**D. Brief Summary of Rule**

The purpose of the rulemaking is to amend Wis. Admin. Code ch. PSC 118, relating to allowing an electric provider, or customer or member of an electric provider, to create a renewable resource credit for heat that is a byproduct of a manufacturing process and is used to provide thermal energy for another purpose, to conform with the statutory changes made in Wis. Stat. § 196.378 (3) (a) 1m. by 2017 Wisconsin Act 53. This is accomplished by adding the definition “heat that is a byproduct of a manufacturing process” under Wis. Admin. Code PSC § 118.02(5g).

**E. Comparison with Existing or Proposed Federal Legislation**

The Commission is not aware of any existing or proposed federal legislation concerning the matters addressed in this rulemaking.

**F. Comparison with Similar Rules in Surrounding States**

The Commission is not aware of any surrounding states that allow heat that is a byproduct of a manufacturing process under definitions of resources for rules related to a state Renewable Portfolio Standard.

**G. Effect on Small Business**

This rule will not affect small businesses. The Wis. Stat. §. 227.114 (1) definition of “small business” states that to be considered a small business, the business must not be dominant in its field. Since electric, gas, and water utilities are monopolies in their service territories, they are dominant in their fields and, so, are not small businesses.
