Analysis by the Legislative Reference Bureau

Under current law, the Technical College System Board may establish and supervise training programs in fire prevention and protection, which must be made available to members of volunteer and paid fire departments. Also under current law, technical college district boards must make available to members of volunteer and paid fire departments in the district a fire fighting training program approved by the Technical College System Board. This bill requires the Technical College System Board and the technical college district boards to include in provided programs different course modules to account for different fire fighter focuses, and to differentiate any provided fire fighting training program based on whether the training is for volunteer fire fighting officers or paid, full-time fire fighting officers.

For further information see the local fiscal estimate, which will be printed as an appendix to this bill.
