### *Analysis by the Legislative Reference Bureau*

With certain exceptions, current law requires the Department of Commerce (department) to establish reasonable standards or rules for the construction, repair, and maintenance of places of employment and public buildings so as to render them safe. Current law also requires all machines and mechanical devices installed in places of employment and public buildings to be in conformity with the orders of the department. In addition, with certain exceptions, the department must approve the essential drawings, calculations, and specifications (building plans) for the construction of places of employment and public buildings, including building plans related to elevators, escalators, ski lift and towing devices, and power dumbwaiters. Pursuant to these requirements, the department has promulgated a chapter of rules governing, among other things, the installation, inspection, maintenance, and repair of elevators and other conveyances.

This bill creates a subchapter of the statutes specifically governing elevators and other conveyances. Major provisions of this bill include:

#### ***Conveyance safety code***

**ASSEMBLY BILL 886**

The bill requires the department to promulgate rules establishing standards for the safe installation and operation of conveyances. Under the bill, a “conveyance” is an elevator, escalator, dumbwaiter, belt manlift, moving walkway, platform lift, stairway chair lift, or any other similar device used to elevate or move people or things, as provided in the rules of the department. The bill requires the department, in promulgating these rules, to consider the recommendations of the Conveyance Safety Code Council, which is established under the bill. The rules must satisfy all of the following:

1. They must be consistent, to the extent practicable, with national, industry-wide safety standards applicable to conveyances.

2. They must require any testing of conveyances or related equipment required under the rules to be performed by an elevator mechanic licensed by the department under the bill.

3. They must require any person who installs a new conveyance to give the owner of the building in which the conveyance is installed, before the conveyance is placed in operation, a written certification indicating that the installation complies with the rules.

4. They must include an enforcement procedure and a procedure pursuant to which the department may grant a variance from the rules if the variance would not jeopardize public safety.

***Conveyance permits***

Under the bill, no person may construct, install, or alter a conveyance in this state unless an elevator contractor licensed by the department has received a permit for the construction, installation, or alteration from the department. With certain exceptions, such a permit expires if work is not commenced under the permit within six months after the date the permit was issued. The bill also contains provisions relating to applications for and revocations of these permits.

Under the bill, no person may allow a conveyance to be operated on property owned by the person unless the person has received a permit for the operation from the department. The department may not issue a permit for the operation of a conveyance until the conveyance passes an inspection by an elevator inspector licensed by the department. The term of such a permit is one year, except that a permit applicable to a platform lift, stairway chair lift, or residential lift in a private residence is valid until ownership of the private residence is transferred, at which time the new owner must apply for renewal of the permit.

***Licensing of elevator contractors, mechanics, and inspectors***

With certain exceptions, this bill requires any person engaging in the business of constructing, installing, altering, servicing, replacing, or maintaining conveyances in this state to be licensed by the department as an elevator contractor. In addition, with certain exceptions, the bill requires any person who erects, constructs, alters, replaces, maintains, repairs, removes, or dismantles any conveyance in this state to be licensed by the department as an elevator mechanic and to be under the direct supervision of a licensed elevator contractor. Any person who performs elevator inspections in this state must likewise be licensed by the department as an elevator inspector and must hold a certification as an elevator

**ASSEMBLY BILL 886**

inspector issued by a person approved by the American Society of Mechanical Engineers. The bill requires an applicant for any of these licenses to undergo a criminal background check. The term of these licenses under the bill is two years. The bill also contains provisions relating to applications for and revocation and suspension of of these licenses. In addition, the bill establishes continuing education requirements and other provisions relating to renewal of these licenses.

The department may issue an elevator contractor's license only to a person who demonstrates to the satisfaction of the department that the person is adequately qualified and able to engage in business as an elevator contractor, except that, in certain circumstances, the department may summarily issue an elevator contractor's license to a person who is licensed as an elevator contractor under the laws of another state. Every person who applies for an elevator contractor's license must provide the department with a certificate of insurance issued by one or more insurers authorized to do business in this state, indicating that the person is insured in the amount of at least \$1,000,000 per occurrence because of bodily injury to or death of others, is insured in the amount of at least \$500,000 per occurrence because of damage to the property of others, and is insured to the extent required under the workers compensation laws.

With certain exceptions, the department may issue an elevator mechanic's license only to an individual who satisfies all of the following:

1. Demonstrates to the satisfaction of the department that the person is adequately qualified and able to perform the work of an elevator mechanic.
2. During the three years preceding the date of application, was continuously employed in a position requiring the individual to perform work relevant to the erection, construction, alteration, replacement, maintenance, repair, removal, or dismantling of conveyances, as verified by the individual's employers.
3. Satisfactorily completes a written examination administered by the department covering the provisions of the subchapter created in the bill and rules promulgated under that subchapter relevant to the license applied for or satisfactorily completes an elevator mechanic's examination approved by the department and administered by a nationally recognized training program established by the elevator industry.
4. Satisfactorily completes an elevator mechanic's apprenticeship program that is approved by the Department of Commerce and the Department of Workforce Development.

The bill contains three exceptions relating to an elevator mechanic's license. First, the department may summarily issue an emergency elevator mechanic's license if an emergency exists in this state due to disaster or work stoppage and the number of licensed elevator mechanics working in the area of the emergency is insufficient to cope with the emergency. An emergency elevator mechanic's license may be issued only to an individual who is certified by a licensed elevator contractor as adequately qualified and able to perform the work of an elevator mechanic without direct and immediate supervision, who the department determines is so qualified and able, and who applies for an emergency elevator mechanic's license on a form prescribed by the department. An emergency elevator mechanic's license has a term

**ASSEMBLY BILL 886**

of 30 days and may be renewed by the department in the case of a continuing emergency. Second, if there are no licensed elevator mechanics available to provide services contracted for by a licensed elevator contractor, the elevator contractor may notify the department and request the issuance of a temporary elevator mechanic's license to any individual who is certified by the elevator contractor as adequately qualified and able to perform the work of an elevator mechanic without direct and immediate supervision and who applies for a temporary elevator mechanic's license on a form prescribed by the department. A temporary elevator contractor's license has a term of 30 days and may be renewed by the department in the case of a continuing shortage of licensed elevator mechanics. Third, the department may summarily issue an elevator mechanic's license to an individual who is licensed as an elevator mechanic under the laws of another state, if, in the opinion of the department, that state's regulation of elevator mechanics is substantially the same as this state's.

The bill also contains a grandfather provision applicable to any individual who, during the three-year period before the effective date of the subchapter created in the bill, performed primarily the work of an elevator mechanic, within the scope of his or her employment. Such an individual may apply to the department for an elevator mechanic's license during the 12-month period beginning on the effective date of the subchapter created in the bill. The department must issue an elevator mechanic's license to any such individual who, in the opinion of the department, is adequately qualified and able to perform the work of an elevator mechanic. The term of each such license is two years.

***Other provisions***

Under the bill, no city, village, town, or county may enact an ordinance or adopt a resolution regulating a matter specifically governed by the subchapter created in the bill or by a rule promulgated under that subchapter. The bill also invalidates any such ordinance that is in effect on the effective date of the new subchapter.

The bill requires the owner or lessee of any conveyance in operation on the effective date of the new subchapter to obtain any required operating permit no later than the first day of the 6th month beginning after the effective date of the new subchapter. This requirement does not apply to any person required to obtain a permit under rules of the department of commerce that are in effect before the effective date of the new subchapter.

Because this bill creates a new crime or revises a penalty for an existing crime, the Joint Review Committee on Criminal Penalties may be requested to prepare a report concerning the proposed penalty and the costs or savings that are likely to result if the bill is enacted.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

11 equipment for compliance with this subchapter and any applicable rules  
12 promulgated under this subchapter. This inspection by the department does not  
13 exempt the owner from the requirement to ensure that the department receives an  
14 inspection report from a licensed elevator inspector. Upon performing this  
15 inspection, the department shall give the owner notice of relevant conveyance safety  
16 requirements and shall instruct the owner as to the procedure for obtaining periodic  
17 inspections and renewing the permit under which the lift or equipment is operated.

19 a term of one year, except that a permit applicable to a platform lift, stairway chair  
20 lift, or residential lift in a private residence is valid until ownership of the private

22 permit under par. (b). The owner of the building or residence in which a conveyance  
23 is located shall display the permit under par. (a) applicable to the conveyance on or  
24 in the conveyance or, if applicable, in the machinery room.
