Analysis by the Legislative Reference Bureau

Under current law, the governor has authority to accept aid made available to the state by the U.S. government, including moneys the federal government makes available to the state in connection with the COVID-19 pandemic.

This bill requires the Department of Administration to develop, maintain, and update at least weekly a publicly available and fully searchable dashboard on its Internet site that provides a full accounting of all of the following:

1. The amount of federal COVID-19 relief funds DOA reasonably anticipates that this state will receive and when the state will receive the funds.
2. The amount of federal COVID-19 relief funds accepted by the state and the date of each acceptance of the funds.
3. The amount of federal COVID-19 relief funds allocated to each state agency, including an identification of the state agency and a detailed description of the purposes for which the funds were allocated.
4. The amount of federal COVID-19 relief funds allocated to each nonentitlement unit of local government, as defined under federal law, including an identification of each nonentitlement unit of local government and a detailed description of the purposes for which the funds were allocated.
5. The amount of federal COVID-19 relief funds expended by each state agency, an identification of the appropriation from which the funds were expended, the purposes for which the funds were expended, and the date of each expenditure.

SENATE BILL 980

6. An identification of each vendor, including zip code, receiving COVID-19 relief funds from the state, the amount of the funds expended by each vendor, and the date of each expenditure.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
