Analysis by the Legislative Reference Bureau

This bill requires the Department of Health Services to enter into any necessary agreements with the federal Department of Health and Human Services and neighboring states to join and participate as an active member in the Public Assistance Reporting Information System. The Public Assistance Reporting Information System is a federal database used to check whether public assistance recipients may be receiving duplicate benefits in more than one state. The bill also requires DHS to identify any veterans, dependents of veterans, and survivors receiving benefits under the Medical Assistance program that are eligible for federal military-related health care benefits and encourage those individuals to apply for the federal benefits for which they are eligible.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
