7 diseases, and allowing certified advanced practice nurse prescribers to

Analysis by the Legislative Reference Bureau

This bill allows certified advanced practice nurse prescribers to provide certain services provided by other health care providers.

TRANSPORTATION

Under current law, the Department of Transportation (DOT) may require an operator's license applicant or licensee to submit to a special examination to determine incompetency, physical or mental disability, disease, or any other condition that might prevent the applicant or licensee from exercising reasonable and ordinary control over a motor vehicle. If DOT receives a report from a physician, advanced practice nurse prescriber, or optometrist, DOT must determine whether

ASSEMBLY BILL 828

the operator should submit to a special examination. When DOT receives the results of a special examination, DOT must consider the recommendation of the examiner together with other evidence in determining if it is in the interest of public safety to issue, renew, deny, or cancel a license.

This bill specifies that a special examination required by DOT may be conducted by, and the results of the examination certified by, a physician, certified advanced practice nurse prescriber, or optometrist.

NATURAL RESOURCES

Under current law, the Department of Natural Resources (DNR) is authorized to issue certain hunting permits that authorize hunting by persons who have a physical disability or who are visually handicapped (specialized permits). Among the privileges granted by these specialized permits is the privilege of hunting with assistance rendered by another person and, under some circumstances, hunting with a crossbow. In order to obtain a specialized permit from DNR, a person must submit an application furnished by DNR that includes a statement or report prepared and signed by a specified medical professional verifying that the applicant is physically disabled. A person may also obtain a specialized permit even if the person would otherwise be ineligible for a specialized permit if DNR, based on the recommendation of a specified medical professional, determines that the issuance of the permit complies with the intent of the law.

This bill authorizes an applicant for a specialized permit to submit a statement, report, or recommendation from a certified advanced practice nurse prescriber, in addition to the medical professionals specified current law, in support of a specialized permit application.

Current law also requires DNR to issue an annual or temporary disabled person fishing license (disabled fishing license) to a resident who produces a certificate from a specified medical professional stating that his or her sight is impaired to a specified degree. Among the privileges of a disabled fishing license is the right to pay a reduced fee for the license and the authority to fish during special fishing seasons designated by DNR. This bill allows advanced practice nurse prescribers, in addition to the medical professionals specified under current law, to furnish the required certificate for a disabled fishing license.

HEALTH CARE

Under current law, physicians may examine, diagnose, and treat a minor with a sexually transmitted disease, which includes syphilis, gonorrhea, and chlamydia, without obtaining consent of the minor's parents or guardian. The physician may not be held civilly liable for not having that consent.

The bill allows an advanced practice nurse prescriber to examine, diagnose, and treat a minor with a sexually transmitted disease without obtaining the parent's or guardian's consent and relieves the advanced practice nurse prescriber from civil liability for not having that consent.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
