Description					
disclosure of information regarding state revenue					

## Assumptions Used in Arriving at Fiscal Estimate

This bill requires the Department of Revenue to display on its website information about the amounts of general purpose revenue collected by source and the purposes for which it is spent. The information must be presented in readily understandable graphs and other formats. Under the bill, DOR may work with the Department of Administration to gather the information. The bill requires that DOR's e-filing web page prominently link to the web page containing the information and to the existing local government dashboard.

DOR currently publishes on its website an interactive database that shows the sources of general fund tax revenue with graphs, charts, and data going back to FY1963.

DOR can develop and publish a data visualization similar in content to the local government dashboard on an annual basis with existing resources. DOR will depend on information provided by the Department of Administration for the expenditure portion of this visualization.

## **Long-Range Fiscal Implications**
