessments based on work effort performed and believe our allocations accurately reflect the significant COVID response work our agency accomplished during FY21. These assessments are based, in part, on operations, procurement, and human resource spend at each state agency. Due to that, DHS' pandemic response expenditures led to an increase in the amount DHS was assessed. These assessments are not budgeted for, and DHS relies on these costs being supported by the funding sources staff record their time to each year. DHS has maintained a consistent method of performing these allocations in alignment with our federally approved cost allocation plan.

www.dhs.wisconsin.gov

Protecting and promoting the health and safety of the people of Wisconsin

Memo to Sherry Haakenson
May 11, 2022
Page 2

As the memo notes, DHS incurred \$435.7 million in Coronavirus Relief Fund (CRF) expenditures during the audit period. This required significant usage of our enterprise resource planning system and human resource assets. It was necessary to support staff working on the COVID Response Team (CRT) with the STAR system and personnel activities. We feel that using the number of positions associated with these cost pools is a reasonable way to determine equitable costs to directly allocate to each funding source.

DHS, in conjunction with human resources staff at DOA, hired approximately 750 staff to work as contact tracers and administer other COVID response programs. Significant payroll expenses and hiring efforts were conducted to onboard these staff. Having to hire this many new staff in a fiscal year for a specific purpose related to pandemic response would cause an allocation to that cost pool to increase in a more rapid manner than the remainder of the state's hiring costs.

We do not believe that comparing the amount our assessments increased directly to the amount that was charged to the CRF is an accurate comparison. In addition to the hiring we did, in many cases DHS staff were reassigned fully or partially to work being funded by the CRF. As our directly allocable costs follow the work effort reported by staff, there can be a reasonable assumption that the amount charged to the CRF could be larger than the amount our assessment increased due to the changes in workload many positions faced. Fewer costs were going to our traditional funding sources in lieu of support being provided to CRF programs.

Allocating outside of our federally approved methodology would result in overcharging other federal grants or spending state funds to respond to the public health emergency that the Coronavirus Relief Funds were intended to address. As our federally approved methodology supports that it is appropriate to directly allocate these types of costs and number of positions is an appropriate allocation method, we believe the department's CRF-funded pandemic response charges represent necessary expenditures incurred due to the public health emergency.

AskLAB@legis.wisconsin.gov

Finding 2021-307

Rebuttal from the Wisconsin Legislative Audit Bureau:

In its response to Finding 2021-307 (page 61), DHS disagreed with our finding regarding allowable costs and the CRF. The CARES Act states that costs charged to the CRF must be:

- necessary expenditures incurred due to the public health emergency;
- not accounted for in the State's budget that was in place when the CARES Act was enacted; and
- incurred prior to December 31, 2021.

Treasury guidance does not address the appropriateness of allocating costs to the CRF and further indicates that administrative expenses may be allowable if they represent an increase over previously budgeted amounts.

Although DHS indicated that it followed its established cost allocation plans in charging the questioned costs to the CRF, the STAR development costs are an allocation of costs from the development of the State's ERP System, which was implemented in FY 2015-16, and outside the period of performance of the CRF. These costs do not appear to be necessary costs incurred to address the public health emergency. We further note that both the STAR development costs and the central human resources allocation were reoccurring costs that DHS would have been planning for when the CARES Act was passed. In response to this finding, DHS could choose to reach out to the federal government to seek further clarification. As part of our FY 2021-22 audit, we will follow up on the status of this finding.

 Treatment of Substance Abuse – Federal Funding Accountability
 and Transparency Act Reporting

Department staff has reviewed the Legislative Audit Bureau's (LAB) interim audit memo for Finding 2021-308: Block Grants for Prevention and Treatment of Substance Abuse – Federal Funding Accountability and Transparency Act Reporting. This is the department's Corrective Action Plan.

☑ Recommendation (2021-308): Block Grants for Prevention and Treatment of Substance Abuse – Federal Funding Accountability and Transparency Act Reporting

We recommend the Wisconsin Department of Health Services:

- Reviewing monthly that all required subawards are reported.
- Ensuring all subawards, including any amendments or modifications to a subaward, greater than \$30,000 are reported in the Federal Funding Accountability and Transparency Act Subaward Reporting System in a timely manner.

Wisconsin Department of Health Services Planned Corrective Action:

The remediation efforts will be to bring all subaward grant filings current. All subawards for January through April 2022 will be imported into the FSRS system no later than May 31, 2022. The Expenditure Accounting Section Chief will be responsible for reviewing the submission as well ensuring that the reporting deadline is met.

On a monthly basis, going forward, the monthly reporting requirement will be met for all subawards that were executed in the prior month.

Information for 2020 and 2021 will be reviewed to ensure all required data is captured in the FSRS system. Edits will be completed no later than June 30, 2022.

Memo to Sherry Haakenson
May 5, 2022
Page 2

We recommend the Wisconsin Department of Health Services:

- Identifying and reporting accurately all key data elements for each subaward.

Wisconsin Department of Health Services Planned Corrective Action:

Our current system did not include a field to capture the subaward contract signature date. We have since added a field in our access tables to ensure we capture this date for 2022 and forward.

Anticipated Completion Date: June 30, 2022

Person responsible for corrective action:

Tanya B. Holcomb, Expenditure Accounting Section Chief
Bureau of Fiscal Services, Division of Enterprise Services

Jill K. Underly, PhD, State Superintendent

Corrective Action Plan

Finding 2021-400: Education Stabilization Fund–ESSER Reporting:

Planned Corrective Action: The Department of Public Instruction (DPI) has already begun to develop formal, written procedures for compiling the ESSER Fund annual report, including:

- procedures that identify the specific information that is needed from LEAs or other sources;
- the steps needed to compile the information;
- the steps taken to review the report; and
- the process for retaining all supporting documentation.

DPI had always planned on developing these procedures. It was the uncertainty created by the U.S. Department of Education’s process that resulted in the lack of formal written procedures.

Anticipated Completion Date: June 30, 2022

Corrective Action Plan

Finding 2021-401: Education Stabilization Fund—Federal Funding Accountability and Transparency Act Reporting

Planned Corrective Action: The Department of Public Instruction (DPI) has implemented corrective action. DPI is updating the WISEgrants system to include a report listing the allocations awarded to LEA's throughout the year. This report will be downloaded on a monthly basis for comparison and reporting in the FFATA Subaward Reporting System (FSRS).

ESSER grants were unique and created their own set of reporting challenges due to when the funds were released to DPI and the multiple federal and state approvals needed to provide the allocations to the LEAs. To correct this reporting issue DPI has updated the allocation approval process to include tracking of all grants that are administered by the DPI School Financial Services (SFS) team. The approval tracking document will be reviewed by the SFS Team accountant who enters data into FFATA to ensure all grants have been reported on in a timely manner. On a monthly basis, the Assistant Director of the School Financial Services Team will review and ensure timely reporting.

Anticipated Completion Date: July 1, 2022

Finding 2021-600: Reporting—Unemployment Insurance Program

1. **RECOMMENDATION:** Develop and implement adequate procedures for the preparation and review of the UI performance and special reports to ensure the accuracy of amounts reported to the federal government; and retain documentation that supports the amounts included in each report it submits to the federal government.

Planned Corrective Action: DWD will develop and implement adequate procedures for the preparation and review of the UI performance and special reports to ensure the accuracy of amounts reported to the federal government; and retain documentation that supports the amounts included in each report it submits to the federal government.

Anticipated Completion Date: September 30, 2022.

Corrective Action Plan

Finding 2021-601: Unemployment Insurance Benefit Accuracy Measurement Program – Compliance with Program Requirements

1. **RECOMMENDATION:** Ensure that the timeliness requirements of the Benefit Accuracy Measurement program are being met and that the minimum number of denied claims are being investigated.

Planned Corrective Action: As of April 6, 2022, DWD is in full compliance with the timeliness and investigation requirements of the Benefit Accuracy Measurement program for Denied Claims Accuracy (DCA) audits for Improper Payment Information Act (IPIA) YR 2022, ending June 30, 2022.

DWD is also on track to meet the timeliness requirement for Paid Claims Accuracy (PCA) audits for the first quarter of 2022.

Anticipated Completion Date: DWD will achieve full compliance by October 31, 2022.

Corrective Action Plan

Finding 2021-602: Unemployment Insurance Benefit Accuracy Measurement Program – Lack of Supervisory Review of Investigations

1. **RECOMMENDATION:** Follow its (DWD's) written procedures for the Benefit Accuracy Measurement program and ensure that a detailed supervisory review of each investigation report occurs before the report is submitted to the U.S. Department of Labor.

Planned Corrective Action: DWD will update its written procedures to conform to the standard of review set forth by the U.S. Department of Labor (US DOL). The US DOL does not require a detailed supervisory review of each investigation report. It requires a reasonable review and supervisory sign-off based on factors determined by DWD management.

During the review period for the State Fiscal Year 2021 Single Audit, DWD conducted a detailed supervisory review of 96.35% of investigations, which complied with the US DOL standard.

While DWD typically provided a detailed supervisory review of every investigation report, DWD found that use of US DOL's standard process during the pandemic achieved satisfactory accuracy results while also more appropriately recognized staff workloads. The US DOL-Employment and Training Administration Region 5 validated that conclusion in its February 2022 monitoring report of Wisconsin's Benefit Accuracy Measurement (BAM) Methods and Procedures, which identified no findings nor areas of concern.

Anticipated Completion Date: April 29, 2022.

Nathan Houdek, Commissioner of Insurance

DATE: April 26, 2022

TO: Carolyn Stittleburg, Deputy State Auditor for Financial Audit

FROM: Rachel Cissne Carabell, Deputy Commissioner

SUBJECT: Corrective Action Plan-Wisconsin Healthcare Stability Plan

Office of the Commissioner of Insurance (OCI) staff has reviewed the Legislative Audit Bureau (LAB) interim audit memo for Finding 2021-900: 1332 State Innovation Waiver Program-Verification Audit. This is OCI's Corrective Action Plan.

Recommendation (2021-900): 1332 State Innovation Waiver Program-Verification Audit

We recommend the Wisconsin Office of the Commissioner of Insurance:

- Follow its established written procedures for conducting verification audits.

OCI Corrective Action Plan

OCI will implement a new process for selecting claim samples for the phase I and phase II verification audits that will meet the requirements for a random sample.

Anticipated completion date: June 1, 2022

- Develop written procedures for a secondary review of the audits, including steps for conducting a secondary review and documentation of the secondary review.

OCI Corrective Action Plan

OCI will develop written procedures for a secondary review of the audits, including steps for conducting a secondary review and documentation of the secondary review.

Anticipated completion date: May 15, 2022
