### ***Analysis by the Legislative Reference Bureau***

Currently, under the Wisconsin Retirement System (WRS), annuitants may have insurance premiums for health care coverage paid directly from their WRS annuities. This program, however, only applies to health insurance plans offered under a program established by the Group Insurance Board (GIB). Similarly, state annuitants may currently have insurance premiums for long-term care coverage paid directly from their retirement annuities. Again, this option only applies to long-term care insurance plans offered under a program established by GIB. This bill permits all annuitants to have premiums for any health care coverage or long-term care coverage plan deducted from their annuities, even if the plan is not offered under the program established by GIB.

The Deferred Compensation Board (board), attached to the Department of Employee Trust Funds, currently selects and contracts with plan providers that are used by state agencies for providing deferred compensation plans to state employees. These plans are also made available to public employers other than the state for their employees. This bill provides that the board may require a deferred compensation plan, upon election by a participant, to allow for the deduction of insurance premiums for health or long-term care insurance coverage from an amount

distributed from a participant's account and for the payment of the premiums directly to an insurer.

Because this bill relates to public employee retirement or pensions, it may be referred to the Joint Survey Committee on Retirement Systems for a report to be printed as an appendix to the bill.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
