### *Analysis by the Legislative Reference Bureau*

Under current law, only an automatic fire sprinkler contractor or journeyman automatic fire sprinkler fitter licensed or registered by the department of commerce (department) may install an automatic fire sprinkler system (sprinkler system). The sprinkler system includes underground and overhead piping and a suitable water supply. Under current law, a master plumber or utility contractor licensed by the department may not install any portion of a sprinkler system.

This bill expands current law by authorizing a master plumber or utility contractor licensed by the department to install the underground piping for a sprinkler system.
