1 **AN ACT relating to:** administrative rules relating to hunting wild turkeys.

---

### *Analysis by the Legislative Reference Bureau*

This bill requires the Department of Natural Resources to modify administrative rules relating to the hunting of wild turkeys to combine hunting zones and seasons and to modify youth hunting restrictions.

Current DNR rules create a spring open season for the hunting of wild turkeys that begins on the third Wednesday in April and continues Wednesday through Tuesday of the following week for six consecutive seven-day time periods. The bill requires DNR to combine the six periods into two periods. The first period would last for two weeks and be open only to those issued hunting licenses and authorizations under the cumulative preference system. The second period would last for four weeks, during which hunting licenses and authorizations would be issued to applicants in the order in which applications are received, regardless of accumulated preference points.

Current DNR rules provide that a person under the age of 16 who possesses the necessary approvals may hunt turkeys for two consecutive days starting on the Saturday before the beginning of the spring turkey hunting season. If the person does not successfully harvest a turkey during the youth hunt, the authorization remains valid during the time period and in the zone for which the authorization was issued. The bill requires DNR to provide that the authorization remains valid in the same hunting zone during both hunting periods that follow the youth hunt.

Current DNR rules create seven wild turkey hunting zones. The bill requires DNR to create a southern zone, to consist of current zones 1 to 3, and a northern zone, to consist of current zones 4 to 7.
