WM-02-05

Analysis Prepared by the Department of Natural Resources

Statutory Authority and Explanation: Statutes that authorize the promulgation of this rule order include sections 29.014, 29.024(5), 29.885(2), 29.889(2), 169.02, 169.15(5), 169.19(6), 169.20(4), 169.25(6) and 227.11, Stats. These sections grant rule making authority to the department to establish and maintain open and closed seasons for hunting and that all rules promulgated under this authority are subject to review under ch. 227, Stats.

Statutes Interpreted and Explanation: In promulgating this rule sections, 29.014, 29.024(5), 29.885(2), 29.889(2), 169.02, 169.15(5), 169.19(6), 169.20(4), 169.25(6), Stats. have been interpreted as providing the department with the authority to make these housekeeping clarifications.

Related Statute or Rule: Annually the Bureau of Wildlife Management submits corrections and clarifications to chs. NR 10, 12, 16, 17, 19 and 27. This changes are necessary to assure that the administrative code is consistent with new statutes and administrative rules promulgated in the previous year, and to correct inconsistencies that may arise as a result of new technologies, new licenses, agricultural damage, permitting, hunter interests or hunting and trapping methods. Additionally, some changes are necessary to organize the existing administrative code sections to allow for ease of reference and reading.

Plain Language Rule Analysis: These rule changes are minor and non-controversial in nature. Annually the department updates administrative code language to correct inconsistencies and outdated language and provide clarification where appropriate. This year, the department has proposed the following changes related to hunting, trapping, captive wildlife, licensing and agricultural damage caused by nuisance wildlife:

- Updates the administrative code to reference the scientific research license, as it pertains to possession and acquisition of wild animals for research purposes, which was created under the captive wildlife legislation.
- Clarifies doves as being included in the department's definition of migratory game birds.
- Clarifies that cylinder loading black powder handguns may be used for hunting if they meet the same requirements of a muzzle-loading handguns.
- Clarifies that the concealment by natural vegetation requirement for non-open water waterfowl hunting also applies to a waterfowl blind.
- Creates a definition for rifle.
- Clarifies that hen pheasants taken or held under ch. 29 or 169, Stats. authority are not considered protected.
- Codifies the department position that pigeons are considered domestic animals and therefore are not subject to NR 10 hunting regulations or ch. 29, Stats. licenses.
- Clarifies various weapon regulations and specifically clarifies that air guns may not be used for deer or bear hunting.
- Updates references to the submission of special permit applications necessary due to modified hours of operation for DNR service centers.
- Codifies the issuance of special permits for those who tag a deer with an incorrect tag.
- Clarifies that a structure, for the purposes of dry land body gripping type traps is a single unit or structure.
- Updates rule language pertaining to use of cable restraints following analysis of regulations from the first cable restraint season in January and February 2004.
- Corrects typos and grammar and updates references in sections of chs. NR 10, 12, 16, 19 and 27 pertaining to hunting.
- Clarifies rules pertaining to turkey tagging and tag validation.
- Clarifies that all participants assisting in removal of damage or nuisance wildlife shall comply with all hunting and trapping rules, unless specifically exempted by permit, rules or statute.
- Clarifies the type of license required for those assisting with turkey damage shooting permits.
- Clarifies that wildlife damage claims shall be paid only to the owner of the property or crop eligible for damage claims.

Federal Regulatory Analysis: Provided state rules and statutes do not relieve individuals from the restrictions, requirements and conditions of Federal statutes and regulations, regulation of hunting and trapping of native species has been delegated to state fish and wildlife agencies. Additionally, none of the proposed rules exceed the authorities granted the states in 50 CFR 10.

State Regulatory Analysis: These housekeeping rule changes are minor and non-controversial in nature and therefore, do not represent policy or significant rule changes that may differ from surrounding states. All surrounding states have regulations and rules in place for the management of wild upland, migratory and trapping species, however these proposed rule changes to the Wisconsin Administrative code are not relevant to or comparable to any known similar housekeeping initiatives in our surrounding states.

Summary of Factual Data and Analytical Methodologies: This rule order is based solely on the need to correct inconsistencies created through the promulgation of other rules and statutes and to serve as a vehicle to provide clarification to existing code.

Anticipated Private Sector Costs: These rules, nor the legislation which grants the department rule making authority, do not have a significant fiscal effect on the private sector. Additionally, no significant costs are associated with compliance to these rules.

Effects on Small Businesses: These rules are applicable to individual sportspersons and impose no compliance or reporting requirements for small businesses, nor are any design or operational standards contained in the rule.
