Paper #357

### Public Health Grant Programs (Health Services -- Public Health)

[LFB 2021-23 Budget Summary: Page 280, #4, Page 280, #5, Page 283, #8, Page 283, #9, Page 284, #12 and Page 287, #17]

---

#### CURRENT LAW

The Department of Health Services, Division of Public Health (DPH) administers several state-supported health programs for which the Governor has recommended funding increases.

*Community Health Centers and Free and Charitable Clinics.* In 2020-21, the Department of Health Services (DHS) is budgeted \$5,990,000 GPR to fund four types of grants to community health centers and free and charitable clinics. First, DHS is budgeted \$5,390,000 GPR annually to provide grants to federally qualified health centers (FQHCs) in amounts proportional to grants these FQHCs receive from the U.S. Department of Health and Human Services, Health Resources and Services Administration (HRSA). Second, 2019 Wisconsin Act 9 directed DHS to allocate \$500,000 GPR annually, beginning in 2019-20, to free and charitable clinics, which are not defined in statute. Third, DHS is directed to allocate \$50,000 GPR annually to a community health center in the City of Milwaukee (currently the Sixteenth Street Health Center receives this grant). Finally, DHS is directed to allocate \$50,000 GPR annually to HealthNet of Janesville, Inc. (now HealthNet of Rock County).

*Windows Plus Lead Exposure Prevention Program.* Under this program, initiated in 2019-20 but suspended during the COVID-19 pandemic, DHS provided funding to renovate homes built before 1950 that were inhabited or frequently visited by low-income families with children. The program focused on high-risk components, such as windows, porches, floors, and siding.

*Tobacco and Vaping Prevention.* DHS funds a tobacco use control program, which supports grants for a variety of tobacco and cessation activities. Base (GPR) funding for this program is \$5,315,000 GPR.

*EMS Assistance.* The emergency medical services (EMS) funding assistance program

provides annual grants to all public ambulance service providers, including volunteer fire departments, nonprofits, and counties or municipalities that operate their own ambulance service or contract with a private provider. Grants consist of a uniform base allocation to each provider, an additional amount based on population served, and funding for providers who apply for assistance with training, examinations, and licensure. Base funding for the program is \$1,960,200 GPR.

*Hearing Aid Assistance Program.* The program provides up to \$250 per device towards the cost of a telecoil, Bluetooth-enabled hearing aid, or cochlear implant external processor to Wisconsin residents who; (a) have income under 200% of the federal poverty line; (b) are not enrolled in the MA program; and (c) complete a hearing loss certification form. Base funding for the program that supports interpreter services and telecommunications aids for individuals who are hearing impaired is \$178,200 annually. DHS uses this funding to reimburse hearing interpreters and, subject to availability of funds, operate several financial assistance programs for telecommunication equipment for low-income people with hearing impairments, including the hearing aid assistance program.

## **DISCUSSION POINTS**

This paper provides information on the items in Assembly Bill 68 and Senate Bill 111 that would increase funding for current grant programs.

### **Federally-Qualified Health Centers -- State Supplement**

1. AB 68/SB 111 would provide \$2,000,000 annually to increase, from \$5,490,000 to \$7,490,000, annual funding for grants DHS distributes to community health centers. This funding increase is identical to the funding increase that would be provided under 2021 Assembly Bill 66 and a companion bill, 2021 Senate Bill 59. Both bills have bipartisan sponsorship. Consequently, this item could be addressed as separate legislation, apart from the state budget bill.

2. FQHCs are nonprofit or public organizations that provide comprehensive primary health care services to underserved areas and populations, including migrant agricultural workers and people experiencing homelessness. All FQHCs must meet federal requirements, such as offering services to all persons, regardless of ability to pay, charging patients for services based on a sliding fee scale, and providing services that promote access and engagement in health, such as patient and community health education. Although many health centers provide similar services -- including free and charitable clinics, rural health centers, and 'FQHC look-alikes' -- FQHCs are health centers that qualify for federal grants under Section 330 of the federal Public Health Service Act. The U.S. Department of Health and Human Services, Health Resources and Services Administration (HRSA) provides federal funding and oversight of FQHCs.

3. There are 17 FQHCs in Wisconsin that received a total of \$47.5 million in awards under section 330 in federal fiscal year 2019-20, as shown in the second column of Attachment 1. DHS is directed to make supplementary GPR-funded grants to each FQHC in amounts that are

proportional to the amount of their federal Section 330 award, totaling \$5,390,000 each year. These awards for state fiscal year 2020-21 are shown in the first column of the attachment.

4. Together, these state and federal grants account for approximately 10% of FQHCs' revenue in 2018. In that year, 69% of FQHC revenue was provided through medical assistance reimbursement, 12% from private insurance and self-pay; 4% from Medicare, and 5% from other grants, such as the Ryan White HIV/AIDS program. In 2018, revenues to all FQHCs totaled \$500.7 million from all sources.

5. In response to the COVID-19 pandemic, several state and federal programs have provided financial assistance to FQHCs, as shown in the final four columns of Attachment 1. The Coronavirus Aid, Relief, and Economic Security (CARES) Act granted \$2,257.7 million to Wisconsin as reimbursement for certain COVID-19–related costs from the Coronavirus Relief Fund (CRF), DHS allocated part of this funding to reimburse healthcare providers for COVID-19–related losses, creating the CARES Act Provider Payment Program and reserving \$20 million specifically for FQHCs, rural health clinics, and free clinics. As shown, FQHCs received a total of \$11.9 million.

6. The federal government made similar reimbursements to healthcare facilities through the Provider Relief Fund, granting Wisconsin FQHCs a total of \$15.4 million to date. Authorized through various federal Acts, the Health Resources and Services Administration (HRSA) also made three separate grants to support FQHCs and their COVID-19 testing efforts. Together, these grant programs provided \$22.2 million to Wisconsin FQHCs in 2020. Subsequently, the American Rescue Plan Act (ARPA) authorized HRSA to provide additional supplemental grants, including \$59.1 million received by FQHCs in Wisconsin. Finally, the federal Paycheck Protection Program provided \$27.1 million in forgivable loans to support FQHCs in Wisconsin, as of December 2020. For FQHCs, generally the entire loan amount will be forgiven.

7. The additional funding FQHCs received as part of the federal COVID-19 legislation is one-time funding that was provided specifically to address FQHC costs related to the COVID-19 pandemic. The Governor, in his budget bill, and legislators that authored AB 66 and SB 59 support a permanent, ongoing increase in state funding to support the work of FQHCs.

### **Free and Charitable Clinics -- State Grant Program**

8. AB 68/SB 111 would provide \$2,000,000 annually to increase, from \$500,000 to \$2,500,000, annual funding for grants DHS distributes to free and charitable clinics and specify this annual allocation amount in statute.

9. In addition, AB 68/SB 111 would create a statutory definition of "free and charitable clinics" as health care organizations that: (a) are nonprofit and tax exempt or are a part of a larger nonprofit, tax-exempt organization; (b) are located in Wisconsin or serve Wisconsin residents; (c) serve only people who are uninsured, underinsured, or have limited or no access to primary, specialty, or prescription care; (d) provide one or more of medical care, mental health care, dental care, or prescription medications; (e) use volunteer health care professionals, nonclinical volunteers, and partnerships with other health care providers to provide these services; and (f) are

not federally qualified health centers (FQHCs) or reimbursed by Medicare or medical assistance as FQHCs.

10. Free and charitable clinics are not currently defined in statute. However, for purposes of administering the \$500,000 GPR annual grant program created in Act 9, DHS used the definition of "free and charitable clinics" that the Governor proposes in the bill. Free and charitable clinics have the same mission as FQHCs, but are not regulated and funded under HRSA's FQHC program. The Committee could include the statutory language definition as proposed in AB 68/SB 111 (Alternative B5). However, given that DHS will likely continue to administer the program without the statutory changes, the Committee could decide not to include it in their version of the bill (Alternative B6).

11. Attachment 2 to this paper lists the current free and charitable clinics, as they appear on the website of the Wisconsin Association of Free and Charitable Clinics.

### **Windows Plus Lead Exposure Prevention Program**

12. AB 68/SB 111 would provide \$961,800 in 2021-22 and \$1,054,800 in 2022-23 and 1.0 position, beginning in 2021-22, to resume the Windows Plus lead exposure prevention program that DHS initiated in 2019-20 with one-time funding that was provided for lead abatement projects in 2019 Act 9. The program provided lead-safe renovation in homes built before 1950 that were inhabited or frequently visited by low-income families with children and focused on high-risk components, such as windows, porches, floors, and siding

13. A lead hazard is present if a home has wood or metal that has lead in it that is able to come off of the wood or metal. Often, a hazard is created when lead-based paint is chipping or peeling. Opening doors and windows can create lead dust from these sources, a source of lead poisoning, especially among children. Abatement may involve removing and replacing the hazardous material or applying a coating to the surface of the material that seals the lead into the hazardous material.

14. Currently, DHS provides related lead abatement services through the lead safe homes project (LSHP), funded in part by federal funds from a children's health insurance program (CHIP) health services initiative. However, participation in the LSHP is limited to housing units that meet certain requirements that do not apply under the Windows Plus lead exposure prevention program. For example, under the LSHP program, the unit must be inhabited by children enrolled in medical assistance, a formal lead risk assessment must be conducted by a certified assessor, and all workers on the site must be certified as lead abatement workers or supervisors. The Windows Plus lead exposure prevention program would fund renovation projects that are ineligible for funding under the LSHP program.

15. Attachment 3, prepared by DHS, shows the difference between the LSHP and Windows Plus Program.

16. As of September 2020, 132 homes had been enrolled in the LSHP program. The costs of lead abatement work average between \$25,000 and \$35,000, including contractor costs and

additional costs of family relocation, grant administration, lab tests and property assessment activities.

17. DHS estimates that the funding amount in the bill would provide lead-safe renovations to approximately 47 homes in 2021-22 and 53 homes in 2022-23. The cost estimate includes indirect costs such as administration and relocation of resident families

18. In late September, 2020, the U.S. Department of Housing and Urban Development (HUD) awarded Wisconsin a \$3.4 million lead hazard control and healthy homes grant to fund lead poisoning prevention work for three years. DHS intends to use the grant to identify and control lead-based paint hazards in 125 eligible privately-owned rental or owner-occupied homes, reach at least 500 people through educational events, add a website dedicated to preventing lead poisoning that provides information and referrals, and provide training to 80 individuals in lead risk assessment or lead hazard control activities. Kenosha County was also awarded \$4.0 million under the HUD program to address 204 housing units for low-income families with children.

### **Tobacco and Vaping Prevention**

19. AB 68/SB 111 would provide \$2,000,000 GPR in 2021-22 to fund a new public health campaign aimed at preventing initiation of tobacco and vapor product use. The bill would authorize DHS to include in the new public health campaign grants for local and regional organizations working on youth vaping and providing cessation services. In addition, the bill would require DHS to include the new public health campaign in a required annual report to the Legislature detailing and evaluating the tobacco use control grants, beginning April 15, 2022.

20. Tobacco is the leading cause of preventable death in the United States. The Centers for Disease Control and Prevention (CDC) estimates that:

- Cigarette smoking causes about one of every five deaths in the United States each year (approximately 480,000 deaths annually);
- The life expectancy of smokers is at least 10 years shorter than for nonsmokers; and
- Quitting smoking before the age of 40 reduces the risk of dying from smoking-related diseases by about 90%.

The adverse health consequences of smoking are well documented in a 943-page, 2014 report from the Surgeon General, *The Health Consequences of Smoking -- 50 Years of Progress*, which is available at [The Health Consequences of Smoking - 50 Years of Progress: A Report of the Surgeon General \(nih.gov\)](https://www.fda.gov/oc/ohrt/the-health-consequences-of-smoking-50-years-of-progress-a-report-of-the-surgeon-general-nih.gov).

21. In March, 2015, the American Journal of Preventive Medicine published an article, *Annual Healthcare Spending Attributable to Cigarette Smoking: an Update*, in which the authors estimated health care spending attributable to cigarette smoking by using data from the 2006-10 Medical Expenditure Panel Survey (MEPS). MEPS is a set of large-scale surveys of families and individuals, their medical providers, and employers across the United States that is considered to

be the most complete source of data on the cost and use of health care and health insurance coverage.

Using statistical analytic methods, the authors estimated that 8.7% of annual healthcare spending in the United States could be attributed to cigarette smoking, (with a 95% confidence interval (CI) of between 6.8% and 11.2%), and that 15.2% of Medicaid expenses were attributable to cigarette smoking (with a 95% CI of between 6.2% and 27.4%). By applying the 8.7% estimate to total annual healthcare spending in 2010, the authors estimated that, nationally, approximately \$170 billion of healthcare spending was attributable to cigarette smoking.

By applying the estimate of the percentage of total Medicaid spending attributable to cigarette smoking (15.2%) with the current (all funds) estimate of gross Wisconsin MA benefits spending in 2020-21 (\$11.4 billion), it is estimated that approximately \$1.7 billion of Wisconsin Medicaid benefits costs in this year may be attributable to cigarette smoking.

22. DHS estimates that approximately 7,000 Wisconsin residents die each year from smoking-related illnesses, and that the direct health care cost of smoking, including physician visits, hospitalizations, and medications is approximately \$3.0 billion per year across all public and private payors.

23. Nearly all tobacco use begins during youth and young adulthood. Responses from the Department's 2019 Youth Risk Behavior Survey indicate that 46% of high school students have tried an electronic vapor product. Electronic cigarettes, little cigars, smokeless products, sweet candy flavors and new products designed to hide addition are targeted at young people, and are commonly accessible. The minty flavor of menthol makes tobacco appealing to youth and it is widely believed that the industry uses sweet flavorings and menthol to target young people.

Further, many products containing tobacco are produced to disguise their contents, such as electronic smoking devices with toy-like shapes and colors that may look like a makeup compact, a USB drive, a writing pen, or highlighter. Wearable products may have secret pockets, hidden tubes, and mouthpieces that enable youths to use e-cigarettes without being noticed.

24. The use of electronic smoking devices has significantly increased, both nationwide and in Wisconsin. DHS reports that current e-cigarette use among Wisconsin high school students increased 154 percent between 2014 and 2018. In 2014, nearly 8 percent of Wisconsin high school students were using e-cigarettes. In 2018, that number had increased to 20 percent. Further, the age of initiation is also getting younger. DHS survey information suggests that 96 percent of middle schoolers who have ever used an e-cigarette first tried one before the age of 13.

25. DHS indicates that, of the \$2.0 million in one-time funding recommended by the Governor, it would allocate approximately 70 to 75% of the funding to support a public health media campaign and 25 to 30% to fund grants to fund private media efforts that promote treatment options and access to cessation programs. The Department would begin reviewing market research to determine what campaign materials are currently available that would likely be effective in preventing youth from using e-cigarettes, including materials from the CDC's Media Campaign Resource Center. This work may include using focus groups or surveys with teens, using current

materials. If DHS determines that the current materials would be effective, most of the media campaign would be focused on buying media time.

26. If DHS determines that existing campaign materials would not be effective, DHS would develop an original e-cigarette youth prevention campaign. This would involve using focus group and online research to determine what youth need to hear about the topic and what messages they would find most effective. It would likely build on the current "Tobacco is Changing" campaign, which educates Wisconsin parents on e-cigarettes, flavored tobacco products, and other issues.

27. The outreach grants would be provided to local community Alliances, FACT groups, community based-organizations serving youth and young adult populations most affected by the targeting and use of e-cigarettes, and state-wide programs such as the Quit Line. The goals of these grants would be to extend the message of the paid media campaign by engaging members of the community in that educational outreach. The messaging will focus both on the youth e-cigarette prevention campaign and the promotion of cessation resources available in Wisconsin such as the Quit Line and Not on Tobacco (N-O-T), a school-based program to assist youth quit smoking.

28. The DHS Division of Public Health currently administers the tobacco use control grant program, funded at \$5,315,000 annually. Attachment 4 provides information on the grants DHS supported with its base funding in 2020-21.

29. Several options are available to the Committee to address this issue, including adopting the provisions in AB 68/SB 111 (Alternative D1), providing less funding than would be provided in AB 68/SB 111 (Alternative D2), providing an ongoing increase to funding DHS provides under the current tobacco use control and prevention program (Alternatives D3 and D4), or maintaining base level funding of \$5,315,000 (Alternative D5).

### **EMS Assistance**

30. AB 68/SB 111 would provide \$239,800 annually to increase, from \$1,960,200 to \$2,200,000, annual funding for grants DHS distributes to public ambulance service providers. This funding increase is identical to the funding increase that would be provided under 2021 Assembly Bill 96, which has been recommended for passage on a vote of 16-0 by the Assembly Committee on Health, and 2021 Senate Bill 88, which has been referred to the Senate Committee on Government Operations, Legal Review and Consumer Protection. Both bills have received bipartisan sponsorship. Consequently, the Committee could address this item as separate legislation, apart from the state budget bill.

31. The Division of Public Health administers the emergency medical services (EMS) funding assistance program (FAP) by distributing funds for several purposes.

DHS distributes funds to ambulance service providers that are public agencies, volunteer fire departments or nonprofit corporations to purchase ambulance service vehicles, vehicle equipment, EMS supplies and equipment, and emergency medical training. DHS disburses these funds under a formula that ensures that each ambulance service provider receives an identical base

amount, plus a supplemental amount based on the population of the ambulance service provider's primary service or contract area. If a public agency has contracted for ambulance service with a provider that operates for profit, DHS distributes the funds to the public agency. The state funds are meant to supplement, rather than supplant, local funding for ambulance services.

The funding is also available to purchase training required for the initial licensure and licensure renewals for the providers' emergency medical technicians (EMTs), for initial certification and renewals of emergency medical responders (EMRs), and to pay for the administration of examinations for EMTs and EMRs.

32. As a condition of relicensure, ambulance providers are required to submit financial reports of expenditures of funds each ambulance provider received under the program. In addition, DHS may require financial reports from ambulance services contracted by public agencies, volunteer fire departments, and nonprofit corporations.

The state's EMS Board provides recommendations to DHS relating to the state's emergency medical services programs, including the recommended formula for allocating funding under the FAP. In 2019-20, DHS distributed funding as follows:

- For EMS support and improvement, each ambulance service provider received a base rate of \$3,588 plus an additional award of \$0.03 per capita for the population of the provider's primary service area.
- For EMS training, the total amount available equaled the total funding budgeted for the program (\$1,960,200 GPR), less the amount allocated for the support and improvement activities component of the formula. Each qualified service received a base distribution, equal to half of the funds available for training divided by the number of qualified services that applied, with the remaining half allotted to services based on run volume, the number of EMTs and responders on the ambulance provider's service roster, and the population of the service area.

33. Attachment 5 lists the 2019-20 grant amounts DHS awarded to the EMS providers participating in the program.

34. The program was created in 1989 Wisconsin Act 102, which provided \$2,200,000 (\$1,100,000 GPR and \$1,100,000 SEG from the transportation fund), beginning in 1990-91 to support EMS services. Since that time, there have been several programmatic and funding changes. However, the amount of assistance the state has provided to these EMS units has not exceeded the 1990-91 appropriation amount (30 years). Further, as over 300 EMS units are currently eligible for assistance under the program, the amount each unit receives is relatively modest. For these reasons, the Committee could provide a funding increase greater than proposed by the administration or in separate legislation. Alternative E2 would increase funding for the assistance program to \$3.0 million GPR per year.

## **Hearing Aid Assistance Program**

35. AB 68/SB 111 would provide \$321,800 GPR annually to increase from \$25,000 to \$346,800 funding DHS would be allocated for the hearing aid assistance (HAA) program. DHS created the program in February, 2021, as part of the telecommunications assistance program (TAP). The statutes currently provide DHS with broad authority to provide assistance to hearing impaired persons to secure telecommunication devices capable of serving their needs, but limits this assistance to individuals who: (a) are certified as deaf or severely hard of hearing by a physician or audiologist; and (b) live in families with adjusted gross income less than 200% of the federal poverty level.

36. TAP currently provides four types of assistance. First, the TAP copay program funds the \$100 copay costs required by the telecommunications equipment purchase program available through the Public Service Commission for the purchase of approved distance communications devices. Second, the program funds up to \$150 toward an applicant's purchase of an approved device when there are additional out-of-pocket costs that would be a hardship for the applicant to pay. Third, up to \$250 is available to cover the costs of approved specialized telecommunications equipment for individuals who do not apply under the first two programs. Finally, the TAP HAA program provides funding towards the purchase of new hearing aids and cochlear implant external processors to increase the efficiency and use of telecommunications devices for distance communications. TAP HAA can provide up to \$250 towards the cost of a telecoil or Bluetooth-enabled hearing aid or cochlear implant external processor. TAP HAA is available to eligible applicants with an out-of-pocket expense.

37. DHS rules (HS 78) provide additional guidance regarding eligibility and benefits under TAP. For example, the rules specify that individuals who are eligible for or receiving services from the Department of Workforce Development's Division of Vocational Rehabilitation (DVR) are first evaluated by DVR to determine whether a telecommunications device can be provided through that program, in which case the individual can apply for assistance under the program. The rules specify that all assistance is provided on a first-come, first-serve basis, and are subject to the availability of funds. The program is administered through vouchers DHS issues, which can be redeemed with DHS-approved vendors.

38. TAP is funded by a sum certain GPR appropriation which also partially supports hearing interpreter services. The following table summarizes funding budgeted for DPH's hearing-impaired services, including base funding and funding that would be provided under AB 69/SB 11.

## Services for Hearing Impaired Persons Program Funding

	<u>Base</u>	<u>Governor Change to Base</u>	<u>Total Under Bill</u>
<b>GPR</b>			
Interpreter Services*	\$96,200	\$0	\$96,200
<b>Telecommunications Assistance Program (TAP)</b>			
Hearing Aids Assistance	25,000	321,800	346,800
Other Assistance**	<u>57,000</u>	<u>          </u>	<u>57,000</u>
GPR Total	\$178,200	\$321,800	\$500,000
<b>PR</b>			
Interpreter Services	\$129,900	\$0	\$129,900
Total (All Funds)	\$308,100	\$321,800	\$629,900

\*Excludes \$90,000 GPR DHS has allocated for this purpose under the treatment program grants program created in Act 9, which is not directed specifically for services for hearing impaired persons.

\*\*Includes copayment assistance, equipment purchase assistance, and TAP Plus (specialized telecommunications assistance).

39. As the HAA program is relatively new, it is not known what the potential demand for program benefits will be. However, the program is not an entitlement program, so DHS will continue to administer the program on a first-come, first serve basis. The funding increase in the Governor's budget appears to be based on a goal of providing \$500,000 GPR annually to support all benefits under the TAP program.

### ALTERNATIVES

#### A. Federally Qualified Health Centers

1. Increase grant funding for FQHCs by \$2.0 million GPR per year.

ALT A1	Change to Base
GPR	\$4,000,000

2. Increase grant funding for FQHCs by \$1.0 million GPR per year.

ALT A2	Change to Base
GPR	\$2,000,000

3. Take no action.

**B. Free and Charitable Clinics**

Funding

1. Increase grant funding for free and charitable clinics by \$2.0 million GPR per year.

ALT B1	Change to Base
GPR	\$4,000,000

2. Increase grant funding for free and charitable clinics by \$1.0 million GPR per year.

ALT B2	Change to Base
GPR	\$2,000,000

3. Increase grant funding for free and charitable clinics by \$0.5 million GPR per year.

ALT B3	Change to Base
GPR	\$1,000,000

4. Take no action.

Statutory Change

5. Add the statutory definition of "free and charitable clinics," as described in Discussion Point 9.

6. Take no action.

**C. Windows Plus Lead Exposure Prevention Program**

1. Provide \$961,800 in 2021-22 and \$1,054,800 in 2022-23 and 1.0 position, beginning in 2021-22, to resume the Windows Plus lead exposure prevention program.

ALT C1	Change to Base Funding	Positions
GPR	\$2,016,600	1.00

2. Provide \$461,800 in 2021-22 and \$505,800 in 2022-23 and 1.0 position, beginning in

2021-22, to resume the Windows Plus lead exposure prevention program.

<b>ALT C2</b>	<b>Change to Base</b>	
	<b>Funding</b>	<b>Positions</b>
GPR	\$1,016,600	1.00

3. Take no action.

**D. Tobacco and Vaping Prevention**

1. Provide \$2,000,000 GPR in 2021-22 to fund a new public health campaign aimed at preventing initiation of tobacco and vapor product use. Authorize DHS to include in the new public health campaign grants for local and regional organizations working on youth vaping and providing cessation services. Require DHS to include the new public health campaign in a required annual report to the Legislature detailing and evaluating the tobacco use control grants, beginning April 15, 2022.

<b>ALT D1</b>	<b>Change to Base</b>	
	<b>Funding</b>	<b>Positions</b>
GPR	\$2,000,000	1.00

2. Provide \$1,000,000 GPR in 2021-22 to fund a new public health campaign aimed at preventing initiation of tobacco and vapor product use. Authorize DHS to include in the new public health campaign grants for local and regional organizations working on youth vaping and providing cessation services. Require DHS to include the new public health campaign in a required annual report to the Legislature detailing and evaluating the tobacco use control grants, beginning April 15, 2022.

<b>ALT D2</b>	<b>Change to Base</b>	
	<b>Funding</b>	<b>Positions</b>
GPR	\$1,000,000	1.00

3. Increase funding for tobacco use control and prevention program by \$2,000,000 GPR annually.

<b>ALT D3</b>	<b>Change to Base</b>
GPR	\$4,000,000

4. Increase funding for tobacco use control and prevention program by \$1,000,000 GPR annually.

ALT D4	Change to Base
GPR	\$2,000,000

5. Take no action.

**E. EMS Assistance Program**

1. Increase funding for the EMS assistance program by \$239,800 GPR annually so that \$2,200,000 GPR annually would be budgeted for the program.

ALT E1	Change to Base
GPR	\$479,600

2. Increase funding for the EMS assistance program by \$1,039,800 GPR annually so that \$3,000,000 GPR annually would be budgeted for the program.

ALT E2	Change to Base
GPR	\$2,079,600

3. Take no action.

**F. Hearing Aid Assistance Program**

1. Increase funding for the TAP hearing aid assistance program by \$321,800 GPR annually so that \$500,000 GPR annually would be budgeted for the TAP program.

ALT F1	Change to Base
GPR	\$643,600

2. Increase funding for the TAP hearing aid assistance program by \$121,800 GPR annually so that \$300,000 GPR annually would be budgeted for the TAP program.

ALT F2	Change to Base
GPR	\$243,600

3. Take no action.

### Comparison of DHS Lead Hazard Reductions Programs

<i>Activity</i>	<b>Health Service Initiative: Lead Abatement</b>	<b>Windows Plus Lead-Safe Renovation</b>
<i>Scope of Work</i>	<ul style="list-style-type: none"> <li>• Goal: Abatement of lead hazards</li> <li>• Objective: All surfaces, components and fixtures identified as a lead hazard during lead risk investigation will be abated.</li> <li>• Eligible costs include any abatement work to address an identified lead hazard (including soil) with the exception of replacement of lead laterals. The cost of minor repairs to ensure the integrity of the abatement work are allowable as well.</li> </ul>	<ul style="list-style-type: none"> <li>• Goal: Lead-safe renovation</li> <li>• Objective: Renovation of common high-risk components. Under this option, all chipping and peeling paint, as well as friction and impact surfaces were renovated.</li> <li>• Eligible costs include lead-safe renovation of surfaces identified as deteriorated or friction/impact surface, including windows, doors, porches, floors, and siding.</li> </ul>
<i>Lead Risk Assessments</i>	<ul style="list-style-type: none"> <li>• Required to define scope of work. Any lead hazard identified must be remediated.</li> <li>• Conducted by a state certified lead risk assessor</li> </ul>	<ul style="list-style-type: none"> <li>• Not required. Areas requiring lead-safe renovation are identified by visual assessment.</li> </ul>
<i>Property Eligibility</i>	<ul style="list-style-type: none"> <li>• Property constructed before 1978</li> <li>• Occupied or visited by MA/CHIP eligible children and/or pregnant women</li> <li>• Current on all property taxes</li> <li>• Property is properly insured</li> <li>• Lead poisoning not required for participation (EBLL or no EBLL)</li> </ul>	<ul style="list-style-type: none"> <li>• Property constructed before 1950</li> <li>• Occupied or visited regularly by low income families</li> <li>• For non-lead poisoned eligible individuals (no EBLL)</li> </ul>
<i>Workforce</i>	<ul style="list-style-type: none"> <li>• Everyone on the crew must:               <ul style="list-style-type: none"> <li>o Be certified by the state as either lead abatement workers or supervisors;</li> <li>o Have completed Lead Renovator and Lead Abatement Worker Training;</li> <li>o Be supervised by a Lead Abatement Supervisor; and,</li> <li>o Work for a certified lead company.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Work can be conducted by state certified lead-safe renovators or abatement crews.</li> <li>• Trained to work safely with lead hazards.</li> <li>• Lead-safe renovators must complete a one-day lead-safe renovator training initially and then refresher training periodically.</li> <li>• Any company working with pre-1978 housing must be certified as a lead company with DHS.</li> <li>• Only one person on team must have training rather than whole team.</li> </ul>
